Dear Commissioner,

After thoroughly reviewing the staff report, I am appalled by the blatant disregard for facts and the staff's unwarranted support for this application.

There is no local support for this proposal. The overwhelming majority of island residents stand firmly against it. I urge you to visit our unique piece of old

Florida—accessible only by private vessel—and speak directly with the community to fully understand the impact of your decision.

The applicant has no experience in this field, and the proposed system is neither functional nor a legitimate central sewer system. If approved, it will result in an ecological disaster. I am well-acquainted with such systems, and they fail under power outages and flooding conditions. Any commissioner who votes in favor will bear responsibility for the consequences.

Additionally, staff has overlooked the necessity and cost of easements. The applicant's other utility company has already unlawfully seized my property in two separate locations without permission, invitation, or legal due process. For years, he has profited illegally from my land without repercussions. Approving this sewer company will follow the same pattern, with the county being used as a tool to force compliance, just as was done with the water utility.

A vote in favor of this application is not a vote for responsible sewer management—it is a vote to enrich one individual at the expense of our island's integrity. Our community treasures its old Florida charm, and it deserves your protection. I urge you to vote for denial.

Thank you for your time and consideration.

Sincerely,

William J. Meyers
