10"	Compound	115.0		
10"	Turbine	145.0		
12"	Turbine	215.0		
			Total Water System Meter Equivalent	61

CALCULATION OF THE WATER SYSTEM EQUIVALENT RESIDENTIAL CONNECTIONS

Provide a calculation used to determine the value of one water equivalent residential connection (ERC).
Use one of the following methods:

(a) If actual flow data are available from the preceding 12 months, divide the total annual single family residence (SFR) gallons sold by the average number of single family residence customers for the same period and divide the result by 365 days.

(b) If no historical flow data are available, use:
ERC = (Total SFR gallons sold (Omit 000) / 365 days / 350 gallons per day)

ERC Calculation:

ERC =	1,725	gallons, divided by
	350	gallons per day
	365	days
	14.0	ERC's

CALCULATION OF THE WATER SYSTEM EQUIVALENT RESIDENTIAL CONNECTIONS

Provide a calculation used to determine the value of one water equivalent residential connection (ERC).
Use one of the following methods:

(a) If actual flow data are available from the preceding 12 months, divide the total annual single family residence (SFR) gallons sold by the average number of single family residence customers for the same period and divide the result by 365 days.

(b) If no historical flow data are available, use:
ERC = (Total SFR gallons sold (Omit 000) / 365 days / 350 gallons per day)

ERC Calculation:

ERC =	2,067	gallons, divided by
	350	gallons per day
	365	days
	16.0	ERC's

CALCULATION OF THE WATER SYSTEM EQUIVALENT RESIDENTIAL CONNECTIONS

Provide a calculation used to determine the value of one water equivalent residential connection (ERC).
Use one of the following methods:

(a) If actual flow data are available from the preceding 12 months, divide the total annual single family residence (SFR) gallons sold by the average number of single family residence customers for the same period and divide the result by 365 days.

(b) If no historical flow data are available, use:
ERC = (Total SFR gallons sold (Omit 000) / 365 days / 350 gallons per day)

ERC Calculation:

ERC =	311	gallons, divided by
	350	gallons per day
	365	days
	2.0	ERC's

Provide a calculation used to determine the value of one water equivalent residential connection (ERC).
Use one of the following methods:

(a) If actual flow data are available from the preceding 12 months, divide the total annual single family residence (SFR) gallons sold by the average number of single family residence customers for the same period and divide the result by 365 days.

(b) If no historical flow data are available, use:
ERC = (Total SFR gallons sold (Omit 000) / 365 days / 350 gallons per day)

ERC Calculation:

ERC =	2,244	gallons, divided by
	350	gallons per day
	365	days
	18.0	ERC's

OTHER WATER SYSTEM INFORMATION

Furnish information below for each system. A separate page should be supplied where necessary.

1. Present ERC's * that system can efficiently serve. 61
2. Maximum number of ERC's * which can be served. 61
3. Present system connection capacity (in ERC's *) using existing lines. 61
4. Future system connection capacity (in ERC's *) upon service area buildout. 61
5. Estimated annual increase in ERC's *. None
6. Is the utility required to have fire flow capacity? No
   If so, how much capacity is required? N/A
7. Attach a description of the fire fighting facilities. None
8. Describe any plans and estimated completion dates for any enlargements or improvements of this system.
   None
9. When did the company last file a capacity analysis report with the DEP? N/A
10. If the present system does not meet the requirements of DEP rules:
    a. Attach a description of the plant upgrade necessary to meet the DEP rules.
    b. Have these plans been approved by DEP? N/A
    c. When will construction N/A
    d. Attach plans for funding the required upgrading.
    e. Is this system under any Consent Order of the DEP? No
11. Department of Environmental Protection ID # 3054101
12. Water Management District Consumptive Use Permit # N/A
    a. Is the system in compliance with the requirements of the CUP? Yes
    b. If not, what are the utility's plans to gain compliance? N/A

* An ERC is determined based on the calculation on the bottom of Page W-13

4. Future system connection capacity (in ERC's *) upon service area buildout. 282
5. Estimated annual increase in ERC's * .
6. Is the utility required to have fire flow capacity? Yes
   If so, how much capacity is required? 250 gpm
7. Attach a description of the fire fighting facilities.
8. Describe any plans and estimated completion dates for any enlargements or improvements of this system.
   None
9. When did the company last file a capacity analysis report with the DEP? N/A
10. If the present system does not meet the requirements of DEP rules: N/A
    a. Attach a description of the plant upgrade necessary to meet the DEP rules.
    b. Have these plans been approved by DEP? N/A
    c. When will construction begin? N/A
    d. Attach plans for funding the required upgrading. N/A
    e. Is this system under any Consent Order of the DEP? N/A
11. Department of Environmental Protection ID # 6280064
12. Water Management District Consumptive Use Permit # 26456.004
    a. Is the system in compliance with the requirements of the CUP? Yes
    b. If not, what are the utility's plans to gain compliance?

12. Water Management District Consumptive Use Permit #	N/A
a. Is the system in compliance with the requirements of the CUP?	Yes
b. If not, what are the utility's plans to gain compliance?	

