2540 Shumard Oak Boulevard
Tallahassee, Florida 32399-0850

Re: Docket No. 20250011-EI - Petition for rate increase by Florida Power & Light Company

Dear Mr. Teitzman:

This filing is being made via the Florida Public Service Commission's web-based electronic filing portal in six separate filings due to the voluminous size of Exhibit S filed with Citizens' Third Motion and Notice of Intent to Seek Official Recognition.

This filing is Exhibit S, **No. 4 of 6.**

Please note **Exhibit S has been divided into six (6) parts due to electronic filing requirements.**

If you have any questions or concerns, please do not hesitate to contact me. Thank you for your assistance in this matter.

Sincerely,

/s/ Walt Trierweiler
Walt Trierweiler

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Kathleen Patteson

Personally, because I am living on a fixed income, this affects me even more, so I have taken every step I can as a consumer to lower my costs. I've adjusted my thermostat, I've unplugged appliances, and I have purchased solar products, yet even with these sacrifices, my bills continue to rise, and this just isn't fair. The average Floridian cannot afford yet another increase. Enough is enough!

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Subject: Keep FPL Rates Down Docket #20250011

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

As a Florida Power & Light (FPL) customer, I strongly oppose the largest rate increase in U.S. History. This excessive hike would place an unfair burden on customers, especially low-income customers or older adults on fixed incomes who simply cannot afford to pay more.

With costs for housing, healthcare, and everyday essentials already high, the last thing I need is a higher electric utility bill. FPL is already a highly profitable company—asking customers to pay more just to boost corporate profits is completely unacceptable.

I urge you to reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

Sincerely,

Terry Prieto-Fingerhut

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Maria Ramos

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

As a low income senior the past couple of years have seen my SNAP benefits lowered and the price of food doubled. My water/trash bill has gone up. Now I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

The money I get from my medicare advantage plan does not adequately cover my utilities, and that money I use to pay my electric bill should be going to pay for food. The nearly $10 billion FPL is requesting in new charges over the next four years — will fall heavily on me EVERY MONTH.

I can't afford to lose any more weight. Since half of every dollar in this proposal would go straight to shareholder profits I find that unacceptable. I have not completely fixed my home since the last hurricane.

I don't use a lot of electricity. I should be able to afford it.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Nancy Rothman

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

They could save a lot of money by ending the advertising campaigns directed toward a captive audience.

Please do the public a service and just say NO.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Patti Schultz

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Sandra Smallwood

This request is so far outside the norm for dividends to shareholders that is is nothing more than a blatant effort to steal money from their customers. There are no facts that are legal that would make this sickening request valid. This utility is already one, if not the most, expensive electrical monopolies in the country and this demand shbiould receive the attention it deserves - total refusal.
The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Richard Szymanski

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Christina Viljoen

Dear Florida Public Service Commission,

I'm writing to demand that you REJECT Florida Power & Light Company's proposed rate increase (Docket No. 20250011). This is purely CORPORATE GREED!!!

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services, repairs Or strengthening the grid. That's UNACCEPTABLE!!!!!!

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms, battling the rising cost of living and dealing with increasing HEAT.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear " THIS IS MISLEADING". According to OPC, FPL's numbers are INFLATED — and rather than ask to raise rates, the company should be asking to ACTUALLY CUT RATES by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Nancy Weissman

Dear Florida Public Service Commission,

I'm writing to tell you to 'Reject' Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in New Charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to *Shareholder PROFITS*, and NOT essential services!! That's UNACCEPTABLE!!!! >:(

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year!!! THAT is insane!!! This latest plan would add another $360 in just two years – all while Floridians are 'still recovering from devastating storms' and battling the rising cost of living.

FPL CLAIMS the hike is needed to meet demand, but the Office of Public Counsel has made it CLEAR that this is misleading. According to OPC, FPL's numbers are 'inflated' — and rather than raise rates, the company should actually cut them by $620.5 million in 2026!

This is VERY concerning to me and I can only imagine how angry others must be about this. The Public Service Commission is charged with 'protecting' the public — 'NOT maximizing utility profits.' I stand firmly and URGE you to REJECT this rate hike and send a clear message that Floridians come first. Florida needs you NOW.
Sincerely,
Joan Wiersma
Bokeelia, FL

Subject: Keep FPL Rates Down Docket #20250011

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

As a Florida Power & Light (FPL) customer, I strongly oppose the largest rate increase in U.S. History. This excessive hike would place an unfair burden on customers, especially low-income customers or older adults on fixed incomes who simply cannot afford to pay more.

With costs for housing, healthcare, and everyday essentials already high, the last thing I need is a higher electric utility bill. FPL is already a highly profitable company—asking customers to pay more just to boost corporate profits is completely unacceptable.

