RE: TL727, Embarq Florida, Inc. - General Exchange Tariff

Dear Ms. Salak:

Attached for filing is the original and one (1) copy, including a CD, of the entire revised General Exchange Tariff to reflect the company name change from Sprint-Florida, Incorporated to Embarq Florida, Inc. This filing is submitted with a proposed effective date of June 5, 2006. Embarq's tariffs are available at website: www.sprint.com/tariffs.

Commission consideration and timely approval of these pages are respectfully requested. If you have any questions or need additional information regarding this filing, please contact me at (850) 599-1027.

Sincerely,

A handwritten signature in black ink, appearing to read "F. Ben Poag", written over a faint, larger version of the same signature.

GENERAL EXCHANGE TARIFF FOR THE STATE OF FLORIDA

This tariff contains regulations and rates applicable for the furnishing of Basic Local Exchange Service, Long Distance Message Telecommunications, Wide Area Telephone Service, Mobile Telephone Service, and for other general customer services, and facilities associated with the above services offered by Embarq Florida, Inc., the Telephone Company, and/or Company within the State. This tariff is on file with the Florida Public Service Commission.

This tariff replaces those previously filed with the Florida Public Service Commission for United Telephone Company of Florida and for Central Telephone Company of Florida.

Differences in rates and rate application between certain exchanges are noted. Wherever the designations United Telephone exchanges only and Central Telephone exchanges only appear in this tariff, they refer to particular exchanges as follows:

UNITED TELEPHONE

Apopka, Arcadia, Astor, Avon Park, Belleview, Beverly Hills, Boca Grande, Bonita Springs, Bowling Green, Bushnell, Cape Coral, Cape Haze, Clermont, Clewiston, Crystal River, Dade City, Eustis, Everglades, Forest, Fort Meade, Fort Myers, Fort Myers Beach, Groveland, Homosassa Springs, Howey-in-the-Hills, Immokalee, Inverness, Kenansville, Kissimmee, LaBelle, Lady Lake, Lake Placid, Leesburg, Lehigh Acres, Marco Island, Montverde, Moore Haven, Mount Dora, Naples, North Cape Coral, North Fort Myers, North Naples, Ocala, Ocklawaha, Okeechobee, Orange City, Pine Island, Port Charlotte, Punta Gorda, Reedy Creek, Saint Cloud, Salt Springs, San Antonio, Sanibel-Captiva Islands, Sebring, Silver Springs Shores, Spring Lake, Tavares, Trilacoochee, Umatilla, Wauchula, West Kissimmee, Weirsdale, Wildwood, Williston, Windermere, Winter Garden, Winter Park, Zolfo Springs

GENERAL EXCHANGE TARIFF
FOR THE STATE OF FLORIDA

CENTRAL TELEPHONE

Alford, Baker, Bonifay, Cherry Lake, Cottdale, Crawfordville, Crestview, DeFuniak Springs, Destin, Fort Walton Beach, Freeport, Glendale, Grand Ridge, Greenville, Greenwood, Kingsley Lake, Lawtey, Lee, Madison, Malone, Marianna, Monticello, Panacea, Ponce de Leon, Reynolds Hill, St. Marks, Santa Rosa Beach, Seagrove Beach, Shalimar, Sneads, Sopchoppy, Starke, Tallahassee, Valparaiso, Westville

Interstate communication services are furnished through facilities provided by the Company for the transmission of intelligence by electrical impulse, principally by means of wire, radio, or a combination of both.

Explanation of Symbols

When changes are made in any tariff sheet, a revised sheet will be issued canceling the tariff sheet affected; such changes will be identified through the use of the following symbols:

- (C) To signify changed regulation or tariff.
- (D) To signify discontinued rate, regulation or text.
- (I) To signify increase.
- (M) To signify a move from one sheet to another with no change in text, regulation or tariff.
- (N) To signify new rate, regulation or text.
- (O) To signify obsoleted rate, regulation or text, and a move to the obsolete service offerings section.

SECTION A1
First Revised Sheet 1
Cancelling Original Sheet 1
Effective: January 1, 1997

EXPLANATION OF TERMS

ACCESS LINES - A telephone facility between the station protector on the customer's telephone service or PBX to, and including, the serving central office main frame.

ACCESSORIES - Devices which are mechanically attached to, or used with, the facilities furnished by the Company and which are independent of, and not electrically, acoustically or inductively connected to the communications path of the telecommunications systems.

ACOUSTICAL CONNECTION - A connection made by sound.

ADD-ON - A feature which permits a station user to add another station to the conversation on incoming central office trunk calls.

AFFILIATED ENTITIES - Affiliated entities are those corporations, partnerships, proprietorships or other groups that hold stock in excess of fifty percent (50%) of the stock of the entity which claims to be affiliated.

AGENT OR REPRESENTATIVE - One authorized to act on behalf of another, usually by legal contract.

AIRLINE MEASUREMENT - The shortest distance between two points. Also see Mileage.

ALTERNATING CURRENT SUPPLY - Electrical energy which is used for power purposes, for protection of equipment in humid areas, and for the operation of bells and signal devices.

AUTHORIZED PROTECTIVE CONNECTING MODULE - A protective unit which is designed and manufactured in compliance with standards as set forth by Part 68 of the FCC rules and regulations.

GENERAL EXCHANGE TARIFF

Embarq Florida, Inc.

By: F. B. Poag
Director

SECTION A1
First Revised Sheet 2
Cancelling Original Sheet 2
Effective: January 1, 1997

EXPLANATION OF TERMS

AUTHORIZED USER - A person, firm, or corporation, other than the subscriber, who has been authorized by the Company to communicate over a private line or channel according to the terms of the tariff and (1) on whose premises a private line service is terminated or (2) who receives from or sends to the subscriber over such private line or channel communications relating solely to the business of the subscriber.

AUXILIARY LINE - An individual circuit connecting an additional main station with a central office for one-way (inward to the subscriber) service in order to relieve the load on the first individual line.

AUTOMATIC IDENTIFICATION OUTWARD DIAL (AIOD) - Provides the capability of automatically identifying the number being called and the number from which the call originates.

BASIC TERMINATION CHARGE - A charge applying when a subscriber discontinues a service prior to the expiration of the initial service period designated for such item. The basic termination charge is an amount established for an individual service from which the termination charge is computed.

BATTERY - Electrical energy for talking and signaling purposes other than ringing except in the case of intercommunicating systems when direct current may be used for ringing the station bells.

BAUD - A unit of signaling speed which is the reciprocal of the time duration in seconds of the shortest signal element (mark or space) within a code signal. The speed in bauds is the number of signal elements per second.

BILL TO THIRD PARTY - A billing arrangement by which a call can be charged to an authorized station as determined by the Company other than the station originating the call or the station where the call is terminated.

SECTION A1
First Revised Sheet 3
Cancelling Original Sheet 3
Effective: January 1, 1997

EXPLANATION OF TERMS

BRIDGING CONNECTION - Amplifying equipment and services required to connect a station, or an interexchange channel serving a station, at an intermediate point on an interexchange network or to connect an additional station at a terminal point.

BUILDING (SAME) - The term "Same Building," as it applies to other than Shared Tenant Service buildings, is to be interpreted as a structure under one roof, or two or more structures under separate roofs but connected by covered passageways not crossing public thoroughfares, in which the cable of the Company can be safely run provided the plant facility requirements are not appreciably greater than would be required normally if all structures were under one roof. In those cases where there are several structures under separate roofs, but connected by enclosed passageways and the plant facility requirements for furnishing telephone service are appreciably greater than would be required normally if all the structures were under one roof, the term "Same Building" applies individually to each of the separate structures. Pipes and conduit are not considered enclosed passageways.

BUILDING (SINGLE) - In a Shared Tenant Service application, the term "single building" means one structure under one roof. Separate buildings superficially connected are not considered as one building.

CALL - An attempted or completed communication.

CALL AGGREGATOR - Any vendor that, in the ordinary course of its operations, makes telephones available to the public or to transient users of its premises for telephone calls using a provider of operator services.

SECTION A1
First Revised Sheet 4
Cancelling Original Sheet 4
Effective: January 1, 1997

EXPLANATION OF TERMS

CALLING AREA LOCAL - The area within which telephone service is furnished subscribers under a specific schedule of exchange rates and without long distance charges. A local service area may include one or more exchange service areas under extended area service arrangements.

CANCELLATION CHARGE - A charge applicable under certain conditions when an application for service and/or facilities is canceled in whole or in part prior to the completion of the work involved.

CAPTION LISTING - The listing of the subscriber's name without address or telephone number followed by a series of indented listings covering branches or different departments of the business or other listings associated with the residence.

CENTRAL OFFICE - A switching unit for establishing telephone communication between stations by having the necessary equipment and operating arrangements for terminating and interconnecting lines and trunks.

CENTRAL OFFICE AREA - The specific section or area served by a single central office and serving all subscribers' lines which have a common central office designation.

CENTRAL OFFICE CONNECTING FACILITY - A facility furnished to an Other Common Carrier by the Company, in accordance with the Company's facilities for Other Common Carrier's tariffs, between the terminal location of the Other Common Carrier and a point of connection on the Company premises.

CENTRAL OFFICE LINE - A circuit extending from a central office to the demarcation point of an individual line, rotary line, or a PBX trunk.

SECTION A1
Fourth Revised Sheet 5
Cancelling Third Revised Sheet 5
Effective: March 1, 2003

EXPLANATION OF TERMS

CHANNEL - An electrical path suitable for the transmission of communications.

CHANNEL TERMINATION - The facilities required for terminating and connecting an interexchange channel to a station or the facilities required where, at the request of the customer, such an interexchange channel is terminated in a telephone company central office.

CLASS OF SERVICE - A description of telephone service furnished a customer in terms such as:

- a. For Exchange Service:
 - 1. Grade of Line: Individual Line
 - 2. Type of Rate: Flat Rate or Measured Rate
 - 3. Character of Use: Business or Residence
- b. For Long Distance Telecommunications Service:
 - 1. Type of Call: Station-to-Station, Person-to-Person, etc.
- c. For Wide area Telecommunications Service:
 - 1. Type of Rate: Outward or TFC Service

COIN DROP PAY TELEPHONE - A telephone station equipped with a device for collecting money in payment of telephone messages and used in connection with pay telephone service.

COINLESS PAY TELEPHONE - A pay telephone connected directly to the Telephone Company or another Carrier for the placing of collect, credit card and third-number billed calls only.

SECTION A1
First Revised Sheet 6
Cancelling Original Sheet 6
Effective: January 1, 1997

EXPLANATION OF TERMS

COLLECT CALL - A billing arrangement by which the charge for a call may be reversed (charged to the called station) provided the charge is accepted at the called station. A collect call may be billed to a credit card or third party number.

COMMISSION - Florida Public Service Commission.

COMMON BATTERY SERVICE - The type of telephone service in connection with which electrical energy for talking and signaling is supplied from a central point.

COMMUNICATING DEVICE - A device consisting of a transmitter, receiver, network control signaling unit, and associated apparatus and so connected as to permit the sending and receiving of telecommunication messages.

COMMUNICATING SYSTEMS - Channels and other facilities which are capable, when not connected to telecommunications services, of communications between customer-provided terminal equipment.

COMPANY - Whenever used in this tariff, "Company" refers to Embarq Florida, Inc., (formerly United Telephone Company of Florida and/or Central Telephone Company of Florida) unless the context clearly indicates otherwise.

COMPANY STATION - A station for which the central office equipment, lines and station equipment are owned and maintained by the company and provided as a part of the Company's service offering.

Director

SECTION A1
First Revised Sheet 7
Cancelling Original Sheet 7
Effective: January 1, 1997

EXPLANATION OF TERMS

COMPLETED CALL - A completed call is a calling attempt by the subscriber that results in an off-hook condition at the receiving end. Such conditions shall include the following actions:

- a. The called party responds by personally answering the call;
- b. A customer controlled automatic answering device responds by answering the call;
- c. A Company recording, under the control of the called party responds to the calling attempt (i.e., Call Block, Anonymous Call Rejection would be completed calls), except for attempts defined as incomplete calls; and/or
- d. The calling attempt, when under the control of the called party (i.e., Call Forwarding Busy, Call Forwarding Don't Answer, etc.), is forwarded to another telephone number which results in one of the conditions described preceding.

CONFORMANCE NUMBER - An identifying number assigned by the FCC to a particular model of conforming answering device incorporating an authorized protective connecting module when that model or device is in conformance with the provisions set forth by the FCC in its technical reference for conforming answering devices.

CONFORMING ANSWERING DEVICE - A customer-provided device which automatically answers incoming calls; transmits a prerecorded voice message or appropriate audible signal to the calling party; records a voice message from the calling party if so designed and arranged; and automatically disconnects from the line in a prearranged manner on completion of the last of the functions for which it was designed and arranged as described in this paragraph. The conforming answering device may include remote interrogation and/or device function control. A conforming answering device must incorporate an authorized protective connecting module and must bear a valid conformance number.

SECTION A1
First Revised Sheet 8
Cancelling Original Sheet 8
Effective: January 1, 1997

EXPLANATION OF TERMS

CONNECTING ARRANGEMENT - The protective equipment to accomplish a direct electrical connection of customer-provided facilities with the facilities of the Company, or of facilities of the Company with other facilities of the Company when such customer provided equipment does not conform with the FCC Rules and Regulations on terminal equipment.

CONNECTING COMPANY - A corporation, association, firm or individual owning and operating a toll line and/or one or more central offices providing local exchange telephone service to the public and with whom the Company interchanges traffic.

CONSTRUCTION CHARGE - A separate initial charge authorized in the tariff for construction of pole lines, circuits, facilities, etc., in excess of that contemplated under the rates quoted in the exchange tariffs.

CONSULTATION HOLD - Permits a station user to hold an existing external call while originating a new call for the purpose of consultation. After consultation, the initial call can be restored.

GENERAL EXCHANGE TARIFF

Embarq Florida, Inc.

Director

SECTION A1
First Revised Sheet 9
Cancelling Original Sheet 9
Effective: January 1, 1997

EXPLANATION OF TERMS

CONTINUOUS PROPERTY - A continuous plot of ground, including any building thereon, which is used exclusively by the customer (or by an authorized user of the customer's service) and which is not separated by property occupied by others.

Application of continuous property treatment to the campus of a college or university will be based upon the following:

- a. In evaluating "continuous property" for a college or university, especially in a metropolitan area, a map of an individual campus of a college or university will be considered for determining continuous property.
- b. The addition of properties, not shown on the original map, when being made a part of the campus, will be reviewed by the Company for consideration as continuous property.
- c. Where maps are not available, the Company will review the general campus area in determining whether off-campus property additions can reasonably be considered as continuous property.

CONTRACT - The service agreement between a customer and the Company under which service and facilities for communication between specified locations for designated periods and for the use of the customer and the authorized users specifically named in the contract are furnished in accordance with the provisions of this tariff.

CONTRACT PERIOD - The length of time for which a subscriber is responsible for the charges associated with service and facilities.

COST - Wherever the word "cost" is used in this tariff, it is intended to cover the cost of labor, material, and incidentals, plus a charge for supervision.

GENERAL EXCHANGE TARIFF

Embarq Florida, Inc.

By: F. B. Poag
Director

SECTION A1
First Revised Sheet 10
Cancelling Original Sheet 10
Effective: January 1, 1997

EXPLANATION OF TERMS

CUSTOMER - Any person, firm, partnership, corporation, municipality, cooperative organization or government agency furnished communication service by the Company under the provisions and regulations of its tariff. Same as "subscriber".

CUSTOMER OF RECORD/SUBSCRIBER OF RECORD - A person, firm, partnership, corporation, municipality, cooperative organization or government agency which orders and is responsible for paying the telephone bill for any form of exchange service furnished by the Company. A subscriber may also be the agent for multi subscribers when the exchange service is for residential individual line service and the service will be used by multi owners of the individual residential apartment, the individual residential condominium unit apartment or the single-occupancy residential house.

CUSTOMER PREMISES - The discrete real property owned, leased, or controlled by a customer for the customer's own business or residential purposes.

CUSTOMER PREMISES EQUIPMENT (CPE) - Terminal equipment owned and maintained by the customer, such as telephone sets, data terminal equipment, key system equipment, etc. CPE does not include Company-provided pay stations, terminal equipment used for official telephone company business, subscriber multiplexing terminal equipment, subscriber pair gain equipment, transmit earth stations, telecommunications devices for the deaf (TDD) or E911 PSAP equipment.

CUSTOMER-PROVIDED TERMINAL EQUIPMENT - Devices or apparatus and their associated wiring, provided by a customer, which do not constitute a communications system and which, when connected to the communications path of the telecommunications system, are so connected either electrically, acoustically, or inductively.

GENERAL EXCHANGE TARIFF

Embarq Florida, Inc.

By: F. B. Poag
Director

SECTION A1
First Revised Sheet 11
Cancelling Original Sheet 11
Effective: January 1, 1997

EXPLANATION OF TERMS

DATA ACCESS ARRANGEMENT - A protective connecting arrangement for use with the network control signaling unit, or, in lieu of the connecting arrangement, an arrangement to identify a central office line and protective facilities and procedures to determine compliance with criteria set forth in this tariff.

DATA SET - A device designed to accept from and/or impart to data transmitting and/or receiving terminal equipment material in the form produced and/or accepted by the terminal equipment into a form acceptable for transmission over network facilities.

DEMARCATIION POINT - The point of physical interconnection (connecting block, terminal strip, jack, protector, optical network interface or remote isolation device) between the telephone network and the customer's premises wiring. This point is part of the telephone network provided and maintained by the Telephone Company under tariff. The location of this point is:

- a. Single line/single customer building - either at the point of physical entry to the building, or at a junction point as close as practicable to the point of entry.
- b. Single line/multi customer building - within the customer's premises at a point easily accessed by the customer.
- c. Multi line systems/single or multi-customer building - at a point within the same room or within 25 feet of the FCC registered terminal equipment or cross-connect field.
- d. Temporary Accommodations Subscriber Premises with inadequate grounding (i.e., some mobile homes, trailers, houseboats, construction modules) - on a permanent stake, pole or structure with a suitable safety ground.

GENERAL EXCHANGE TARIFF

Embarq Florida, Inc.

By: F. B. Poag
Director

SECTION A1
First Revised Sheet 12
Cancelling Original Sheet 12
Effective: January 1, 1997

EXPLANATION OF TERMS

DIGILINK SERVICE - A digital transmission service designed to transmit signals end to end over digital facilities routed through the Company's central offices. DigiLink is furnished at synchronous rates of 2.4, 4.8, 9.6, 19.2 and 56 Kbps between two or more points located within the same LATA. This service is available in United Telephone exchanges only.

DIRECT BURIAL - The installation of cables or conductors directly in the earth and not in conduit or duct.

DIRECT CONNECTION - Connection of terminal equipment to exchange facilities by means other than acoustic and/or inductive coupling.

DIRECT CURRENT SUPPLY - Electrical energy for talking and signaling purposes other than ringing. However, in some inter-communicating systems, direct current may be used for ringing the station bells.

DIRECT ELECTRICAL CONNECTION - A physical connection of the electrical conductors in the communications path.

DIRECTORY ASSISTANCE CALL COMPLETION (DACC) - A service which provides customers who dial Directory Assistance from a touch-tone telephone the option of having the requested local or intraLATA telephone number automatically dialed and the call completed by the automated Directory Assistance System.

DIRECTORY LISTING - The publication in the Company's directory and/or directory assistance records of information relative to a subscriber's telephone number, by which telephone users are able to ascertain the call number of a desired station.

GENERAL EXCHANGE TARIFF

Embarq Florida, Inc.

By: F. B. Poag
Director

SECTION A1
First Revised Sheet 13
Cancelling Original Sheet 13
Effective: January 1, 1997

EXPLANATION OF TERMS

DISCONTINUANCE OF SERVICE - An arrangement made at the request of the subscriber, or initiated by the Company for violation of tariff regulations by the subscriber, for a permanent interruption of telephone service. Once effected, telephone equipment would be removed, if appropriate, from the subscriber's premises and a "final" bill would be rendered showing monies owed to the Company as of the date service was disconnected.

DORMITORY STATION - A station furnished to a college or university and located in the living quarters of students, faculty members, or employees.

DROP WIRE - Wires used to connect the circuits of open wire, aerial, buried, or underground distribution facilities to a point of entrance to the building where connection is made with the inside wiring.

DUPLEX SERVICE - Service which provides for simultaneous transmission in both directions.

EQUALIZATION - The treatment applied to a telecommunications channel so that the component frequencies of the program material transmitted have about the same relationship at the two ends of the channel.

ENTERPRISE SERVICE - A service plan by which a subscriber can offer his/her customers in selected areas the privilege of calling him/her without payment of toll charges and without having to request that charged be reversed.

GENERAL EXCHANGE TARIFF

Embarq Florida, Inc.

By: F. B. Poag
Director

SECTION A1
Second Revised Sheet 14
Cancelling First Revised Sheet 14
Effective: May 29, 1997

EXPLANATION OF TERMS

EXCHANGE - An area served by a central office or group of central offices, together with the subscriber's lines connected thereto, forming a local system which furnishes means of telephone intercommunication without toll charges between subscribers within a specified area, usually a single city, town or village; a toll rate center. When an exchange includes only one central office, it is termed a single office exchange, but when it includes more than one central office, the exchange is termed a multi office exchange.

EXCHANGE LINE - Any line (circuit) directly or indirectly connecting an exchange station with a central office. Exchange lines are subdivided into Central Office Lines, Main Station Lines, Extension Station Lines, Extension Lines, PBX station Lines, Centrex Station Lines and Tie Lines.

EXCHANGE SERVICE - The general telephone service rendered in accordance with tariff provisions. Exchange service is a general term describing as a whole, the facilities provided for local intercommunication, together with the right to originate and receive a specified or an unlimited number of local messages at charges in accordance with the provisions of this tariff.

EXCHANGE SERVICE AREA - The geographical area served by an exchange within which local telephone service is furnished at the exchange rates applicable within that exchange.

EXTENDED AREA SERVICE - A type of telephone service furnished under tariff provisions whereby subscribers of a given exchange may complete calls to and, where provided by the tariff, receive calls from one or more exchanges without the application of long distance message telecommunication charges.

SECTION A1
First Revised Sheet 15
Cancelling Original Sheet 15
Effective: January 1, 1997

EXPLANATION OF TERMS

EXTENSION LINE - A circuit connecting an extension telephone or extension bell with the telephone circuit to which the main telephone is connected or for connecting a Private Branch Exchange (PBX) station to a PBX switchboard or to another PBX station.

EXTENSION LINE MILEAGE - The measurement applying to that portion of an extension line in excess of the length provided by the Company without additional charge.

FLAT RATE SERVICE - A classification of exchange service for which a stipulated charge is made, regardless of the amount of use.

FOREIGN CENTRAL OFFICE MILEAGE - The measurement applying to a line within the exchange connecting a subscriber's main access line or PBX trunk with a central office other than that from which he/she would normally be served, for the use of which a separate circuit charge is made in addition to the basic rate.

FOREIGN CENTRAL OFFICE SERVICE - A classification of exchange service furnished to a customer in a multi-office exchange from a central office other than the one from which service would normally be furnished.

FOREIGN EXCHANGE LISTING - The listing of a subscriber in the alphabetical list of an exchange other than that for the exchange from which the subscriber is served.

FOREIGN EXCHANGE MILEAGE - The measurement applying to a line connecting a subscriber's main line or PBX trunk with a central office of an exchange other than that from which the subscriber would normally be served, for the use of which a separate charge is made in addition to the basic rate.

SECTION A1
First Revised Sheet 16
Cancelling Original Sheet 16
Effective: January 1, 1997

EXPLANATION OF TERMS

FOREIGN EXCHANGE SERVICE - A classification of exchange service furnished to a customer from an exchange other than the one from which he/she would normally be served.

GENERATOR - A mechanical device for producing electrical current for ringing. Generators designed to be hand-operated are termed "hand generators" and those which are not to be hand-operated are termed "power generators."

GRADE OF SERVICE - The type of service which may be provided to a customer over a telephone access line, such as individual residence, business, rotary or PBX.

HALF DUPLEX SERVICE - Service which provides for transmission alternately in either direction or for transmission in one direction only.

