

To Public Service Commission

June 17, 2025

CORRESPONDENCE  
6/25/2025  
DOCUMENT NO. 05229-2025

Regarding Docket #20250029-GU

I am writing to let you know I am totally against the proposed rate increase to take effect in January 2026 requested by TECO. It is a large increase that will increase the monthly bill for gas, especially during the cold weather season and that will make it really tough for seniors on fixed incomes.

I know that they have to build additional facilities due to so many people moving to Florida but that also means a much larger customer base that will provide them with a massive increase in profits generated by all those additional customers as they pay their bills every month. In time that will more than make up for the expense of building those additional facilities to service them.

Please reject their request for this large and unfair increase in rates. Many people are really hurting right now financially and we need some relief and some fairness to the public in making these decisions.

Thank You,  
Judith Festa 1363 Fort Lawn Loop, The Villages, Fl. 32162
