I certify that I am the responsible accounting officer of Florida Public Utilities Company;

that I have examined the following report; that to the best of my knowledge, information, and belief, all statements of fact contained in the said report are true and the said report is a correct statement of the business and affairs of the abovenamed respondent in respect to each and every matter set forth therein during the period from January 1, 2009 to December 31, 2009, inclusive.

I also certify that all affiliated transfer prices and affiliated cost allocations were determined consistent with the methods reported to this Commission on the appropriate forms included in this report.

I am aware that Section 837.06, Florida Statutes, provides:

Whoever knowingly makes a false statement in writing

performance of his official duty shall be guilty of a misdemeanor of the second degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

Independent Auditors' Report

To the Boards of Directors Chesapeake Utilities Corporation and Florida Public Utilities Company

We have audited the balance sheet of Florida Public Utilities Company as of December 31, 2009, and the accompanying statements of income and the statement of retained earnings included on pages 6 through 11T (excluding additional information on page 8A – Electric, Gas and Other Utility Divisions) of the accompanying Annual Report of Natural Gas Utilities, as filed with the Florida Public Service Commission. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. The financial statements for Florida Public Utilities Company as of December 31, 2008 and for the year then ended were audited by other auditors whose report dated May 27, 2009, expressed an unqualified opinion on those statements.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described in Note A, these financial statements were prepared in accordance with the accounting requirements of the Florida Public Service Commission, which is substantially equivalent to the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

In our opinion, the 2009 financial statements referred to above present fairly, in all material respects, the financial position of Florida Public Utilities Company as of December 31, 2009 and the results of its operations for the year then ended, in accordance with accounting requirements of the Florida Public Service Commission, which are substantially equivalent to the accounting requirements of the Federal Energy Regulatory Commission as set forth in the applicable Uniform System of Accounts and published accounting releases.

This report is intended solely for the information and use of the boards of directors and management of Chesapeake Utilities Corporation and Florida Public Utilities and for filing with the Florida Public Service Commission and should not be used for any other purpose.

SECURITY HOLDERS AND VOTING POWERS

1. Give the names and addresses of the 10 security holders of the respondents who, at the date of the latest closing of the stock book or compilation of the list of stockholders of the respondent, prior to the end of the year, had the highest voting powers in the respondent, and state the number of votes which each would have had the right to cast on that date if a meeting were in order. If any such holder held in trust, give in a footnote the known particulars of the trust (whether voting trust, etc.) duration of the trust, and principal holders of beneficiary interests in the trust. If the stock book was not closed or a list of stockholders was not complied within one year prior to the end of the year, or if since the previous compilation of a list of stockholders, some other class of security has become vested with voting rights, then show such 10 security holders as of the close of the year. Arrange the names of the security holders in the order of voting power, commencing with the highest. Show in column (a) the titles of officers and directors included in such list of 10 security holders.

2. If any security other than stock carries voting rights, explain in a supplemental statement of circumstances whereby such security became vested with voting rights and give others important particulars (details) concerning the voting rights of such security. State whether voting rights are actual or contingent if contingent, describe the contingency.

3. If any class or issue of security has any special privileges in the election of directors, trustees or managers, or in the determination of corporate action by any method, explain briefly in a footnote.

4. Furnish particulars (details) concerning any options, warrants, or rights outstanding at the end of the year for others to purchase securities of the respondent or any securities or other assets owned by the respondent, including prices, expiration dates, and other material information relating to exercise of the options, warrants, or rights. Specify the amount of such securities or assets so entitled to be purchased by any officer, director, associated company, or any of the ten largest security holders.

IMPORTANT CHANGES DURING THE YEAR

Give particulars (details) concerning the matters indicated below. Make the statements explicit and precise, and number them in accordance with the inquires. Each inquiry should be answered. Enter "none" "not applicable," or "NA" where applicable. If information which answers an inquiry is given elsewhere in the report, make a reference to the schedule in which it appears.

 Acquisition of ownership in other companies by reorganization, merger, or consolidation with other companies; Give name of companies involved, particulars concerning the transactions.

2. Purchase or sale of an operating unit or system: Give brief description of the property, and of the transactions relating thereto, and reference to Commission authorization, if any was required.

 Important extension or reduction of transmission or distribution system: State territory added or relinquished and date operations began or ceased also the approximate number of customers added or lost and approximate annual revenues of each class of service.
 State briefly the status of any materially important legal proceedings pending at the end of the year, and the results of any such proceedings culminated during the year.
 State briefly the status of any materially important transactions of the respondent not disclosed elsewhere in this report in which an officer, director, security holder, voting trustee, associated company or known associate of any of these persons was a party or in which any such person had a material interest.

1 Florida Public Utilities Company was acquired by Chesapeake Utilities Corporation on October 28, 2009.

STATEMENT OF RETAINED EARNINGS

Report all changes in appropriated retained earnings, and unappropriated retained earnings for the year.

2. Each credit and debit during the year should be identified as to the retained earnings account in which recorded (Accounts 433, 436-439 inclusive). Show the contra primary

account affected in column (b). 3. State the purpose and amount for each reservation or

appropriation of retained earnings.

4. List first Account 439, Adjustments to Retained Earnings, reflecting adjustments to the opening balance of retained earnings. Follow by credit, then debit items, in that order.

 Show dividends for each class and series of capital stock.
 Show separately the state and federal income tax effect of items shown in account 439, Adjustments to Retained Earnings.

7. Explain in a footnote the basis for determining the amount reserved or appropriated. If such reservations or appropriation is to be recurrent, state the number and annual amounts to be reserved or appropriated as well as the totals eventually to be accumulated.

8. If any notes appearing in the report to stockholders are applicable to this statement attach them at page 11.

For the Year Ended

December 31, 2009

NOTES TO THE FINANCIAL STATEMENTS ON A CONSOLIDATED BASIS

1. Use the space below for important notes regarding the Balance Sheet, Statement of Income for the year, Statement of Retained Earnings for the year, and Statement of Changes in Financial Position, or any account thereof. Classify the notes according to each basic statement, providing a subheading for each statement except where a note is applicable to more than one statement.

 Pumish particulars (details) as to any significant contingent assets or liabilities existing at end of year, including a brief explanation of any action initiated by the Internal Revenue Service involving possible assessment of additional income taxes of material amount, or of a claim for refund of income taxes of a material amount initiated by the utility. Give also a brief explanation of any dividends in arrears on cumulative preferred stock.
 For Account 116, Utility Plant Adjustments, explain the origin of such amount, debits and credits during the year, and

plan of disposition contemplated, giving references to Commission orders or other authorizations respecting classification of amounts as plant adjustments and requirements as to disposition thereof. 4. Where Accounts 189, Unamortized Loss on Reacquired Debt, and 257, Unamortized Gain on Reacquired Debt, are not used, give an explanation, providing the rate treatment given these items. See General Instruction 17 of the Uniform System of Accounts.

5. Give a concise explanation of any retained earnings restrictions and state the amount of retained earnings affected by such restrictions.

6. If the notes to financial statements relating to the respondent company appearing in the annual report to the stockholders are applicable and furnish the data required by instructions above and on pages 8-10, such notes may be attached hereto.

See Attached Notes to the Financial Statements Supplements.

Notes to the Financial Statements

A. SUMMARY OF ACCOUNTING POLICIES

Nature of Business

Florida Public Utilities Company ("we," "us," "our," "FPU" or the "Company") is an operating public utility engaged principally in the purchase, transmission, distribution and sale of electricity and in the purchase, transmission, distribution, sale and transportation of natural gas. We are subject to the jurisdiction of the Florida Public Service Commission ("FPSC") with respect to our natural gas and electric operations. The suppliers of electric power to the Northwest Florida division and of natural gas to the natural gas divisions are subject to the jurisdiction of the Federal Energy Regulatory Commission ("FERC"). The Northeast Florida division is supplied most of its electric power by a municipality which is exempt from FERC and FPSC regulation. We also distribute propane gas through a non-regulated subsidiary.