HARM - Electrical hazards to persons, damage to Company equipment, malfunctions of Company billing equipment, and degradation of service to persons other than the user of the subject terminal equipment or communications system, as well as the calling or called party.

HOST OFFICE - Denotes an electronic switching system which provides call processing capabilities for one or more Remote Modules or Remote Systems.

HUB - Denotes a Company designated wire center where bridging or multiplexing functions are performed.

INCOMPLETE CALL ATTEMPT - Calls that are not completed due to insufficient answering capability. Call attempts are considered incomplete if the calling party receives a busy signal, a ring with no answer, or a recorded message stating network difficulty in completing the call, number changed, number invalid, number not in service or number not assigned.

SECTION A1
Second Revised Sheet 17
Cancelling First Revised Sheet 17
Effective: April 1, 1997

EXPLANATION OF TERMS

INDENTED LISTING - A directory listing indented under another listing.

IDENTIFICATION OUTWARD DIALING - Provides the capability of identifying the number being called and the number from which the call originates.

INDIVIDUAL LINE SERVICE - A classification of exchange service which provides that only one main station shall be served by the line connecting such station with the central office or other switching unit.

INDUCTIVE CONNECTION - A connection made by using the electromagnetic field generated by the telephone equipment.

INITIAL SERVICE PERIOD - The minimum period of time for which service, facilities, and equipment are provided.

INSTALLATION CHARGE - A nonrecurring charge applying to the provision of certain services or facilities as distinguished from the service connection charge applicable for establishment of basic telephone service. The installation charge is normally associated with optional service features and may sometimes be called an "initial" charge.

SECTION A1
Third Revised Sheet 18
Cancelling Second Revised Sheet 18
Effective: April 9, 1999

EXPLANATION OF TERMS

INTERCEPT SERVICE - A service arrangement whereby calls placed to an unequipped nonworking, a disconnected or discontinued telephone number are intercepted by operator, recording or audio response computer, and the calling party is informed that the called telephone number is not in service, has been disconnected, discontinued, or changed to another number, or that calls are received by another telephone. This service is also provided in certain central offices or switching centers to inform the calling party of system blockages, inability of the system to complete a call as dialed, no such office code, all circuits busy, etc.

INTERFACE - That point on the premises of the customer at which provision is made for connection of other than telephone company provided facilities to exchange facilities provided by the Telephone Company.

INTEROFFICE CHANNEL - That element of a private line service which interconnects Local Channels which serve customers located in different central office areas (wire center serving areas).

LIFELINE ASSISTANCE - A program sponsored by the Federal Communications Commission which provides reduction in the price of basic local residential exchange access service to qualifying low-income subscribers.

LINK-UP FLORIDA - A state-approved, FCC authorized assistance program which provides a specific credit to and a deferred payment schedule of the nonrecurring charges for the establishment of service to qualified residence customers.

LISTING - The publication in the Company's directory and/or directory assistance records of information relative to a subscriber's telephone number, by which telephone users are able to ascertain the call number of a desired station.

SECTION A1
Second Revised Sheet 19
Cancelling First Revised Sheet 19
Effective: May 29, 1997

EXPLANATION OF TERMS

LOCAL CALLING AREA/LOCAL SERVICE AREA - The area within which telephone service is furnished subscribers under a specific schedule of exchange rates and without long distance charges. A local service area may include one or more exchange service areas under extended area service arrangements.

LOCAL CHANNEL - The element of a private line service required for connecting customer premises to the serving wire center.

LOCAL EXCHANGE SERVICE - The general telephone service, provided under a specified schedule of rates, which allows a subscriber to originate and receive calls from his/her telephone line through facilities provided for local intercommunication to other telephone lines within a specified area without payment of toll charges. Local exchange service rates may or may not be based on usage, and generally include provisions for the local exchange access line and extended calling privileges to one or more exchange areas where applicable.

LOCAL MEASURED SERVICE - A classification of exchange service which may be charged on the basis of local usage, as determined by one or more of the following: 1) the number of calls, 2) the duration of the calls, 3) the distance of the calls, or 4) the time of day the calls are placed.

LOCAL MESSAGE - A communication between a calling telephone and any other telephone within the local service area of the calling telephone.

LOCAL SERVICE AREA/LOCAL CALLING AREA - The area within which telephone service is furnished subscribers under a specific schedule of exchange rates and without long distances charges. A local service area may include one or more exchange service areas under extended area service arrangements.

EXPLANATION OF TERMS

LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE - The furnishing of facilities for customers' telephone communications on an individual message basis between the rates centers or, in connection with toll stations, within the same rate center. The toll service charges specified are in payment for all service furnished between the calling and called telephones.

LONG DISTANCE TERMINAL - A subscriber's station used exclusively for toll service and directly connected with the Toll Switchboard.

MAIN STATION LINE - Any line (circuit) directly or indirectly connecting an exchange station with a central office. Exchange lines are subdivided into Central Office Lines, Main Station Lines, Extension Station Lines, Extension Lines, PBX station Lines, Centrex Station Lines and Tie Lines.

MANUFACTURER DISCONTINUED - Items of regulated equipment which are no longer manufactured. Existing stock items in this category may continue to be offered and provided until available stock is depleted.

MESSAGE - A communication between two telephone stations. Messages may be classified as local or toll.

MESSAGE RATE SERVICE - A classification of exchange service which is charged for on the basis of amount of use.

MILEAGE - A charge applying for the use of part or all of a circuit furnished by the Company in addition to the basic rate for service, including airline measurement, route measurement, etc.

MISCELLANEOUS COMMON CARRIERS - Communications Common Carriers, as defined in Part 21 of the FCC Rules, which are not engaged in the business of providing either a public landline message telephone service or public message telegraph service.

SECTION A1
Second Revised Sheet 21
Cancelling First Revised Sheet 21
Effective: July 14, 2001

EXPLANATION OF TERMS

MOBILE TELEPHONE SERVICE - A communication service through a land-radiotelephone base station and between a wire telephone and a mobile unit or between two mobile units.

MOVE - A change in the location on the same premises which does not involve a change in the class or grade of service, a change in the rate charged for service furnished, or a break in the continuity of the contract under which the service is furnished.

N11 SERVICES - Abbreviated three (3)-digit dialing codes which allow the caller to connect to a location in the local telephone network that otherwise would be accessible only through a seven (7)- or ten (10)-digit telephone number. The local telephone network must be preprogrammed to translate the three-digit code into the appropriate seven- or ten-digit telephone number and route the call accordingly. Among abbreviated dialing arrangements, "N11" codes are three-digit codes of which the first digit can be any digit other than 0 or 1, and the last two digits are both 1. 0 and 1 are unavailable because those digits are used for switching and routing. The following N11 codes have been designated by the FCC or by the telephone industry for the purpose listed below:

N11 CODE

Purpose

211	Allows access to community information and referral services. Designated by the FCC.
311	Allows access to non-emergency police and government services. Designated by the FCC.
411	Traditionally allows access to local directory assistance services of local telephone companies. Not designated by the FCC.
511	Allows access to traveler information services. Designated by the FCC.
611/811	Traditionally allows access to local telephone company repair and business offices. Not designated by the FCC.
711	Allows access to Telecommunications Relay Services (TRS) for individuals with hearing or speech disabilities. Designated by the FCC.
911	Federally mandated as the National Emergency Number and allows access to emergency services. Designated by the FCC and ordered by the United States Congress.
011/111	Not available. "0" and "1" are used for switching and routing purposes.

NETWORK CONTROL SIGNALING - The transmission of signals used in the telecommunications system which perform functions such as supervision (control, status, and charging signals), address signaling (dialing), calling and called number identification, audible tone signals (call progress signals indicating reorder or busy conditions, alerting, coin denominations, coin collect and coin return tones) to control the operation of switching machines in the telecommunications system.

NETWORK CONTROL SIGNALING UNIT - The terminal equipment furnished, installed and maintained by the Company for the provision of network control signaling.

NETWORK INTERFACE - That point on the premises of the customer at which provision is made for connection of other than telephone company provided facilities to exchange facilities provided by the Telephone Company.

NONLISTED TELEPHONE NUMBER - An exchange telephone number which, at the subscriber's request, is not listed in the directory but is carried in Directory Assistance Records.

GENERAL EXCHANGE TARIFF

SECTION A1
Second Revised Sheet 22
Cancelling First Revised Sheet 22
Effective: April 1, 1997

EXPLANATION OF TERMS

NONPUBLISHED TELEPHONE NUMBER - An exchange telephone number which, at the subscriber's request, is not listed in the directory and is not made available to the general public by the Company. The Company may decline to furnish the call number of such lines or may decline to complete connections with such lines unless the number is furnished by the calling party.

NONRECURRING CHARGE - A charge that does not occur again after it is once made.

OTHER COMMON CARRIER - A common carrier (when not engaged in the business of furnishing public switched network telephone services or of furnishing domestic private line voice or data service via terrestrial facilities), a Domestic or International Public Record Carrier, or a Domestic Satellite Carrier.

PAY TELEPHONE SERVICE (PATS) - A class of service furnished to individuals, firms or corporations which permits connection of a customer-provided instrument that is activated by the deposit of coins, cards, tokens, or the entry of a customer account number, to the lines of the Company.

PAY STATION - A telephone station equipped with a device for collecting money in payment of telephone messages and used in connection with pay telephone service.

PERSON-TO-PERSON CALL - A service whereby the person originating the call specifies to the telephone company operator a particular person to be reached, a particular mobile station to be reached through a Miscellaneous Common Carrier attendant, or a particular station, department, or office to be reached through a PBX attendant.

SECTION A1
First Revised Sheet 23
Cancelling Original Sheet 23
Effective: January 1, 1997

EXPLANATION OF TERMS

PORT - Denotes the point of access into a computer, a network, or other electronic devices.

PREMISES (same) - The term "Same Premises" (except in connection with inside moves) shall be interpreted to mean:

- (a) the building or buildings, together with the surrounding land occupied or used in the conduct of one establishment or business, or as a residence, and not intersected by a public thoroughfare or by property occupied by others; or
- (b) the portion of the building occupied by the customer, either in the conduct of his/her business or as a residence, and not intersected by a public corridor or by space occupied by others; or
- (c) the building or portion of a building occupied by the customer in the conduct of his/her business and as a residence provided both the business and residence bear the same street address; or
- (d) the continuous property operated as a single farm not intersected by a public thoroughfare.

In connection with inside moves, the term "Same Premises" is to be interpreted to mean the building or portion of a building occupied as a unit by the customer in the conduct of his/her business or residence, or a combination thereof, and not intersected by a public thoroughfare, a corridor or space occupied by others.

SECTION A1
First Revised Sheet 24
Cancelling Original Sheet 24
Effective: January 1, 1997

EXPLANATION OF TERMS

PRIMARY CLASS OF SERVICE - Any of those classes of service which the Company undertakes to furnish at any point within a specific exchange at a rate common to all applicants for the same class located in the same area.

PRIMARY LOCATION - The continuous property designated by the customer as the primary location and at which the attendant's position is located.

PRINCIPAL LOCATION - The premises of the customer at which the largest number of main stations are located.

PRIVATE BRANCH EXCHANGE (PBX) TRUNK - A central office line (circuit) connecting a customer-provided PBX system with a central office.

PRIVATE LINE - A circuit provided to furnish communication only between two or more terminals directly connected to it and not having connection with either central office or private branch exchange switching apparatus.

PRIVATE LINE NETWORK - Two or more private line units of the same type contracted for by one customer and reaching one or more common service points. The lines may be operated separately or they may be connected or connectable by means of a switching arrangement.

PRIVATE LINE SERVICE - The channels or the channels and equipment furnished to a customer for communication between specified locations.

PROTECTIVE CONNECTING ARRANGEMENT - Equipment provided for electrical protection when facilities provided by other than the Company are connected with facilities provided by the Company.

SECTION A1
Third Revised Sheet 25
Cancelling Second Revised Sheet 25
Effective: November 27, 1998

EXPLANATION OF TERMS

PAY TELEPHONE - An appropriate equipped piece of customer premises equipment (CPE) installed at a location chosen or accepted as suitable and for furnishing services to the general public for a fee.

RATE CENTER - A specified geographical location within an exchange area from which mileage measurements are determined for the application of rates between exchange areas.

REFERENCE LISTING - The listing of a generally accepted name of a firm or corporation followed by a reference to another listing.

REGISTERED PROTECTIVE CIRCUITRY - Separate, identifiable, and discrete electrical circuitry designed to protect the telephone network from harm, and registered in accordance with Part 68 of the FCC Rules and Regulations.

REGISTERED TERMINAL EQUIPMENT - Terminal equipment which is registered in accordance with Part 68 of the FCC Rules and Regulations.

REMOTE MODULES AND/OR REMOTE SYSTEMS - Denotes small end offices which obtain their call processing capability from a Host Office. When a Remote Module (RM) or a Remote System (RS) has its own NXX, the RM or RS will be considered the central office or wire center for private line rating purposes. When an RM or RS shares the NXX of the Host Office, the Host Office will be considered the central office or wire center for rating purposes.

RESTORATION CHARGE - A charge made for restoring service after service has been suspended (temporarily interrupted) at the request of the subscriber or by the Company for violation of tariff regulations by the subscriber.

Director

SECTION A1
First Revised Sheet 26
Cancelling Original Sheet 26
Effective: January 1, 1997

EXPLANATION OF TERMS

ROTARY LINE SERVICE - A service arrangement which allows calls made to a busy number to be completed to another idle line in that rotary number group.

ROUTE MEASUREMENT - The actual length of a circuit between two points.

SAME CUSTOMER - In order for different services to be considered as furnished to the "same customer", such services must be billed in the same name. The business and residence service of a customer qualify as being furnished to the "same customer" even though the business service is furnished in other than his/her own name.

SECRETARIAL LINES - Extension station or main station lines of patrons of a telephone answering bureau which terminate in telephone answering facilities on the premises of the bureau so as to permit the bureau attendant to answer incoming calls on such lines.

SERVICE CONNECTION CHARGE - A nonrecurring charge applying to the establishment of basic telephone service for a subscriber and certain subsequent additions to that service.

SERVICE LINES - A two-way business individual line, a dial PBX main station, or an extension of any of the before mentioned, which is required for testing of certain services provided by the Company and which is to be billed at the existing tariff rate.

SERVICE POINT - When used in connection with customer-provided communication channels, this term denotes the point on the customer's premises where such channels or facilities are terminated in switching equipment used for communications with stations or customer-provided terminal equipment located on the premises.

SECTION A1
First Revised Sheet 27
Cancelling Original Sheet 27
Effective: January 1, 1997

EXPLANATION OF TERMS

SERVING CENTRAL OFFICE - The central office from which a customer or authorized user would normally be served for local exchange telephone service.

SHARED TENANT PROVIDER - One who has been granted a certificate of public convenience and necessity by the Florida Public Service Commission to provide Shared Tenant Services in accordance with Chapter 86-270 Laws of Florida (or Section 364.339 Florida Statutes (Supp. 1986).

SHARED TENANT SERVICE - A class of resold local exchange service furnished through a common switching or billing arrangement to commercial or residential tenants within a single building by a provider other than an existing local exchange telephone company.

STATION - The equipment located at the customer's premises at which the line facilities terminate to provide exchange, long distance and other communications services.

In connection with private line services, a station consists of the transmitting or receiving equipment, or combination transmitting and receiving equipment, at any location on a premises and connected for private line service; or, where the service involves only channels, a station is any point on a premises at which a channel is terminated.

In connection with private line channels, a station is any point on the premises of a customer or authorized user at which a private line channel is terminated.

In connection with program transmission channels, a station includes points designated by a customer on premises other than those of the customer or an authorized user at which material is transmitted to or received from a program transmission channel. A point of connection or interexchange and local channels is not considered to be station.

SECTION A1
First Revised Sheet 28
Cancelling Original Sheet 28
Effective: January 1, 1997

EXPLANATION OF TERMS

STATION ARRANGEMENT - The Company-provided equipment which is necessary to condition the signals from CPE to insure that such signals are acceptable for transmission over 150 baud private line channels.

STATION CONNECTION - Amplifying equipment and service including special supervision which may be required when a station transmits a program to or receives a program from an interexchange network.

STATION TERMINATION - The connection to the exchange access line through a standard plug, jack, or equivalent.

STATION-TO-STATION CALL - A service whereby the person originating the call either dials the telephone number desired or gives to the telephone company operator the telephone number of the desired telephone, Miscellaneous Common Carrier connecting circuit, PBX or PBX station which is reached directly rather than through a PBX attendant, or gives only the name and address under which such number is listed and does not specify a particular person to be reached, nor a particular mobile station to be reached through a Miscellaneous Common Carrier attendant, nor a particular station, department or office to be reached through a PBX attendant.

SUBSCRIBER OF RECORD/CUSTOMER OF RECORD - A person, firm, partnership, corporation, municipality, cooperative organization or government agency which orders and is responsible for paying the telephone bill for any form of exchange service furnished by the Company. A subscriber may also be the agent for multi subscribers when the exchange service is for residential individual line service and the service will be used by multi owners of the individual residential apartment, the individual residential condominium unit apartment or the single-occupancy residential house.

SECTION A1
First Revised Sheet 29
Cancelling Original Sheet 29
Effective: January 1, 1997

EXPLANATION OF TERMS

SUPPLEMENTAL CONTRACT - A contract for service or facilities in addition to that provided for under the original contract.

SUSPENSION OF SERVICE - An arrangement made at the request of the subscriber, or initiated by the Company for violation of tariff regulations by the subscriber, for temporary interruption of service without terminating the service agreement. Although the service is rendered inoperable, the facilities are reserved in anticipation that normal service will be resumed at some future date.

TELECOMMUNICATIONS SERVICES - The services offered by the Company as specified in this General Exchange Tariff.

TELECOMMUNICATIONS SERVICE PRIORITY (TSP) SYSTEM - A service developed by the National Communications System (NCS) of the Federal Government which provides the regulatory, administrative and operational procedures authorizing the priority installation and/or priority restoration of National Security Emergency Preparedness (NSEP) telecommunications services.

TELEPHONE ANSWERING SERVICE - A service provided by other than the local exchange company for the purpose of answering customer telephone lines at a central location, either as a primary line or an extension of a primary line, when the customer is absent or does not desire to answer calls personally.

TELEPHONE NETWORK INTERFACE (TNI) DEVICE - A device installed by the Company on the customer's premises that establishes a point of demarcation between network facilities provided by the Company for connection to facilities provided by other than the Company. See DEMARCATION POINT.

SECTION A1
Third Revised Sheet 30
Cancelling Second Revised Sheet 30
Effective: March 1, 2001

EXPLANATION OF TERMS

TELEPHONE NUMBER - A designation assigned to an access line, central office line, or PBX trunk for convenience in placing calls and for identification in the assessment of message charges, etc. Such designation usually consists of a seven-digit number comprised of a three-digit central office code (name or numeral) followed by a four-digit line number.

TELEPHONE OR TELECOMMUNICATIONS NETWORK - The local telephone exchange and long distance message telecommunications facilities or network, for both interstate and intrastate.

TEMPORARY SERVICE - Private line service furnished for a period of less than one month.

TERMINATION CHARGE - A charge applying when a subscriber discontinues an item of service prior to the expiration of the initial service period designated for such item. The basic termination charge is an amount established for an individual item of service from which the termination charge is computed.

TERMINATION OF SERVICE - An arrangement made at the request of the subscriber, or initiated by the Company for violation of tariff regulations by the subscriber, for permanent discontinuance of service.

THIRD PARTY BLOCK SERVICE - A service that blocks the placing of monthly recurring charges on customers' telephone bills by third party service providers.

TIE LINES - A circuit connecting two switching systems, either PBX and/or ACD systems, for the purpose of inter-communicating between the stations connected with such switching systems.

TIE LINE MILEAGE - The measurement upon which the rate for tie lines is based in accordance with tariff provisions.

TOLL BLOCKING - A service that enables the customer, by means of Telephone Company operator identification, to restrict outgoing toll calls from station users and prohibits the charging of calls to the customer's telephone number(s) via alternate billing arrangements, such as third number or collect billing.

SECTION A1
Third Revised Sheet 31
Cancelling Second Revised Sheet 31
Effective: March 1, 2003

EXPLANATION OF TERMS

TOLL FREE CALLING (TFC) - Denotes a three-digit Numbering Plan Area (NPA) or Area Code that is specifically assigned by the telecommunications industry for use by Telecommunications Services Providers in the provision of telephone numbers that, unlike traditional telephone numbers and calls, when dialed are toll free to the originating caller. The specific codes assigned and used, or reserved for use, for this purpose are 800, 822, 833, 844, 855, 866, 877, and 888.

TOLL MESSAGE - A communication between two telephone stations, the called station being outside of the local service area of the station from which the message originates.

TOLL SERVICE - That part of the total telephone service rendered by the Company which is furnished between patrons in different rate centers in accordance with the rates and regulations specified in the Company's Toll Tariff.

TOUCH-TONE CALLING SERVICE - A classification of exchange service furnished from certain specified central offices whereby calls are originated through the use of pushbuttons in lieu of a rotary dial. Touch-Tone is included in the monthly exchange rates for Individual, Key, Centrex, Trunk and Pay Telephone Service lines.

TRANSIENT - One temporarily occupying the premises, with occupancy not to exceed nine (9) months.

TRANSITIONAL LIFELINE ASSISTANCE - A transitional program which provides a reduction of basic local telecommunication service for any Lifeline subscriber who no longer qualifies for Lifeline Assistance.

TROUBLE LOCATION CHARGE - The nonrecurring charge applicable in connection with a service difficulty, or acceptance testing of customer provided premises wiring, when it is determined that the difficulty was caused by or resulted from the use of CPE including intra-system wiring, protective circuitry, or communications systems connected to Company facilities and requiring a premises visit.

UNAFFILIATED ENTITY - One that controls less than 50% of another entities' stock.

EXPLANATION OF TERMS

VOICE GRADE FACILITY - A communications path typically used in the telecommunications industry for the transmission of the human voice and associated telephone signals within the frequency bandwidth of approximately 300 to 3000 Hertz between two points comprised of any form or configuration of physical plant capable of transmitting and receiving these frequencies.

WEATHER ANNOUNCEMENT SERVICE - An announcement service providing the means for telephone access by the general public to a brief announcement of current and forecasted weather conditions. The service is furnished by an electronic or electromechanical device and may be publicly advertised. The announcements may contain advertising messages.

WIDE AREA TELECOMMUNICATIONS SERVICE (WATS) - The furnishing of facilities for dial type telephone communication between a wide area service access line and access lines in specified service areas as prescribed in the tariff.

WIRE CENTER - A building or complex of buildings housing Company equipment necessary for the provision of switched or non-switched telephone service to customers in a defined geographical area within an exchange. The facility is identified with V&H coordinates and is assigned one or more NXX's for use in providing switched services to customers located in the specified geographical area. The company equipment located at a Wire Center may consist of switching equipment or non-switching equipment working with a distant host switch as well as equipment used to terminate dedicated non-switched services.

GENERAL REGULATIONS

A. APPLICATION

The regulations specified herein are in addition to the rules and regulations of all communication services offered in this tariff and contained in other sections of the General Exchange Tariff. Additional regulations, where applicable, pertaining to specific service offerings are located in the various sections of this tariff.

B. LIMITATIONS AND USE OF SERVICE

1. Use of Subscriber's Service

- a. Telephone facilities are furnished for the use of the subscriber, employees, agents, or representatives of the subscriber or members of the subscriber's domestic establishment except in connection with pay telephone service and except as the use of the service may be extended to the transient public. Transient public may include, but is not limited to, patrons of hotels, members of clubs, patients of hospitals, occupants of licensed Adult Congregate Living Facilities, nursing homes, continuing care facilities and retirement homes, students living in quarters furnished by schools, colleges or universities; to persons temporarily subleasing a subscriber's residential premises; to the transient public in connection with reservation service at airport terminals and other public places; to exhibitors at convention halls, to transient customers of time-share facilities, yacht basins, apartment hotels and composite data services; or, to clients of a certificated Shared Tenant Service operation as specified in Section A26 of this tariff. In addition, airports are permitted to extend local service to businesses located at the airport terminal and engaged in airport operations necessary for the proper functioning of the airport.

