Good Afternoon,

Please let me know how this group approves rate hikes that negatively affect the normal electric consumer. I mean increasing by 40 dollars in two years is a huge impact. Already dealing with prices hikes for everyday goods.(food, clothing, etc.) Now this group consistently approves rate hikes to the detriment of the normal tax payer. Are we even thinking about the economy and the state of the of the economy in Hillsborough county? This needs to be thought about or rate hikes need to be leveled out to decrease the hit to us. More and more people are going to cut the cord and go to solar panels as they will not be able to afford all these rate hikes.

Regards,

Christopher Wiley

Rate hikes over the last years

- **January 2025:** A base rate increase was approved, adding an estimated \$15 per month for the average residential customer.
- **March 2025:** An additional increase of \$20 to \$25 per month was approved to help TECO recover storm-related costs.

Good Evening,

I read an article stating that TECO has requested yet again to hike their rates. I implore you not to consider this! I am a single mother trying to survive. My TECO bill is more expensive then my monthly car payment!! It's criminal how much TECO is charging families and we have no alternative companies we can use. I can't afford my bill already, let alone another hike. PLEASE DO NOT LET THIS HAPPEN! Enough is enough.

To Whom It May Concern,

I have heard that TECO has submitted a request to temporarily increase rates for customers for storm coverage and infrastructure upgrades. While I understand that with these instances, money has to come from somewhere, but this company has been ripping money from our pockets over the past two years. The amount of rate increases that have been approved recently has jumped our bill from \$400 to almost \$650 a month. The only thing that has changed is that we have put our thermostat at a higher temperature and installed a more energy efficient pool pump. These should have the opposite effect and actually decrease our electric bill. We cannot keep allowing this company to increase rates. Please, please vote no and let them see they can't keep getting away with this. Hillsborough county is one of the largest and most expensive counties to live in, they have plenty of money for these fixes if they would stop putting millions of dollars into an office building with a gym and pickleball court.

Sincerely,
Tiffany Ryan
A frustrated TECO customer

COMPLAINT INFORMATION

Complaint: Other Complaints against Tampa Electric Company

Details:

the rate hike is placing a higher burden on an already struggling public . the profit margins of the electric company are well within the black and there is zero need for a rate hike . this is a monopoly and usery

Do you thieves and your boy DeSantis over say no to raising rates. How much kick back do you thieves get? A 939 per year raise per household since 2020. Way to watch out for customers but as long as you and the lying governor get a good payoff who cares about customers. Of course you won't answer.