On October 28, 2009, we merged with Chesapeake Utilities Corporation ("Chesapeake"), pursuant to which FPU became a wholly-owned subsidiary of Chesapeake. The Company's accompanying Statement of Income is presented for the entire year-ended December 31, 2009, rather than from January 1, 2009 to the date of the merger.

Basis of Presentation

The financial statements include the accounts of Florida Public Utilities Company and its wholly owned nonregulated subsidiary accounted for under the equity method of accounting. All significant intercompany balances and transactions have been eliminated. Under the equity method of accounting, our non-regulated subsidiary's accounts are not reflected within our balance sheet and statement of income, however, the Company's share of earnings and loses are reflected in the aggregate as equity in earnings of subsidiary companies in the accompanying statements of income and the Company's carrying value of its non-regulated subsidiary is reflected in the Company's balance sheet. Where applicable the accompanying notes to the financial statements include amounts on a consolidated basis, inclusive of amounts and balances of our non-regulated subsidiary.

System of Accounts

Our financial statements are prepared in conformity with the accounting requirements of the FERC as set forth in the applicable Uniform System of Accounts and published accounting releases, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America ("GAAP"). We also maintain our accounts in accordance with recognized policies prescribed by the FPSC. The accounting requirements of the FERC are consistent with GAAP, except for:

- Lack of reclassifications of certain negative balances on the balance sheets as required by GAAP;
- The presentation of deferred income tax assets and liabilities separately rather than as a single amount as required by GAAP;
- The omission of the statement of cash flows for the current and prior year as required by GAAP;
- The omission of the statement of retained earnings for the prior year for a comparative presentation as required by GAAP;
- The presentation of positive acquisition adjustments in Account 114, which are included in the plant assets on the balance sheets, rather than as a regulatory asset or goodwill in accordance with GAAP; and
- The presentation of costs of removal in Account 108, which is included in accumulated depreciation on the balance sheets, rather than as a liability as required by GAAP.

- The presentation of costs of removal in Account 108, which is included in accumulated depreciation on the balance sheets, rather than as a liability as required by GAAP.

Property, Plant, Equipment and Depreciation

Property, plant and equipment is stated at original cost. Costs include direct labor, materials and third-party construction contractor costs, allowance for capitalized interest and certain indirect costs related to equipment and employees engaged in construction. The costs of repairs and minor replacements are charged against income as incurred, and the costs of major renewals and betterments are capitalized. The provision for depreciation is computed using the straight-line method at rates that amortize the unrecovered cost of depreciable property over the estimated remaining useful life of the asset. Depreciation and amortization expenses for the regulated energy operations are provided at various annual rates, as approved by the FPSC.

Allowance for Funds Used During Construction

The allowance for funds used during construction ("AFUDC") is an accounting procedure whereby the cost of borrowed and other funds used to finance construction project is capitalized as part of utility plant on the balance sheet and is credited as non-cash items on the income statement. The costs of borrowed and equity funds are segregated between interest expenses and other income, respectively. We did not capitalize any AFUDC during 2009 and 2008.

Related Party Transactions

FPUC allocates costs between our regulated and non-regulated operations (Flo-Gas) which generate inter-company receivables and payables. These amounts consolidate to zero and were \$16,568,103 and \$14,712,473 at December 31, 2009 and 2008, respectively.

Cash and Cash Equivalents

Our policy is to invest cash in excess of operating requirements in overnight income-producing accounts. Such amounts are stated at cost, which approximates market value. Investments with an original maturity of three months or less when purchased are considered cash equivalents. Subsequent to the merger with Chesapeake, certain excess cash of FPU may be transferred to and invested in Chesapeake's overnight income-producing accounts.

Pension and Other Postretirement Plans

Pension and other postretirement plan costs and liabilities are determined on an actuarial basis and are affected by numerous assumptions and estimates including the market value of plan assets, estimates of the expected returns on plan assets, assumed discount rates, the level of contributions made to the plans, and current demographic and actuarial mortality data. Management annually reviews the estimates and assumptions underlying our pension and other postretirement plan costs and liabilities with the assistance of third-party actuarial firms. The assumed discount rates and the expected returns on plan assets are the assumptions that generally have the most significant impact on our pension costs and liabilities. The assumed discount rates, health care cost trend rates and rates of retirement generally have the most significant impact on our postretirement plan costs and liabilities.

The discount rates are utilized principally in calculating the actuarial present value of our pension and postretirement obligations and net pension and postretirement costs. When establishing its discount rates, we consider high quality corporate bond rates based on the Citigroup yield curve, changes in the rates from the prior year, and other pertinent factors, such as the expected life of each of our plans and their respective payment options.

The expected long-term rates of return on assets are utilized in calculating the expected returns on plan assets component of our annual pension and plan costs. We estimate the expected returns on plan assets of each of our plans by evaluating expected bond returns, asset allocations, the effects of active plan management, the impact of

periodic plan asset rebalancing and historical performance. We also consider the guidance from our investment advisors in making a final determination of our expected rates of return on assets.

We estimate the assumed health care cost trend rates used in determining our postretirement net expense based upon actual health care cost experience, the effects of recently enacted legislation and general economic conditions. Our assumed rate of retirement is estimated based upon our annual reviews of participant census information as of the measurement date.

Income Taxes and Investment Tax Credit Adjustments

Deferred tax assets and liabilities are recorded for the tax effect of temporary differences between the financial statements bases and tax bases of assets and liabilities and are measured using the enacted tax rates in effect in the years in which the differences are expected to reverse. The portions of our deferred tax liabilities applicable to regulated energy operations, which have not been reflected in current service rates, represent income taxes recoverable through future rates. Deferred tax assets are recorded net of any valuation allowance when it is more likely than not that such tax benefits will be realized. Investment tax credits on utility property have been deferred and are allocated to income ratably over the lives of the subject property.

We account for uncertainty in income taxes in the financial statements only if it is "more likely than not" that an uncertain tax position is sustainable based on technical merits. Recognizable tax positions are then measured to determine the amount of benefit recognized in the financial statements.

Interest and penalties associated with uncertain tax positions as part of the income tax provision. We have determined that we have no material uncertain tax positions.

Financial Instruments

None of our natural gas or electric contracts are accounted for using the fair value method of accounting. All material contracts that meet the definition of derivative instruments are considered "normal purchase" under Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 815, "Derivatives and Hedging."

Operating Revenues and Cost of Sales

Revenues for our natural gas and electric distribution operations are based on rates approved by the FPSC. For deliveries of natural gas and electricity, we read meters and bill customers on monthly cycles that do not coincide with the accounting periods used for financial reporting purposes. We accrue unbilled revenues for natural gas and electricity that have been delivered, but not yet billed, at the end of an accounting period to the extent that they do not coincide. In connection with this accrual, we must estimate the amount of natural gas and electricity that have not been accounted for on our delivery systems and must estimate the amount of the unbilled revenue by jurisdiction and customer class.

Each of our natural gas and electric distribution operation has a purchased fuel cost recovery mechanism. This mechanism provides a method of adjusting the billing rates to reflect changes in the cost of purchased fuel. The difference between the current cost of fuel purchased and the cost of fuel recovered in billed rates is deferred and accounted for as either unrecovered purchased fuel costs or amounts payable to customers. Generally, these deferred amounts are recovered or refunded within one year.