B. LIMITATIONS AND USE OF SERVICE (Cont'd)

7. Limited Communication

The Company reserves the right to limit the length of communication when necessary because of a shortage of facilities caused by emergency conditions. In addition, when deemed necessary by the Company to prevent degradation of its general telephone service, arrangements which are designed to limit the volume of calls directed beyond a central office in which such calls originate may be used by the Company. The Company will incur no liability for not forwarding such calls.

8. Transmitting Messages

The Company will not transmit messages, but offers the use of its facilities when available, and will not be liable for errors in transmission or for failure to establish connections. Employees of the Company are forbidden to accept oral or written messages to be transmitted over the facilities of the Company.

9. Unlawful Use of Service

The service is furnished subject to the condition that it will not be used for an unlawful purpose. Service will be discontinued if any law enforcement agency, acting within its apparent jurisdiction, advises in writing that such service is being used in violation of law. The Company will refuse to furnish service when it has reasonable grounds to believe that such service will be used in violation of law.

GENERAL REGULATIONS

B. LIMITATIONS AND USE OF SERVICE (Cont'd)

10. Refusal or Discontinuance of Service by Company

- a. As applicable, the Company may refuse or discontinue telephone service under the following conditions provided that, unless otherwise stated, the customer shall be given notice and allowed a reasonable time to comply with any rule or remedy any deficiency:
 - 1) For non-compliance with and/or violation of any State or municipal law, ordinance or regulation pertaining to telephone service.
 - 2) For the use of telephone service for any other property or purpose than that described in the application.
 - 3) For failure or refusal to provide the Company with a deposit to insure payment of bills in accordance with the Company's regulations.
 - 4) For neglect or refusal to provide reasonable access to the Company for the purpose of inspection and maintenance of equipment owned by the Company.
 - 5) For non-compliance with and/or violation of the Commission's regulations or the Company's rules and regulations on file with the Commission, provided five (5) working days' written notice is given before termination.

B. LIMITATIONS AND USE OF SERVICE (Cont'd)

10. Refusal or Discontinuance of Service by Company (Cont'd)

a. (Cont'd)

- 6) For non-payment of bills for telephone service, including the Telecommunications Access System surcharge, provided that suspension or termination of service shall not be made without five (5) working days' written notice to the customer, except in extreme cases. The written notice shall be separate and apart from the regular monthly bill for service. The Company shall not, however, refuse or discontinue service for nonpayment of a dishonored check service charge imposed by the Company.
- 7) For purposes of paragraphs 5) and 6), "working day" means any day on which the Company's business office is open and the U.S. Mail is delivered.
- 8) Without notice in the event of customer use of equipment in such manner as to adversely affect the Company's equipment or the Company's service to others.
- 9) Without notice in the event of tampering with the equipment furnished and owned by the Company.

10. Refusal or Discontinuance of Service by Company (Cont'd)

a. (Cont'd)

10) Without notice in the event of unauthorized or fraudulent use of service. Whenever service is discontinued for fraudulent use of service, the Company may, before restoring service, require the customer to make, at his own expense, all changes in facilities or equipment necessary to eliminate illegal use and to pay an amount reasonably estimated as the loss in revenues resulting from such fraudulent use.

b. In case of refusal to establish service, or whenever service is discontinued, the Company shall notify the applicant or customer in writing of the reason for such refusal or discontinuance.

c. Service shall be initiated or restored when cause for refusal or discontinuance has been satisfactorily adjusted.

d. The following shall not constitute sufficient cause for refusal of service to an applicant or customer:

1) Delinquency in payment for service by a previous occupant of the premises, unless the current applicant or customer occupied the premises at the time the delinquency occurred and the previous customer continues to occupy the premises and such previous occupant shall benefit from such new service.

B. LIMITATIONS AND USE OF SERVICE (Cont'd)

10. Refusal or Discontinuance of Service by Company (Cont'd)

- f. The Company may refuse to furnish or continue to furnish service, if such service would be used or is used for a purpose other than that for which it is provided; or when its use interferes with or impairs, or would interfere with or impair, any other services rendered to the public by the Company.
- g. The Company reserves the right to cancel any contract for service with and to discontinue service to any person who uses or permits the use of obscene, profane, or grossly abusive language over or by means of the Company's facilities, and who, after reasonable notice fails, neglects, or refuses to cease and refrain from such practice or to prevent the same; and to remove its property from the premises of such person.

11. Termination of Service

a. Termination by the Company

Violation of the regulations contained in this tariff on the part of the subscriber may be regarded as sufficient cause for termination of the subscriber's service. The subscriber shall be responsible for the payment of all charges due. This includes all charges due for the period service has been rendered plus any unexpired portion of an initial service period or applicable terminations charges, or both.

GENERAL REGULATIONS

B. LIMITATIONS AND USE OF SERVICE (Cont'd)

11. Termination of Service (Cont'd)

b. Termination of Service at the Subscriber's Request

Service may be terminated at any time upon reasonable notice from the subscriber to the Company. Upon such termination, the subscriber shall be responsible for the payment of all charges due. This includes all charges due for the prior service has been rendered plus any unexpired portion of an initial service period or applicable termination charges, or both.

12. Termination Liability

a. Unless noted in specific sections of this tariff, the following termination liabilities will apply:

- 1) Termination liability may not carry over from one system to a new system, but must be paid in full before the new system or equipment is installed.
- 2) Periods for which a system has been temporarily suspended by the customer, or suspended by the Company for non-payment will not be credited to the determination of the termination liability.
- 3) Service may be terminated after expiration of the initial contract period upon proper notification to the Company and payment of all charges due up to the date of termination of service.

GENERAL REGULATIONS

B. LIMITATIONS AND USE OF SERVICE (Cont'd)

12. Termination Liability (Cont'd)

b. Calculation of Termination Liability

- 1) The customer will be liable for the total monthly rate which is to be paid over the contract period minus the recurring expenses associated with the service.
- 2) The total termination liability is calculated as follows:

Monthly rate minus monthly maintenance minus monthly Administration minus Other Taxes equals Monthly Liability. Monthly liability times the contract period (in months) equals the total termination liability to be prorated over the life of the contract.

C. ESTABLISHMENT AND FURNISHING OF SERVICE

1. Obligation to Furnish Service

- a. The Company's obligation to furnish service is dependent upon its ability to secure and retain, without unreasonable expense, suitable facilities and rights for the provision of such service.

Director

SECTION A2
First Revised Sheet 14
Cancelling Original Sheet 14
Effective: January 1, 1997

GENERAL REGULATIONS

C. ESTABLISHMENT AND FURNISHING OF SERVICE (Cont'd)

1. Obligation to Furnish Service (Cont'd)
 - b. The rates and charges quoted in this tariff provide for the furnishing of service and facilities where suitable facilities are available or when the construction of the necessary facilities does not involve excessive costs. When excessive costs are involved for the construction of facilities, charges for such construction will be determined in accordance with the regulations as set forth in Section A5, "Charges Applicable Under Special Conditions," except as otherwise specified.
2. Flat- and Message-Rate Service
 - a. When both flat- and message-rate service are offered in an exchange, an applicant may, at his/her option, select either type of service.
 - b. A combination of both flat- and message-rate service will not be furnished on the same premises to the same subscriber, or in the same room to the same subscriber, or to a group of different subscribers. This does not apply to:
 - 1) hotel and hospital premises where flat-rate service may be furnished for the exclusive use of the hotel or hospital management or may be contracted for separately by guests or patients, in addition to the message rate service ordinarily provided in guests' or patients' rooms and lobbies;

- 3) non-administrative lines connected to secretarial service facilities and not furnished with outward service;
- 4) the premises of a Shared Tenant Service client who requests direct service from the Company;
- 5) Opportunity 800 customers.

3. Application for Service

- a. Any applicant for service may be required to sign an application form requesting the Company to furnish the service in accordance with rates, charges, rules and regulations from time to time in force and effect.
- b. The Company reserves the right to refuse service to any applicant who is found to be indebted to the Company for service previously furnished until satisfactory arrangements have been made for the payment of all such indebtedness, except that conditions specified in B. of this section do not constitute sufficient cause for refusal of service to an applicant or customer.

3. Application for Service (Cont'd)

b. (Cont'd)

The Company may also refuse to furnish service to any applicant desiring to establish service for former subscribers of the Company who are indebted for previous service, regardless of the listing requested for such service, until satisfactory arrangements have been made for the payment of such indebtedness.

c. If telephone service is established and it is subsequently determined that either condition in b. preceding exists, the Company may suspend or disconnect such service until satisfactory arrangements have been made for the payment of the prior indebtedness.

1) In case of refusal to establish service, or whenever service is discontinued, the Company shall notify the applicant or customer in writing of the reason for such refusal or discontinuance.

d. When an application for service and facilities or requests for additions, rearrangements, relocations, or modifications of service and equipment are canceled in whole or in part prior to completion of the work involved, the applicant is required to reimburse the Company for all expense incurred in handling the request before notice of cancellation is received. Such charge, however, is not to exceed all charges, which would apply if the work involved in complying with the request had been completed.

3. Application for Service (Cont'd)

- e. When a subscriber requests a change in location of all or a part of the facilities covered by his/her application for service or requests for additions, rearrangements, modifications of his/her existing service and equipment prior to completion of the work involved, he/she may be required to pay the difference between the total costs and expenses incurred by the Company in completing the work involved and that which would have been incurred had the final location of the facilities been specified initially.

4. Application of Rates for Business and Residence Service

- a. In general, business rates apply at business locations and residence rates apply at residence locations. The determination as to whether subscriber service should be classified as business or residence is based on the following paragraphs.
- b. Business rates apply whenever the use of the service is primarily or substantially of a business, professional institutional or otherwise occupational nature or where the listing required is such as to indicate business use. Business rates apply for:
 - 1) Offices, stores, factories, mines, and all other places of a strictly business nature.

- 2) Boarding houses¹, except as modified following, offices of hotels, halls or offices of apartment houses, colleges, quarters occupied by clubs and fraternal societies, except as modified following; public, private or parochial schools, hospitals, nursing homes, libraries, and other institutions and in churches.
- 3) Any location where a business designation is provided or when any title indicating a trade or profession is listed in the telephone directory or in other advertising, except as modified following.
- 4) Business rates will be applicable to access lines providing interconnection of Company facilities with amateur radio repeater stations if the repeater station is located on commercial property. Access lines for amateur radio repeater stations located on property used for residential purposes are subject to residence access line rates.

Note 1: For purposes of this tariff, a boarding house is defined as a house or apartment where rooms are rented or boarders taken or both. Such houses or apartments may obtain service at residence rates when in the judgment of the Company; they are not conducted primarily for business purposes and are listed as residences.

4. Application of Rates for Business and Residence Service (Cont'd)

b. (Cont'd)

- 5) Service terminating solely on the secretarial facilities of a secretarial answering firm will carry business rates.

c. Residence rates apply for:

- 1) Private residences where a business listing in the telephone directory or business advertising is not utilized.
- 2) Private apartments in hotels, clubs, and boarding houses where service is confined to the domestic use of the subscriber and business listings are not employed.
- 3) The place of residence of a clergyman, physician, registered or practical nurse, midwife, dentist, veterinary surgeon, or other medical practitioner, provided the service is not installed in that portion of the subscriber's residence, which is used as an office, but is located in the subscriber's domestic establishment, and provided no business designation is employed. Titles such as "Doctor," "Reverend," "Judge," "Professor" are not considered business designations.
- 4) Private stable or garage when strictly a part of the subscriber's domestic establishment.
- 5) College fraternity houses where members of the fraternity lodge within the house.

c. (Cont'd)

- 6) Secretarial line terminations of residence main service terminating as extension lines on the premises of a telephone answering bureau.
 - 7) Lines numbering six or fewer located at private residential locations will be billed residential rates. Lines in excess of six at private residential locations, if used primarily for domestic use, will be billed at residential rates. The residential rates as defined above will be applicable provided no business listing or directory advertising is requested.
- d. Changes from business service where a business directory listing is employed to residence service are made only in the event of a change in the subscriber's arrangements, which would entitle a subscriber to a residence classification of service. Ordinarily the subscriber's business number is to be changed and a new number assigned to the residence service without reference of calls.
- e. Changes from residence to business service may be made without change in telephone number, if the subscriber so desires.
- f. Where a subscriber requests facilities in excess of those which would normally be provided, applicable rates and charges, found in Section A5 of this tariff, will apply.

5. Transfer of Service Between Subscribers

- a. Service previously furnished one subscriber may be assumed by a new subscriber upon due notice of cancellation, or in case of abandonment, provided there is no lapse in service. Such transfers are subject to service connection charge regulations and may be arranged for in either of two ways:
 - 1) If the new subscriber, fully understanding the regulations governing the service and the status of the account, willingly assumes all obligations thereunder, future bills are then rendered without an adjustment to or from any particular date, with the Company arranging for the requested change in billing and directory listing. No final bill will be issued.
 - 2) If the new subscriber does not wish to assume payment of the old account, a new service application is taken and an adjustment in billing is made to and from the date the transfer is effective. A final bill is rendered for the old account and appropriate service connection charges apply for the new account.
- b. Under either method of transfer the reassignment of the old telephone number to the service of the new party is arranged for only after the former subscriber has given his consent to its use, and then only when, in the judgment of the Company, there exists no relationship, business or otherwise, between the old and new subscribers, and when in the judgment of the Company a change in the telephone number is not required.

6. Initial Service Periods

- a) Unless otherwise specified, the rate for all services offered in this tariff are monthly rates and the initial service period is for one month commencing with the date of installation of the service.
- b) The initial service period relates to each applicable unit of service, either on the initial or subsequent installations.
- c) For additional directory listings, the initial period is the life of the directory issue in which the listing appears. Where the additional listing does not appear in the directory, the initial period is one month.

 - b) Subscribers may not disconnect or remove or permit others to disconnect or remove any apparatus installed by the Company, except upon the written consent of the Company.
 - c) Equipment and facilities furnished by the Company shall, upon termination of service from any cause whatsoever, be returned to it in good condition, reasonable wear and tear thereof expected.
9. Provision and Ownership of Telephone Numbers
 - a) Telephone numbers are the property of the Company and are assigned to the service furnished the subscriber. The subscriber has no property right to the telephone number or any other call number designation associated with services furnished by the Company, and no right to the continuance of service through any particular central office. The Company reserves the right to change such numbers, or the central office designations associated with such numbers, or both, assigned to the subscriber, whenever the Company deems it necessary to do so in the conduct of its business.
10. Provision of Directories
 - a) Customers shall receive one telephone directory for each access line or trunk in service. Subject to availability, additional directories shall be provided by the Company based on customer requests.

11. Maintenance and Repairs

All ordinary expense of maintenance and repairs, unless otherwise specified in this tariff, is borne by the Company. In case of damage, loss, theft, or destruction of any of the Company's property due to the negligence or willful act of the subscriber or other persons authorized to use the service, and not due to ordinary wear and tear or causes beyond the control of the subscriber, the subscriber shall be required to pay the expense incurred by the Company in connection with the replacement of the property damaged, lost, stolen, or destroyed, or the expense incurred in restoring it to its original condition.

12. Company Facilities at Hazardous or Inaccessible Locations

Where service is to be established at a location that would involve undue hazards, or where accessibility is impracticable to employees of the Company, the subscriber may be required to install and maintain the Company's equipment and facilities in a manner satisfactory to the Company, any remuneration to be based on the conditions involved.

13. Work Performed Outside Regular Working Hours

The rates and charges specified in this tariff contemplate that all work in connection with furnishing or rearranging service to be performed during regular working hours. Whenever a subscriber requests that work necessarily required in the furnishing or rearranging of his/her service be performed outside the Company's regular working hours or that work once begun be uninterrupted, so that the Company incurs costs that would not otherwise have been incurred, the subscriber may be required to pay, in addition to the other rates and charges specified in this tariff, the amount of additional costs incurred by the Company as a result of the subscriber's special requirements.

14. Suspension of Business and Residence Service (Vacation Service)

a. General

- 1) Upon request, a subscriber to business or residence service may arrange for the temporary suspension of such service, except when subject to initial service periods.
- 2) The suspension of service is not allowed for periods of less than one month or for more than six months in any twelve month period.
- 3) Local or long distance service is not furnished during the period of suspension. At the request of the subscriber, inward calls to a station at which service is suspended may be referred to the call number of another station in the same or a distant exchange.
- 4) The charge for the total suspension period may be collected in advance.
- 5) There is no reduction in the charge for foreign central office line mileage, foreign exchange line mileage or for services that are tarified as obsolete during the period of suspension.
- 6) No allowance is made in the charges for additional listings except when the service under the main contract is temporarily suspended.
- 7) Whenever the period of disconnection is less than the minimum period, the charge levied by the Company will not exceed the regular rate for the service. The minimum charge for any calendar year shall be three-fourths of the annual rate.
- 8) Suspension period limitations and minimum charges of 3/4 of the annual rate shall be waived for any emergency oriented organization, the primary mission of which is the preservation of life or property, and is government funded and the use of the service is limited to emergency situations. During non-emergency times, service shall be kept available on a standby basis except during testing by the subscriber. Restoration of Service charges shall apply when ending suspension or testing.

Effective: April 1, 2005

GENERAL REGULATIONS

C. ESTABLISHMENT AND FURNISHING OF SERVICE (Cont'd)

16. School and Library Discounts (Cont'd)

b. Application for Support (Cont'd)

2) Other Funding Sources

The Customer is responsible for applying for Support from state and/or local administrators (Funding Sources). The Customer will notify the Company in writing within 30 days of its receipt of a Support commitment from such Funding Sources and will include a copy of its application, Funding Source Support documentation, and other relevant documentation as requested by the Company.

c. Receipt of Support

1) E-Rate Program

The Customer will pay, in full, all invoices issued by the Company prior to the Company's receipt of notification from the Funding Source acknowledging the Customer's receipt of Service. Upon notification, the Company will apply discounts to the Customer's invoices or reimburse the Customer according to the Funding Commitment Decision Letter. The Customer is responsible to apply for SLD reimbursement (instead of receiving discounted Company bills) for all eligible customer premise equipment rentals or other financed arrangements. The Company reserves the right to require the Customer to seek SLD reimbursement (instead of receiving discounted Company bills) if the Customer has not received its Funding Commitment Decision Letter from the SLD by December 31 of the funding year. All discounts or reimbursements will be retroactive to the date authorized by the SLD funding year. The Company will either apply a credit to the Customer's account or provide the Customer with a check corresponding to the appropriate amount of Support based on Service received.

2) Other Funding Sources

The Customer will pay, in full, all invoices issued by the Company prior to the Company's receipt of notification from the Funding Source acknowledging the Customer's receipt of Service. Upon notification, The Company will apply discounts or reimburse the Customer for Service delivered corresponding to the Funding Source acknowledgement. These discounts or reimbursements will be retroactive to the date authorized by the Funding Source funding year. The Company may reimburse the Customer with a credit to the Customer's account or with a check corresponding to the appropriate amount of Support based on Service received.

SECTION A2
First Revised Sheet 30
Cancelling Original Sheet 30
Effective: January 1, 1997

GENERAL REGULATIONS

D. PAYMENT ARRANGEMENTS AND CREDIT ALLOWANCES

1. Advance Payments

- a. An applicant for service or facilities may be required to pay in advance of installation an amount not to exceed applicable service connection, installation, or other recurring charges plus charges for one month of service. Where construction charges are applicable, the payment thereof may be required in advance of start of construction.
- b. The amount of the advance payment is credited to the customer's account on the first bill rendered under the contract.

2. Credit and Deposits for Applicants

- a. The Company may, in order to safeguard its interests, require an applicant to establish satisfactory credit, or pay a cash deposit, as set forth in the following:
 - 1) Credit will be deemed to be established if:
 - a) The applicant for service has been a customer of any telephone utility within the last two years and during the last twelve consecutive months of service did not have more than one occasion in which a bill was paid after becoming delinquent and never had service disconnected for nonpayment.

D. PAYMENT ARRANGEMENTS AND CREDIT ALLOWANCES (Cont'd)

2. Credit and Deposits for Applicants (Cont'd)

a. (Cont'd)

1) Credit will be deemed to be established if: (Cont'd)

- b) The applicant for service furnishes a satisfactory guarantor to secure payment of bills for the service requested. A satisfactory guarantor shall, at a minimum, be a customer of the Company with a satisfactory payment record. A guarantor's liability shall be terminated when a residential customer whose payment of bills is secured by the guarantor meets the requirements in D.2.c.1). Guarantors providing security for payment of residential customers' bills shall only be liable for bills contracted at the service address contained in the contract of guaranty.
- c) The applicant pays a cash deposit.
- d) The applicant for service furnishes an irrevocable letter of credit from a bank or a surety bond.
- e) Lifeline subscribers, who voluntarily elect to receive Toll Blocking, are not required to pay a service deposit.

Cancelling Original Sheet 32
Effective: January 1, 1997

GENERAL REGULATIONS

D. PAYMENT ARRANGEMENTS AND CREDIT ALLOWANCES (Cont'd)

2. Credit and Deposits for Applicants (Cont'd)

a. (Cont'd)

2) Amount of Deposit

The amount of the cash deposit shall not exceed an amount equal to the charges for one (1) month's local exchange service plus two (2) month's estimated toll service provided by or billed by the Company. If, after 90 days' service, the actual deposit is found to be greater than an amount equal to one (1) month's local service plus two (2) month's actual average toll service provided by or billed by the Company, the Company shall, upon demand of the subscriber to the Company, promptly refund the difference. These deposit rules apply to local exchange service and toll service provided by or billed by the Company only and do not apply to Special Arrangement Agreements covering termination equipment installations for which the Company may require a reasonable deposit.

b. New or Additional Deposits

The Company may require, upon reasonable written notice of not less than 15 days, a new deposit, where previously waived or returned, or an additional deposit, in order to secure payment of current bills. However, the total amount of the required deposit should not exceed twice the actual average monthly toll billing provided by or billed by the Company plus one (1) month's local service charge, for the 90 day period immediately prior to the date of notice.

Effective: January 1, 1997

GENERAL REGULATIONS

D. PAYMENT ARRANGEMENTS AND CREDIT ALLOWANCES (Cont'd)

2. Credit and Deposits for Applicants (Cont'd)

b. New or Additional Deposits (Cont'd)

In the event the customer has had service less than 90 days, then the Company shall base its new or additional deposit upon the actual average monthly billing available. When the Company has good reason to believe payment by a nonresidential customer is in jeopardy and toll usage provided by or billed by the Company is significantly above normal for that customer, the Company may request a new or additional deposit. If the deposit requested is not paid within 48 hours, the Company may discontinue service.

c. Refund of Deposits

- 1) After a customer has established a satisfactory payment record and has had continuous service for a period of 23 months, the Company shall refund the residential customer's deposits; and shall, at its option, either refund or pay the higher rate of interest D.2.d. for nonresidential deposits, providing that in the preceding 12 months the customer has not (a) made more than one late payment of a bill (after the expiration of 15 days from the date of mailing or delivery by the Company), (b) paid with a check refused by a bank, been disconnected for nonpayment, or (d), at any time used service in a fraudulent or unauthorized manner.
- 2) Upon termination of service, the deposit and accrued interest may be credited against the final account and balance, if any, shall be returned promptly to the customer, but in no event later than 45 days after service is discontinued.

Cancelling Original Sheet 34
Effective: January 1, 1997

GENERAL REGULATIONS

D. PAYMENT ARRANGEMENTS AND CREDIT ALLOWANCES (Cont'd)

2. Credit and Deposits for Applicants (Cont'd)

d. Interest on Deposit

All deposits held by the Company in excess of six months shall bear interest at the rate of 6% per annum. The Company shall pay an interest rate of seven percent per annum on deposits of nonresidential customers qualifying under D.2.c.1) when such deposits are not refunded after 23 months. The deposit interest shall be simple interest in all cases and settlement shall be made annually, either in cash or by credit on the current bill. No customer depositor shall be entitled to receive interest on his/her deposit until and unless a customer relationship and the deposit have been in existence for a continuous period of six months' then he/she shall be entitled to receive interest from the date of the commencement of the customer relationship and placement of the deposit. Nothing in the Commission rule prohibits the Company from refunding at any time a deposit with any accrued interest.

e. Record of Deposits

The Company shall keep records to show the name of each customer making the deposit; the premises occupied by the customer when the deposit was made; the date and amount of deposit; and each transaction concerning the deposit such as interest payments, interest credited, or similar transactions.

