Power company increases

**Message**  
Every company has up and down years in profit. While it's great to be up every year by 15% your customers should determine that not the government. Every time power companies want an increase it's approved. Duke energy made 23 billion in profit this year and the year they are using for the increase they still made 19 billion in profit. Being forced to use a specific power company is nothing short of a monopoly. Open the market please. Let the people choose their provider so costs will come down.