Operations and Maintenance Expenses

Operations and maintenance expenses are costs associated with the operation and maintenance of our natural gas and electric businesses. Major cost components include operation and maintenance salaries and benefits, materials and supplies, usage of vehicles, tools and equipment, payments to contractors, utility plant maintenance, customer service, professional fees and other outside services, insurance expense, minor amounts of depreciation, accretion of cost of removal for future retirements of utility assets, and other administrative expenses.

Allowance for Doubtful Accounts

An allowance for doubtful accounts is recorded against amounts due to reduce the net receivables balance to the amount we reasonably expect to collect based upon our collections experiences and management's assessment of our customers' inability or reluctance to pay. If circumstances change, our estimates of recoverable accounts receivable may also change. Circumstances which could affect such estimates include, but are not limited to, customer credit issues, the level of natural gas and electricity and general economic conditions. Accounts are written off when they are deemed to be uncollectible.

Certain RIsks and Uncertaintles

Our financial statements are prepared in accordance with recognized policies prescribed or permitted by the FERC and FPSC, which require management to make estimates in measuring assets and liabilities and related revenues and expenses. These estimates involve judgments with respect to, among other things, various future economic factors that are difficult to predict and are beyond the control of the Company; therefore, actual results could differ from those estimates.

We record certain assets and liabilities in accordance with ASC Topic 980, "Regulated Operations." In applying provisions of this Topic, our regulated operations may defer costs or revenues in different periods than our unregulated operations would recognize, resulting in their being recorded as assets or liabilities on the applicable operation's balance sheet. If we were required to terminate the application of these provisions to our regulated operations, all such deferred amounts would be recognized in the income statement at that time. This would result in a charge to earnings, net of applicable income taxes, which could be material.

Taxes Collected from Customers and Remitted to Governmental Authorities

We remit to governmental authorities various taxes collected from customers throughout the year including gross receipts and franchise taxes. These taxes are pass through revenues and expenses and do not impact our results of operations. The amount of gross receipts and franchise taxes for the year ending December 31, 2009 and 2008 was \$8.9 million and \$8.7 million, respectively.

Acquisition accounting

The merger with Chesapeake was accounted for under the acquisition method of accounting under GAAP, with Chesapeake treated as the acquirer. The acquisition method of accounting under GAAP requires, among other things, that the assets acquired and liabilities assumed in the merger be recognized at their fair value as of the acquisition date. In estimating the fair value of FPU's assets and liabilities subject to rate regulation, we considered the nature and impact of such regulations on those assets and liabilities as a factor in determining their appropriate fair value. We also considered the existence of a regulatory process that would allow, or sometimes require, regulatory assets and liabilities to be established for fair value adjustment to certain assets and liabilities subject to rate regulatory process, as was the case for fuel contracts and long-term debt, we did not "gross-up" our balance sheet to reflect the fair value adjustment and corresponding regulatory asset/liability. As a result, there were no fair value adjustments to FPU's assets and liabilities subject to rate regulation in the merger.

The merger with Chesapeake resulted in a purchase premium of approximately \$34.0 million for FPU's regulated operations, which was reflected in account 114 as part of the plant assets on the balance sheet. For GAAP purposes, such amount, net of a negative purchase premium related to FPU's unregulated operations, which decreased the carrying value of certain assets in the merger, was reflected as goodwill in Chesapeake's financial statements as of

December 31, 2009. The purchase price allocation is not final as estimates of deferred income taxes and certain accruals are subject to change.

As of December 31, 2009, Chesapeake incurred approximately \$3.0 million in acquisition-related costs to consummate the merger and integrate operations following the merger. Since the allocation of the acquisition-related costs has not been finalized, none of such costs has been allocated to FPU as of December 31, 2009. FPU incurred approximately \$4.1 million in acquisition-related costs, all of which have been expensed in 2009.

Regulatory Assets, Liabilities and Expenditures

We account for our regulated operations in accordance with ASC Topic 980, "Regulated Operations." This Topic includes accounting principles for companies whose rates are determined by independent third-party regulators. When setting rates, regulators often make decisions, the economics of which require companies to defer costs or revenues in different periods than may be appropriate for unregulated enterprises. When this situation occurs, a regulated company defers the associated costs as regulatory assets on the balance sheet and records them as expense on the income statement as it collects revenues. Further, regulators can also impose liabilities upon a regulated company for amounts previously collected from customers, and for recovery of costs that are expected to be incurred in the future as regulatory liabilities.

At December 31, 2009 and 2008, the regulated utility operations had recorded the following regulatory assets and liabilities on the Balance Sheets. These assets and liabilities will be recognized as revenues and expenses in future periods as they are reflected in customers' rates.

	Dec	ember 31, 2009	Dec	ember 31, 2008
(in thousands)				
Regulatory Assets				
Deferred development costs (1)	\$	1,698	\$	4,161
Unamortized fuel related regulatory costs (5)		. 12		24
Environmental assets (2)		6,624		7,092
Deferred retirement plan costs (4)		3,580		9,945
Unamortized rate case expense (7)		906		861
Under-recovery of fuel costs (6)		-		756
Unamortized piping and conversion costs (1)		1,061		1,273
Unamortized loss on reacquired debt (1)		154		172
Unamortized bridge crossing (10)		89		-
Acquisition adjustment(11)		7 95		-
Income tax related amounts due from customers(12)		440		-
Total Regulatory Assets	\$	15,359	\$	24,284
Regulatory Liabilities				
Tax liabilities (8)		655		707
Cost of removal (9)		11,693		10,304
Storm reserve liabilities (3)		2,554		2,418
Over-recovery of fuel costs (6)		2,082		1,608
Over-recovery of conservation (6)		411		357
Natural gas rate refund liability (3)		258		-
otal Regulatory Liabilities	\$	17,653	\$	15,394

- (2) We have included the amount due from customers as a regulatory asset for environmental costs. The FPSC authorized recovery of these environmental costs from customers over 20 years.
- (3) The FPSC ordered disposition in 2008 of our 2006 natural gas over-earnings to additionally fund our storm reserve for our natural gas operations. Our natural gas storm reserve is approximately \$792,000 as of December 31, 2009. Our electric storm reserve is approximately \$1,762,000 as of December 31, 2009.
- (4) The actuarial valuation of the retirement plan obligations has been completed and resulted in a regulatory asset of \$3.6 million and \$9.9 million at December 31, 2009 and 2008, respectively.
- (5) We have deferred certain regulatory fuel-related costs and since January 2006 have been amortizing these over five years according to a FPSC order in the November 2005 fuel hearings.
- (6) We have certain costs that are passed directly through to customers for recovery including fuel and conservation costs. There are amounts related to expenses that are either over or under-recovered in a calendar year. The over-recoveries will be refunded to customers and under-recoveries will be collected from customers in the following year, but both are deferred in the current period.
- (7) We have costs associated with preparing and filing rate proceedings before the FPSC. These costs are amortized over a four year period. This represents the unamortized portion of these costs. We have incurred rate case costs associated with the recent electric filing finalized in 2008 and natural gas filing finalized in 2009. Amortization of natural gas costs began in mid 2009.
- (8) We have deferred tax liabilities associated with property, plant and equipment. We use a FPSCapproved method to amortize these liabilities.
- (9) We have a liability for the estimated future costs to remove or retire existing fixed assets.
- (10) We have costs associated with repairs and maintenance on bridge crossings recommended by FPSC's Bureau of Safety. These costs are amortized over a four year period. This amount represents the unamortized portion of these costs. Amortization of bridge crossings repairs and maintenance costs began in mid 2009.
- (11) The FPSC approved the recovery in rates of certain acquisition premiums from FPU's previous acquisition.
- (12) Income taxes related amounts due from customers, is attributable to the merger with Chesapeake.