D. PAYMENT ARRANGEMENTS AND CREDIT ALLOWANCES (Cont'd)

2. Credit and Deposits for Applicants (Cont'd)

f. Receipt for Deposit

A nontransferable certificate of deposit shall be issued to each customer and means provided so that the customer may claim the deposit if the certificate is lost. The deposit receipt shall contain notice that after 90 days' service, the subscriber is entitled to refund of any deposit over and above an amount equal to one month's local service plus two months' average toll service provided by or billed by the Company.

g. Responsibility for Payment

The fact that a deposit has been made in no way relieves the applicant or subscriber from complying with the Company's regulations as to advance payments and the prompt payment of bills on presentation, or constitutes a waiver or modification of the regular practice of the Telephone company providing for the discontinuance of service for nonpayment of any sums due to the Company.

GENERAL REGULATIONS

D. PAYMENT ARRANGEMENTS AND CREDIT ALLOWANCES (Cont'd)

3. Payment for Service

a. The subscriber is responsible for payment of all appropriate charges for completed calls, services and equipment. All charges due by the subscriber are payable at the Company's business office or at any agency authorized to receive such payments. Any objection to billed charges should be promptly reported to the Company. Adjustments to customers' bills shall be made to the extent that records are available and/or circumstances exist which reasonably indicate that such charges are not in accordance with approved rates or that an adjustment may otherwise be appropriate. Where any undercharge in billing of a subscriber is the result of a Company mistake, the Company may not backbill in excess of twelve months. Where overbilling of a subscriber occurs, due either to company or subscriber error, no liability exists which will require the Company to pay any interest, dividend or other compensation on the amount overbilled.

1) A charge of \$25.00 or 5%, whichever is greater, will apply whenever a check or draft presented for payment for service is not accepted by the institution on which it is written.

b. The subscriber shall pay monthly in advance or on demand all charges for service and equipment and shall pay on demand all charges for long distance service. The subscriber is responsible for payment of all charges for services furnished the subscriber, including charges for services originated or charges accepted at the subscriber's station.

D. PAYMENT ARRANGEMENTS AND CREDIT ALLOWANCES (Cont'd)

3. Payment for Service (Cont'd)

- c. Should service be suspended for nonpayment of charges, restoration of service will be made only as provided under "Restoration Charge" in Section A4 of this tariff. Non payment of the charge in D.3.a.1) will not constitute sufficient cause for interruption or cancellation of service.
 - 1) Residential customers whose telephone services have been temporarily denied for non-payment will continue to have access to 911 Service (outgoing service only). Service will be provided on a "where available" basis.
- d. When the service has been disconnected for nonpayment, the service agreement is considered to have been terminated. Re-establishment of service may be made only upon the execution of a new service agreement, which is subject to the provisions of this tariff, except as stated in the Lifeline Assistance Program in Section A3 of this tariff.
- e. At its discretion, the Company may restore or reestablish service which has been suspended or disconnected for nonpayment of charges, prior to payment of all charges due. Such restoration or reestablishment of service shall not be construed as a waiver of any rights to suspend or disconnect service for nonpayment of any such or other charges due and unpaid or for the violation of the provisions of this tariff; nor shall the failure to suspend or disconnect service for nonpayment of any past due account or accounts operate as a waiver or estoppel to suspend or disconnect service for nonpayment of such account or of any other past due account.

D. PAYMENT ARRANGEMENTS AND CREDIT ALLOWANCES (Cont'd)

3. Payment for Service (Cont'd)

- f. Bills for service shall not be considered delinquent prior to the expiration of 15 days from the date of mailing or delivery by the Company. However, the Company may demand immediate payment under the following circumstances:
 - 1) Where service is terminated or abandoned.
 - 2) Where toll service is two times greater than the subscriber's average usage as reflected on the monthly bills for the three months prior to the current bill or, in case of a new customer who has been receiving service for less than four months, where the toll service is twice the estimated monthly toll service.
 - 3) Where the Company has reason to believe that a business subscriber is about to go out of business or that bankruptcy is imminent for the subscriber.
- g. A Late Payment Charge of one and one-half percent (1½%) or \$4.00, whichever is greater, will be applied to each customer's bill when the previous month's bill has not been paid in full prior to the next billing date with the exception of charges that have been disputed by the customer. The 1.5% charge is applied to the total unpaid amount carried forward and is included in the total amount due on the current bill. If the amount is less than \$4.00, the \$4.00 minimum will be applied to the total amount due. This tariff shall apply to federal and state government pursuant to existing statutes applicable to those governmental entities.

SECTION A2
First Revised Sheet 41
Cancelling Original Sheet 41
Effective: January 1, 1997

GENERAL REGULATIONS

E. TWO-TIER PAYMENT PLANS (Cont'd)

2. Description of Plans

- a. Plan 1 - embodies an extended initial service period with two-tier monthly rates for each component in the system. The first tier (Tier A) is a one-time payment or a recurring monthly rate applicable for the initial service period selected by the subscriber and is guaranteed against change. The second tier (Tier B) is a monthly rate applicable for the period the subscriber has the service and is subject to change.
- b. Plan 2 - embodies an installation charge, a single monthly rate for each component, and a minimum 30 days service period unless specified otherwise. The monthly rates apply for the period the subscriber has the service and are subject to change.

3. Conditions of Plans

- a. Under Plan 1, except where the one-time payment option is selected, the monthly rate will consist of the sum of two segments, Tier A and Tier B, until the termination of the agreed-upon initial service period at which time the monthly rate will reduce to the Tier B rate. When the one-time payment option is selected for Tier A, the subsequent monthly rate will consist only of the Tier B rate.

E. TWO-TIER PAYMENT PLANS (Cont'd)

3. Conditions of Plans (Cont'd)

a. (Cont'd)

- 1) The Company will provide complete maintenance service, including replacement of like components, for a period as specified for each service offered under the Two-Tier Payment Plans. At the expiration of this period, the company will provide maintenance service, but replacement of like components will be provided at supplemental charges subject to the availability of facilities.
- 2) In the event of termination of all or part of the service prior to expiration of the original Tier A initial service period, the subscriber will be required to pay any unpaid balance of the Tier A charges. At the subscriber's option, a lump sum payment will be computed by calculating the present worth of the remaining Tier A monthly payments at the annual effective interest rate used in determining the Tier A monthly rates. The Tier B rate will continue until the date the subscriber requests removal of the service. With prior written concurrence by the Company, the agreement may be transferred to a second party at the same location.
- 3) The Tier A portion of the monthly rate is not subject to change during the agreed-upon initial service period. The Tier B monthly rate is subject to changes.

E. TWO-TIER PAYMENT PLANS (Cont'd)

3. Conditions of Plans (Cont'd)

a. (Cont'd)

4) Additional services may be added to the existing system prior to the expiration of the original Tier A initial service period. Such services may be added in one of three ways. 1) The subscriber may enter into a new Tier A contract on that item of service for one of the available periods; 2) additional services may be added utilizing the Plan 2 rates; and 3) services may be added to the existing initial service contract by prepaying an amount equal to the months expired on the present contract times the monthly rate, thereby causing all of the Tier A contract to terminate at the same time.

b. Under Plan 2, the installation charges and monthly rates will be as filed for each item of service. The monthly rates will apply until the service is terminated and are subject to changes.

c. Charges for other service items, including service connections, moves, and changes, are as specified in other sections of this tariff.

d. Suspension of service (vacation rate) is not permitted for services provided under Two-Tier Payment Plans 1 or 2.

F. LIABILITY OF THE COMPANY

1. Service Irregularities

The liability of the Company for damages arising out of service provided to its subscribers such as defects or failures in facilities furnished by the Company or mistakes, omissions, preemptions, interruptions, delays, errors, or defects in the provision of its services as set forth herein or any portion of its services, occurring in the course of furnishing such facilities or services, and not caused by the negligence of the subscriber, or of the Company in failing to maintain proper standards of maintenance and operation and to exercise reasonable supervision shall, in no event, exceed an amount equivalent to the proportionate charge to the subscriber for the period of service during which such mistake, omission, interruption, delay, error or defect in transmission or defect or failure in facilities or services occurs.

2. Use of Facilities of Other Connecting Carriers

When suitable arrangements can be made, facilities of other connecting carriers may be used in conjunction with this Company's facilities in establishing connections to points not reached by this Company's facilities. Neither this Company nor any connecting carrier participating in a service shall be liable for any act or omission of any other company or companies furnishing a portion of such service.

F. LIABILITY OF THE COMPANY (Cont'd)

3. Indemnifying Agreement

The Company shall be indemnified and saved harmless by the subscriber or subscribers against claims for libel, slander, or the infringement of copyrighting arising directly or indirectly from the material transmitted over the facilities or the use thereof; against claims for infringement of patents arising from combining with or using in connection with, facilities furnished by the Company, apparatus and systems of the subscriber; and against all other claims arising out of any act or omission of the subscriber in connection with the facilities provided by the Company.

4. Liability Limitation

The Telephone Company will not be liable for any consequential, incidental or indirect damages for any cause of action, whether in contract or tort. Consequential, incidental and indirect damages include, but are not limited to, lost projects, lost revenues and loss of business opportunity, whether or not the Telephone Company was aware or should have been aware of the possibility of these damages.

5. Defacement of Premises

The Company is not liable for any defacement of or damage to the premises of a subscriber resulting from the furnishing of service or the attachment of equipment or apparatus furnished by the Company on such premises or by the installation or removal thereof, when such defacement or damage is not the result of negligence of the employees of the Company.

6. Period for the Presentation of Claims

The Company shall not be liable for damages or statutory penalties in any case where a claim is not presented in writing within 60 days after alleged delinquency occurs.

F. LIABILITY OF THE COMPANY (Cont'd)

7. Equipment in Explosive Atmosphere

- a. The Company does not guarantee nor make any warranty with respect to equipment provided by it for use in an explosive atmosphere. The subscriber shall indemnify and hold the Company harmless from any and all loss, claims, demands, suits, or other action, or any liability whatsoever, whether suffered, made, instituted or asserted by the subscriber or by any other party or person, for any personal injury to or death of any person or persons, and for any loss, damage or destruction of any property, whether owned by the subscriber or others, caused or claimed to have been caused directly or indirectly by the installation, operation, failure to operate, maintenance, removal, presence, condition, location or use of said equipment so provided.
- b. The Company may require each subscriber to sign an agreement for the furnishing of such equipment as a condition precedent to the furnishing of such equipment.
- c. The subscriber shall furnish, install and maintain sealed conduit with explosion-proof fittings between this equipment and points outside the hazardous area where connection may be made with regular facilities of the Company. The subscriber may be required to install and maintain this equipment within the hazardous area if, in the opinion of the Company, injury or damage to Company employees or property might result from installation or maintenance by the Company.

8. Year 2000 (Y2K)

The Company will make reasonable efforts to cure any material failure to provide service caused solely by year 2000 defects in the Company hardware, software or systems. Due to the interdependence among telecommunications providers and the interrelationship with non-Telephone Company processes, equipment and systems, the Company is not responsible for failures caused by circumstances beyond its control, including, but not limited to, failures caused by: 1) the Customer; 2) other telecommunications providers; or 3) customer premises equipment. In addition, the Company does not ensure compatibility between the Company and non-Telephone Company services used by the Customer.

SECTION A2
First Revised Sheet 47
Cancelling Original Sheet 47
Effective: January 1, 1997

GENERAL REGULATIONS

G. CLASSIFICATION OF AREAS AS THE BASIS FOR FURNISHING TELEPHONE SERVICE

1. General

Economical operation of the telephone business, to secure protection to the whole body of ratepayers and to the business itself, requires that the property be built and operated in accordance with a definite plan under which specified classes of service are regularly furnished in specified areas or types of areas. The Company therefore does not undertake to furnish any desired class of service at any desired location, nor does it undertake to extend its plant to remote sections where such extension is not warranted by the public necessity as distinguished from personal desire, except where adequate protection is afforded.

2. Classification of Areas

- a. The general plan for furnishing telephone service is based upon Exchange Areas for the determination of the classes of service available and for the application of rates. An Exchange Area encompasses the territory served by a toll rate center and in which territory both local and long distance service is offered to the public.
- b. Generally, the Company will serve subscribers in general without the application of construction charges where the service to be furnished is of a permanent nature and dependent upon the availability of facilities.

GENERAL EXCHANGE TARIFF

Embarq Florida, Inc.

Director

SECTION A2
Third Revised Sheet 48
Cancelling Second Revised Sheet 48
Effective: May 12, 2000

GENERAL REGULATIONS

G. CLASSIFICATION OF AREAS AS THE BASIS FOR FURNISHING TELEPHONE SERVICE

2. Classification of Areas (Cont'd)

- c. Requests for service which are not in accordance with the general service plan, either because of class of service desired or due to the location, cannot be met under a fixed rate of charge. The general principle is that the Company undertakes to provide telephone service under conditions beyond the normal plan if the applicant will meet the special conditions imposed, as by payment of installation or construction charges, under an agreement based on the facts in the case and designed to protect the general body of rate payers by assessing unusual items of cost to those for whom the costs are incurred.
- d. The furnishing of telephone service is dependent upon the availability of facilities. Where no facilities exist, service may be subject to additional charges as specified in Section A5 of this tariff.
- e. The regulations outlined in Section A2.H do not apply in exchanges or central offices where "Call Tracing" capabilities are available as an ExpressTouch Feature reflected in Section A13.F of this Tariff.

H. ANNOYANCE CALLS AND REQUESTS FOR TRACING CALLS (TRAP AND TRACE)

1. Types of Annoyance Calls

The most serious annoyance calls are the ones which are threatening in nature. Annoyance calls can generally be classified into one of the following four types:

- a. Threatening - These include threats of kidnapping, bodily harm, property damage, bomb threats, etc.

GENERAL EXCHANGE TARIFF

Embarq Florida, Inc.

Cancelling First Revised Sheet 49
Effective: July 17, 1997

GENERAL REGULATIONS

H. ANNOYANCE CALLS AND REQUESTS FOR TRACING CALLS (TRAP AND TRACE) (Cont'd)

1. Types of Annoyance Calls (Cont'd)

b. Harassing - Harassing calls are usually one of the following types:

- 1) Ring and hang-up calls, or calls with heavy breathing without speaking.
- 2) False report calls where the caller represents himself as a member of the police force or hospital staff and informs the called party that a member of his family has had an accident.

c. Obscene - The call is considered obscene when a comment, request, suggestion, or prc is made which a reasonable person would consider indecent.

d. Interfering - These calls are made with the intent of hindering the called party in the use of his/her service, usually accomplished by the calling party not hanging up when the call is completed.

2. Request Procedure to Trap and Trace

a. A customer believing that he/she has received an abusive call will contact the Call Trace Bureau in his/her service area. The Company representative receiving the complaint will determine if the customer has received an abusive call or only a misdirected or sales solicitation call.

Effective: July 17, 1997

GENERAL REGULATIONS

H. ANNOYANCE CALLS AND REQUESTS FOR TRACING CALLS (TRAP AND TRACE) (Cont'd)

2. Request Procedure to Trap and Trace (Cont'd)

- b. If the review by the Company indicates that there are annoyance calls with regularity which appear to be a violation of the law, and if the annoyed customer has filed a complaint with the appropriate law enforcement agency or state attorney's office, the customer will be requested to sign an authorization permitting the Company to trace the annoyance calls and take whatever action might be necessary and appropriate to prevent the continuance of the calls.
- c. It is understood and the customer will be advised that not all abusive calls can be traced because of differences in central office equipment.

3. Responsibility of the Telephone Company

- a. The Company will not file a formal complaint concerning an annoyance call with a law enforcement agency or with a prosecutor. This is solely a matter between the customer receiving the call and the law enforcement agency. The Company is acting only as an intermediary between the customer and the law enforcement agency by providing information and assistance that might not otherwise be available.

- c. In situations where Trap and Trace functionality is initiated by a subscriber, information pertaining to nonpublished numbers will be provided to any authorized law enforcement agency upon request.

4. Responsibility of the Customer

- a. Before line identification processes are initiated, the customer-complainant will be required to:
 - 1) File a formal complaint with the appropriate law enforcement agency.
 - 2) Depending on the Central Office equipment, agree to identify each such call to the Company.
 - 3) Authorize the Company to place necessary line identification equipment on the central office facilities serving his/her telephones.
 - 4) Designate and appoint the Company as agent for purposes of revealing the identity and location of such telephones to law enforcement agencies engaged, at the customer-complainant's request, in the investigation thereof.
- b. In case of criminal action against the responsible person or civil action later by the person accused, the customer-complainant may be required to take the witness stand and testify.

GENERAL REGULATIONS

I. TELECOMMUNICATIONS ACCESS SYSTEM ACT (TASA) OF 1991

1. In Order No. 24581, Docket No. 910496-TP, Telecommunications Access System Act of 1991, the Commission requires each local exchange telecommunications company to begin accessing and collecting a surcharge per access line per month on bills rendered on or after July 1, 1991, for remission to the administrator for deposit in the operational fund. Each local exchange telecommunications company shall remit moneys collected to the administrator. On August 15, 1991, each local exchange telecommunications company shall begin remitting the moneys collected to the administrator on a monthly basis and in a manner as prescribed by the Commission. The administrator shall use such moneys to cover costs incurred during the development of the telecommunications relay services and to establish and administer the specialized telecommunications devices system.
2. The Commission requires all local exchange telecommunications companies to impose the monthly surcharge on all local exchange telecommunications company subscribers on an individual access line basis, except that such surcharge shall not be imposed upon more than 25 basic telecommunications access line per account bill rendered. The Commission is interpreting "account bill rendered" for purposes of determining the 25 access line limit using the methodology each local exchange company currently uses to define an individual account.
3. The surcharge will be itemized on the first bill rendered after July 1, 1991, at the time of the annual inventory statement and each time the surcharge is changed, as well as any other time a completely itemized bill is rendered. However, the surcharge will be itemized no more often than the total bill is itemized.

J. SPECIAL PROMOTIONS

1. The Company may offer special promotions of new or existing services or products for limited periods as approved by the Public Service Commission. These promotions are a temporary waiver of certain recurring and/or non-recurring charges as stated following. These promotions will be offered on a completely non-discriminating basis with each subscriber in the classification of service and area for which the promotion is offered having an equal opportunity for participation.
2. If there is an “*” included under Charges Waived, it indicates that the waiver is available to first time subscribers of the services only.
3. The following promotions are approved by the Commission:

<u>Area of Promotion</u>	<u>Service</u>	<u>Charges Waived</u>	<u>Period</u>
Business Customers	Business Individual Line, Key Trunk, PBX Trunk, ISDN-BRI, ISDN-PRI II, Centrex Service, Frame Relay, or Translink	Company will waive all nonrecurring installation and/or service charges that are otherwise applicable when a business customer establishes a new account and subscribes to any of the services listed under the same order. The customer's initial monthly charges must be at least \$70 and the customer must commit to a minimum of a one year term in order to qualify for participation in this promotion. Charges for all regulated and non-regulated services, including all applicable taxes, surcharges and other fees, contribute towards the qualifying monthly charges. Customers subscribing to services under this promotion who discontinue service within one year of installation will be assessed all charges originally waived under the promotion.	4/3/06 thru 7/1/06

GENERAL EXCHANGE TARIFF

Embarq Florida, Inc.

By: F. B. Poag
Director

SECTION A3
Second Revised Sheet 1
Cancelling First Revised Sheet 1
Effective: May 29, 1997

BASIC LOCAL EXCHANGE SERVICE

A. GENERAL

1. Exchange rate schedules are applied according to the total number of access lines and PBX trunks in the local service area.
2. Exchange Service Areas for each exchange are identified on maps filed as a supplement to this tariff. Base Rate Area maps are also included with the United Telephone exchanges.
3. The rules, regulations and rates for service and facilities not specifically shown in this section are detailed in other sections of this tariff.
4. Selections of Local Exchange Services
 - a. All systems (PBX and multi-functional) that permit connections to access lines through an operator, dial access, or systems that maintain within their operating capabilities features that permit dial access will be billed the PBX trunk rate.
 - b. When system connection access lines is achievable other than as described above, then PBX trunk rates will not apply. Instead, a different class of service will be selected as is appropriate to the needs of the customer being served. When hybrid Key Systems are used by the customer, the Company will provide access lines at business rates if the customer certifies that there is no use of shared trunks and/or dial access arrangements. In the absence of such certification, orally or in writing, the customer using hybrid Key Systems will be charged for system connection access lines at PBX trunk rates.

SECTION A3
Second Revised Sheet 1.1
Cancelling First Revised Sheet 1.1
Effective: April 17, 2000

BASIC LOCAL EXCHANGE SERVICE

A. GENERAL (Cont'd)

5. Definitions

- a. EAS - Extended Area Service - Telephone service provided under tariff whereby subscribers of a given exchange may complete calls to and receive calls from one or more exchanges without incurring toll charges. See C.1. for a complete explanation of this service.
- b. \$.20 EAS (Central Telephone exchanges only) - A type of Extended Area Service where calls from the referenced exchange to any exchange listed will be charged at \$.20 per completed call of unlimited duration for residence; and \$.20 per call up to a total of 60 minutes per message with usage exceeding the 60 minutes being charged for at the long distance message rates shown in A18 for business. See C.2. for a complete explanation of this service.
- c. ECS - Extended Calling Scope - A type of extended local calling developed by the Commission, which provides an alternative to toll message rates on routes between specified exchanges. Consists of three plans:

Plan A: All calls, residence and business, are rated at \$.25 per call for unlimited duration.

Plan B: All residence calls are rated at \$.25 per call of unlimited duration, and business calls are rated at \$.10 for the first minute and \$.06 for each additional minute.

Plan C: All calls, residence and business, are rated on a usage-sensitive basis of \$.10 for the first minute of use and \$.06 for each additional minute of use.

See C.3. for a complete explanation of this service.

SECTION A3
Fourth Revised Sheet 1.2
Cancelling Third Revised Sheet 1.2
Effective: November 12, 2004

BASIC LOCAL EXCHANGE SERVICE

A. GENERAL (Cont'd)

5. Definitions (Cont'd)

- d. TOLL-PAC - a one-way calling plan which allows a subscriber the option of placing toll calls to specific nearby exchanges at a 30% discount applied to the direct dial rate. The plan has a minimum monthly rate which will apply for each point-to-point or for each point to multi-point service. TOLL-PAC for United exchanges had two rate steps, designated in the listing of exchange rate group classifications and calling areas on the following pages as (RS1) and (RS2). TOLL-PAC is available in only one Central Telephone Exchange, therefore only one rate is applicable. See C.4. for a complete explanation of this service.
- e. OELC - Optional Extended Local Calling - An optional two-way calling plan available between specific exchanges. The plan permits customers to pay a monthly flat rate for the ability to place and receive unlimited toll-free calls to and from the selected exchange which is outside the normal local calling area. See C.5. for a complete explanation of this service.
- f. OEAS - A one-way optional calling plan offered on selected exchanges to provide an alternative to long distance message rates on exchanges within the same LATA. There are two flat-rated block of time options, and one unlimited calling option available to residence customers and a discounted toll option available to residence and business customers.

Telephone service which is provided under tariff whereby subscribers of a given exchange may complete and receive calls from one or more exchanges without the application of long distance message telecommunications charges.

2. \$.20 EAS

a. Calls from the referenced exchange to any exchange listed, but not shown in the corresponding local calling area, will be charged at the following rates:

- 1) Residence Service: \$.20 per completed call,* unlimited duration
- 2) Business Service: \$.20 per completed call up to a total of 60 minutes per message. Usage exceeding the sixty minutes per message limit will be charged for on a usage basis at the long distance message rates shown in A18.

b. For calls from the Tallahassee exchange to the Chattahoochee exchange, see note on Sheet 14 of this section.

* Residential customer calls under this plan will be based on an allowance of five (5) calls for all applicable routes in the aggregate. This allowance applies on a per account basis per month.

