Subject: FPL doesn't represent me – Docket #20250011

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

As a Florida resident and consumer, I know the value of my hard-earned money. I also know that the power and light I pay for every month is a lifesaver, especially during these extreme heat waves that are becoming all too common.

Florida Power & Light (FPL) wants to raise my rates by hundreds a year and make working residents like me foot the bill for their profits and executive bonuses. Reporting has shown that 50 cents of every dollar is going to profit, not keeping the power on.

Additionally, from March 2024 to February 2025, FPL shut off 1.216 M residential customers for non-payment — about a fifth of all their residential customers.

Florida families and small business owners make up the overwhelming majority of FPL's customers—we keep their business running. Now FPL has the audacity to say they "represent us" while excluding us from their backdoor negotiations with corporate buddies like Walmart and Publix.

The Office of Public Counsel—the watchdog for consumers—submitted expert testimony showing FPL is inflating the numbers and should cut rates by \$620 million, not raise them.

I urge you to reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

Dear Commissioner Fay:

I have previously written you about the unneeded consequences of passing FPL's proposed rate increase in Docket #20250011. As a 30-yr. resident & 25-yr homeowner, I strongly urge you to vote NO this week for this proposal.

-

This proposal is not acceptable because of FPL's overextension in solar power & FLP isn't increasing low-cost energy alternatives (natural gas), nor are they supporting FL's existing long-term economies and wise land use, and they are not promoting a diversity of energy types. The large space needed for this proposal continues to infringe on Florida's cattle production, citrus farming, wildlife habitat, & crop production in the FL landscape. Solar power generation in FL is maximally efficient FOR ONLY 5.1 hrs of the day (DOE Berkeley Natl Lab). And to the detriment of our State & National economy, solar power components are largely made in China & this invariably drives up my overall electric bill. In the last 5 yrs., Europe and Australia have faced rolling "blackouts" due to an overreliance on solar power.

Duke Energy, TECO, and FP&L must be given a clear signal to redevelop a proposal that promotes nuclear & low-carbon emission, fuel sources for power development. This action would fulfill the PSC's own recommendations identified in the April 2025 Feasibility Report to advance Nuclear Power in FL. The 2024 Workshop on Nuclear Feasibility engaged numerous state & federal officials including those with technical expertise in nuclear power and it aligns well with Florida's energy policy (F.S. 377.602 efficient and American made).

Thus, I urge your support to REJECT this Docket proposal (20250011) outright with no compromise and to urge these public utilities to redesign their proposal to develop more reliable and abundant, low-cost power diversity alternatives which will benefit FL businesses and current & future ratepayers.

Sincerely,
Ben Nottingham, Jr.