Subsequent Events

We have assessed and reported on subsequent events through July 7 2010, the date these financial statements are available to be issued.

Codification

Beginning in 2009, we adopted FASB ASC, which is now the single source of authoritative accounting principles in the United States. The adoption of the ASC did not have a material impact on our financial position and results of operations. As a result of this adoption, we updated all references to accounting and reporting standards included in this filing and in some instances provided references to both pre-and post-Codification standards, as appropriate.

FASB Statements and Other Authoritative Pronouncements

FASB Statements and Other Authoritative Pronouncements

Accounting Amendments Adopted by the Company in 2009:

In December 2007, the FASB issued Statement of Financial Accounting Standard ("SFAS") No. 141(R), now codified within ASC Topic 805, "Business Combinations." SFAS No.141(R): (a) defines the acquirer as the entity that obtains control of one or more businesses in a business combination; (b) establishes the acquisition date as the date that the acquirer achieves control; and (c) requires the acquirer to recognize the assets acquired, liabilities assumed and any non-controlling interests at their fair values as of the acquisition date. Provisions of this standard were adopted effective January 1, 2009. The merger with Chesapeake, effective October 28, 2009, was accounted for using provisions of this standard.

In April 2008, the FASB issued FASB Staff Position ("FSP") FAS 142-3, "Determination of the Useful Life of Intangible Assets," which is codified within ASC Sections 350-30-50, 55 and 65 of the Topic, "Intangibles -Goodwill and Other," and ASC Section 275-10-50, of the Topic, "Risks and Uncertainties." It amended factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset. The intent of these provisions is to improve the consistency between the useful life of a recognized intangible asset and the period of expected cash flows used to measure the fair value of the asset. We adopted this standard, effective January 1, 2009. Adoption of this standard did not have an impact on our financial position and results of operations.

In December 2008, the FASB issued FSP SFAS 132(R)-1, "Employers' Disclosures about Postretirement Benefit Plan Assets." This FSP is codified within ASC Section 715-20-65, of the Topic, "Compensation - Retirement Benefits." It expands the disclosure requirements of a defined benefit pension or other postretirement plan by including the following discussions about plan assets: (i) how investment allocation decisions are made, including the plan's investment policies and strategies; (ii) the major categories of plan assets; (iii) the inputs and valuation techniques used to measure the fair value of plan assets; (iv) the effect of fair value measurements, using significant unobservable inputs on changes in plan assets for the period; and (v) significant concentrations of risk within plan assets. The disclosures required by this standard are discussed in Note K, "Employee Benefit Plans," to these financial statements.

۱. این

د , ۲

In May 2009, the FASB issued SFAS No. 165, "Subsequent Events," which we adopted in 2009. The provisions of this standard, now residing in ASC Sections 855-10-05, 15, 25, 45, 50 and 55 of the Topic, "Subsequent Events," establish general standards of accounting for, and disclosure of, events that occur after the balance sheet date but before financial statements are issued or are available to be issued. The adoption of this standard did not have an impact on our consolidated financial position and results of operations.

B. TRANSACTIONS WITH AFFILIATES

Cash arrangements

Subsequent to the merger, we operate under an arrangement with Chesapeake whereby Chesapeake may invest certain of our excess cash in an overnight income producing accounts. We are allocated a portion of interest income generated from those accounts.

Also subsequent to the merger with Chesapeake, the investments totaling \$3.5 million from insurance proceeds related to the environmental costs were transferred to Chesapeake's general account that invests in overnight income producing securities. These investments were previously reflected as a non-current investment on the balance sheet prior to the transfer to Chesapeake.

In connection with the merger with Chesapeake, our outstanding borrowings under the revolving line of credit totaling \$4.2 million were repaid in full in November 2009 and the revolving line of credit was terminated on November 23, 2009. We now utilizes Chesapeake's short term borrowing facility to finance our short term needs and are allocated a portion of interest expense on Chesapeake's short-term credit facilities

Allocated Costs from Affiliates

During the period from the effective date of the merger to December 31, 2009, we were allocated approximately \$290,000 of operating expenses from Chesapeake, which primarily represent our share of the insurance and external audit fees for the period.

C. NOTES RECEIVABLE

As of December 31, 2009 there was approximately \$5.8 million in receivables from the 2003 sale of our water assets with the interest of 4.34 percent. We received payment for the notes receivable in March 2010.

D. OVER-EARNINGS AND RATE REFUND - NATURAL GAS

The FPSC approves rates that are intended to permit a specified rate of return on investment and limits the maximum amount of earnings of regulated operations. We have agreed with the FPSC staff to limit the earned return on equity for regulated natural gas and electric operations.

In 2009 and 2008, there were no estimated natural gas and electric over-earnings.

On September 29, 2008 the FPSC finalized the 2006 over-earnings for the natural gas segment. Total over-earnings was determined to be \$160,000 plus interest of \$17,000. The FPSC ordered the disposition of the 2006 overearnings to provide additional funds for the natural gas storm reserve.

On December 15, 2009, the FPSC approved the settlement agreement for a final natural gas rate increase of \$7,969,000 for our natural gas distribution operation. The rates authorized pursuant to the order approving the settlement agreement became effective on January 14, 2010. In February 2010, we refunded to our natural gas customers approximately \$290,000 representing revenues in excess of the amount provided by the settlement agreement that had been billed to customers from June 2009 through January 14, 2010.

E. STORM RESERVES

As of December 31, 2009, we had a storm reserve of approximately \$1.8 million for the electric segment and approximately \$792,000 for the natural gas segment. We do not have a storm reserve for the propane gas segment. The FPSC ordered disposition of 2005 over earnings to eliminate the related regulatory asset - storm reserve in natural gas operations and the storm surcharge collected from customers. The remaining 2005 over-earnings and the 2006 over-earning were used to fund a storm reserve for any future storm costs.

F. INCOME TAXES

We have filed and will file a separate federal income tax return for FPU for the period prior to the merger. For the period after the merger, we will be included in the Chesapeake consolidated federal return for the post-merger period. We have filed and will continue to file a separate state income tax return for FPU in the state of Florida.

In February 2008, the IRS completed its examination of our 2003 and 2004 federal income tax returns. We reclassified the tax liability recognized in 2007 related to this audit as a current tax payable. We paid this tax liability and the interest of approximately \$195,000 and \$48,000 respectively in July 2008. This adjustment does not affect our annual effective income tax rate, and did not result in a material change in our financial position. We amended our 2004 Florida corporate income tax returns to reflect the 2004 IRS audit adjustments. During 2008, the IRS also examined our 2005 and 2006 tax years. Based on the completion of the IRS examination, at December 31, 2008 we had an income tax receivable of \$346,000 and interest income of approximately \$45,000 for the 2005 and 2006 tax years. The federal portion of this refund was received in 2009. We are not subject to income tax examinations by the IRS for the years before December 31, 2006.

The tables below provide the following: (a) the components of income tax expense; (b) reconciliation between the statutory federal income tax rate and the effective income tax rate; and (c) the components of deferred income tax assets and liabilities at December 31, 2009 and 2008 for FPU on a consolidated basis (inclusive of our non-regulated subsidiary). Income expense attributable to our non-regulated subsidiary for the years ended December 31, 2009 and 2008 were \$ 258,000 and \$ 362,000, respectively. Net deferred income tax liabilities able to our non-regulated subsidiary at December 31, 2009 and 2008 were \$ 4,789,000 and \$ 3,000,000, respectively.