I urge you to reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

Sincerely,

Donna Wohlfarth

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Christina Ziegler

Subject: Keep FPL Rates Down Docket #20250011

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

As a Florida Power & Light (FPL) customer, I strongly oppose the largest rate increase in U.S. History. This excessive hike would place an unfair burden on customers, especially low-income customers or older adults on fixed incomes who simply cannot afford to pay more.

With costs for housing, healthcare, and everyday essentials already high, the last thing I need is a higher electric utility bill. FPL is already a highly profitable company—asking customers to pay more just to boost corporate profits is completely unacceptable.

I urge you to reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

Sincerely,

Gloria Abrahams

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Matthew Breanahan

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

As a Florida Power & Light (FPL) customer, I strongly oppose the largest rate increase in U.S. History. Life is already expensive enough without the wage increases to match, so please reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

Sincerely,

Stephen Clements

CORRESPONDENCE
8/6/2025
DOCUMENT NO. 07521-2025

Dear FPSC Clerk Adam Teitzman:

I am a FL. homeowner who strongly favors reliable electricity. I **strongly urge your support to REJECT PSC Docket 20250011 by FP&L, Duke Energy, & TECO who have proposed a $9 billion rate hike for solar energy development.** FP&L, TECO, & Duke Energy believe it's best to support the FL Renewable Energy mandate from 2004. Alot has transpired since then, & continues each day, where refinements in other energy sectors such as nuclear power & biofuel power, now support phenomenal changes to a highly diverse energy array.

This proposal is not acceptable because of FP&L's overextension in solar power, not increasing low-cost energy alternatives (natural gas), not supporting FL's existing long-term economies & wise land use, and **not promoting a diversity of energy types**. The large space needed for this Docket proposal (192,000 acres) is beginning to infringe on Florida's longstanding cattle production, citrus farming, wildlife habitat, & crop production in the So. FL landscape. Solar farms will simply take up too much land space in the place of what appears as open landscape (ie., ag lands & wildlife habitat). Solar power generation in FL. is maximally efficient for **only 5.1 hrs** of the day (DOE Berkeley Natl Lab). And to the detriment of our State & National economy, solar power components are largely made in China & invariably this drives up my overall electric bill despite solar radiation being no cost. In the last 5 yrs., Europe & Australia have faced rolling "blackouts" due to an overreliance on solar power. Florida has very good potential for hosting Artificial Intelligence (AI) development with its current land area & a low business tax framework to attract this growing AI expansion. However, AI absolutely requires a highly dependable, 24-hr power grid which can only be met with **a rich & stable power diversity**. Hence, Florida's public power providers **should be working to diversify its array of power generation**. Thankfully, Pres. Trump has ordered a **reform of nuclear power permitting** that should be operational in the very near future. This reform and the refinement of small module (nuclear) reactors have fueled high hopes for expanded nuclear power development.

Duke Energy, TECO, & FP&L must be given a clear signal to redevelop a proposal that promotes nuclear & low-carbon emission, fuel sources for power development. This action would fulfill the PSC's own recommendations identified in the April 2025 Feasibility Report to advance Nuclear Power in FL. The 2024 Workshop on Nuclear Feasibility engaged numerous state & federal officials including those with technical expertise in nuclear power & it aligns well with Florida's energy policy (F.S. 377.602). Your leadership necessitates that public utilities & all FL utilities should be developing a more diverse power character with more natural gas plants built with US components and sources...all of which are cost efficient & American made.

I urge the PSC to REJECT this Docket proposal (20250011) outright with no compromise and to urge these public utilities of the need to redesign their proposal to develop more reliable and efficient, low-cost power diversity alternatives (ie., nuclear, natural gas) which will benefit FL businesses and current & future ratepayers.

Sincerely, Jack M Cooper

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
ELIZABETH CRUICKSHANK

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

Dear PSC PSC,

Adam Teitzman, Commission Clerk
Division of Commission Clerk and Administrative Services Florida Public Service Commission
2540 Shumard Oak Boulevard
Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost $9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,
Miss Liv Doura

Dear Florida Public Service Commissioners,

As a Florida Power & Light (FPL) customer, I strongly oppose the largest rate increase in U.S. History. This excessive hike would place an unfair burden on customers, especially low-income customers or older adults on fixed incomes who simply cannot afford to pay more.

With costs for housing, healthcare, and everyday essentials already high, the last thing I need is a higher electric utility bill. FPL is already a highly profitable company—asking customers to pay more just to boost corporate profits is completely unacceptable.

I urge you to reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

Dear Florida Public Service Commissioners,

FPL is spending excessive amounts of money buying property to expand there solar fields in Union county. Please stop the expansion of solar in the Union county Florida. There solar fields are negatively impacting our property values and forestry operations. They spent over 10.2 million dollars for two 500 acre properties paying 11 K an acre.This is a property with a large amount of wetlands that is not conducent to conversion to solar fields. We noticed unusual influxes of high temperatures with winds coming from direction of there existing large solar field. Please stop the conversion of agricultural property to solar fields by declining this record breaking utility fees increase.