Fourth Revised Sheet 24
Cancelling Third Revised Sheet 24
Effective: November 1, 2005

BASIC LOCAL EXCHANGE SERVICE

C. DIALING PLANS

3. ECS - Extended Calling Scope

Also called Message Rate Plan, this plan was instituted in Docket No. 891239-TL, Order No. 24595, and established a \$.25* per call message rate plan for exchanges with rate centers within a 1-10 mileage band of each other. The plan may also be established for exchanges with rate centers over 11 miles, with the approval of the Florida Public Service Commission.

Each call between the designated exchanges listed under Plan A will be charged for at a flat rate of \$.25 per call of unlimited duration. Such calls will be dialed as seven-digit local calls where the involved exchanges are in the same NPA. Where the exchanges are in different NPA's, the plan may be implemented on a 10 digit basis due to NXX code conflicts. This rate is applicable to both residential and business customers.

Plan A includes calls dialed or placed through an operator from all single party access lines, rotary lines, Centrex lines, PBX trunks, SmallTalk access lines and pay telephone lines. Plan A calls placed from SmallTalk access lines and message-rated PBX trunks will be assessed \$.25 per call; such calls are not included in call allowances. Calls placed as landline-to-mobile will be billed at \$.25 per call unless the mobile carrier subscribes to the landline-to-mobile reverse billing option in Section A25, G. Of this tariff. Operator assisted local call charges are applicable to plan calls placed through an operator.

Plan B routes include calls dialed and placed from all residential access lines, residential rotary, residential Centrex, SmallTalk and residential PBX to be billed at a flat rate of \$.25 per call* regardless of duration. Calls dialed and placed from business access lines, business rotary, business Centrex, pay telephones and business PBX will be billed at \$.10 for the first minute and \$.06 for each additional minute of use. Calls placed as landline-to-mobile will be billed at either \$.25* per call for residential services or \$.10/.06 per minute for business services unless the mobile carrier subscribes to the landline-to-mobile reverse billing option in Section A25 I. of this tariff. Operator assisted local call charges are applicable to plan calls placed through an operator.

* Residential customer calls under this plan will be based on an allowance of five (5) calls for all applicable routes in the aggregate. This allowance applies on a per account basis per month.

C. DIALING PLANS

3. ECS - Extended Calling Scope (Cont'd)

Plan C routes include one-way interLATA calls dialed and placed from all single party access lines, rotary lines, Centrex lines, PBX trunks, SmallTalk access lines and pay telephone lines to be billed on a usage-sensitive rate of \$.10 for the first minute of use and \$.06 for each additional minute of use. Calls placed as landline-to-mobile will be billed on a usage-sensitive rate of \$.10 for the first minute of use and \$.06 for each additional minute of use. Operator assisted local call charges are applicable to plan calls placed through an operator.

PATS phones utilizing the B-1 rate option will be assessed normal PATS usage charges on calls placed over ECS routes for Plan A, Plan B and Plan C.

Calls between ECS route exchanges will be considered local and will be charged for under the appropriate ECS plan rate.

4. TOLL-PAC

- a. TOLL-PAC (Toll-Personalized Area Calling) is a one-way calling plan which allows a subscriber the option of placing toll calls to nearby communities with a discount of 30% applied to the direct dial rate as appropriate for the period in which the call was made. This service is an alternative to the toll rates which would normally apply for such calls.

5. OELC - Optional Extended Local Calling

a. General

- 1) Optional Extended Local Calling (OELC) is an optional two-way calling plan available to customers in the exchanges listed under OELC in B.2. previously.
- 2) OELC permits exchange subscribers to place and receive unlimited toll-free calls to and from the selected exchange which is outside the subscriber's normal local calling area for a monthly rate as specified following. This rate is in addition to the applicable local exchange rate with which OELC is associated.
 - a) Calls eligible under this plan are those which are direct dialed either from the access line arranged for OELC to the selected exchange or from the selected exchange to the access line arranged for OELC, except as identified in paragraphs c), d) and e) following.
 - b) OELC service does not include calls to or from those other exchanges which are considered within the local calling scope of the selected exchange.

5. OELC (Cont'd)

a. General (Cont'd)

2) Cont'd.

- c) Credit card calls and calls that require the assistance of an operator for completion are not eligible under the OELC plan. Such calls will be charged for at the appropriate long distance rate except that an operator will reestablish an eligible call that is interrupted due to facilities or poor transmission.
- d) Calls from coin telephones in the selected exchange to access lines arranged for OELC are not eligible under this plan. Such calls will be charged for at the appropriate long distance rate. The operator, at the time the call is placed, does not have the capability of determining which access lines are arranged for OELC.
- e) Calls from hotel/motel guest rooms in the selected exchange to access lines arranged for OELC will be quoted the appropriate long distance rate at the time the call is placed. The operator does not have the capability of determining which access lines are arranged for OELC and will quote time and charges as they would for any toll call.

2) Cont'd.

f) When a subscriber to rotary service requests OELC, the last line in the rotary group will be the first line so arranged; the next-to-last line will be second, and so on. Each line arranged for OELC will be charged for at the appropriate rate.

3) OELC is not offered to pay telephones or FX service or to resellers.

b. Directory Listing

1) Subscribers to OELC are entitled to one listing in the telephone directory of the selected exchange at no charge. This is in addition to their regular exchange directory listing.

2) Such listing will contain a line of information sufficient to advise callers in the selected exchange that the subscriber to OELC can be called toll-free on a direct dialed basis. The choice of wording in the line of information rests entirely with the Company.

6. OEAS Optional Extended Area Service

- a. OEAS is a one-way optional calling plan offered by the company to subscribers in the exchanges specified in this section. OEAS provides alternative billing for direct distance dialed (DDD) calls to an exchange beyond the subscriber's local calling area but within the same LATA.

A customer with multiple access lines, subscribing to OEAS, will be billed a monthly minimum charge for each access line.

- b. Options I, III and IV of the OEAS plan are available only to subscribers with residential access lines. Option II is available to both residential and business access line services.
- c. OEAS is not offered in conjunction with FX service, pay telephone service, Shared Tenant Services, guest and patient lines which terminate in hotels, motels, nursing homes or hospitals, nor any other form of resold service.
- d. OEAS does not include calls to other exchanges which are considered within the local calling scope of the additive exchange.

6. OEAS Optional Extended Area Service (Cont'd)

- e. Suspension of service is permitted for lines arranged for OEAS at the rates and regulations prescribed in Section A2 of this tariff.
- f. Credit card calls and calls that require the assistance of an operator for completion are not eligible under the OEAS plan. Such calls will be charged for at the appropriate long distance rate except that an operator will re-establish an eligible call that is interrupted due to facilities or poor transmission.
- g. Options
 - 1) Residence and business subscribers in exchanges where OEAS has been approved by the Florida Public Service Commission may select from the following options at rates specified following.
 - a) Option I, III and IV - Available to residential access lines only. With Option I and III, subscribers pay a monthly flat rate (i.e., the per line monthly minimum) and receive a block of time. The customer may use the block of time to make calls to the specified exchange. If the entire block of time is not used, the customer will be billed only the monthly minimum. Additional usage, in excess of the monthly minimum, is billed on a per minute of use basis. With Option IV, subscribers pay a monthly flat rate and receive unlimited calling to the specified exchange.

GENERAL EXCHANGE TARIFF

Embarq Florida, Inc.

By: F. B. Poag
Director

SECTION A3
First Revised Sheet 45.1
Cancelling Original Sheet 45.1
Effective: November 1, 2005

BASIC LOCAL EXCHANGE SERVICE

D. MONTHLY EXCHANGE RATES – BASIC SERVICES (Cont'd)

16. Rates and Charges (Cont'd)

p. Term Discount Plan (TDP)

1) General

- a) A Term Discount Plan (TDP) provides customers, who have five (5) or more lines/trunks at the same location and billed under a single bill or who have five (5) or more lines/trunks at different locations and billed under a single bill, with discounted rates for Business Flat Rate, Business Rotary Flat Rate, Business Key Lines, Business Rotary Key Lines, and Trunks Flat Rate. Fewer than five (5) lines/trunks billing under a single bill are not eligible for TDP rates, regardless of whether the customer subscribes to five (5) or more lines/trunks.
- b) Business Flat Rate, Business Rotary Flat Rate, Business Key Lines, Business Rotary Key Lines, and Trunks Flat Rate may be ordered under a TDP for fixed periods of two (2) years and three (3) years.
- c) The customer must specify the length of the initial service period at the time the service is ordered.
- d) At the end of the TDP commitment period the customer may subscribe to a new TDP at discounts on the prevailing rates as set forth in A3.p.3) following. If the customer does not contact the Company 90 days prior to the expiration of the TDP, the commitment period and the discount in effect at the time of expiration will automatically be extended for 12 months. The customer can terminate service at the end of the minimum commitment period with no penalty or obligation to continue the service.
- e) Rate increases or decreases will automatically be applied to the monthly term plan rates for the remaining term of the TDP. If a Company initiated rate increase causes the services under the TDP to increase by 10% or more annually, then the customer may cancel the TDP without incurring termination liability charges provided the customer notifies the Company within 30 days after the effective date of the rate increase.
- f) The customer can extend TDP commitment periods at any time during the term of the plan, up to a maximum of three years. The number of remaining months in the original term plan will apply toward the new term plan selected.

MISCELLANEOUS SERVICE ARRANGEMENTS

D. MONTHLY EXCHANGE RATES – BASIC SERVICES (Cont'd)

16. Rates and Charges (Cont'd)

p. Term Discount Plan (TDP) (Cont'd)

2) Termination Liability Charges

- a) If a customer under a Term Discount Plan (TDP) disconnects any portion of the Business Flat Rate, Business Rotary Flat Rate, Business Key Lines, Business Rotary Key Lines, and/or Trunks Flat Rate TDP service prior to the expiration of the TDP, then a Termination Liability Charge will apply to those services that are disconnected. The Termination Liability Charge will be a one-time charge equal to the sum of 50% of the payments for the remainder of the TDP. Should a customer drop below the line/trunk minimum requirement, the customer will no longer qualify for the TDP, and the remaining lines/trunks will default to the standard month-to-month rates effective with the disconnect date.

3) Discounts

	<u>Two Years</u>	<u>Three Years</u>
a) Business Flat Rate	10%	15%
b) Business Rotary Flat Rate	10%	15%
c) Business, Key Line	10%	15%
d) Business, Rotary, Key Line	10%	15%
e) Trunks, Flat Rate	10%	15%

GENERAL EXCHANGE TARIFF

Embarq Florida, Inc.

By: F. B. Poag
Director

SECTION A3
Eleventh Revised Sheet 51
Cancelling Tenth Revised Sheet 51
Effective: November 12, 2004

BASIC LOCAL EXCHANGE SERVICE

F. DIRECTORY ASSISTANCE

1. General

- a. Directory Assistance Service is provided by the Telephone Company to assist the users of the service in obtaining telephone numbers.
- b. The rates set forth following apply when subscribers of the company request assistance in determining telephone numbers of subscribers (1) who are located in the same Local Calling Area or, (2) who are not located in the same Local Calling Area or Home Numbering Plan Area as the subscriber's serving exchange.
- c. There will be no charge for Local Calling Area Directory Assistance calls received from customers with a physical or mental impairment rendering them unable to use the telephone directory.
- d. Calls to Long Distance Directory Assistance are charged for at the appropriate rate.
- e. Directory Assistance Service for Outside the Local / Home Numbering Plan Area is not available for Pay Telephone Service as described in Section A7 of this tariff.

2. Rates and Charges

a. Local Calling Area

- 1) A charge of \$.55 is applicable for each call to Directory Assistance, except as noted in 3) following.
- 2) A maximum of two numbers may be requested on each call.
- 3) A customer is allowed one Directory Assistance call per access line or PBX trunk line per billing period without charge. This allowance is cumulative for group billed services. A subscriber to Centrex Service is allowed one Directory Assistance call per billing period for each Centrex station line at no charge.

GENERAL EXCHANGE TARIFF

Embarq Florida, Inc.

By: F. B. Poag
Director

SECTION A3
Eighth Revised Sheet 52
Cancelling Seventh Revised Sheet 52
Effective: March 1, 2003

BASIC LOCAL EXCHANGE SERVICE

F. DIRECTORY ASSISTANCE

2. Rates and Charges (Cont'd)

b. Outside the Local / Home Numbering Plan Area

- 1) A charge of \$.95 is applicable for each call to Directory Assistance.
- 2) A maximum of two numbers may be requested on each call.

c. In locations where the customer has the technical capability to direct dial Directory Assistance but places the call by dialing "0", Operator Assisted Station-to-Station Charges listed in Section A3.H.3.b. will apply, in addition to the Directory Assistance Service Charge.

G. DIRECTORY ASSISTANCE CALL COMPLETION (DACC)

1. General

- a. Directory Assistance Call Completion (DACC) provides an incoming Directory Assistance customer requesting a local or IntraLATA number a mechanized announcement offering call completion to the listed number requested, excluding nonpublished numbers. The call is completed on a sent-paid basis which is paid for by the calling customer, except on 0+HNPA+555 calls which will allow Calling Card and Billed to Third Number Charges.
- b. The mechanized announcement will instruct the caller that for an additional charge, they may have the call automatically completed by depressing a specific digit on the key pad. All completed calls will be charged the DACC charge, in addition to any other appropriate charges.

GENERAL EXCHANGE TARIFF

Embarq Florida, Inc.

By: F. B. Poag
Director

SECTION A3
Second Revised Sheet 53
Cancelling First Revised Sheet 53
Effective: May 29, 1997

BASIC LOCAL EXCHANGE SERVICE

G. DIRECTORY ASSISTANCE CALL COMPLETION (DACC)

1. General (Cont'd)

- c. The Telephone Company assumes no responsibility or liability for any errors in the information furnished. The caller shall indemnify the Company and hold it free and harmless of and from any and all claims, demands, or damages that shall arise from the use of the service.
 - 1) This service is furnished solely for the telephone calling purposes of the caller.
 - 2) Additional provisions concerning limitations of liability and allowance for interruption of service are set forth in Section A2 of this tariff.
- d. This offering provides call completion on a Local Access and Transport Area (LATA) basis. Customers will need to consult their directory for LATA maps.
- e. DACC will be furnished only where facilities permit and where the service used by the customer can support all billing requirements for the service.
- f. Only the second provided Directory Assistance telephone number may be dialed and completed by DACC if two Directory Assistance requests are made during the same call.
- g. Customers who currently subscribe to a screening option that includes 1+ or 411 will not be eligible for this service.

GENERAL EXCHANGE TARIFF

Embarq Florida, Inc.

By: F. B. Poag
Director

SECTION A3
Third Revised Sheet 54
Cancelling Second Revised Sheet 54
Effective: June 3, 1997

BASIC LOCAL EXCHANGE SERVICE

G. DIRECTORY ASSISTANCE CALL COMPLETION (DACC)

1. General (cont'd)

h. DACC is not available for the following:

- 1) Alternately billed calls, i.e., Collect, Calling Card*, or Billed to Third Number*
- 2) Any PBX type customer who requires real-time notification of charges, i.e., hotels/motels, hospitals, etc.
- 3) Any special lines, i.e., prisons, etc.
- 4) 900/976 directory assistance number requests
- 5) Calls from Pay telephone, coin or coinless stations
- 6) InterLATA long distance calls
- 7) Cellular providers/wireless technology
- 8) Independent telephone companies that access the Company's directory assistance service
- 9) WATS
- 10) Alternate or Competitive Local Exchange Companies
- 11) N11 services

i. Local and intraLATA individual message detail is included as a part of this service.

j. DACC is not subject to concessions.

* On 0+HNPA+555 calls, Calling Card and Billed to Third Number charges will be allowed.

G. DIRECTORY ASSISTANCE CALL COMPLETION (DACC)

2. Rates and Charges

- a. The DACC service charge specified will be applicable to all subscribers, except that DACC service charges are not applicable to handicapped customers who are exempt from Directory Assistance charges.
- b. For charging purposes, a completed call is defined in Section A1 of this tariff.
- c. Service Charges

	Rate
DACC service charge, per completed call	\$.50

H. OPERATOR ASSISTED LOCAL CALLS

- 1. All types of local exchange service have local calling areas as specified previously in this tariff which are the areas that can be called on a flat-rate basis (no charge for individual calls), on a local coin call rate basis, or a measured or message rate basis.
- 2. Local dial calls must be dialed and completed without the assistance of a Company operator and must be billed to the originating telephone when a charge is applicable. Otherwise, operator assistance charges will apply to the call, in addition to the applicable local dial rate.
- 3. The following service charges apply in addition to the local dial rate applicable for operator assisted local calls.
 - a. Station-to-Station customer dialed credit card local call \$1.00
 - b. Station-to-Station operator assisted sent-paid, collect, third number, and non-customer-dialed credit card calls \$1.60
 - c. Person-to-Person operator assisted local call \$4.00

H. OPERATOR ASSISTED LOCAL CALLS (Cont'd)

4. The following Operator Assisted Local Calls are exempt from the service charge:
 - a. Calls to designated Company numbers for official telephone business.
 - b. Emergency calls to recognizable authorized civil agencies.
 - c. Those cases where a Company operator provides assistance to:
 - 1) re-establish a call which has been interrupted after the called number has been reached, or
 - 2) reach the called telephone number where facility problems prevent customer dial completion.
 - 3) Place a non-coin, sent-paid call for a calling party who identifies himself/herself as being handicapped and unable to dial the call because of that handicap.

I. VERIFICATION AND EMERGENCY INTERRUPT SERVICE

1. General

Verification and Emergency Interrupt Service is furnished where and to the extent that facilities permit. The customer shall indemnify and save the Company harmless against all claims that may arise from either party to the interrupted call or any person.

a. Verification

- 1) The Company furnishes Verification Service for the purpose of aiding subscribers with legitimate call completion problems. Upon request, the operator will verify and provide the line status condition of a local subscriber line.
- 2) A subscriber originated request for verification of a local number other than an emergency agency number is a chargeable verification request. No charge applies if the line is out of order.

b. Emergency Interrupt Service

- 1) The Company furnishes Emergency Interrupt Service when a subscriber who has originated a verification request to a line which has been found in a busy talking state informs the operator that an urgent or emergency situation exists and requests that the operator have the busy line cleared.
- 2) A subscriber originated request for Emergency Interrupt to a local number other than an emergency agency number is a chargeable Emergency Interrupt request.
- 3) An Emergency Interrupt requires verification. Both charges are applicable for an Emergency Interrupt Request.

BASIC LOCAL EXCHANGE SERVICE

I. VERIFICATION AND EMERGENCY INTERRUPT SERVICE

2. Rates and Charges

- a. A charge of \$2.00 is applicable for each chargeable verification request as defined previously.
- b. A charge of \$2.00 in addition to the verification charge is applicable for each chargeable emergency interrupt request as defined previously.
- c. No charge will apply if the requesting customer identifies that the call is to or from an official public emergency agency. An official public emergency agency is defined as a government agency which is operated by the Federal, state or local government, and has the capability and legal authority to provide prompt and direct aid to the public in emergency situations. Such agencies include the local police, state police, fire department, licensed hospitals, etc.
- d. Charges may not be billed on a collect basis or on a third number basis to the number being verified or interrupted.
- e. If the number verified is not in use, or as a result of interrupt, the line is cleared, and at the calling party's request the operator completes the call, the charges for Operator Assisted Local Calls as defined in this tariff section apply in addition to the applicable verification and emergency interrupt charges.

J. LIFELINE ASSISTANCE PROGRAM

1. General

- a. The Interstate Subscriber Line Charge Waiver and Matching Program adopted by the Florida Public Service Commission is a Lifeline Assistance Program and provides for a federal credit equal to 100% of the Interstate Subscriber Line Charge (SLC) of \$6.50 as shown in the Interstate Access Tariff, Section 4, an equivalent Company provided subsidy of \$5.75, plus an additional federal reduction of \$3.50 for a total credit of up to \$15.75 per month. Effective October 1, 2000, eligible applicants living on federally recognized Native American reservations will receive an additional credit of up to \$25.00 sufficient to reduce the monthly rate for local service to no less than \$1.00 inclusive of the subscriber line charge.
- b. The federal and Company credits are applied to the local service bills for qualified residential recipients of public assistance who apply for the credits and authorize agency verification of their participation in at least one of the following programs: Temporary Assistance to Needy Families (TANF), Medicaid, Supplementary Security Income (SSI), food stamps, Federal Public Housing Assistance (Section 8), Low-Income Home Energy Assistance Program (LIHEAP) and National School Lunch Program (free meals program only).
- c. An applicant living on federally recognized Native American reservations is eligible for additional credit as outlined in J.1.a. preceding, if he/she is currently a recipient of benefits from one of the following assistance programs: Temporary Assistance to Needy Families (TANF), Medicaid, Supplementary Security Income (SSI), food stamps, Federal Public Housing Assistance (Section 8), Low-Income Home Energy Assistance Program (LIHEAP), Federal Public Housing Assistance, Bureau of Indian Affairs (BIA) General Assistance, Tribally Administered Temporary Assistance for Needy Families, Head Start (only for those meeting its income qualifying standard) and National School Lunch Program (free meals program only).
- d. Additionally, customers not receiving benefits under one of the preceding programs, and whose total gross annual income does not exceed 135% of the federal poverty guidelines, meet the requirements of a State established means test and may apply directly to the Office of Public Counsel (OPC) for eligibility certification.
- e. Lifeline Assistance is available for one telephone line per residence, at the customer's principle place of residence.

J. LIFELINE ASSISTANCE PROGRAM - (Cont'd)

1. General - (Cont'd)

- f. SmallTalk Service as found in D.2. of this tariff section is not eligible for Lifeline Assistance.
- g. Vacation Service is not applicable to lines with Lifeline assistance.
- h. Local Service may not be disconnected for failure to pay toll charges.
- i. Toll Blocking services are available to Lifeline customers at no charge.
- j. Deposits may not be collected from customers who select toll blocking. If a Lifeline customer removes Toll Blocking prior to establishing an acceptable credit history, a deposit may be required. When applicable, advance payments will not exceed the connection and local service charges for one month.
- k. Federal Universal Service Fund End User Charge will not be billed to Lifeline customers.
- l. From September 19, 2005 through March 31, 2006, relocated victims of Hurricane Katrina from the following areas:
 - 1. Any Louisiana parish
 - 2. Any Mississippi county
 - 3. Baldwin, Choctaw, Clarke, Greene, Hale, Jefferson, Marengo, Mobile, Pickens, Sumter, Tuscaloosa or Washington Counties in Alabama

may receive Lifeline assistance without qualifying under 1.b., 1.c. or 1.d above upon self certification of displacement from the above identified areas and qualification for any federal or state disaster relief program. Effective April 1, 2006, Hurricane Katrina Lifeline benefits will be discontinued unless the subscriber qualifies under one of the above programs.

J. LIFELINE ASSISTANCE PROGRAM - (Cont'd)

2. Applications and Regulations

a. Guidelines for implementation of this program are as follows:

- 1) Certification Procedures – As proof of eligibility, all applicants for this service will sign a Simplified Certification Document, certifying under penalty of perjury, that the customer is receiving benefits from one of the programs identified in paragraph J.1.b, above, identifying the specific program or programs from which the customer receives benefits, and agreeing to notify the Company if the customer ceases to participate in such program or programs.

The Simplified Certification Document will be provided to the customer by the Company, upon request.

- 2) Processing Procedures -- The Company will process all Simplified Certification Documents and apply the appropriate credit on the subscriber's monthly bill.
- 3) Verification Procedures -- The Company reserves the right to periodically audit its records, working in conjunction with the appropriate state agencies, for the purpose of determining continuing eligibility. Information obtained during such audit will be treated as confidential information to the extent required under State and Federal laws. The use or disclosure of information concerning enrollees will be limited to purposes directly connected with the administration of the Lifeline plan.

J. LIFELINE ASSISTANCE PROGRAM – (Cont'd)

2. Applications and Regulations – (Cont'd)

a. Guidelines for implementation of this program are as follows: - (Cont'd)

3) - (Cont'd)

When a customer is determined to be ineligible as a result of an audit, the Company will contact the customer. If the customer cannot provide eligibility documentation, the Lifeline credit will be discontinued on the following bill.

