GENERAL WATER SYSTEM INFORMATION

Furnish information below for each system. A separate page should be supplied where necessary.

- 1 Present ERC's * the system can efficiently serve. _____
- 2 Maximum number of ERCs * which can be served. _____
- 3 Present system connection capacity (in ERCs *) using existing lines. _____
- 4 Future connection capacity (in ERCs *) upon service area buildout. _____
- 5 Estimated annual increase in ERCs *. _____
- 6 Is the utility required to have fire flow capacity? _____
If so, how much capacity is required? _____
Attach a description of the fire fighting facilities. _____
- 7 Describe any plans and estimated completion dates for any enlargements or improvements of this system. _____

- 8 When did the company last file a capacity analysis report with the DEP? _____
- 9 If the present system does not meet the requirements of DEP rules, submit the following:
 - a Attach a description of the plant upgrade necessary to meet the DEP rules. _____
 - b Have these plans been approved by DEP? _____
 - c When will construction begin? _____
 - d Attach plans for funding the required upgrading. _____
 - e Is this system under any Consent Order with DEP? _____
- 10 Department of Environmental Protection ID # _____
- 11 Water Management District Consumptive Use Permit # _____
 - a Is the system in compliance with the requirements of the CUP? _____
 - b If not, what are the utility's plans to gain compliance? _____

NOT APPLICABLE
SYSTEM NOT YET IN OPERATION

* An ERC is determined based on one of the following methods:

- (a) If actual flow data are available from the preceding 12 months:
Divide the total annual single family residence (SFR) gallons sold by the average number of single family residents (SFR) gallons sold by the average number of single family residence customers for the same period and divide the result by 365 days.
- (b) If no historical flow data are available use:
ERC = (Total SFR gallons sold (omit 000/365 days/350 gallons per day).

GENERAL WASTEWATER SYSTEM INFORMATION

Furnish information below for each system. A separate page should be supplied where necessary.

- 1 Present number of ERCs* now being served. _____
- Maximum number of ERCs* which can be served. _____
- 2 Present system connection capacity (in ERCs*) using existing lines. _____
- 3 Future connection capacity (in ERCs*) upon service area buildout. _____
- 4 Estimated annual increase in ERCs*. _____
- 5 Describe any plans and estimated completion dates for any enlargements or improvements of this system _____

If the utility uses reuse as a means of effluent disposal, provide a list of the reuse end users and the amount of reuse provided to each, if known.

If the utility does not engage in reuse, has a reuse feasibility study been completed? _____

If so, when? _____

6 Has the utility been required by the DEP or water management district to implement reuse? _____

If so, what are the utility's plans to comply with this requirement? _____

7 When did the company last file a capacity analysis report with the DEP? _____

8 If the present system does not meet the requirements of DEP rules, submit the following:

- a. Attach a description of the plant upgrade necessary to meet the DEP rules.
- b. Have these plans been approved by DEP? _____
- c. When will construction begin? _____
- d. Attach plans for funding the required upgrading.
- e. Is this system under any Consent Order with DEP? _____

9 Department of Environmental Protection ID # _____

An ERC is determined based on one of the following methods:

- (a) If actual flow data are available from the preceding 12 months:
Divide the total annual single family residence (SFR) gallons sold by the average number of single family residents (SFR) gallons sold by the average number of single family residence customers for the same period and divide the result by 365 days.
- (b) If no historical flow data are available use:
ERC = (Total SFR gallons sold (omit 000/365 days/280 gallons per day).

NOT APPLICABLE
NO SYSTEM IN OPERATION

CERTIFICATION OF ANNUAL REPORT

I HEREBY CERTIFY, to the best of my knowledge and belief:

- YES NO 1. The utility is in substantial compliance with the Uniform System of Accounts prescribed by the Florida Public Service Commission in Rule 25-30.115 (1), Florida Administrative Code.
- YES NO 2. The utility is in substantial compliance with all applicable rules and orders of the Florida Public Service Commission.
- YES NO 3. There have been no communications from regulatory agencies concerning noncompliance with, or deficiencies in, financial reporting practices that could have a material effect on the financial statement of the utility.
- YES NO 4. The annual report fairly represents the financial condition and results of operations of the respondent for the period presented and other information and statements presented in the report as to the business affairs of the respondent are true, correct, and complete for the period for which it represents.

Items Certified

1. 2. 3. 4.

(signature of chief executive officer of the utility) *

1. 2. 3. 4.

(signature of chief financial officer of the utility) *

Each of the four items must be certified YES or NO. Each item need not be certified by both officers. The items being certified by the officer should be indicated in the appropriate area to the left of the signature.

Notice: Section 837.06, Florida Statutes, provides that any person who knowingly makes a false statement in writing with the intent to mislead a public servant in the performance of his duty shall be guilty of a misdemeanor of the second degree.

**Reconciliation of Revenue to