Sincerely,

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

Thank you.

Regards,
Mr. Ian Forbes

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Evelyn Grosch

Subject: Keep FPL Rates Down Docket #20250011

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

As a Florida Power & Light (FPL) customer, I strongly oppose the largest rate increase in U.S. History. This excessive hike would place an unfair burden on customers, especially low-income customers or older adults on fixed incomes who simply cannot afford to pay more.

With costs for housing, healthcare, and everyday essentials already high, the last thing I need is a higher electric utility bill. FPL is already a highly profitable company—asking customers to pay more just to boost corporate profits is completely unacceptable.

I urge you to reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

Sincerely,

Suzie Humphrey

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Rosemarie Kimelman

Hollywood, FL

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Faye Nino

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Docket #20250151

We oppose the plan to spend 9 billion dollars of money from the Florida residents to build solar farms. Solar power has been proven as a stand alone power that is worthless because you can't store electricity unless you have a storage system. This is too costly as it harms birds and animals and it is an eyesore and creates a serious disposal problem in the end. Example, the site north of us is polluting the rivers because they clearcut and the runoff cannot be controlled. FPL has promised to fix the problem which will most likely be at our expense and is probably too large to worry about following construction requirements. Why are you doing

this to the residents of Florida? This is the problem when you allow companies to absorb their competitors. Don't do this!!

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Y Schwartz

RE: Docket No. 20250011 - FPL Rate Case / EV Charging Program

Dear Commissioners:

On February 28th, 2025, Florida Power & Light Company (FPL) submitted a petition for a permanent base rate increase that includes a request to make its utility-owned public electric vehicle (EV) charging program permanent. The Charge Ahead Partnership (CAP) respectfully submits the following comments opposing FPL's proposed continuation of its utility-owned, ratepayer-funded EV charging network.

CAP urges the Florida Public Service Commission ("FPSC" or "Commission") to reject this portion of the proposal. The continued expansion of FPL's public EV charging stations using ratepayer dollars distorts competitive markets, deters private investment, and shifts long-term costs and risks onto captive customers. Florida is already seeing healthy private sector growth in EV infrastructure deployment. There is no demonstrated need for monopolistic intervention-particularly in a service that is inherently competitive.

About Charge Ahead Partnership

Charge Ahead Partnership is a national coalition of businesses, organizations, and individuals committed to expanding EV charging access through competitive, market-based solutions. Our members include fuel marketers, convenience stores, restaurants, retailers, and other businesses that own or operate properties ideally suited for EV infrastructure. Many are already investing in EV chargers in Florida and across the country.

Our mission is to ensure that EV charging remains a dynamic and competitive marketplace - one in which infrastructure is developed efficiently, profitably, and in response to consumer demand. This vision requires fair market access, not a public utility leveraging guaranteed rate recovery to compete with private operators.

Comments on FPL's Proposed EV Charging Program

FPL's proposal to make its EV charging program permanent would further perpetuate the use of ratepayer funds to build, own, and operate public EV charging stations. This is a competitive service that should not be supported by the general body of ratepayers, many of whom may

never use these services. It would constitute a long-term transfer of wealth from all utility customers - including those who do not own EVs - to support services used by a select segment of the population.

Rate-basing competitive infrastructure has serious implications. First, it creates an unfair advantage for monopoly utilities over private competitors. Unlike FPL, private charging providers must raise capital, assume operating risk, respond to market forces, and recover costs directly from the user. By contrast, FPL's proposal would insulate it from market dynamics by ensuring cost recovery through regulated rates, regardless of station utilization or performance. As Grid Strategies has written:

> "Allowing monopoly utilities to own public EV charging stations will provide less efficient, lower-quality service and choice to EV owners, resulting in unfair cost shifting to other electricity consumers. Regulators should ban or disfavor utility ownership of charging stations."[1]

Second, FPL's use of a regulated charging rate - set at 35 cents per kilowatt-hour - poses a direct and unfair threat to the private EV charging market. Private providers must charge significantly more to cover equipment, maintenance, electricity, site leasing, and transaction costs. By offering a below-market rate subsidized by ratepayers, FPL undercuts private providers who operate without guaranteed cost recovery. This pricing distortion suppresses competition, discourages private investment, and signals to would-be market entrants that Florida prefers monopoly-controlled infrastructure over private-sector innovation.

Third, this model increases the risk of stranded assets. As EV charging technology and consumer behavior evolve rapidly, utility-owned charging stations could become obsolete before their costs are fully recovered. Utilities are not designed to respond quickly to changes in consumer demand, site utilization, or charging platform upgrades.