- b. No Secondary Service Ordering Charges will apply when this service is initiated or canceled by a subscriber.
- c. A Lifeline customer's basic local service will not be disconnected for non-payment of unpaid toll charges or ancillary services, but may be disconnected for non-payment of basic local service charges, taxes and fees. Access to toll service may be denied for non-payment of regulated tolls. Access to ancillary services may be denied for non-payment of basic local service charges. A Lifeline customer's request for reconnection of basic local service will not be denied if the service was previously denied for non-payment of toll or ancillary charges. Partial payments will first be applied to basic local service.
- d. Lifeline eligible customers who have previously been disconnected for nonpayment of local charges may obtain local service equipped with toll blocking upon payment of outstanding debt for regulated non-toll charges, taxes and fees. Toll blocking shall not be removed prior to receipt of full payment of all outstanding toll charges.
- e. Payment for the outstanding debt associated with Basic Local Service and associated taxes and fees may be paid in installments for a period of not less than four months. Should the customer default on this payment arrangement, service will be disconnected and the customer must pay the outstanding non-toll balance in full before local service will be reestablished. Installment payments are not available on defaulted amounts previously installment billed.
- f. Payment for other outstanding debt will be pursued in the same manner as for non-Lifeline customers.

K. TRANSITIONAL LIFELINE ASSISTANCE PROGRAM

1. General

- a. Transitional Lifeline Assistance is a state program which provides a 30% reduction of the applicable monthly exchange flat rate for residential basic local service for subscribers who no longer qualify for the Lifeline Assistance Program.

2. Regulations

- a. A Lifeline Assistance subscriber who requests this service will receive the discounted rate for a period of one (1) year from the date the subscriber ceases to be qualified for the Lifeline Assistance Program.

L. SPECIAL ACCESS SERVICES

1. General

- a. When a special access line, intraLATA interexchange private line or Private Bypass Facility is connected to a device capable of and for the intention of completing calls into the local exchange network, there will be an additional measured or message charge associated with the flat rate local service rate for that device (i.e., the PBX trunk in the case of a PBX). Those customers who intend to use their special access line, intraLATA interexchange private line or private bypass facility for the completion of calls into the local exchange network and have local exchange service other than flat rate will be required to convert to flat rate.
- b. The measured charge will apply where facilities and equipment are available in the exchange central office. In all other exchange central offices, the message charge will apply. As facilities and equipment become available in central offices, measured charges will apply.

| a. Measured Charge, per minute of local usage | \$.03 |
| b. Message Charge, per local message | \$.12 |

Please refer to the Private Line tariff for specific regulations.

M. STORM COST RECOVERY CHARGE

1. General

In accordance with the Florida Public Service Commission's ruling in Docket No. 050374-TL, a charge will be assessed to each Access Line or Facility beginning October 6, 2005 through October 5, 2007. This charge is designed to recover extraordinary expenditures incurred by the Company for storm damage restoration related to Hurricanes Charley, Frances, Jeanne and Ivan during 2004. This surcharge will not be assessed to Lifeline customers.

2. Rates and Charges

	<u>Monthly Rate</u>
Per Access Line	\$0.85 *

* For each PBX Trunks multiply the rate by two. For each ISDN-PRI multiply the rate by five for each T-1 facility.

SERVICE CHARGES

A. GENERAL

1. A service charge represents the charge for one or more work functions necessary to perform a service connection, move, or change.

B. DEFINITIONS/APPLICATION OF CHARGES

1. Service Ordering Charge (Primary and Secondary) The charge appropriate for receiving and recording information and/or taking action in connection with a customer or applicant and processing the necessary data.
 - a. The service order charge applies per customer request for work performed by the Company to be completed for the same account at the same premises, on the same date.
 - b. Where more than one account is located at the same premises, work on each individual account will be considered separately.
 - c. One Service Ordering Charge is applicable for each channel (circuit) between two points on separate premises. Multiple channels between the same points, or multi-point channels, or extension of mileage channels, ordered at the same time are included under the same Service Ordering Charge.
2. Access Line Charge Work associated with the line extending from the serving central office to the customer's demarcation point. Includes, but is not limited to, central office connections, cable cross connections, and connecting and disconnecting the drop and block wires.

SERVICE CHARGES

B. DEFINITIONS/APPLICATION OF CHARGES (Cont'd)

2. (Cont'd)

a. The access line charge applies for work including but not limited to:

- 1) Making and changing connections in the central office
- 2) Making and changing connections in distribution facilities between the central office and the customer's demarcation point, including necessary cross connections and line transfers.

3. Premises Visit Charge The charge that applies for a visit to the customer's premises for customer-requested rearrangement of drop wire, protector and/or Telephone Network Interface device (TNI).

- a. The premises visit charge applies only for a visit to the customer's premises to relocate or rearrange drop wire, protector and/or TNI at the customer's request.
- b. When more than one visit is necessary to complete the work due to Company reasons, only one Premises Visit Charge applies.
- c. This charge does not apply for disconnect work.
- d. For each trip to more than one customer location, a premises visit charge will apply for each location visited.

4. Premises Work Charge Includes work performed on the customer's premises other than work required to establish network access.
 - a. The premises work charge applies to work performed on the customer premises for customer requested rearrangement of the drop wire, protector and/or TNI.
5. Record Change Charge The charge appropriate for adding or changing directory listings at the customer's request.
 - a. The record change charge applies for changing listings at the customer's request. It does not apply for corrections of name or address or for listings changed for Company reasons.
6. Restore Service The charge applicable to restoration of service following a temporary suspension of service. The suspension of service may be at the customer's request or for nonpayment of charges.
 - a. In the event service is temporarily suspended at the subscriber's request, such service will be restored at the charges listed following.
 - b. In the event service is temporarily interrupted for nonpayment, such service will be restored upon payment of charges due or, at the discretion of the Company, a substantial portion thereof, and the Restore Service charges will be applicable.

C. REGULATIONS (Cont'd)

2. Service charges do not apply for:
 - a. The substitution of the name of another member of the family for that already listed in the directory, nor for correction in the addresses in the directory.
 - b. Telephone Service previously provided over a Government system where there is no break in the continuity of service.
 - c. Company-initiated directory listings or changes in class or grade of service.
 - d. Upgrades or downgrades to or from flat rate service to measured rate service.
3. When service is re-established at a location which has been destroyed by fire, flood, or wind, or made untenable by fire, flood, or wind, service connection charges do not apply when the service is re-established within a reasonable time. If the subscriber desires service at a new location for a temporary period, the service connection charge will apply covering the establishment of service at the temporary location, but no service connection charge will apply when service is re-established at the former location. If the subscriber desires service established at a new and permanent location, then the service connection charge will apply. Changes in a location of existing access line terminations to points outside the premises occupied by the subscriber are considered as new service connections at the new location.

SERVICE CHARGES

C. REGULATIONS (Cont'd)

4. In all cases where construction or installation charges apply, such charges are in addition to the prescribed service connection charges. Service Ordering Charges apply in addition to, and not in lieu of, mileage charges, initial Nonrecurring Charges, as well as Construction Charges.
5. Except as provided in this paragraph, service connection charges are required to be paid when the desired work functions are requested. For existing subscribers, additional service may be established in advance of payment of service connection charges. Service may be established in advance of payment of service connection charges for additions to the service provided for the use of departments, administrations, or agencies of the Federal, State, County, or Municipal governments.
6. Where the service desired requires more than one order, premises work, or access line work function, the total charge is the sum of the separate charges for each function required, except as provided elsewhere in this tariff.
7. The service connection charges specified in this tariff contemplate work being performed during regular scheduled working hours. Work performed during non-scheduled hours will necessitate the subscriber paying an additional charge on costs incurred for such nonscheduled work.
8. Applicants for service may pay service connection charges in equal monthly installments over a period of at least three months. The Company will charge a service fee of \$1.00 for each monthly installment billing of service connection charges.

G. LINK-UP FLORIDA

1. General

- a. Link-Up Florida is offered in all exchanges to provide subsidized assistance to qualifying applicants. It is intended to preserve and promote subscribership among low income households by providing a credit to and a deferred schedule for payment of the installation and connection charges applicable to the provisioning of residence service. The Link-Up Florida program applies to installation and connection charges only. All other services will fall under Commission approved tariffed rates and regulations.
- b. The Company's rules for the Link-Up Florida program are as provided in Commission Order No. 19684, Docket Number 880847-TL.
- c. The Company's deferred payment schedule referenced in the previously mentioned order is provided as follows in this section.
- d. In compliance with the FCC's Order, FCC 05-178, dated October 14, 2005, support under the federal Link-Up program will be provided to victims of Hurricane Katrina moving to temporary housing arrangements and to those who return to permanent residences in the affected areas. A federal credit in the amount of thirty dollars (\$30.00) per qualifying household will be available to subscribers upon request and certification by the applicants that they were residents of counties that are designated by FEMA as eligible for individual assistance. A signed letter with this certification will suffice. A maximum of two federal credits (one for the temporary location and one for a return to the permanent location) will be available for qualified subscribers. These credits will be available for customer orders through March 1, 2007. These subscribers will not necessarily be eligible for the Lifeline program as specified in this tariff.

2. Regulations

- a. Persons wishing to qualify for the credit must meet state certification criteria for eligibility. This credit is available only to residence customers, and will be applied to the nonrecurring charges for the establishment of service for a single telephone line per household at the principal place of residence.

SERVICE CHARGES

G. LINK-UP FLORIDA (Cont'd)

2. Regulations (Cont'd)

a. (Cont'd)

- 1) The customer will be responsible for payment of any applicable monthly charges in association with his/her service.
- 2) The Company reserves the right to require a deposit according to the regulations set forth in Section A2.
- 3) Any additional services, other than the basic R-1 service will be at the appropriate tariffed rate.

b. The subscriber must not be a dependent for federal income tax purposes, unless the subscriber is more than 60 years of age.

c. The federal credit is applied to the local service bills for qualified residential recipients of public assistance who apply for the credits and authorize agency verification of their participation in at least one of the following programs: Temporary Assistance to Needy Families (TANF), Medicaid, Supplementary Security Income (SSI), food stamps, Federal Public Housing Assistance (Section 8), Low-Income Home Energy Assistance Program (LIHEAP) and National School Lunch Program (free meals program only).

d. For an applicant living on federally recognized Native American reservations, additional assistance programs are as follows: Bureau of Indian Affairs (BIA) General Assistance, Tribally Administered Temporary Assistance for Needy Families, Head Start (only for those meeting its income qualifying standard) and National School Lunch Program (free meals program only).

e. Additionally, customers not receiving benefits under one of the preceding programs, and whose total gross annual income does not exceed 135% of the federal poverty guidelines, meet the requirements of a State established means test and may apply directly to the Office of Public Counsel (OPC) for eligibility certification.

f. From September 19, 2005 through March 31, 2006, relocated victims of Hurricane Katrina from the following areas:

1. Any Louisiana parish
2. Any Mississippi county
3. Baldwin, Choctaw, Clarke, Greene, Hale, Jefferson, Marengo, Mobile, Pickens, Sumter, Tuscaloosa or Washington Counties in Alabama

may receive Link-Up Florida benefits without qualifying under 2.c. or 2.d above upon self certification of displacement from the above identified areas and qualification for any federal or state disaster relief program.

SERVICE CHARGES

G. LINK-UP FLORIDA (Cont'd)

3. Rates and Charges

Applicable Federal Credit is 50% of the total of the Service Ordering Charge plus Access Line Charge or a \$30.00 reduction, whichever is less. Effective October 1, 2000, in addition to the reduction in this section, eligible applicants living on federally recognized Native American reservations will receive a 100% discount on service connection charges which exceed \$60.00, up to a maximum of \$130.00. These charges include both line extension and initial connection charges. The combined Link-up credit shall not exceed \$100.00.

- a. There is not restriction as to the number of service connections per year for which qualifying low-income subscribers who relocate may receive link-up support.

CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

A. GENERAL

1. Contents

Section A5 contains the regulations, rates and charges applicable to the provision of Company services which require:

- Special Construction
- Additional Engineering, Labor and Miscellaneous Charges
- Charges for Unusual Installations
- Specialized Service or Arrangements
- Contract Service Arrangements
- Special Disaster Relief Rates Initiated by the Company

2. Explanation of Terms

The following terms are applicable to this section of the tariff.

ACTUAL COST - the estimated costs applicable to the specific case of special construction plus prorated costs of items used in common with other facilities, minus estimated net salvage.

ESTIMATED COST - the estimated costs applicable to the specific case of special construction of facilities plus prorated costs of items used in common with other facilities, minus estimated net salvage.

EXCESS CAPACITY - a quantity of facilities requested by a customer which is greater than that which the Company would construct to fulfill the customer's order for service.

CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

A. GENERAL (Cont'd)

2. Explanation of Terms (Cont'd)

FACILITIES - any cable, poles, conduit, microwave or carrier equipment, wire center distribution frames, central office switching equipment, computers (both hardware and software), business machines, etc., utilized to provide the services offered under this tariff or the services provided by a customer for his own use.

FIVE (5) YEAR FORECAST - a projection of the maximum number of cable pairs the customer will require over a five year period that is mutually agreed upon by the customer and the Company. This is normally the Initial Liability Period.

INITIAL LIABILITY PERIOD - (ILP) a written agreement with the Company and the customer on the quantity of cable pairs to be provided and the length of time in which the customer expects to place the cable pairs in service.

MAXIMUM TERMINATION LIABILITY (MTL) CHARGE - the maximum amount of money for which the customer is liable in the event all services or facilities ordered in a special construction case are discontinued before a specified period of time.

MTL PERIOD - the length of time the customer is liable for a termination charge in the event the specially constructed facilities are terminated. The MTL period is equal to the average account life of the telephone facilities provided. When the construction involves multiple classes of plant with differing lives, the MTL period is equal to the weighted average of the account lives involved in the special construction case.

CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

A. GENERAL (Cont'd)

2. Explanation of Terms (Cont'd)

NET SALVAGE - the estimated scrap, or trade-in value, less the estimated cost of salvage. Cost of salvage includes the costs of demolishing, tearing down, removing, or otherwise disposing of the material and any other applicable costs. Because the cost of removal may exceed salvage, facilities may have negative net salvage.

NONRECOVERABLE COST - the cost of providing for the specially constructed facilities for which the Company has no foreseeable use should the customer terminate service.

OTHER TELEPHONE COMPANY - a company that is not Embarq Florida, Inc., but is engaged in the business of furnishing public switched network telephone exchange services.

PERMANENT FACILITIES - facilities that are expected to remain in place for the normal service life of the plant.

RECOVERABLE COST - the cost of providing for the specially constructed facilities for which the Company has a foreseeable reuse, either in place or elsewhere, should the customer terminate service.

SPECIAL CONSTRUCTION - a series of tariff regulations that are designed to protect the Company from undue risk associated with specially constructed facilities and allows the Company to recover excessive investments incurred by the construction of facilities that will carry services currently offered on a general basis in a service tariff. These regulations are also designed to prevent undue subsidizations of specially constructed facilities by the general body of ratepayers.

A. GENERAL (Cont'd)

2. Explanation of Terms (Cont'd)

SUBSCRIBERS IN GENERAL - as used in this tariff is to be interpreted to include those cases where the construction of permanent facilities is required to serve two or more customers.

TEMPORARY FACILITIES - facilities used to provide service(s) where it is known before construction that the facilities will be relocated, abandoned or removed prior to the normal service life of the facilities. The cost of temporary facilities is not to be recovered from subscribers in general and does not constitute a carrier of last resort obligation for the Company.

TERMINATION CHARGE - the portion of the maximum termination charge that is applied as a nonrecurring charge when all services are discontinued prior to the expiration of the specified liability period.

UNDERUTILIZATION CHARGE - an obligation, incurred by a customer, which is designed to reimburse the Company for the annual costs of a portion of specially constructed facilities when the customer's actual use of those facilities is less than 70% of the amount of use forecasted or ordered by the customer.

B. SPECIAL CONSTRUCTION

1. General

- a. Special construction consists of a series of tariff regulations that are designed to protect the Company from undue risk associated with specially constructed facilities and allows the Company to recover excessive investments incurred by the construction of facilities that will carry services currently offered on a general basis in a service tariff. These regulations are also designed to prevent undue subsidization of specially constructed facilities by the general body of ratepayers

B. SPECIAL CONSTRUCTION (Cont'd)

1. General (Cont'd)

- b. When special construction of facilities is required, the provisions of this tariff apply in addition to all regulations, rates and charges set forth in the appropriate service tariff. All applicable provisions set forth in this tariff will be implemented by a written agreement prepared by the Company and signed by the customer.
- c. The regulations, rates and charges applicable for special construction of Company facilities which are used to provide services under this tariff are as follows.

2. Conditions Requiring Special Construction

Special construction is required when suitable facilities are not available to meet a customer's order for service and/or a mutually agreed upon facility forecast and one or more of the following conditions exist:

- a. The Company has no other requirement for the facilities constructed at the customer's request.
- b. The customer requests that service be furnished using a type of facility, or via a route, other than that which the Company would otherwise utilize in furnishing the requested service.

B. SPECIAL CONSTRUCTION (Cont'd)

2. Conditions Requiring Special Construction (Cont'd)

- c. The customer requests the construction of more facilities than required to satisfy his initial order for service; and submits a mutually agreed upon facility forecast.
- d. The customer requests construction be expedited resulting in added cost to the Company.
- e. The customer requests that temporary facilities be constructed.
- f. The cost to construct line extension facilities for an individual subscriber when the cost exceeds the estimated five year exchange revenue.
- g. The term "customer" as used in the preceding context also includes those entities, businesses, government agencies or their agents, which request the construction of temporary facilities or create a requirement for the construction of temporary network facilities. The services provided over the temporary facilities may be ordered by and billed to separate end user customers. Examples of such entities or businesses include, but are not limited to, political campaigns, sporting events, concerts, government agencies such as the Federal Emergency Management Agency (FEMA) or the United States Army Corps of Engineers or agents of such agencies or businesses.
- h. No customer shall be charged special construction rates for the minimum grade of line offered where the new plant parallels and reinforces existing plant or is constructed on or along any public road or highway and is to be used to serve subscribers in general.

CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

B. SPECIAL CONSTRUCTION (Cont'd)

3. Ownership of Facilities

Unless otherwise specified in this Tariff, the Company retains ownership of all specially constructed facilities even though the customer may be required to pay special construction charges.

4. Interval to Provide Facilities

a. Based on available information and the type of service ordered, the Company will establish an objective date for the installation of necessary facilities. The date will be established on an individual case basis and provided to the customer. The Company will make every reasonable effort to assure that the date is met. However, shortage of components, personnel or other factors may lengthen the installation interval.

b. If the scheduled completion date cannot be met due to circumstances beyond the control of the Company, a new completion date will be established and the customer will be notified. The amount of interest accrued on all prepaid items will be credited to the customer's account for any delays that could have been circumvented by the Company.

5. Special Construction Involving Interstate and Intrastate Facilities

When special construction involves facilities used to provide both interstate and intrastate services, charges for the portion of the construction used to provide intrastate service shall be in accordance with Embarq Florida, Inc.'s Intrastate

Access Service tariff. Charges for the portion of the construction used to provide interstate service shall be in accordance with Embarq's Interstate Access Tariff.

6. Charges of Other Companies

Charges and/or maximum termination liabilities for special construction of facilities provided by another company are developed by the other company and may be applied by Embarq Florida, Inc., under this tariff on the other company's behalf.

7. Liabilities, Charges and Payments for Special Construction

- a. The various charges and payments that apply when the Company provides special construction of facilities in accordance with a customer's specific request are described as follows. The customer must provide the Company with written approval of all liabilities and charges prior to the start of construction. If more than one condition requiring special construction is involved, charges for each condition apply.
- b. Payment is due upon presentation of a bill for the specially constructed facilities. To safeguard its interests during construction, the Company will require the customer to make an advance payment for the portion of the estimated cost of the special construction for which the customer is subject to a nonrecurring charge. Partial payments will be requested as costs are incurred and will be credited to the customers account. No special construction charges paid to the Company are refundable except as provided under Section B.7.d.(2).

CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

B. SPECIAL CONSTRUCTION (Cont'd)

7. Liabilities, Charges and Payments for Special Construction (Cont'd)

- c. When the facilities are provided, billing of recurring charges for specially constructed facilities starts on the contract service date or the in-service date, whichever is earlier. Billing accrues through and includes the day that the specially constructed facilities are discontinued. Monthly charges will normally be billed one month in advance.
- d. The customer has the option of having the liabilities and charges billed based on either estimated or actual costs. Costs, as used in this context, may include one or more of the items specified in E.1.c. following. Estimated costs will be billed unless the customer notifies the Company of the selection of the actual cost option in writing prior to the start of special construction.
 - 1) Under the estimated cost option, special construction liabilities and charges are developed based on estimated costs and will be specified in the written agreement between the customer and the Company.

B. SPECIAL CONSTRUCTION (Cont'd)

7. Liabilities, Charges and Payments for Special Construction (Cont'd)

d. (Cont'd)

- 2) Under the actual cost option, if all actual costs are not available prior to the start of service, estimated special construction charges will be specified in the written agreement between the customer and the Company. As soon as the actual costs, including costs of preparation and processing are subsequently determined, the estimated charges will be adjusted to reflect the actual costs.

8. Contingent Liabilities

In special construction cases that involve recurring charges, as described in B.9.b. following, one or both of two categories of contingent liabilities will apply. These liabilities, Maximum Termination Liability (MTL) and Underutilization Liability (UL) are described as follows:

- a. Maximum Termination Liability and Termination Charge is a liability against the customer for whom facilities were constructed. If the customer prematurely discontinues the use of the facilities, the liability will be converted into a termination charge if it is determined at the time of disconnect that the facilities are not reusable.

First Revised Sheet 11
Cancelling Original Sheet 11
Effective: January 1, 1997

CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

B. SPECIAL CONSTRUCTION (Cont'd)

8. Contingent Liabilities (Cont'd)

a. (Cont'd)

- 1) An MTL is equal to the nonrecoverable costs associated with specially constructed facilities and is the maximum amount which could be applied as a termination charge if all specially constructed facilities were discontinued before MTL expires.
- 2) The liability period is equal to the average life of the account associated with the specially constructed facilities. The liability period is generally expressed in terms of an effective and expiration date.
- 3) A termination charge is applicable when all services using specially constructed facilities which have a written and signed agreement for an MTL are discontinued prior to the expiration of the liability period. The charge reflects the unamortized portion of the nonrecoverable costs at the time of termination, adjusted for net salvage and possible reuse. Administrative costs associated with the specific case of special construction and any costs for restoring a location to its original condition are also included. A termination charge may never exceed the MTL agreed to and signed by the customer in the initial contract.
- 4) The MTL in the signed agreement is in decreasing amounts at ten-year intervals over the average account life of the facilities. In the event that the average

8. Contingent Liabilities (Cont'd)

a. (Cont'd)

4) (Cont'd)

account life of the facilities is not an even multiple of ten; the last increment will reflect the appropriate number of years remaining.

Example illustrating a 27-year average account life:

<u>MTL</u>	<u>Effective Date</u>	<u>Expiration Date</u>
\$10,000	6/1/84	6/1/94
7,000	6/1/94	6/1/04
3,000	6/1/04	6/1/11

- 5) Prior to the expiration of each liability period, the customer has the option to terminate the special construction case and pay the appropriate charges, or extend the use of the specially constructed facilities for the new liability period.
- 6) The Company will notify the customer six months in advance of the expiration date of each ten-year liability period. The customer must provide the Company with written notification at least 30 days prior to the expiration of the liability period if termination is elected. Failure to do so will result in an automatic extension of the special construction case to the next liability period at the MTL amount.

B. SPECIAL CONSTRUCTION (Cont'd)

8. Contingent Liabilities (Cont'd)

a. (Cont'd)

- 7) A partial termination of specially constructed facilities will be provided, at the election of the customer. The termination is determined by multiplying the termination charge which would result if all services using the specially constructed facilities were discontinued, at the time partial termination is elected, by the percentage of specially constructed facilities to be partially terminated. A new written agreement will be made following a partial termination to list remaining MTL amounts and the number of specially constructed facilities the customer will remain liable for.

Example: A customer with an MTL contract of \$100,000 for 3600 specially constructed facilities requests a partial termination of 900 facilities. The termination charge for all facilities, at the time of election, is \$60,000. The partial termination charge in this example is \$60,000 x 900/3600, or \$15,000.