G. LONG TERM DEBT

Our outstanding long-term debt, net of unamortized debt issuance costs, is as shown below:

	December 31, 2009	December 31, 2008
(in thousands)		
Secured first mortgage bonds:		
9.57% bond, due May 1, 2018	\$8,156	\$9,059
10.03% bond, due May 1, 2018	4,486	4,983
9.08% bond, due June 1, 2022	7,950	7,945
6.85% bond, due October 1, 2031	14,012	13,286
4.90% bond, due November 1, 2031	13,222	14,056
Total long-term debt	47,826	49,329
Less: current maturities	(28,643)	(1,409)
Total long-term debt, net of current maturities	\$19,183	\$47,920

Annual maturities of consolidated long-term debt are as follows: \$30,109 for 2010; \$1,409 for 2011; \$1,409 for 2012; \$1,409 for 2013; \$1,409 for 2014 and \$13,636 thereafter. The annual maturity for 2010 of \$30,109, includes \$28,700 of the secured first mortgage bonds redeemed prior to stated maturity in January 2010.

Secured First Mortgage Bonds

As of December 31, 2009, our secured first mortgage bonds had a carrying value of \$47.8 million, net of unamortized debt issuance costs (\$49.3 million in outstanding principal balance). The first mortgage bonds are secured by a lien covering all of FPU's property. The 9.57 percent bond and 10.03 percent bond require annual sinking fund payments of \$909,000 and \$500,000, respectively.

In January 2010, we redeemed the 6.85 percent and 4.90 percent series of our secured first mortgage bonds prior to their respective maturity for \$28.7 million, which represented the outstanding principal balance of those bonds. Chesapeake obtained a new short-term borrowing to finance the redemption of these bonds and is currently in discussions with a lender for the long-term financing of these bonds. The difference between the carrying value of those bonds and the amount paid at redemption totaling \$1.5 million was deferred as a regulatory asset.

Each series of our first mortgage bonds contains a restriction that limits the payment of dividends by FPU. The most restrictive covenants of this type are included within the series that is due in 2031, which provided that we cannot make dividend or other restricted payments in excess of the sum of \$2.5 million plus our consolidated net income accrued on and after January 1, 2001. As of December 31, 2009, we had the cumulative net income base of \$32.7 million, offset by restricted payments of \$22.1 million, leaving \$10.6 million of cumulative net income of our free of restrictions based on this covenant. In January 2010, this series of first mortgage bonds were redeemed prior to their maturities. The second most restrictive covenant of this type is included in the series that is due in 2022, which provided that we cannot make dividend or other restricted payments in excess of the sum of \$2.5 million plus consolidated net income accrued on and after January 1, 1992. This covenant provides us with the cumulative net income base of \$56.0 million, offset by restricted payments of \$37.6 million, leaving \$18.4 million of cumulative net income to cumulative net income of PPU free of restrictions as of December 31, 2009.

H. SHORT TERM BORROWING

In 2004, we entered into an amended and restated loan agreement that allowed us to increase the line of credit to a maximum of \$20 million, upon 30 days notice. In 2008, the agreement was amended with an expiration date of July 1, 2010, and a maximum of \$26 million. The amendment also reduces the interest rate paid on borrowings by 0.10 percent or 10 basis points. Effective April 29, 2008, we increased the available line of credit from \$12 million to

\$15 million, with a current outstanding balance of \$12.7 million. We had reserved \$1.0 million of the line of credit to cover expenses for any major storm repairs in its electric segment.

In connection with the merger with Chesapeake, the outstanding borrowings under the revolving line of credit totaling \$4.2 million were repaid in full in November 2009 and the revolving line of credit was terminated on November 23, 2009.

I. CAPITALIZATION

Common stock

In connection with the merger with Chesapeake on October 28, 2009, all of the outstanding shares of our common stock were exchanged to Chesapeake common stock and as a result, we became a wholly owned subsidiary of Chesapeake.

Preferred Stock

Prior to the merger with Chesapeake, we had 6,000 shares of 4 3/4 percent Series A preferred stock \$100 par value authorized for issuance of which 6,000 were issued and outstanding. The preferred shares were redeemed in September 2009, prior to the merger with Chesapeake.

J. LEASE OBLIGATIONS

We have entered into several operating lease arrangements for office space, equipment and pipeline facilities, which are not material to our financial position or result of operations.

K. EMPLOYEE BENEFIT PLANS

The following employee benefit plan disclosures are presented on a consolidated basis and inclusive of amounts and balances related to our non-regulated subsidiary.

Retirement Plans

We continue to sponsor and maintain a separate defined benefit pension plan for FPU ("FPU Pension Plan") and a separate unfunded postretirement medical plan for FPU ("FPU Medical Plan") after the merger.

We measure the assets and obligations of the defined benefit pension plan and other postretirement benefits plans to determine the plans' funded status as of the end of the year as an asset or a liability on our consolidated balance sheets. We recognize as a component of accumulated other comprehensive income/loss the changes in funded status that occurred during the year but that are not recognized as part of net periodic benefit costs, except for the portion related to FPU's regulated energy operations, which is deferred as a regulatory asset to be recovered in the future pursuant to a previous order by the FPSC. The measurement dates were December 31, 2009 and 2008.

Defined Benefit Pension Plan

The FPU Pension Plan covers eligible FPU non-union employees hired before January 1, 2005 and union employees hired before the respective union contract expiration dates in 2005 and 2006.

In March 2009 and October 2009, we amended the FPU Pension Plan in an effort to reduce anticipated future pension expenses. As a result of these amendments, we froze the FPU Pension Plan for all participants effective December 31, 2009. All future benefit accruals under the plan were ceased, including freezing salary rates at 2009 average compensation levels as of December 31, 2009. In addition to the freeze, the reduced early retirement eligibility was lowered from 30 years to 20 years and two additional service years were earned by active participants at the December 31, 2009 average compensation levels for the purposes of benefit accrual, vesting and retirement eligibility. Beyond December 31, 2011, active participants will continue to accrue service years for the purposes of vesting and retirement eligibility. The amendments to the plan have been accounted for as a curtailment, resulting in the recognition of approximately \$2.7 million in non-cash pretax curtailment loss of which \$2.2 million is reflected in expenses and \$500,000 is reflected on the balance sheet.

Our funding policy provides that payments to the trustee shall be equal to the minimum funding requirements of the Employee Retirement Income Security Act of 1974. In 2009 we contributed \$5.9 million to the FPU Pension Plan as required by the Pension Protection Act funding rules.

The following schedule summarizes the assets of the FPU Pension Plan, by investment type, at December 31, 2009 and 2008:

14 December 21	2009	2008
At December 31,		
Asset Category	63.00%	69.00%
Equity securities Debt securities	29.00%	30.00%
Other	8.00%	1.00%
Total	100.00%	100.00%

The asset listed as "Other" in the above table represents monies temporarily held in money market funds, which invest at least 80 percent of their total assets in:

- United States government obligations; and
- Repurchase agreements that are fully collateralized by such obligations.

All of the assets held by the FPU Pension Plan are classified under Level 1 of the fair value hierarchy and are recorded at fair value based on unadjusted quoted prices in active markets for identical securities.

The investment policy for the FPU Pension Plan is designed to achieve a long-term rate of return, including investment income and appreciation, sufficient to meet the actuarial requirements of the plan. The plan's investment strategy is to achieve its return objectives by investing in a diversified portfolio of equity, fixed income and cash securities seeking a balance of growth and stability as well as an adequate level of liquidity for pension distributions as they fall due. Plan assets are constrained such that no more than 10 percent of the portfolio will be invested in any one issue. Investment allocation decisions for the FPU Pension Plan are made by the Pension Committee.