Fourth, publicly funded utility networks tend to suffer from inferior performance in terms of functionality and access to amenities. Independent studies in Maryland observed that despite generous ratepayer support, utility-owned chargers were frequently underutilized and failed to provide the amenities that drivers expect such as bathrooms and food vendors. In one survey, only 31% – 33% of utility-operated fast chargers were operational, compared to 99.6% uptime for privately-owned fast chargers.[2] These findings reinforce that utility ownership of charging stations often leads to underperforming charging experiences for EV drivers.

The Florida Market Is Competitive and Growing

Florida's EV charging market should not be dominated by monopoly electric utilities. EV adoption in Florida is rapidly growing with nearly 250,000 registered EVs in the state.[3] Additionally, Florida ranks third nationally in the number of publicly available EV charging

ports, with over 6,000 as of early 2024.[4] This network includes Level 2 and DC fast chargers, many of which are provided by private-sector companies that are deploying infrastructure in response to increasing demand. What is needed now is make-ready programs, favorable rate structures, and regulatory support for private businesses not a permanent expansion of utility-owned chargers.

Florida Law and National Trends Favor Market-Driven EV Infrastructure

Florida's current statutory framework, as amended by House Bill 1645 (2024), places restrictions on investor-owned utilities' ability to rate-base EV charging infrastructure. While earlier proposals like Senate Bill 920 sought to require utilities to use unregulated affiliates, HB 1645 did not go that far. However, it does limit cost recovery by requiring that utility EV infrastructure serve a grid benefit and disallows ratepayer recovery for charging stations that compete directly in the retail EV charging market. This reflects a policy direction that acknowledges the competitive nature of EV charging and aims to avoid cross-subsidization that could distort private investment.

Other states have adopted similar policies:

- In Maryland, the Commission issued Order No. 91297, requiring utilities to halt development of new utility-owned stations and to begin evaluating non-ratepayer funding options for existing chargers.[5]
- In South Carolina, Duke Energy's public EV charging program is being phased out. Operating and maintenance costs are now recovered exclusively through charging revenues, not general rates.[6]
- In Georgia, Charge Ahead Partnership supported the passage of Senate Bill 146 (2023), which ensured EV charging remains a deregulated retail service by specifying that entities selling electricity by the kWh for EV charging are no longer classified as utilities. This legislation limits utility ownership of charging stations to a narrowly defined "community charger" program, restricts ratepayer funding, and gives private providers the right of first refusal on proposed charger sites, safeguarding private investment and ensuring fair competition.[7]

These policy shifts recognize that utility monopolization of EV infrastructure is not sustainable, particularly as the private sector proves ready and able to meet growing demand.

The Appropriate Role of Utilities

This is not to say utilities have no role in EV infrastructure deployment. Utilities are well-positioned to manage make-ready infrastructure, upgrade distribution systems, and help facilitate interconnection for new chargers. These are appropriate monopoly functions tied to core grid services. However, EV charging services are different in that they are inherently competitive and not well suited for regulated monopoly control.

As a 2022 report from the Georgetown Climate Center and MJ Bradley concluded:

"The best use of utility involvement in EV infrastructure is to support investments that complement, not compete with, the private market. This includes make-ready infrastructure, time-of-use rates, and capacity upgrades-not direct ownership of retail-facing chargers."[8]

Conclusion

CAP urges the Commission to reject FPL's proposal to make its EV charging program permanent. Ratepayer-funded, utility-owned charging infrastructure poses long-term risks to both market fairness and financial accountability. Private investment is active and growing in Florida, making utility monopolization both unnecessary and harmful.

Instead, the Commission should continue to foster a level playing field where private providers can thrive and utilities are incentivized to support-not supplant-the competitive EV charging market. Thank you for the opportunity to submit these comments.

Sincerely,

/s/ Jay Smith

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost $9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL

is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,
Miss Brenna Strehle
12702 Bruce B Downs Blvd Tampa, FL 33612-4739 strehle.brenna@gmail.com

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Michael Wallace

Dear PSC PSC,

Adam Teitzman, Commission Clerk
Division of Commission Clerk and Administrative Services Florida Public Service Commission
2540 Shumard Oak Boulevard
Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost $9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,
Miss Baylee Bessingpas

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Jeanne Boyce-Taylor

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

The last rate increase we saw was due to rising natural gas costs. Natural gas costs have gone way down and as a result we should see a rate decrease, not an increase.

The added capacity is more likely due to demands from AI and data centers. Consumers and residents should not be paying for these increased costs, the people putting in the data centers should be absorbing 100% of it's costs. The data centers can then pass on the cost to those using their services. They should not be borne by residents who have no skin in the AI / Data Center game. If the cost go up to provide residential services, then i don't have a problem. But that is not what is going on here. Lower energy costs should not equate to higher rates.