* An ERC is determined based on the calculation on the bottom of Page W-13

UTILITY NAME: Florida Water Services
SYSTEM NAME / COUNTY: St Johns Highlands / Putnam

YEAR OF REPORT
December 31, 2004

OTHER WATER SYSTEM INFORMATION

Furnish information below for each system. A separate page should be supplied where necessary.

1. Present ERC's * that system can efficiently serve. 96
2. Maximum number of ERC's * which can be served. 96
3. Present system connection capacity (in ERC's *) using existing lines. 96
4. Future system connection capacity (in ERC's *) upon service area buildout. 96
5. Estimated annual increase in ERC's * .
6. Is the utility required to have fire flow capacity?
   If so, how much capacity is required?
7. Attach a description of the fire fighting facilities.
8. Describe any plans and estimated completion dates for any enlargements or improvements of this system.
   None
9. When did the company last file a capacity analysis report with the DEP?
10. If the present system does not meet the requirements of DEP rules:
    a. Attach a description of the plant upgrade necessary to meet the DEP rules.
    b. Have these plans been approved by DEP?
    c. When will construction begin?
    d. Attach plans for funding the required upgrading.
    e. Is this system under any Consent Order of the DEP?
11. Department of Environmental Protection ID #
12. Water Management District Consumptive Use Permit #
    a. Is the system in compliance with the requirements of the CUP?
    b. If not, what are the utility's plans to gain compliance?

* An ERC is determined based on the calculation on the bottom of Page W-13

OTHER WATER SYSTEM INFORMATION

Furnish information below for each system. A separate page should be supplied where necessary.

1. Present ERC's * that system can efficiently serve. 95
2. Maximum number of ERC's * which can be served. 95
3. Present system connection capacity (in ERC's *) using existing lines. 95
4. Future system connection capacity (in ERC's *) upon service area buildout. 95
5. Estimated annual increase in ERC's * .
6. Is the utility required to have fire flow capacity? No
   If so, how much capacity is required? N/A
7. Attach a description of the fire fighting facilities.
8. Describe any plans and estimated completion dates for any enlargements or improvements of this system.
   None
9. When did the company last file a capacity analysis report with the DEP? N/A
10. If the present system does not meet the requirements of DEP rules: N/A
    a. Attach a description of the plant upgrade necessary to meet the DEP rules.
    b. Have these plans been approved by DEP?
    c. When will construction begin?
    d. Attach plans for funding the required upgrading.
    e. Is this system under any Consent Order of the DEP?
11. Department of Environmental Protection ID # 2541242
12. Water Management District Consumptive Use Permit # N/A
    a. Is the system in compliance with the requirements of the CUP?
    b. If not, what are the utility's plans to gain compliance?

Note: This data includes Group 37 Saratoga Hoarbour

OTHER WATER SYSTEM INFORMATION

Furnish information below for each system. A separate page should be supplied where necessary.

1. Present ERC's * that system can efficiently serve. 1,288
2. Maximum number of ERC's * which can be served. 1,288
3. Present system connection capacity (in ERC's *) using existing lines. 1,288
4. Future system connection capacity (in ERC's *) upon service area buildout. 1,288
5. Estimated annual increase in ERC's *. None
6. Is the utility required to have fire flow capacity? Yes
   If so, how much capacity is required? 600 gpm
7. Attach a description of the fire fighting facilities.
8. Describe any plans and estimated completion dates for any enlargements or improvements of this system.
   None
9. When did the company last file a capacity analysis report with the DEP? N/A
10. If the present system does not meet the requirements of DEP rules: N/A
    a. Attach a description of the plant upgrade necessary to meet the DEP rules.
    b. Have these plans been approved by DEP? N/A
    c. When will construction N/A
    d. Attach plans for funding the required upgrading.
    e. Is this system under any Consent Order of the DEP? No
11. Department of Environmental Protection ID # 3590186
12. Water Management District Consumptive Use Permit # 8362
    a. Is the system in compliance with the requirements of the CUP? Yes
    b. If not, what are the utility's plans to gain compliance? N/A

OTHER WATER SYSTEM INFORMATION

Furnish information below for each system. A separate page should be supplied where necessary.

1. Present ERC's * that system can efficiently serve.	60
2. Maximum number of ERC's * which can be served.	60
3. Present system connection capacity (in ERC's *) using existing lines.	60
4. Future system connection capacity (in ERC's *) upon service area buildout.	60
5. Estimated annual increase in ERC's *	None
6. Is the utility required to have fire flow capacity?	No
If so, how much capacity is required?	N/A
7. Attach a description of the fire fighting facilities.	None
8. Describe any plans and estimated completion dates for any enlargements or improvements of this system.	Main replacement program, 2005; Meter replacement program, 2005
9. When did the company last file a capacity analysis report with the DEP?	N/A
10. If the present system does not meet the requirements of DEP rules:	N/A
a. Attach a description of the plant upgrade necessary to meet the DEP rules.	
b. Have these plans been approved by DEP?	N/A
c. When will construction begin?	N/A
d. Attach plans for funding the required upgrading.	N/A
e. Is this system under any Consent Order of the DEP?	N/A
11. Department of Environmental Protection ID #	3590497
12. Water Management District Consumptive Use Permit #	8357
a. Is the system in compliance with the requirements of the CUP?	Yes
b. If not, what are the utility's plans to gain compliance?	N/A