The following schedule sets forth the funded status at December 31, 2009 and 2008:

At December 31,	2009	2008
(in thousands)		
Change in benefit obligation:		
Benefit obligation beginning of year	\$43,067	\$39,520

Funded status	(2,417)	(1,693)
Accrued pension cost	(\$2,417)	(\$1,693)
Assumptions:		
Discount rate	5.75%	6.60%

Net periodic postretirement costs for 2009 and 2008 include the following components:

For the Years Ended December 31,	2009	2008
(in thousands)		
Components of net periodic postretirement cost:		
Service cost	\$89	\$ 53
Interest cost	127	104
Amortization of transition obligation	36	43
Amortization of actuarial gain	(16)	(50)
Net periodie postretirement cost	\$236	\$150

Assumptions

The assumptions used for the discount rate to calculate the benefit obligation of all the plans were based on the interest rates of high-quality bonds in 2009, reflecting the expected life of the plans. In determining the average expected return on plan assets for each applicable plan, various factors, such as historical long-term return experience, investment policy and current and expected allocation, were considered. Since the pension plan is frozen with respect to additional years of service and compensation, the rate of assumed compensation rate increases is not applicable.

The health care inflation rate for 2009 used to calculate the benefit obligation is 10.50 percent for the Medical Plan. A one percentage point increase in the health care inflation rate from the assumed rate would increase the accumulated postretirement benefit obligation by approximately \$259,000 as of January 1, 2010, and would increase

the aggregate of the service cost and interest cost components of the net periodic postretirement benefit cost for 2009 by approximately \$5,000. A one percentage point decrease in the health care inflation rate from the assumed rate would decrease the accumulated postretirement benefit obligation by approximately \$228,000 as of January 1, 2010, and would decrease the aggregate of the service cost and interest cost components of the net periodic postretirement benefit cost for 2009 by approximately \$5,000.

Estimated Future Benefit Payments

In 2010, we expect to contribute \$1.6 million and \$144,000 to the FPU Pension Plan and FPU Medical Plan respectively. The schedule below shows the estimated future benefit payments for each of our plans previously described:

	FPU	FPU Medical Plan ⁽²⁾⁽³⁾
	Pension Plan ⁽ⁱ⁾	
(in thousands)		_
2010	\$2,176	\$144
2011	2,308	158
2012	2,452	181
2013	2,617	176
2014	2,747	196
Years 2015 through 2019	14,914	1,215

(1) The pension plan is funded; therefore, benefit payments are expected to be paid out of the plan assets.

⁽²⁾ Benefit payments are expected to be paid out of the general funds of the Company.

⁽³⁾ These amounts are shown net of estimated Medicare Part-D reimbursements of \$10,000, \$11,000, \$11,000, \$12,000 and \$13,000 for the years 2010 to 2014 and \$78,000 for years 2015 through 2019.

Retirement Savings Plan

We continue to maintain a separate 401(k) retirement savings plan for our employees after the merger. FPU's 401(k) plan provides a matching contribution of 50 percent of an employee's pre-tax contributions, up to six percent of the employee's salary, for a maximum company contribution of up to three percent. Beginning in 2007, for non-union employees the plan provides a company match of 100 percent for the first two percent of an employee's contribution, and a match of 50 percent for the next four percent of an employee's contribution, for a total company match of up to four percent. Employees are automatically enrolled at three percent contribution, with the option of opting out, and are eligible for the company match after six months of continuous service, with vesting of 100 percent after three years of continuous service.

Our contributions to the 401(k) plan totaled \$127,000 and \$130,000 for the years ended December 31, 2009, and 2008, respectively.

L. ENVIRONMENTAL COMMITMENTS AND CONTINGENCIES

We are subject to federal, state and local laws and regulations governing environmental quality and pollution control. These laws and regulations require us to remove or remedy the effect on the environment of the disposal or release of specified substances at current and former operating sites.

We have participated in the investigation, assessment or remediation and have certain exposures at four former manufactured gas plant ("MGP") sites. Those sites are located in Key West, Pensacola, Sanford and West Palm Beach, Florida.

As of December 31, 2009, we had recorded approximately \$12.3 million in environmental liabilities related to FPU's MGP sites in Florida, primarily from the West Palm Beach site, which represents our estimate of the future costs associated with those sites. FPU is approved to recover its environmental costs up to \$14.0 million from insurance and customers through rates. Approximately \$7.4 million of FPU's expected environmental costs has been recovered from insurance and customers through rates as of December 31, 2009. We also had recorded approximately \$6.6 million in regulatory assets for future recovery of environmental costs from FPU's customers.

The following discussion provides details on each site.

Key West, Florida

FPU formerly owned and operated an MGP in Key West, Florida. Field investigations performed in the 1990s identified limited environmental impacts at the site, which is currently owned by an unrelated third party. FDEP has not required any further work at the site as of this time. Our portion of the consulting/remediation costs which may be incurred at this site is projected to be \$93,000.

Pensacola, Florida

FPU formerly owned and operated an MGP in Pensacola, Florida. The MGP was also owned by Gulf Power Corporation ("Gulf Power"). Portions of the site are now owned by the City of Pensacola and the Florida Department of Transportation ("FDOT"). In October 2009, FDEP informed Gulf Power that FDEP would approve a conditional No Further Action ("NFA") determination for the site, which must include a requirement for institutional/engineering controls. The group, consisting of Gulf Power, City of Pensacola, FDOT and FPU, is proceeding with preparation of the necessary documentation to submit the NFA justification. Consulting/remediation costs are projected to be \$14,000.

1

Sanford, Florida

FPU is the current owner of property in Sanford, Florida, an MGP which was operated by several other entities before FPU acquired the property. FPU was never an owner/operator of the MGP. In late September 2006, the U.S. Environmental Protection Agency ("EPA") sent a Special Notice Letter, notifying FPU, and the other responsible parties at the site (Florida Power Corporation, Florida Power & Light Company, Atlanta Gas Light Company, and the City of Sanford, Florida, collectively with FPU, "the Sanford Group"), of EPA's selection of a final remedy for OU1 (soils), OU2 (groundwater), and OU3 (sediments) for the site. The total estimated remediation costs for this site were projected at the time by EPA to be approximately \$12.9 million.

In January 2007, FPU and other members of the Sanford Group signed a Third Participation Agreement, which provides for funding the final remedy approved by EPA for the site. FPU's share of remediation costs under the Third Participation Agreement is set at five percent of a maximum of \$13 million, or \$650,000. As of December 31, 2009, FPU paid \$300,000 to the Sanford Group escrow account for its share of funding requirements, and in January 2010, the Company paid the remaining \$350,000 of this funding requirement.

The Sanford Group, EPA and the U.S. Department of Justice entered into a Consent Decree in March 2008, which was entered by the federal court in Orlando on January 15, 2009. The Consent Decree obligates the Sanford Group

to implement the remedy approved by EPA for the site. The total cost of the final remedy is now estimated at approximately \$18 million. We have advised the other members of the Sanford Group that we are unwilling at this time to agree to pay any sum in excess of the \$650,000 committed by FPU in the Third Participation Agreement.

Several members of the Sanford Group have concluded negotiations with two adjacent property owners to resolve damages that the property owners allege they have/will incur as a result of the implementation of the EPA-approved remediation. In settlement of these claims, members of the Sanford Group, which in this instance does not include FPU, have agreed to pay specified sums of money to the parties. FPU has refused to participate in the funding of the third party settlement agreements based on its contention that it did not contribute to the release of hazardous substances at the site giving rise to the third party claims.

As of December 31, 2009, FPU's remaining share of remediation expenses, including attorney's fees and costs, is estimated to be \$401,000, of which \$350,000 was paid to the Sanford Group escrow account in January 2010. However, the Company is unable to determine, to a reasonable degree of certainty, whether the other members of the Sanford Group will accept FPU's asserted defense to liability for costs exceeding \$13 million to implement the final remedy for this site or will pursue a claim against FPU for a sum in excess of the \$650,000 that FPU has committed to fund under the Third Participation Agreement.