Please stop putting these corporations ahead of Florida residents. FPL is more than able to shoulder these costs themselves.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Dan Brooks

Subject: Do NOT approve the the proposed FPL rate increase

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear sir/Madam;

As a long time resident in the state of Florida and an FPL consumer, I urge you to reject the $9.8 billion rate increase that FPL is asking for. It is excessive, it is not about reliability, it is not about infrastructure, it about raking in higher profits.

In its petition to the PSC, FPL says if its proposed rate increases are approved it will earn a return on equity of 11.9%. The national average is 9.5%. But what about the millions of FPL customers who are experiencing rising costs on all consumer products due to sky high tariffs and are already struggling to to put bread on the table? This increase will be an unjustifiable additional burden, and for many will be straw that broke the camel's back.

The Public Service Commission's mission is suppose to be to maintain the viability of utilities while protecting the public from the excesses that monopolies tend to crave. Members of the PSC do your job and protect us from the this profit hungry utility and reject the $9.8 billion rate increase.

Sincerely,

Turner Cathey

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011). My bill for July 2024 we used 2496 kwh and the bill was $360.00, in 2025 July usage was 2484 and the bill was $404.00 a $64.00 increase for 1 month. We cannot sustain $60 month increases in expenses.

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

Subject: Keep FPL Rates Down Docket #20250011

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

As a Florida Power & Light (FPL) customer, I strongly oppose the largest rate increase in U.S. History. This excessive hike would place an unfair burden on customers, especially low-income customers or older adults on fixed incomes who simply cannot afford to pay more.

With costs for housing, healthcare, and everyday essentials already high, the last thing I need is a higher electric utility bill. FPL is already a highly profitable company—asking customers to pay more just to boost corporate profits is completely unacceptable.

I urge you to reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

In 2023 alone, FPL generated over $20 billion in revenue. Now they want the customer to cover the cost of massive infrastructure projects, solar expansions, executive bonuses, and battery storage, while they remain a protected monopoly with no competition.

They are asking for more from us while already giving us less.This isn't about clean energy. This is corporate greed dressed up as "green innovation."
FPL dosnt have the customers best interest in mind. They have the stock holders best intrest in mind.They force us to pay them or they cut off power for the littlest of things. They have "Accidentally" turned off my power then taking 24 hours ,after being on the phone with them for a long time, to fix their mistakes. I would not use them, as my power company, if I had a choice. But alas I do not have a choice they have a monopoly, and like the gangster of the 1920's I must pay them or else. And they can up my cost at their whim. I find what they do as a company very imoral and evil. If I had my will they would be shut down and broken into multiple competitive companies allowing for the consumer to choose who to use. FPL customer service in non existence they are bullies who don't care. They treat us like scum knowing they alone hold the power and there is nothing we can do. You as the committee have the duty and obligation to block FPLs request for a hike in cost. You the committee must listen and protect the people you represent. Stop FPL protect us Floridaians keep Florida free.

I implore you not to approve a rate hike for Florida Power And Light. They used to be one of the lower priced companies in Florida. I checked around our area with JEA and Jax Beach/beaches and FPL is now more expensive per kWh . They are spending huge sums of money on Green energy which is not efficient or cost-effective. They need to be forced to use other sources of energy which are cost-effective for the citizens of Florida and lower, not increase their pricing. Please see the report by Dave Walsh for details.

Thank you,
Lynn Gray

To whom it may concern,

Unless Florida Power and Light can explain to the consumer why a utility company making over $4 Billion annually for its shareholders needs to increase their rates; put me down as opposed.
This message also serves as a gentle reminder that your agency exists to serve the public and not the utility companies.

That is all,

Comments:

I strongly urge you to reject Florida Power and Light's proposal for yet another rate hike. Since our local utlity in NWFL switched to FPL, the cost of energy has skyrocketed without appreciable improvement in service. We continue to have energy fluctuation and the lines are poorly maintained in my area. By increasing their rates, the average consumer stands to lose much more than we gain. Please, if you're willing to listen to reason, reject the hike of prices when all of our belts are as tight as they can go.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

To anyone concerned,
As a paying utility customer, I see absolutely no need for FPL to receive any increases showing what their profits have been and the S&P index at 12% +. Everywhere you look is Solar panels for miles and miles. We as customers have NO benefit from those. So, waste of money. There isn't NO reason as I have researched for them to make customers pay more than they pay now. Our Senior Citizens just CAN NOT afford it.

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Joanna Masi

This needs to stop. There is absolutely NO REASON to raise rates. These utility companies boast about their profits while the elderly cannot afford their electric. Between lot rents and utility hikes you will have a much larger homeless situation for us over 70 years old. I already set my thermostat at 80 degrees in a 1200 Sq ft home and my bill is over 300.00 a month. Stop the nonsense and greed.

