COMPLAINT INFORMATION

Complaint: Other Complaints against Florida Power & Light Company

Details:

Not a complaint per se, why allow FP&L to pursue increased use of solar and wind technologies and pass the cost of that decision on to consumers? Substantial information exists to show that solar and wind technologies currently are insufficient to meet growing needs. The fact that FP&L has invested so heavily into these techs while also retiring much of it's highly efficient fossil fuel generators represents rash and ill-considered decisions that should be a cost born by THEM alone, not the consumers.