West Palm Beach, Florida

We are currently evaluating remedial options to respond to environmental impacts to soil and groundwater at and in the immediate vicinity of a parcel of property owned by FPU in West Palm Beach, Florida upon which we previously operated an MGP. Pursuant to a Consent Order between FPU and the FDEP, effective April 8, 1991, FPU completed the delineation of soil and groundwater impacts at the site. On June 30, 2008, we transmitted a revised feasibility study, evaluating appropriate remedies for the site, to the FDEP. On April 30, 2009, FDEP issued a remedial action order, which it subsequently withdrew. In response to the order and as a condition to its withdrawal, FPU committed to perform additional field work in 2009 and complete an additional engineering evaluation of certain remedial alternatives. The scope of this work has increased in response to FDEP's demands for additional information.

The feasibility study evaluated a wide range of remedial alternatives based on criteria provided by applicable laws and regulations. Based on the likely acceptability of proven remedial technologies described in the feasibility study and implemented at similar sites, management believes that consulting/remediation costs to address the impacts now characterized at the West Palm Beach site will range from \$7.4 million to \$18.9 million. This range of costs covers such remedies as in situ solidification for deeper soil impacts, excavation of superficial soil impacts, installation of a barrier wall with a permeable biotreatment zone, monitored natural attenuation of dissolved impacts in groundwater, or some combination of these remedies.

Negotiations between FPU and the FDEP on a final remedy for the site continue. Prior to the conclusion of those negotiations, we are unable to determine, to a reasonable degree of certainty, the full extent or cost of remedial action that may be required. As of December 31, 2009, and subject to the limitations described above, we estimate the remediation expenses, including attorneys' fees and costs, will range from approximately \$7.8 million to \$19.4 million for this site.

We continue to expect that all costs related to these activities will be recoverable from customers through rates.

M. OTHER COMMITMENTS AND CONTINGENCIES

Rates and Other Regulatory Activities

Our natural gas and electric distribution operations are subject to regulation by the FPSC. The natural gas and electric operations continue to be subject to regulation by the FPSC as separate entities.

On December 15, 2009, the FPSC approved the settlement agreement for a final natural gas rate increase of \$7,969,000 for FPU's natural gas distribution operation, which represents approximately 80 percent of the requested base rate increase of \$9,917,690 filed by FPU in the fourth quarter of 2008. The FPSC had approved an annual interim rate increase of \$984,054 on February 10, 2009 and approved the permanent rate increase of \$8,496,230 in an order issued on May 5, 2009, with the new rates to be effective beginning on June 4, 2009. On June 17, 2009, however, the Office of Public Counsel entered a protest to the FPSC's order and its final natural gas rate increase ruling, which protest required a full hearing to be held within eight months. Subsequent negotiations led to the settlement agreement between the Office of Public Counsel and FPU, which the FPSC approved on December 15, 2009. The rates authorized pursuant to the order approving the settlement agreement became effective on January 14, 2010 and in February 2010, FPU refunded to its natural gas customers approximately \$290,000 representing revenues in excess of the amount provided by the settlement agreement that had been billed to customers from June 2009 through January 14, 2010.

On December 15, 2009, the FPSC approved the application for a permanent rate increase by Chesapeake's Florida division. This permanent rate increase was applicable to all meters read on all after January 14, 2010. The FPSC also ordered Chesapeake's Florida division and FPU's natural gas distribution operations to submit data no later than April 29, 2011 (which is 18 months after the merger) that details all known benefits, synergies and cost savings that have resulted from the merger).

On September 1, 2009, the electric distribution operation filed its annual Fuel and Purchased Power Recovery Clause, which seeks final approval of its 2008 fuel-related revenues and expenses and new fuel rates for 2010. On January 4, 2010, the FPSC approved the proposed 2010 fuel rates, effective on or after January 1, 2010.

On September 11, 2009, the FPU's natural gas distribution operation separately filed the annual Energy Conservation Cost Recovery Clause, seeking final approval of its 2008 conservation-related revenues and expenses and new conservation surcharge rates for 2010. On November 2, 2009, the FPSC approved the proposed 2010 conservation surcharge rates for FPU, effective for meters read on or after January 1, 2010.

Also on September 11, 2009, FPU's natural gas distribution operation filed its annual Purchased Gas Adjustment Clause, seeking final approval of its 2008 purchased gas-related revenues and expenses and new purchased gas adjustment cap rate for 2010. On November 4, 2009, the FPSC approved the proposed 2010 purchased gas adjustment cap, effective on or after January 1, 2010.

The City of Marianna Commissioners voted on July 7, 2009 to enter into a new ten year franchise agreement with FPU effective February 1, 2010. The agreement provides that new interruptible and time of use rates shall become available for certain customers prior to February 2011 or, at the option of the City, the franchise agreement could be voided nine months after that date. The new franchise agreement contains a provision for the City to purchase the Marianna portion of FPU's electric system. Should FPU fail to make available the new rates, and if the franchise agreement is then voided by the City and the City elects to purchase the Marianna portion of the distribution system, it would require the city to pay FPU severance/reintegration costs, the fair market value for the system, and an initial investment in the infrastructure to operate this limited facility. If the City purchased the electric system, FPU would have a gain in the year of the disposition; but, ongoing financial results would be negatively impacted from the loss of the Marianna area from its electric operations.

Natural Gas and Electric

Our natural gas and electric distribution operations have entered into contractual commitments to purchase gas and electricity from various suppliers. The contracts have various expiration dates.

Our electric fuel supply contracts require us to maintain an acceptable standard of creditworthiness based on specific financial ratios. We have an agreement with JEA that requires us to comply with the following ratios based on the result of the prior 12 months: (a) total liabilities to tangible net worth less than 3.75 and (b) fixed charge coverage greater than 1.5. If either of the ratios is not met, we have 30 days to cure the default or provide an irrevocable letter of credit if the default is not cured. Our agreement with Gulf requires us to meet the following ratios based on the average of the prior six quarters: (a) funds from operation interest coverage (minimum of 2 to 1) and (b) total debt to total capital (maximum of 0.65 to 1). If we fail to meet the requirements, we have to provide the supplier a written explanation of action taken or proposed to be taken to be compliant. Failure to comply with the ratios specified in the Gulf agreement could result in us providing an irrevocable letter of credit. We were in compliance with these requirements as of December 31, 2009.

Other

We are involved in certain legal actions and claims arising in the normal course of business. We are also involved in certain legal proceedings and administrative proceedings before various governmental agencies concerning rates. In the opinion of management, the ultimate disposition of these proceedings will not have a material effect on our consolidated financial position, results of operations or cash flows.

N. FAIR VALUE OF FINANCIAL INSTRUMENTS

None of our natural gas or electric contracts are accounted for using the fair value method of accounting. All material contracts that meet the definition of derivative instruments are considered "normal purchase" under ASC Topic 815, "Derivatives and Hedging."

Other Financial Assets and Liabilities

Financial assets with carrying values approximating fair value include cash and cash equivalents and accounts receivable. Financial liabilities with carrying values approximating fair value include accounts payable and other accrued liabilities. The carrying value of these financial assets and liabilities approximates fair value due to their short maturities and because interest rates approximate current market rates for short-term debt.

At December 31, 2009, long-term debt, which includes the current maturities of long-term debt, had a carrying value of \$47.8 million, compared to a fair value of \$53.1 million, using a discounted cash flow methodology that incorporates a market interest rate based on published corporate borrowing rates for debt instruments with similar terms and average maturities, with adjustments for duration, optionality, and risk profile. At December 31, 2008, the estimated fair value was approximately \$56.6 million, compared to a carrying value of \$49.3 million.

