Subject: Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Chair Mike La Rosa,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,

Ms Keimaya Toombs

10619 Lake Montauk Dr Riverview, FL 33578-9510 toombs.fam@icloud.com

If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,

Mrs Casandra Juarez Vasquez

Subject: Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Chair Mike La Rosa,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on. Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents. The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis. I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,
Ms. Julia Colarossi

Subject: Proposed FPL rate hikes

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Hello Commissioners,

As a long-term resident of the State, I am contacting all of you in order to advise you NOT to approve the proposed rate hike for FPL since there are other cost savings options available that FPL needs to first take before any rate increases are considered and approved for infrastructure enhancements which are then passed along to ALL resident consumers many that are retirees currently living on fixed modest incomes struggling to meet their monthly budget needs. This is primarily due to high cost of living (for renters and homeowners) which is currently being incurred throughout the State with homeowner insurance premiums increasing by over 300% over the last 5 years with no financial relief occurring in sight and property taxes increasing annually as well. If these out-of-control living costs continue to spiral throughout the State, there will undoubtedly be a mass exodus of residents occurring that will have devastating adverse financial impact to the local economies of ALL Cities (some more than others) throughout the State.

Perhaps as an alternative FPL should consider charging impact fees to developers which are the ones that will primarily benefit from major development projects (residential and commercial) that occur so they can enhance their infrastructure and not just rely on funding solely provided by ALL residents throughout the State.

Thank you for your time.

Subject: Help!!!!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Good afternoon! You all need to help us fight, FP&L! My bill was \$361!!! I'm a family of 4 three bedroom two bath home. All appliances are new and eco-friendly. I have a brand new air conditioner. I have brand new window and doors and my bill went from last month 200 and something dollars skyrocketed an extra hundred dollars to \$361! I even have an ecobee thermostat that is locked and nobody in the family can touch but me so that nobody can make my bill go up by putting the AC colder it's programmed and I still have an enormous bill! This is unacceptable and we need your help! I just signed a petition on Nextdoor but I think emailing you can possibly do something. I'm praying!

Subject: FPL Rates

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner La Rosa, Good afternoon, I hope this message finds you well. I am writing as a concerned Florida resident regarding the potential increase in utility rates by Florida Power & Light (FPL). At a time when many Floridians are already dealing with rising living costs, an increase in electricity fares would place an even greater burden on households across the state. FPL provides a vital service, and while maintaining infrastructure and innovation is important, these goals must be balanced with the economic realities faced by residents. Many families are struggling to make ends meet, and utility costs are a major part of their monthly expenses. I respectfully urge you and the Public Service Commission to reject any proposed rate increases from FPL. Furthermore, I encourage the Commission to explore any possible opportunities for reducing rates or increasing affordability for customers, particularly for low- and middle-income families. Thank you for your time and your commitment to serving the people of Florida. I trust that you will act in the best interest of residents and ensure that utility rates remain fair and manageable. Sincerely,

E. Lanoli