Subject: FP&L Docket 20250011-EI

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

I am a Native Floridian of Palm Beach County. I am a widow with 2 children, 1 child diagnosed with Diabetes 2 years ago and has medical needs, in addition, I am also a Real Estate Professional. The Real Estate market has been less than desirable and unable to make a living over the last 2 years; therefore, I have been looking for employment since December 2024, to no avail. Over the years my FP&L bill , even through the summer months and August especially, at it's highest has stayed around $300.00, last year it was around $350.00, ok, I accepted it was a little more due to unbelievable inflation we have had over the last 4 years. Let me say, I keep my A/C at 77-78 degrees; Recently, over the last 2 months, I have been paying $400.00 and I just received a bill for $500.00, we are not even through August (the hottest month of the year) yet! I am terrified at what my bill will be at the end of August. I can not even wrap my head around a $500.00 bill, I am still in shock. I have NEVER paid a $400.00 electric bill, yet a $500.00 bill!

I am not willing to take another rate hike to pay for AI or Electric Vehicle Stations/Electric Car Owners Charging their cars.

How is this happening? This is not sustainable. Everywhere I turn the Insurance Companies, Auto Insurance Companies, Home Owner's I pay $7,000 a year (doubled) for Homeowners Insurance, the Auto Insurance company is charging me for my daughter who is not driving, they are forcing me to pay $1,000 additional for her, are getting in my pocket. How do these companies have so much control? Who has given it to them that they feel they can dictate/force us, the consumer, to pay and come up with excuses to increase the premium and how much we pay?

FP&L is asking for a rate increase? After my bill being $500.00, they have to be joking. Someone has to step up for the people and get these costs down, further deny the rate increase FP&L is asking for. Somehow, FP&L seems to get their way and the Office of Public Council gets defeated. These prices are unprecedented and NOT acceptable. I am not the only person out of work, and struggling in Florida, there are many of us that don't show up on the unemployment stats, we have businesses and are looking for jobs and others that have fallen off of the unemployment.

Kind Regards,

Julie Montesano

Subject: Keep FPL Rates Down Docket #20250011

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

As a Florida Power & Light (FPL) customer, I strongly oppose the largest rate increase in U.S. History. This excessive hike would place an unfair burden on customers, especially low-income customers or older adults on fixed incomes who simply cannot afford to pay more.

With costs for housing, healthcare, and everyday essentials already high, the last thing I need is a higher electric utility bill. FPL is already a highly profitable company—asking customers to pay more just to boost corporate profits is completely unacceptable.

I urge you to reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

Sincerely,

J P

I read that FPL is requesting yet ANOTHER rate increase. The answer should be NO! FPL is an unreliable power company, we are experiencing frequent unexplained, hours long outages. We never had that issue with Gulf Power.

The CEO makes double digit millions! Enough is enough!

I've never been more dissatisfied with a power company, and I've live in multiple states. FPL is garbage.

Response requested? yes
Comments:

I am writing as a resident of Sarasota County with the request that you deny FPL's proposed rate hike, which would primarily benefit its stakeholders and would significantly harm Florida residents, especially those living on a fixed income who cannot afford the proposed rate hikes. FPL is operating at a profit with a projected revenue surplus and has the funds to make necessary infrastructure changes. Nonetheless, its stakeholders want to increase its investor return to 11.9%, well above the national industry average. Does Florida want the dubious distinction of approving the largest rate hike in US history? There is no credible reason to approve this hike. Electricity is not optional for residents, and I know people in my community who would have to choose

between increased FPL fees and medical expenses. Please do not buckle under the pressure of greedy stockholders and support Florida's most important stakeholders, its residents. Thank you, Dr. Thompson

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Whitney Watters

something seems terribly wrong with fpl oversight. I feel as though the oversight is lacking for this corporation. Also, as a side note, It's funny there's advertisement for a company that has no competition. maybe we need some more dumb radical Democrats kicking up dust if the Republican party can't maintain integrity on their own..... I can't believe there's words just came out my mouth but it's the truth. As much as I hate to admit it a one-party system doesn't cut it. Kind of like a company without competition.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

As a Florida Power & Light (FPL) customer, I strongly oppose the largest rate increase in U.S. History. This excessive hike would place an unfair burden on customers, especially low-income customers or older adults on fixed incomes who simply cannot afford to pay more.

With costs for housing, healthcare, and everyday essentials already high, the last thing I need is a higher electric utility bill. FPL is already a highly profitable company—asking customers to pay more just to boost corporate profits is completely unacceptable.

I urge you to reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission PSC,

My name is [NAME], and I am a resident of [COUNTY NAME]. As a member of Florida Rising and a Florida Power & Light customer, I strongly oppose the rate increase request of almost $10 billion — the largest in US history. This unjust and excessive increase would further cause everyday Floridians, especially Black and Brown communities, to fall deeper into a burden caused by the high costs of living currently.