- b. Annual Underutilization Liability and Underutilization Charge as specified in Section B.9.b.1) denotes a per unit amount that will be billed annually if less than 70% of the specially constructed facilities are being utilized.

- 1) Prior to the start of special construction, the Company and the customer will agree on the quantity of facilities to be provided, and the length of the

b. (Cont'd)

1) (Cont'd)

planning period during which the customer expects to place the facilities in service. The planning period is hereinafter referred to as the Initial Liability Period (ILP). The ILP is listed in the written agreement with an effective and expiration date.

2) Underutilization occurs only if, at the expiration date of the ILP and annually thereafter, less than 70% of the specially constructed facilities are in service per the written agreement at tariff service rates.

3) An annual underutilization liability amount is calculated on a per unit basis (i.e., per cable pair) for each case of special construction. This amount is equal to the annual per unit cost and includes depreciation, maintenance, administration, return, taxes and any other costs identified in the supporting documentation provided at the time the special construction agreement is signed.

4) Upon the expiration of the ILP, the number of underutilized facilities, if any, is multiplied by the annual underutilization liability amount. This product is then multiplied by the number of years (including any fraction thereof) in the ILP to determine the underutilization charge.

Effective: January 1, 1997

CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

B. SPECIAL CONSTRUCTION (Cont'd)

8. Contingent Liabilities (Cont'd)

b. (Cont'd)

- 5) Annually thereafter, the number of underutilized facilities, if any, existing on the anniversary of the ILP expiration date will be multiplied by the annual underutilization liability amount to determine the underutilization charge for the preceding 12 month period.

Example: A customer orders 100 services and the special construction of a 600 pair building riser cable is agreed to, based on the customer's five year facility requirements. The ILP, in this example, would be five years. The annual underutilization liability is stated in the written agreement at \$2 per pair. If 400 pairs were in service at the end of the ILP, there would be an underutilization of 20 pairs, i.e., $420 (70\% \text{ of } 600) - 400 = 20$. The total underutilization charge for the first five years would be \$200, or \$2 per pair x 20 pairs x 5 years.

If 420 pairs are in service at the end of the sixth year, there is no underutilization, i.e., $420 - 420 = 0$.

preparation of the quotation and any applicable receipts and other taxes. The customer will be advised of the charge for quotation preparation and must agree to pay the charge before development of the quotation will commence.

b) If, after being advised of the quotation preparation charge, the customer requests a detailed estimate, it will be developed and furnished. A bill for the quotation preparation will be rendered. The quotation is valid for 90 days and will identify all costs associated with the provision of the facilities needed to satisfy the customer's service requirements. The quotation will be considered to be accurate within +/- 10% of the cost quoted. Any unforeseen extraordinary costs which might cause a deviation greater than +10% will require additional approval of the customer. The quotation preparation charge is applicable regardless of whether service is ordered by the customer.

c) If the customer cancels the request for a quotation prior to its completion, the customer will be billed the lesser of the amount for the quotation

preparation charge, which the customer was advised would apply, or the costs incurred for quotation preparation plus any appropriate taxes through the cancellation date.

d) The payment of the quotation preparation charge or any portion thereof does not assign, confer, or transfer title or ownership rights to proposals or equipment, designed or furnished by the Company. Title and ownership rights for any item developed at the customer's request remains with the Company except as specifically provided by an agreement between all parties.

2) Case Preparation Charge - applicable after the customer receives the quote and places an order for service requiring special construction. The charge for case preparation includes the administrative expense associated with preparing the proposal. This expense includes such items as preparation and processing, and gross receipts and other taxes. The Case Preparation Charge is the equivalent of a Primary Service Ordering Charge.

B. SPECIAL CONSTRUCTION (Cont'd)

9. Nonrecurring and Recurring Charges (Cont'd)

a. Nonrecurring Charges (Cont'd)

5) Rearrangement and/or Removal Charges (Cont'd)

b) (Cont'd)

statute, ordinance or other legal requirement. This nonrecurring charge (NRC), developed by dividing the total rearrangement and/or removed cost by the total number of subscribers affected by the ordinance, will be billed as a one time charge via the customer's bill. All customers will have the option of a lump sum payment or monthly payments spread over a specified agreed-to time period.

6) Expedited Order Charge - An expedited order charge applies when a customer requests that construction be completed on an expedited basis and the Company incurs additional costs. The charge is equal to the difference in the estimated cost of construction on an expedited basis and construction without expediting.

7) Supporting Structures on Private Property - These charges, when applicable as specified in Section B.12., include the costs of planning and building supporting structure on private property. Supporting structure includes poles, conduit, trenching, backfilling and associated costs. In cases where the customer or property owner is unable to provide the structure, the Company, at its discretion, will perform the work and

a. Nonrecurring Charges (Cont'd)

7) Supporting Structures on Private Property (Cont'd)

bill the customer or property owner. Ownership and maintenance of supporting structures on private property is vested in the customer or property owner.

8) Service Entrance Facilities - Entrance facilities include all cable and wire required to reach the normal network interface. When, at the request of the property owner or customer, a special route, network location, network arrangement or duplicate facility is required, an NRC will apply. The charge will be equal to the additional cost above that which would have normally been incurred if the special route, location or arrangement was not required. These costs can be billed on an actual or estimated basis as provided in Section B.7.d. of this tariff.

9) Temporary Facilities

a) Special Construction is considered to be "temporary" if one of the following conditions exist:

- (1) The facilities are constructed to provide service to a customer for less than the minimum service period or less than one month, whichever is longer.

9) Temporary Facilities (Cont'd)

a) (Cont'd)

(2) The facilities are constructed and it is known in advance that the newly placed plant will be relocated or removed prior to the end of the normal service life of the plant.

b) If a customer desires to change the service requested from temporary to permanent, such a change will be permitted if the request is made before any initial payment for the temporary service is received by the Company. The customer is liable for any NRCs for the construction of temporary facilities that cannot be reused or transferred to the permanent facilities. If the permanent facilities cannot be reused then a contract for underutilization and maximum termination charge will apply for the permanent facilities in addition to quotation and/or case preparation charges, and any recurring charges associated with the special construction.

c) The NRC for temporary facilities includes all nonrecoverable costs associated with the placement and removal of such facilities.

CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

B. SPECIAL CONSTRUCTION (Cont'd)

9. Nonrecurring and Recurring Charges (Cont'd)

b. Recurring Charges

Recurring charges will always apply for the following conditions:

When a customer uses fewer facilities (i.e., cable pairs) than originally forecasted (Underutilization Charge).

When a customer orders more facilities (i.e., cable pairs) than required to satisfy the demand projected in the Initial Liability Period (ILP) (Excess Capacity Charge).

When a customer requests a facility route or type other than that which the Company would utilize to provide a service (Charges for route or type other than normal).

When a customer's request results in the Company's leasing transmission or other equipment to provide service (Lease Charge).

When a customer requests service that involves extraordinary conditions (Excess Costs).

- 1) Underutilization Charge - An underutilization charge will apply at the end of the ILP if less than 70% of the cable pairs placed is being utilized. The charges are calculated as outlined in B.8.b.

B. SPECIAL CONSTRUCTION (Cont'd)

9. Nonrecurring and Recurring Charges (Cont'd)

b. Recurring Charges (Cont'd)

- 2) Excess Capacity Charge - An excess capacity charge applies when the customer requests more cable pairs be placed than are required to satisfy the demand projected in the ILP. The charge is based on the estimated cost per cable pair times the excess number of cable pairs requested. The charge applies monthly beginning with the contract service date until the customer orders service to be activated on 70% of the cable pairs placed. The excess capacity charge will not apply to cable pairs identified in the forecasted amount.
- 3) Charge for Route or Type Other Than Normal - When the customer requests special construction using a route or type of facilities other than that which the Company would normally use, a monthly recurring charge is applicable. The charge is the difference between the estimated recurring costs of the specially constructed facilities and the estimated recurring costs of the facilities the Company would normally use. The charge will be no greater than the recurring costs of the specially constructed facilities. If the customer has elected the actual cost option, the recurring charge will be adjusted to reflect the actual cost of the new construction when the cost is determined. This adjusted recurring charge is applicable from the start of service.

B. SPECIAL CONSTRUCTION (Cont'd)

9. Nonrecurring and Recurring Charges (Cont'd)

b. Recurring Charges (Cont'd)

- 4) Lease Charge - A monthly and/or nonrecurring lease charge applies when the Company leases equipment (i.e., portable microwave equipment) in order to provide service to meet the customer's requirements. The amount of the charge is the total added cost to the Company caused by the lease.
- 5) Excess Costs - When a customer requests service that involves extraordinary conditions or circumstances and the anticipated 5-year revenue to be derived is not sufficient to support the costs associated with the service provision, then a monthly recurring charge is applicable as specified in D. following.

10. Deferral of the Start of Service

The customer may request the Company to defer the start of service on specially constructed facilities for a cumulative period of no more than eighteen months. If the deferral exceeds eighteen months, the special construction case is considered to be cancelled and cancellation charges apply. Requests for deferral must be in writing and are subject to the following regulations.

Effective: January 1, 1997

CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

B. SPECIAL CONSTRUCTION (Cont'd)

10. Deferral of the Start of Service (Cont'd)

- a. Construction Has Not Started - If the Company has not incurred any costs (i.e., engineering and/or installation) before receiving the customer's request for deferral, no charge applies other than the quotation preparation charge if applicable. However, the original quotation will be reviewed by the Company at the time of reinstatement to determine if the original charges are still valid. Any change in charges requires the concurrence of the customer in writing. Supplemental quotation preparation and case preparation charges will also apply.
- b. Construction Has Started But Is Not Complete - If the construction of facilities has started but has not been completed before the Company receives the customer request for deferral, charges will apply. The charges vary depending on whether all or some of the services ordered are deferred.
 - 1) All Services Are Deferred - When all services involving special construction are deferred, a charge equal to the costs incurred during each month of the deferral applies. Those costs include the recurring costs for that portion of the facilities already completed and any other costs associated with the deferral. The quotation preparation charge and case preparation charge also apply.

B. SPECIAL CONSTRUCTION (Cont'd)

10. Deferral of the Start of Service (Cont'd)

b. Construction Has Started But Is Not Complete (Cont'd)

2) Some But Not All Services Are Deferred - When some, but not all, services utilizing the specially constructed facilities are deferred, the special construction case will be completed. Underutilization and maximum termination charges will apply in addition to quotation and case preparation charges, and any recurring charges associated with the special construction.

c. Construction Complete - If the construction of facilities has been completed before the Company receives the customer's request for deferral, the quotation preparation charge, case preparation charge, underutilization and maximum termination charge, as originally determined, and any recurring charges associated with the special construction will apply.

11. Construction on Public Highways or Public Rights-of-Way

a. No special construction is applicable for the reasonable provision of new network distribution facilities where the facilities are used for subscribers in general. However, if the provision of such facilities is determined to be unreasonable by the Company, then special construction charges will apply.

b. Where facilities are used to serve an individual subscriber, the subscriber may be required to pay recurring and/or nonrecurring construction charges.

B. SPECIAL CONSTRUCTION (Cont'd)

11. Construction on Public Highways or Public Rights-of-Way (Cont'd)
 - c. If special construction is required to serve two or more subscribers and the Company determines that the construction costs are excessive or unreasonable, the excess construction costs will be proportionally charged to all subscribers served by the line extension during the five years following construction completion. Charges will be considered excessive when five times the annual exchange revenue derived from the services utilizing the extended facilities is not expected to exceed the cost to construct the facilities.
 - d. The charge in either event will be the amount by which construction cost exceeds the amount of five times the annual exchange revenue.
 - e. Ownership and maintenance of such facilities is vested in the Company.
12. Construction on Private Property Across Which Rights-of-Way and Easements Satisfactory to the Company are Provided Without Cost to the Company
 - a. No special construction is applicable for the provision of new network distribution facilities where the facilities are used for subscribers in general if the Company determines that the cost of construction is not excessive or unreasonable. When facilities are used to serve an individual subscriber, or if construction costs to serve two or more subscribers are excessive or unreasonable, the subscriber(s) will be required to pay recurring and/or nonrecurring construction charges under the following conditions:

C. ADDITIONAL ENGINEERING, ADDITIONAL LABOR AND MISCELLANEOUS CHARGES

1. Additional Engineering

a. Additional engineering is that engineering or engineering consultation requested by the customer as described in 1) through 3) following. The Company will notify the customer in writing that additional engineering charges as specified in b. following will apply before any additional engineering is undertaken.

1) Engineering Consultation - Engineering consultation is the securing of technical advice from the Company by the customer not in connection with a specific order, and situations in which the customer requests the Company to provide information or to perform a function which will entail additional engineering by the Company. This does not include inquiries of a short duration where no significant engineering time is required or inquiries associated with customer service forecasts.

- a. Additional labor is that requested by the customer on a given service as described in 1) through 6) following. The Company will notify the customer in writing that additional labor charges as specified in b. following will apply before any additional labor is undertaken.
 - 1) Overtime installation - Company installation effort outside of regularly scheduled working hours.
 - 2) Overtime repair - Company maintenance effort performed outside of regularly scheduled working hours.
 - 3) Additional installation testing - testing performed by the Company at the time of installation which is in addition to pre-service acceptance testing. Pre-service testing includes testing for dialing, answering and talking capabilities.
 - 4) Stand by - includes all time in excess of one-half (1/2) hour during which Company personnel stand by to make coordinated tests on a given service.
 - 5) Testing and maintenance with other telephone companies - Additional testing, maintenance or repair of facilities which connect to facilities of other telephone companies, if not concurring carriers, which is in addition to effort required to test, maintain or repair facilities provided solely by the Company.

provisioning, normal maintenance, and taxes. In addition, any special maintenance expense that may occur from time to time will be borne by the subscriber except that maintenance of buried service wire, including trenching where required, will be at the expense of the Company. A subscriber may also be required to pay the amount of additional costs incurred by the Company resulting from the subscriber's special requests. Such special requests may include, but are not limited to, expedited shipping.

E. SPECIAL SERVICE ARRANGEMENTS

1. General Regulations

- a. Special service arrangements (Special Assemblies) may be provided by the Company at the request of a customer on an individual case basis if such service or arrangements meet the following criteria:
 - 1) The requested service or arrangements are not offered under other sections of this tariff.
 - 2) The facilities utilized to provide the requested service or arrangements are of a type normally used by the Company in furnishing its other services.
 - 3) The requested service or arrangements are compatible with other Company services, facilities, equipment and its engineering and maintenance practices.
 - 4) This offering is subject to the availability of the necessary Company personnel and capital resources.

F. BULK FACILITY TERMINATIONS FOR SECRETARIAL SERVICE FACILITIES

Secretarial service firms generally have sufficient activity (i.e., installations of secretarial service lines terminated in telephone answering bureau switchboards) to warrant the provision of a bulk facility termination which will enable the Company to more readily meet the customer's service needs. Where, in the Company's judgment, such termination of a bulk facility is required, cable facilities will be provided as fixed terminations on secretarial line jacks of telephone answering bureau switchboards at charges based on costs at the time this work is done. These charges will be applicable to the secretarial service firm and will be in addition to all other appropriate tariff rates and charges for work done and services provided.

G. UNDERGROUND DISTRIBUTION SYSTEM - SUBDIVISIONS

- a. Requests for underground distribution systems must be made in writing by the developer. The application must give detail as to the area to be served, development schedule, location of utility easements and such other information that may be required to assist in the planning for the distribution system.
- b. The Company shall have the right to reject these requests whenever the electric distribution system is of overhead design.
- c. Rights-of-Way and easements suitable to the Company must be furnished by the applicant in reasonable time to meet service requirements and, at no cost to the Company, must be cleared of trees, tree stumps, paving, and other obstructions, staked to show property lines and final grade by the applicant before the Company will commence construction of the underground distribution system. Such clearing and grading must be maintained by the applicant during construction by the Company.

G. UNDERGROUND DISTRIBUTION SYSTEM - SUBDIVISIONS (Cont'd)

- d. Temporary facilities of aerial type may be utilized during the initial construction stages of the underground distribution system to meet the immediate requirement for telephone service.
- e. The distribution system will be constructed with suitable material to assure that the applicant will receive adequate telephone service for the reasonably foreseeable future.
- f. Any damages to the lines, equipment or facilities of the Company caused by the customer, sub-divider, builder, developer, their agents, or representatives shall be repaired by the Company and charges associated with such repairs shall be paid by the customer, sub-divider, builder, or developer.
- g. The Company will install the underground distribution system at no charge to the applicant except that the applicant will be required to provide conduit of suitable size for the entrance facilities at multiple-occupancy buildings.
- h. The entrance conduit will be terminated in an accessible space of sufficient size to permit the termination of the entrance facility. The space provided must also be equipped with grounding facility.
- i. A cash deposit may be required as a performance guarantee. When the deposit is necessary, it shall be the difference in cost of the facilities requested and the facilities which the Company would normally provide. This deposit would be equated on a pro rata basis for making quarterly refunds during the first five years after the construction completion. The refund amount would be determined by multiplying the quarterly increase in

subscribers by the pro rata share. Quarterly refunds will be made during the first five years after construction completion or until such time as the deposit is depleted if prior to the five years. Any portion of the deposit remaining unrefunded after the fifth year will become the property of the Company. No interest will accrue on the deposit if refunded quarterly. If not refunded quarterly, interest will accrue on the refund- able amount at the then current prime interest rate.

H. CONTRACT SERVICE ARRANGEMENTS

1. When economically practicable, customer specific contract service arrangements may be furnished in lieu of existing tariff offerings provided there is reasonable potential for uneconomic bypass of the Company's services. Uneconomic bypass occurs when an alternative service arrangement is utilized, in lieu of Company services, at prices below the Company's rates but above the Company's incremental costs.
2. Rates, Charges, Terms, and additional regulations, if applicable, for the contract service arrangements will be developed on an individual case basis, and will include all relevant costs, plus an appropriate level of contribution.
3. Costs for the contract service arrangements may include one or more of the following items:
 - a. Labor, engineering, and materials.
 - b. Operating expenses, i.e., maintenance, administration, etc.
 - c. Return on investment.

SECTION A6
First Revised Sheet 1
Cancelling Original Sheet 1
Effective: January 1, 1997

DIRECTORY LISTINGS

A. GENERAL REGULATIONS

1. The rates and regulations specified herein for directory listings apply only to the alphabetical section of the telephone directory.
2. Listings are intended solely for the purpose of identifying subscribers' telephone numbers and as an aid to the use of the telephone service. The listing of subscribers without charge or at the rate specified herein for additional listings in the alphabetical section of the directory does not contemplate special prominence of arrangement.
3. The Company, in accepting listings as prescribed by subscribers or prospective subscribers, will not be a party to controversies between subscribers as a result of the publication of such listings in its directories.
4. Listings are furnished only as specified for the various services mentioned in this section. Listings which, in the opinion of the Company, are not necessary in connection with any services or facilities not specifically mentioned in this section are not furnished either with or without charge.
5. The Company reserves the right to limit the length of any listing to one line in the directory by the use of abbreviations when, in the judgment of the Company, the clearness of the listing and the identification of the subscriber is not impaired in any way.

Director

SECTION A6
First Revised Sheet 2
Cancelling Original Sheet 2
Effective: January 1, 1997

DIRECTORY LISTINGS

A. GENERAL REGULATIONS (Cont'd)

6. The number of listings permitted without extra charge in connection with exchange service is as follows:
 - a. Individual lines, each access line..... 1 listing
 - b. Private Branch Exchanges directly connected to a central office (including "Series" and Centrex), each system..... 1 listing
 - c. Shared Tenant System, each STS system... 1 listing
 - d. Mobile Carrier system, each system..... 1 listing
7. It is desired by the Company that all subscribers shall be properly listed in the directory. Errors or omissions should be promptly reported to the business office.
8. In connection with individual line service where there is more than one access line connected for rotary service, only one listing is regularly furnished. However, additional name listings, which would otherwise be available at the regular rate for additional listings, may be obtained without charge provided they do not exceed the number of access lines or auxiliary lines. Additional listings on consecutive numbers usually bear the call number of the first line.
9. No listing, with or without charge, will be permitted where such listing is a repetition of any other listing furnished the subscriber.

SECTION A6
First Revised Sheet 3
Cancelling Original Sheet 3
Effective: January 1, 1997

DIRECTORY LISTINGS

A. GENERAL REGULATIONS (Cont'd)

10. Charges for extra listings are automatically discontinued after the following circumstances:
 - a. Upon termination of the main contract for service.
 - b. The listed party becomes a subscriber to exchange service, similar in classification, i.e., business or residence, as that under which such party is already listed.
 - c. In the case of the death of the listed party.
 - d. Listing charges may be discontinued at the end of any directory period upon receipt of written notice from the subscriber requesting discontinuance of listing at least 30 days in advance of the closing date of the directory. In this case, the minimum listing charge will be for one directory period.
 - e. In case the listed party moves from the premises at which the exchange service listed is furnished.

11. Street numbers, followed by the names of streets, will be used in identifying the location of the subscriber, except when, in the judgment of the Company, names of buildings, apartment houses, or communities serve as a better means of identification. Corner addresses are undesirable and, except in the judgment of the Company, will be used only where the street number is not available or as additional line matter. The use of floor, room, or suite numbers of buildings or apartment houses or other such detailed designations, are not permitted except as additional line matter.

Effective: November 30, 2004

DIRECTORY LISTINGS

A. GENERAL REGULATIONS (Cont'd)

13. The Company reserves the right to reject additional listings when, in its judgment, such listings would tend to delay or impede the use of the service.

B. RESIDENCE LISTINGS

1. Residence listings normally consist of a name, the address of the premises at which service is rendered and the telephone number. The address of the premises at which service is rendered may be omitted at the request of the subscriber. At no charge and upon the request of any residential subscriber, the Company shall list an additional first name or initial under the same address, telephone number and surnames of the subscriber. The Company shall place the first names or initials in the order requested by the subscriber.
2. The primary listing is ordinarily the name of the individual who contracts for the service. Where the service is contracted for by one party for the use of a second party, the primary listing may be the name of the second party. Additional listings may be furnished in the names of relative, including those by marriage, domestic employees of the subscriber, or other persons residing in the subscriber's house who are recognized as a part of the subscriber's domestic establishment.
3. Listings of residence telephones of clergymen, physicians, surgeons, dentists, veterinary surgeons, professors, government officials, etc., may, for the purpose of identification, include abbreviated designations of titles. Also, the title of "Mrs.," "Miss" or "Ms." is permitted. Degrees are permitted when they serve as a means of better identification; however, titles and designations will be omitted when a degree is used which conveys adequate information.
4. All listings in connection with residence service at concession rates are furnished subject to the regulations specified in this section, except that in connection with residence service for employees of the Company, where two or more employees reside at the same address and use the same telephone, the name of each additional employee may be listed, regardless of whether or not such employees are members of the subscriber's immediate family. The charge, therefore, will be the regular rate for an additional listing.

DIRECTORY LISTINGS

C. BUSINESS LISTINGS

1. Business listings normally consist of a name, designation descriptive of the subscriber's business, the address of the premises at which service is rendered, and the telephone number. The address of the premises at which service is rendered may be omitted at the request of the subscriber.
2. The primary listing is ordinarily the name of the individual, firm or corporation which contracts for the service or the name under which a business is regularly conducted. Where the service is contracted for by one party for the use of a second party, the primary listing may be the name of the second party. Additional listings may be furnished in the names of partners or members of the firm, if the subscriber is a partnership or firm; the names of officers of a corporation, if the subscriber is a corporation; and for any business establishment, the names of associates or employees of the subscriber. Business additional listings may also be the bona fide names of individuals, firms, or corporations which the subscriber owns, controls or is duly authorized to and actually does represent. An additional listing may also be provided for the residence of a business subscriber when the business is located at or operated from the residence.
3. A trade name made up by adding a term such as Company, Agency, Shop, Works, etc., to the name of a commodity or service will not be accepted as a listing unless the subscriber is legally authorized to do business under the trade name.
4. A designation consists of a word or phrase, abbreviated where necessary, used to describe the general character of the subscriber's business. Designations will not be used where the name under which the subscriber is doing business is sufficient to indicate the character of the business.