SECURITIES ISSUED AND SECURITIES REFUNDED OR RETIRED DURING THE YEAR

1. Furnish a supplemental statement giving a brief description of security financing and refinancing transactions during the year and the accounting for the securities, discounts, premiums, expenses, and related gains or losses.

2. Furnish particulars (details) showing fully the accounting for the total principal amount, par value, or stated value of each class and series of security issued, retired, or refunded and the accounting for premiums, discounts, expenses, and gains or losses relating to the securities. Set forth the facts of the accounting clearly with regard to redemption premiums, unamortized discounts, expenses, and gains or losses relating to securities relating to securities relating to securities relating to securities retired or refunded.

and gains or losses relating to securities retired or refunded. 3. Included in the identification of each class and series of security, as appropriate, the interest or dividend rate, nominal date of issuance, maturity date, aggregate principal amount, par value or stated value, and number of shares. 4. Where the accounting for amounts relating to securities refunded or retired is other than that specified in General Instruction 17 of the Uniform System of Accounts, give references to the Commission authorization for the different accounting and state the accounting method.

Chesapeake Utilities Corporations Acquisition Adjustment to clear FPUC's equity in October 2009. See details below:

	Account 2010.1 Common Stock	Total Shares	Par Value	FLA Statues	Balance
		6,236,426	1.50	500	(9,355,139.00)
	2070.1 Premium on Capital Stock				(6,047,969,14)

ł	2190.1 Other Comprehensive Income				1,112,855,33

Common Stock

In connection with the merger with Chesapeake Utilities Corporation on October 28, 2009, all of the outstanding shares of our common stock were exchanged for Chesapeake common stock and as a result, we became a wholly owned subsidiary of Chesapeake Utilities Corporation.

Preferred Stock

Prior to the merger with Chesapeake Utilities Corporation, we had 6,000 shares of 4 3/4 percent Series A Preferred stock \$100 par value authorized for issuance of which 6,000 were issued and outstanding. The preferred shares were redeemed in September 2009, prior to the merger with Chesapeake Utilities Corporation.

UNAMORTIZED LOSS AND GAIN ON REACQUIRED DEBT (Accounts 189, 257)

 Report under separate subheadings for Unamortized Loss and Unamortized Gain on Reacquired Debt, particulars (details) of gain and loss, including maturity date, on reacquisition applicable to each class and series of long-term debt. If gain or loss resulted from a refunding transaction, include also the maturity date of the new issue.
 In column (c) show the principal amount of bonds or other long-term debt reacquired.

3. In column (d) show the net gain or net loss realized on each debt reacquisition as computed in accordance with General Instruction 17 of the Uniform Systems of Accounts 4. Show loss amounts by enclosing the figures in parentheses. 5. Explain in a footnote any debits and credits

other than amortization debited to Account 428.1, Amortization of Loss on Reacquired Debt, or credited to Account 429.1, Amortization of Gain on Reacquired Debit-Credit.

Line No.	Designation of Long-Term Debt (a)	Date Reacquired (b)	Principal of Debt Reacquired (c)	Net Gain or Net Loss (ď)	Balance at Beginning of Year	Balance at End of Year

For the Year Ended

December 31, 2009

LONG-TERM DEBT (Accounts 221, 222, 223, and 224) 1. Report by balance sheet Account the particulars (details) concerning iong-term debt included in Accounts 221, Bonds, 222, Reacquired Bonds, 223, Advances from Associated Companies, and 224, Other Long-Term Debt. If information to meet the stock exchange reporting requirement outlined in column (a) is available from the SEC 10-K Report Form Filing, a specific reference to the report form (i.e., year and company title) 10-K report and this report are compatible.

 For advances from Associated Companies, report separetely advances on notes and advances on open accounts. Designate demand notes as such. Include in column (a) names of associated companies from which advances were received. 3. If the respondent has any long-term securities which have been nominally issued and are nominally outstanding at end of year, describe such securities in a footnote. 4. If interest expense was incurred during the year on any obligations retired or reacquired before end of year, include such interest in column (f). Explain in a footnote any difference between the total of column (f) and the total of Account 427, Interest on Long-Term Debt and Account 430, Interest on Debt to Associated Companies.

RECONCILIATION OF REPORTED NET INCOME WITH TAXABLE INCOME FOR FEDERAL INCOME TAXES

December 31, 2009

1. Report the reconciliation of reported net income for the year with taxable income used in computing Federal income tax accruals and show computation of such tax accruals. Include in the reconciliation, as far as practicable, the same detail as furnished on Schedule M-1 of the tax return for the year. Submit a reconciliation even though there is no taxable income for the year. Indicate clearly the nature of each reconciling amount.

2. If the utility is a member of a group which files a consolidated Federal tax return, reconcile reported net income with taxable net income as if a separate return were to be filed, indicating, however, intercompany amounts to be eliminated in such a consolidated return. State names of group members, tax assigned to each group member, and basis of allocation, allocation, assignment, or sharing of the consolidated tax among the group members.

GAS OPERATING REVENUES (Account 400)

December 31, 2009

1. Report below natural gas operating revenues for each prescribed account in total. 2. Report number of customers, columns (f) and (g), on the basis of meters, except that where separate meter readings are added for

billing purposes, one customer should be counted for each group of meters added. The average number of customers means the average of twelve figures at the close of each month. 3. Report quantities of natural gas sold in therms (14.73 psia at 60 F).

4. Report gas service revenues and therms sold by rate schedule.

5. If increases or decreases from previous year (columns (c),(e), and (g)), are not derived from previously reported figures, explain any inconsistencies in a footnote.

	NUMBER OF GAS DEPARTMENT EMPLOYEES	
	 The data on number of employees should be reported for payroll period ending nearest to October 31, or any payroll period ending 60 days before or after October 31. If the respondent's payroll for the reporting period includes any special construction personnel, include such employees on line 3, and show the number of such special construction employees in a footnote. The number of employees assignable to the gas department from joint functions of combination utilities may be determined by estimate, on the basis of employee equivalents. Show the estimated number of equivalent employees attributed to the gas department from joint functions.

GAS USED IN UTILITY OPERATIONS - CREDIT (Accounts 812)

GAS USED IN UTILIT 1. Report below particulars (details) of credits during the year to Accounts 810, 811 and 812 which offset charges to operating expenses or other accounts for the cost of gas from the respondent's own supply. 2. Natural gas means either natural gas unmixed, or any mixture of natural and manufactured gas. 3. If the reported Therms for any use is an estimated quantity, state

If any natural gas was used by the respondent for which a change was not made to the appropriate operating expense or other account, list separately in column (c) the Therms of gas used, omitting entries in columns (d) and (e).
 Report pressure base of measurement of gas volumes at 14.73 psia at 60 degrees F.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

ANALYSIS OF DIVERSIFICATION ACTIVITY REPORT

Flo-Gas Corporation is a wholly-owned subsidiary of Florida Public Utilities Company and transactions that exceed \$300 annually are numerous. Therefore, the enclosed summaries of Flo-Gas' Income Statement and Balance Sheet should be sufficient to meet the requirements of the report.

- Items relating specifically to Flo-Gas are charged directly.
- Corporate general expenses relating to both companies are allocated using factors previously reviewed by the Florida Public Service Commission during our last rate proceeding.
- Items that typically create intercompany transactions include payroll, cash Payments and receipts, and propane purchases.
- Flo-Gas does not have employees or cash.

Detailed transactions are available at our corporate office. If you require additional information, please let us know.

NOTE: Flo-Gas' Income Statement and Balance Sheet (Supplement pages 1 through 3).