During the public service hearings, we witnessed firsthand how real Floridians are currently struggling to pay their bills, rent, groceries, and medications. Community organizations are standing up against corporate greed and revealing the conditions that everyday Florida residents are currently experiencing.

The PSC should prioritize consumers by ensuring fair and affordable utility rates. I urge the Public Service Commission to reject this massive rate hike and stand by Floridians and not for-profit corporations. We need affordable and clean energy.

Sincerely,
Mr. Tony Forsyth

FPL rate increase request

Message
Since we installed our solar roof 4 years ago the Commission approval of FPL rate increases have resulted in our "minimum" monthly bill increasing from under $11.00/month to now just over $27.00/month. this increase allows FPL to retain, by their own admission, an 11+% to their investors. The additional increase request should be "denied". They should be kept from building any more solar fields (which are detrimental to the environment) and encouraged got build nuclear power plants.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

As a Florida Power & Light (FPL) customer, I strongly oppose the largest rate increase in U.S. History. This excessive hike would place an unfair burden on customers, especially low-income customers or older adults on fixed incomes who simply cannot afford to pay more.

With costs for housing, healthcare, and everyday essentials already high, the last thing I need is a higher electric utility bill. FPL is already a highly profitable company—asking customers to pay more just to boost corporate profits is completely unacceptable.

I urge you to reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

Sincerely,

Deborah G

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Larry Jett

Dear Clerk of public Service Commission

I am a life long Floridian. I am one of the millions of FLORIDIANS for abundant, reliable 24/7, low cost & low footprint electricity, **I strongly urge you to reject PSC Docket 20250011, FP& L's proposed $9 billion rate hike.** My position is based on multiple good reasons including maintaining low-cost energy, maintaining a reliable availability of power, **promoting a diversity of energy**, promoting wise land use, & ensuring an attractive business environment for smart growth.

In the last 3 years, I've been amazed to learn about numerous misguided energy production ventures where many have been well-intentioned but they, like the FP&L request, have numerous shortcomings. The common thread in these misguided exploits is they consist of Green or Renewable energy examples. These examples include wind & solar developments & they're bad because of where they've been placed or proposed & their implementation scale. For example, 3-4 offshore wind turbine projects have been placed in New England coastal waters where during construction these ventures

were found to severely adversely impact the most endangered mammal in N. America, the Atlantic right whale as well as numerous other marine mammals. That's only the start, as New Englanders have found their energy bills have now doubled & when combined with impacts to commercial fisheries activities, things only got worse (seafood costs rose). FP&L, Duke Energy, & TECO are now travelling the same unwise path & are promoting solar energy which is obviously going to cost FLORIDIANS ($9B) as evidenced in this Docket proposal.

FP&L has been inappropriately promoting solar power despite it'slimitations and inherent shortcomings. This Docket proposal wouldtake place over 10 yrs & requires 192,000 acres of surface land area, largely in So. Florida. This type of power generation is maximally efficient for **only 5.2 hrs** of the day (DOE Berkeley Natl Lab) & this is tops with the best weather conditions. Further, this Docket strategy requires both solar & battery storage (BESS) components which require import products- lithum batteries namely from Chinese supply sources or Chinese sub-vendor countries. Also, numerous sources-Reuters, other news sources, & govt. sources (DOE Sandia Lab 2017) have revealed the presence of control sensors embedded within solar panels, power transformers, & inverters of Chinese origin…all vital components of this energy Docket proposal. Building this type of solar & BESS capacity **has caused rates to rise** in areas where power diversity is limited and solar is the mainstay. Over the last 5 yrs. in western Europe, Spain, & Australia, there have been many rolling "blackouts" that have occurred due to an overreliance on solar power and where the power grid has been unwisely configured with minimal power diversity.

This proposal is not acceptable because of FP&L's unwise history in solar power development, a need to maintain FL's existing long-term economies, and a need for future smart development. The land space needed for this Docket proposal (ie., 192,000 acres) will in time infringe on Florida's longstanding cattle production, citrus farming, wildlife habitat, & crop production in the So. FL landscape. Solar farms will simply take up too much land space. Florida has good potential for hosting Artificial Intelligence (AI) development with its current land area & a low business tax framework to attract this growing AI expansion. However, AI absolutely requires a highly dependable 24-hr power grid which could be met with a rich power diversity. Hence, Florida's power providers should be working to diversify its array of power generation. Thankfully, Pres. Trump has ordered a full reform of nuclear power permitting that should be operational in a couple of years. This reform and the refinement of small module (nuclear) reactors have fueled high hopes for a new era of nuclear power development that Duke Energy & FP&L should partake in. Further, FL utilities should be developing a more diverse power character with more natural gas proposals built with US components & sources ..all of which are cost efficient & American made.

