Since the Sept. 15 meeting, fortunately we've had no more issues with sewage leaks at my building. However, we've had yet another water-line break affecting residents on Palm View Ct. If the utility cannot guarantee just the basic adequate service after already having been approved for a doubling of water and sewage rates earlier this year, how can we EVER expect them to meet future demand esp. from all the housing envisioned to be built here? Again, the commissioners need to tell the utility NO. They DON'T qualify for a staff-assisted rate case and they NEED to deliver on the basic water and sewer services to their existing customers before they should even THINK of asking for higher rates. Thank you. Dan Hart, resident at 187 Palm View Ct.