Thus, **I strongly urge you to REJECT this Docket proposal** as this action should alternatively lead to a more reliable and abundant,low-cost power diversity that will benefit FL businesses and current & future FP&L ratepayers. Sincerely

Stuart

To whom it may concern,

I am looking for clarification on why a request from FPL to raise rates is even being entertained?

For the full year 2024, Florida Power & Light Company (FPL) reported a net income on a GAAP basis of $4.543 billion.

That is Billion with a "B". How much profit is enough to not raise rates year after year? That $4.543 BILLION is after all expenses. That is profit. At what point does the good of the people outweigh the greed and political contributions?

Thanks,

Jason

Dear Florida Public Service Commission PSC,

My name is Sally Philips, and I am a resident of Miami-Dade County. As a Florida Power & Light customer, I strongly oppose the rate increase request of almost $10 billion — the largest in US history. This unjust and excessive increase would further cause everyday Floridians, especially Black, Brown, and fixed-income communities, to fall deeper into the difficulties caused by the current high costs of living.

During the public service hearings, we witnessed firsthand how real Floridians are currently struggling to pay their bills, rent, groceries, and medications. Community organizations are standing up against corporate greed and revealing the conditions that everyday Florida residents are currently experiencing.

What benefits to the consumer has FP&L provided since the last rate increase? What justifications have FP&L offered for this proposed increase? Have they made any significant improvements, are they running any more efficiently, are there fewer interruptions of service? Do they anticipate significant increases in operating costs? Are they planning to lower their carbon imprint significantly? What significant benefits to the public will FP&L be providing with this proposed increase? How much of this proposed increase have they ear-marked as campaign contributions to politicians who support corporate profit rather than the welfare of people and the planet.

The PSC should prioritize consumers by ensuring fair and affordable utility rates. I urge the Public Service Commission to reject this massive rate hike and stand by Floridians and not for-profit corporations. We need affordable and clean energy.

Sincerely,
Dr. Sally Philips

Just a few questions regarding the large rate increase being requested by FPL. Rate changes tremendously affect the residents who are already struggling with housing costs, energy, food and other expenses. Now if approved this rate increase will hurt residents already struggling.

Why are you allowing monopoly utilities to destroy affordable power?

Will you support banning campaign donations from regulated utilities?

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly $10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than $400 a year. This latest plan would add another $360 in just two years – all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by $620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Nicole Prescott

Is it true that FL&L is asking for the biggest rate hike in U.S. history for Florida? Why is this happening? Solar power may be more profitable for FL&P but it doesn't extend any savings for us, the consumers. My personal experience since FL&P took over from Gulf Power has been increase in cost not savings or even similar capital outlay.
What ever happened to the goal of looking out for the Floridian. It is no wonder why we are going backwards and people are leaving this state. Between utilities, insurance and abundant waste in government mismanagement by our officials we are losing on every front. Don't sell us out! Eric Reitman Pensacola, Florida

Dear Florida Public Service Commission PSC,

As a member of Florida Rising I strongly oppose the rate increase request of almost $10 billion — the largest in US history. This unjust and excessive increase would further cause everyday Floridians, especially Black and Brown communities, to fall deeper into a burden caused by the high costs of living currently.

During the public service hearings, we witnessed firsthand how real Floridians are currently struggling to pay their bills, rent, groceries, and medications. Community organizations are standing up against corporate greed and revealing the conditions that everyday Florida residents are currently experiencing.

The PSC should prioritize consumers by ensuring fair and affordable utility rates. I urge the Public Service Commission to reject this massive rate hike and stand by Floridians and not for-profit corporations. We need affordable and clean energy.

Sincerely,
Ms. Katina Rentas

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011). THIS PROPOSED RATE INCREASE IS PREPOSTEROUS !! THE RATE INCREASE IS NOT TO MEET "DEMANDS of US CUSTOMERS". IT IS TO MEET THE DEMANDS FOR EXECUTIVES AND SHAREHOLDERS GREED. $$$$$

AS IT IS, MY HUSBAND AND I CRINGE EVERY MONTH WHEN WE OPEN THE BILL.

HOPING AND PRAYING THAT YOU WILL REJECT THIS INCREASE !!!

THANK YOU !!!!

To whom it may concern,
I have a professional and residential relationship with FPL. Their customer service and responsiveness are exemplary in all aspects of the interactions I have with them.

However, rate increases are happening across the board in everything from groceries to power. Given their continued growth over the last few years coupled with their over $4billion in profits, I would ask that they tighten their belts before consumers have to decide between power or food. It's time this company worry more about their consumers financial wellbeing than that of their shareholders.

In closing, I would be against further rate increases, especially residential.