C. BUSINESS LISTINGS (Cont'd)

5. Listings of clergymen, physicians, surgeons, dentists, veterinary surgeons, professors, government officials, etc., may, for the purpose of identification, include abbreviated designations of titles. Also, the title of "Mrs.," "Miss" or "Ms." is permitted. Degrees are permitted when they serve as a means of better identification; however, titles and designations will be omitted when a degree is used which conveys adequate information.
6. The listing of an individual, together with his/her title and the name of the business with which he/she is connected or represents, in lieu of a designation of the general character of the business, is not permitted. Likewise, the listing of the name of a firm or corporation, together with the name or name and title of an individual connected therewith, in lieu of a designation of the character of the business is not permitted.

Example:

Smith, J.G. Mgr.,	Lewis Grocery Co.	14 Maple	NXX-1214
	Or		
Lewis Grocery Co.,	Smith, J.G. Mgr.	14 Maple	NXX-1214

7. All listings of a subscriber's services which are located on the same premises, must bear the same address, except in the case of PBX trunk off-premises extension service, the address may be that of the premises at which the exchange station off-premises extension is located.

DIRECTORY LISTINGS

C. BUSINESS LISTINGS (Cont'd)

8. The Company reserves the right to reject listings which appear to be designated primarily to give publicity to the commodity or service, or which, in its judgment, are otherwise objectionable or unnecessary for identification purposes.

D. PRIVATE BRANCH EXCHANGE LISTINGS

1. In connection with private branch exchange (PBX) service, only one listing is ordinarily necessary to properly identify the subscriber. Additional listings may be furnished without extra charge when, in the judgment of the Company, they are necessary to properly identify the subscriber or would be helpful to his/her service, provided they do not exceed the number of trunk lines. All listings, with or without extra charge, usually bear the call number of the first trunk line. However, at the request of the customer, they may bear any of the consecutive numbers including listings of those numbers employed in receiving calls when the PBX operator is not on duty. The listing of a trunk line not consecutive with the rotary series or a listing of the first number of a separate rotary series of trunk lines may be arranged for to meet special conditions.
2. When, in the judgment of the Company, the use of reference or other listings in excess of the number of listings permitted without extra charge, as set out previously, are needed for better identification in order to facilitate the Company's operations, such listings may be provided without charge.

D. PRIVATE BRANCH EXCHANGE LISTINGS (Cont'd)

3. Listings of PBX trunks installed at either business or residence locations are furnished under the regulations specified above for residence and business listings, respectively.

E. PAY TELEPHONE LISTINGS

Listings are not provided in connection with pay telephone service except where, in the judgment of the Company, the listing will facilitate the Company's operation. No additional charge (paid) listings are permitted.

F. MISCELLANEOUS LISTINGS

1. Reference Listings

Reference listings may be arranged for at the regular rate for additional listings when both the main and reference listings appear in the same alphabetical list (directory Section). Reference listings may be furnished to subscribers who change their names, absorb other businesses or subdivide their business and have the authority to continue the use of the old names; and in other cases, when in the judgment of the Company, they are considered necessary and are not intended for advertising purposes.

Example: Long Lumber Co. See South Lumber Co.

F. MISCELLANEOUS LISTINGS (Cont'd)

2. Names Spelled More than One Way

- a. Subscribers whose names may commonly be spelled in more than one way may arrange for additional listings of their names as alternately spelled at the regular rate for an additional listing.

Example: Smithe, A.B. 100 Orange NXX-1234
 And as listed under "Smith"
 Smith, A.B. 100 Orange NXX-1234

- b. Listings of alternate spellings are not allowed when, in the judgment of the company, they are desired for the purpose of securing a preferential position in the directory or for advertising purposes.

3. Indented Listings

Indented listings are employed where a subscriber has more than one listing for service under the same name at more than one location.

Example:	Jones, A.B. atty 180 Second Avenue	NXX-1234
	Res 122 Line	NXX-4321
	Jones, A.B. Imbr 190 Beach Avenue	NXX-1234

4. Caption Listings (Cont'd)

- c. Listings of departments and of variations of the same general line of business which, in the judgment of the Company, are not considered necessary or which are intended to advertise the extent of the subscriber's business, are not permitted.

5. Alternative (Directive) Listings

- a. Subscribers may obtain listings which refer calling parties to certain other telephone numbers after business hours or on Sundays and Holidays, or in case no answer is received on the call for the first listed number of numbers. Such listings are provided at the regular rate for an additional listing. Alternate listings are of two general types, according to whether the listing indicates (a) that the alternate telephone number is to be called after business hours, or on Sundays or Holidays, or (b) that the alternate telephone number is to be called in the event that no answer is received on the call for the first number or numbers.
- b. Alternate listings which refer calling parties to other telephone numbers may indicate the telephone numbers of subscribers who are agreeable to the use of their telephone numbers in such alternate listings or they may be the telephone numbers of members or employees of the firm. Names of individuals are not permitted in alternate listings.

6. Temporary Listings for Tenants Subleasing Subscribers' Premises

- a. Residence subscribers who lease their premises for periods of nine months or less and who request the Company to render service to their tenants without change in billing may arrange for the listing of such tenants.
- b. Such listings will not be furnished in the event the subscriber and the tenant occupy the premises at the same time.
- c. For such listings, the additional listing rate applies.

6. Temporary Listings for Tenants Subleasing Subscribers' Premises (Cont'd)
 - d. Bills covering all charges will be rendered in the name of the subscriber and the subscriber will be responsible for all such charges.
7. Foreign Exchange Listings
 - a. Foreign Exchange listings are offered to subscribers who wish to be listed in a telephone directory of an exchange other than their home exchange.
 - b. Foreign exchange listings to appear in a Company exchange directory are furnished at the rates approved for additional listings.
 - c. Foreign exchange listings for the Company. subscribers are furnished at the approved rates of the company accepting the listing for publication in their exchange directory and will be printed in the format used by the company accepting the listing.
 - d. When, in the judgment of the Company, in the case of stations located in exchange border areas, a foreign exchange listing is needed for better identification in order to facilitate the completion of calls, such listing may be provided without charge. This service is also intended for those customers who receive telephone service from one exchange and yet have a premises mailing address in another (foreign) exchange.

8. Additional Line Matter

- a. Additional line matter may be arranged for at the regular rate for additional listings when the subscriber wishes to provide additional information to calling parties and when, in the judgment of the Company, it is not intended for advertising purposes.
- b. Additional line matter may include supplementary address information, hours of operation, mailing information or calling instructions.
- c. The names of individuals are not permitted in additional line matter.
- d. Additional line matter must provide information directly related to the subscriber's main listing or address where the service is located.
- e. The Company reserves the right to reject listings which, in its' judgment, are objectionable or may be detrimental to the service of other subscribers.
- f. Hearing impaired customers with TDDs may request an additional directory listing indicating "TDD" or "TDD and Voice" at no charge.

9. Advance Listings

- a. When a subscriber will establish a residence or business shortly after the close of subscriber listing records but preceding publication, the exchange company shall, upon request, establish and list service at the requested new address and immediately place the service on suspension.
- b. Service connection charges as specified in Section A4 and other appropriate local service charges shall be due and payable, independent of whether service is later restored.

10. Vanity Listings

- a. Where available, a subscriber may request to have the assigned telephone number published in the telephone directory in upper case alpha form, i.e., "333-THIS", rather than 333-8447. Use of Vanity Listings is not exclusive to any single subscriber. The letters "Q" and "Z" are not available nor may the "#" or "*" symbols be used with this service. The numbers "0" or "1" may not be used to represent the letters "O" or "I", respectively, in a Vanity Listing.
- b. Prior to establishing a Vanity Listing, the Company reserves the right to require, when necessary in its sole discretion, satisfactory evidence from the subscriber that the subscriber is authorized to use any trade name, business name, or any other name or term, requested by the subscriber, which is copyrighted or otherwise reserved.
- c. Provisioning of a Vanity Listing is based upon the current availability of that telephone number. The Company reserves the right to exclude certain numbers or blocks of numbers from assignment, and will determine the availability criteria in its sole discretion. No customer waiting lists will be maintained. The Company reserves the right to reject any listing or number, which in its sole discretion, may be considered objectionable or would tend to delay or impede the use of the directory.
- d. The Company will not be a party to any controversy or conflict between customers as a result of the Vanity Listing.
- e. The customer shall have no property right in the Vanity Listing, and the number shall remain the property of the Company. The Company reserves the right to change the Vanity Listing in its sole discretion. The Company is not liable for any kind of monetary or damage claims due to errors, omissions, or customer problems associated with Vanity Listings.
- f. Vanity Listings may be listed in the Company directories white pages at the rates provided in this Section. Customers wanting the Vanity Listing will be charged the Vanity Listing rate in addition to the applicable nonrecurring rates found in Section 4. Customers wanting the Vanity Listing with the numeric equivalent listing will be charged the Vanity Listing rate and the Additional Listing rate in addition to the applicable nonrecurring rates found in Section 4. When listed, the numeric equivalent of the Vanity Listing shall immediately follow the alpha listing in the directory. Only the numerical listing shall be available from Directory Assistance.

F. MISCELLANEOUS LISTINGS (Cont'd)

11. Rates and Charges

- a. Additional name listings in excess of those permitted without extra charge, reference listings, alternative (directive) listings, temporary listings, foreign exchange listings, listings for clients of Shared Tenant Service, Mobile Carriers, and Pay Telephone Service (PATS) operations and additional line matter, where permitted, are furnished at the following monthly rates:

	<u>Monthly Rate</u>
Per foreign exchange listing, residence	\$3.00
Per foreign exchange listing, business	\$3.00
Per Vanity Listing, residence	3.00
Per Vanity Listing, business	5.00
Per listing, all other types of listings, residence	1.85
Per listing, all other types of listings, business	1.85

- b. A charge will be applicable if such listings are requested after the service is established. The subscriber to the service assumes responsibility for all charges for additional listings associated with his/her service.
- c. Listing charges date from the day the information records are posted and are payable monthly in advance. Information records are posted at the time of the application for the listing.

G. NONPUBLISHED AND NONLISTED NUMBER SERVICE

1. General

Some subscribers request their telephone numbers be omitted from both the directory and the Company's information records. Such requests may be fulfilled through the assignment of a nonpublished or nonlisted telephone number subject to the regulations outlined below.

2. Nonpublished Telephone Numbers

- a. A nonpublished telephone number is one omitted from both the directory and the Company's information records. Such requests are discouraged as far as possible, and the subscriber requesting this service releases the Company from all responsibility for losses arising from such an arrangement.

G. NONPUBLISHED AND NONLISTED NUMBER SERVICE (Cont'd)

2. Nonpublished Telephone Numbers (Cont'd)

- b. Nonpublished numbers will not be furnished upon request of a calling party. However, when a call is placed from a telephone number associated with a nonpublished listing, the number may be disclosed if the called party has the necessary equipment for receiving and/or disclosing incoming telephone numbers.
- c. Incoming calls to nonpublished telephone numbers will be completed by the Company only when the calling party places the call by number. The Company will not complete a call to a nonpublished subscriber on behalf of another caller when the caller does not furnish the nonpublished number to the Company. The Company will adhere to this practice notwithstanding any claim of emergency the calling party may present. The acceptance by the Company of the subscriber's request to furnish a nonpublished number does not create any relationship or obligation, direct or indirect, to any person other than the subscriber.

G. NONPUBLISHED AND NONLISTED NUMBER SERVICE (Cont'd)

2. Nonpublished Telephone Numbers (Cont'd)

- d. In the absence of gross negligence or willful misconduct, no liability for damages arising from publishing a nonpublished telephone number in the directory or disclosing said number to any person attached to the Company, and where such a number is published in the directory, the Company's liability shall be limited to and satisfied by a refund of any monthly charges which the Company may have made for such nonpublished telephone number. In addition, and at the subscriber's request, the Company will change the nonpublished telephone number at no charge to the subscriber.
- e. Telephone numbers transmitted via Caller ID are intended solely for the use of the Caller ID subscriber. Resale of this information is prohibited as described in Section A13 of this tariff.
- f. The subscriber indemnifies and saves the Company harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the publication of a nonpublished telephone number or the disclosing of said number to any person.

G. NONPUBLISHED AND NONLISTED NUMBER SERVICE (Cont'd)

3. Nonlisted Telephone Numbers

- a. A nonlisted telephone number is one for which no listing appears in the alphabetical section of the directory. The number is listed in the directory assistance records and is given out upon request.
- b. The acceptance by the Company of the subscriber's request to furnish a nonlisted telephone number does not create any relationship or obligation, direct or indirect, to any person other than the subscriber.

4. Utilization of Emergency E911 Service

Parties with nonpublished or nonlisted telephone numbers forfeit the privacy afforded by this service to the extent that the telephone number, address, and name associated with the originating access line are automatically delivered to the emergency answering point when the customer calls E911 service.

5. Utilization of Call Tracing and Requests for Tracing Calls (Trap and Trace)

Parties with nonpublished or nonlisted numbers forfeit the privacy afforded by the service to the extent that the telephone number is identified through activation of a Trap and Trace and/or Call Tracing procedure whereby the name and address of the subscriber will be provided to any authorized law enforcement agency upon request.

6. Rates and Charges

	<u>Monthly Rate</u>
Nonpublished Number, per month	\$3.00
Nonlisted Number, per month	\$2.55

Charges as specified in Section A4 are applicable if this service is requested subsequent to initial service.

COIN TELEPHONE SERVICE

C. PAY TELEPHONE SERVICE

1. General

- a. Pay Telephone Service (PATS) is a class of service furnished to individuals, firms or corporations which permits connection of a customer-provided instrument that is activated by the deposit of coins, cards, tokens or the entry of a customer account number, to the lines of the Company.
- b. The Company will not be responsible for the operation, maintenance, coin refund, or coin collection of any PATS instrument nor will Company employees offer PATS operating instructions for those instruments.
- c. Intrastate discounted long distance calling plans are permitted in connection with PATS access lines.
- d. Participation of subscribers to PATS service in optional EAS plans is not allowed.
- e. Subscribers to PATS service are subject to the rates, rules and regulations as specified elsewhere in this tariff, as well as the regulations found in Section 25-24.515 of the Florida Public Service Commission Rules and Regulations.
- f. Foreign Exchange Service will be provided only within the local calling area in accordance with regulations as specified in Section A9 of this tariff.

C. PAY TELEPHONE SERVICE (Cont'd)

1. General

- g. Suspension of service, offered in Section A2, is not available to PATS access lines unless all factors indicate that the PATS instrument is located within an establishment which is temporarily closed and that the instrument is totally inaccessible to the general public. In all cases, the decision to permit temporary suspension of service for PATS service rests with the Company.

2. Directory Listings

- a. A listing in the white page section of the exchange directory may be provided in connection with PATS service. The PATS provider, however, may choose to have nonpublished telephone numbers for PATS access lines at no additional charge. Additional listings will be provided at rates specified in Section A6 of this tariff.
- b. Although the PATS provider is entitled to a directory listing without charge, the PATS client may be listed instead at the rate for an Additional Listing.

C. PAY TELEPHONE SERVICE

3. Responsibility of the Customer

- a. The customer shall be responsible for the installation, operation and maintenance of any customer-provided coin-operated or non-coin-operated telephones used in connection with this service.
- b. Instruments connected to a PATS access line must be FCC registered and of a type which permits free caller access to local directory assistance (411), 911, and where 911 is not available, free access to the operator.
- c. All PATS instruments will be required to ring at a level acceptable to the Commission and to receive incoming calls at no charge, except those placed in hospitals, schools, correctional institutions and others for which a specific exemption may be granted.
 - 1) The PATS provider must subscribe to Billed Number Screening and to Operator Screening. Call blocking, as specified in Section A13 of this tariff, is available for PATS providers as a blocking option. PATS providers who elect to allow access to international calling will be advised of the potential for fraud and their responsibility.

2) One extension station without a dial or coin collector may be allowed for answering purposes only. The extension must be within the premises and within 35 feet of the main station; or, the extension must have a privacy feature which disables the extension when the main station is in use.

d. PATS access lines are standard loop start, two-wire circuits. Optional reverse battery or ground start features are available at rates as stated in Section A13 of this tariff.

e. The PATS provider shall be responsible for payment of a Trouble Location Charge for each visit by the Company to the premises of the subscriber where the service difficulty or trouble reports result from the use of equipment or facilities provided by the subscriber.

f. PATS providers utilizing the first B-1 rate option will be assessed normal PATS usage charges on calls placed over all message rate routes. PATS providers utilizing the second B-1 rate option will be treated as a normal B-1 customer and will pay rates equal to any other B-1 customer.

3. Responsibility of the Customer (Cont'd)

- g. Customer-provided telephones must be connected to the Company network in compliance with Part 68 of the FCC Rules and Regulations as well as regulatory requirements of the Florida Public Service Commission as found in FPSC Rules 25-24.515.
- h. The PATS provider is responsible for meeting all federal, state and local statutes with respect to provision of customer-provided telephones in accordance with all hearing impaired and handicapped person requirements.
- i. The customer shall be responsible for payment of charges of all toll messages originating from or accepted at this type of service.

4. Violation of Tariff

- a. Where any customer-provided, coin-operated, or non-coin-operated telephone is in violation of this tariff, the Company will promptly notify the customer of the violation and will take immediate action, including the disconnection of service, as is necessary for the protection of the telecommunications network and Company employees. The charge will be provided in Section A4 of this tariff.

TELEPHONE ANSWERING SERVICE FACILITIES
(UNITED TELEPHONE Exchanges only)

A. GENERAL

1. The Telephone Company will provide facilities, as outlined herein, for customers for their use in providing telephone answering service for other telephone customers to individual line service when they are absent or do not desire to answer their calls personally.
2. Customer-owned station equipment or specially designed secretarial service switchboards may be utilized to provide facilities for terminating a number of extension lines connected to customer's individual access lines, so that an attendant may answer incoming calls to the lines of customers who contract with the secretarial service to do so, during periods when the customers leave their telephone unattended. Access line terminations are also provided in those cases where the customer contracts with the secretarial service to answer all incoming calls or where the secretarial service wishes to terminate administrative service for answering purposes only.
3. A concentrator-identifier is available for connecting a telephone answering bureau with extension lines or individual access lines of its clients located in central office districts other than that in which a secretarial switchboard is located. This arrangement is limited to central office districts within the same local calling areas as the secretarial switchboard and subject to equipment operational limitations.

TELEPHONE ANSWERING SERVICE FACILITIES
(UNITED TELEPHONE Exchanges only)

A. GENERAL (Cont'd)

4. Local exchange trunks may be terminated in a customer-owned secretarial switchboard for the purpose of completing local or long distance calls to and from administrative access lines furnished with and terminating on the same premises as the secretarial switchboard.
5. Wide Area Telephone Service (WATS) access lines may not be terminated in secretarial switchboards or concentrators. Extension lines on Inward WATS lines may be terminated in telephone answering equipment for the purpose of answering calls at such times as the subscriber is not available at the main access line location.
6. Foreign exchange service and secretarial lines associated therewith may be terminated in customer-provided secretarial equipment for answering purposes and may not be terminated in secretarial equipment for completing calls to and from administrative telephones or the attendant.
7. The telephone answering bureau may forward calls from secretarial lines to the general exchange network over local exchange central office lines furnished the bureau for its administrative use. However, the secretarial service facilities furnished by the Company are not designed for such call-forwarding. The answering bureau forwards calls at its own risk and the Company will not be liable for defects in transmission or other service difficulties arising out of or resulting from this type of connection.

D. SECRETARIAL SERVICE IN-DIALING ARRANGEMENTS

1. General

- a. Secretarial Service In-Dialing Arrangements provide the central office equipment (telephone numbers) necessary for in-dialing from the exchange network and inward access lines necessary to deliver the calls to customer-provided terminal equipment located at the premises of the Telephone Answering Service.
- b. Inward access lines used with the provision of In-Dialing arrangements service shall be provided at rates and charges equivalent to PBX flat-rate trunks.
- c. This service is provided on the condition that the customer subscribes to sufficient inward access lines, a minimum of two, to adequately handle the volume of calls directed to the service without interfering with or impairing any services offered by the Telephone Company.
- d. The service is furnished subject to the availability of facilities and telephone numbers. The assignment of telephone numbers and the sequence of the numbers assigned to dialing arrangements is made at the discretion of the Company. Where the customer requests additional blocks of telephone numbers to be held in reserve for future use, rates and charges as shown in A8 D.2. are applicable for each unused block of telephone numbers.

FOREIGN EXCHANGE SERVICE AND FOREIGN CENTRAL OFFICE SERVICE

A. FOREIGN EXCHANGE (FX) SERVICE

1. General

- a. Foreign Exchange Service is exchange service furnished to a subscriber from an exchange other than the one from which he would normally be served. This tariff applies for foreign exchange service where all facilities and serving points are located in the same LATA.
- b. Foreign Exchange Service is not in accord with the general plan of furnishing telephone service and such service is furnished only under special conditions, where warranted, by the circumstances involved, and provided facilities are available.
- c. Foreign Exchange Service is furnished subject to the same restrictions as to the use of the service by other than the subscriber and his/her representatives, as apply in connection with other classes of service.
- d. Foreign Exchange Service is offered in connection with flat-rate individual access line service, PBX trunk service and rotary line service, Centrex or Enhanced Centrex service, and ISDN.
- e. Other services or facilities used in connection with Foreign Exchange Service (except as otherwise indicated in this tariff) are furnished subject to the rates and regulations applying in the exchange from which the subscriber would normally be served.

Cancelling First Revised Sheet 2
Effective: September 1, 1997

FOREIGN EXCHANGE SERVICE AND FOREIGN CENTRAL OFFICE SERVICE

A. FOREIGN EXCHANGE (FX) SERVICE (Cont'd)

1. General (Cont'd)

- f. Subscribers to Foreign Exchange Service are not required to contract for service in the exchange from which they would normally be served except as specified in paragraph A.1.i. following or where the Foreign Exchange Service is furnished from another company's exchange territory.
- g. Where the serving Foreign Exchange is a multi-office exchange, Foreign Exchange service will be provided from whichever central office would be the most economical to the Company. If a subscriber desires operation from a different central office and facilities are available, Foreign Exchange service will be provided from the desired central office and charges specified in 3.a. following will apply.
- h. Foreign Exchange service is provided as a voice grade service and is not represented as suitable for satisfactory transmission of data. The Company does not assure standard quality of transmission levels for FX extension line service when more than one station is in use simultaneously.
- i. Where nonoptional extended scope service is in effect between two exchanges, Foreign Exchange Service will not be furnished between such exchanges, unless the customer also maintains local service from the exchange from which he/she would normally be served.

FOREIGN EXCHANGE SERVICE AND FOREIGN CENTRAL OFFICE SERVICE

A. FOREIGN EXCHANGE (FX) SERVICE (Cont'd)

1. General (Cont'd)

- j. Custom Calling Features and ExpressTouch Service may be provided in conjunction with Foreign Exchange Service only in central offices equipped to accommodate such combinations.
- k. High capacity digital private line service rate elements may be substituted for the closed end FX rate elements specified in paragraph A.2.f. following if the customer requests termination of the FX service over high capacity facilities. Open end FX usage charges as set forth in paragraph A.2. following will apply regardless of any substitutions with respect to the closed end FX rate elements.
- l. This service is not offered in conjunction with extended area local calling plans.
- m. Resale of this service is not permitted.

2. Rates and Charges (United Telephone exchanges only)

- a. For the open end, or dial tone end, which is located in the foreign exchange where network switching of calls occurs, the rates for Foreign Exchange Service are the usage charges below and the Service Connection charges for flat-rate individual access line service, rotary line service, flat-rate PBX trunk service, or ISDN service applicable within the serving Foreign Exchange.

FOREIGN EXCHANGE SERVICE AND FOREIGN CENTRAL OFFICE SERVICE

A. FOREIGN EXCHANGE (FX) SERVICE (Cont'd)

2. Rates and Charges (United Telephone exchanges only) (Cont'd)

- b. The outward usage charge below will apply on a customer dialed sent-paid basis for all calls originated by the customer over the Foreign Exchange Service line and terminated within the local calling area of the foreign exchange. The inward usage charge below will apply for all calls terminated to the customer's Foreign Exchange Service line.

Per outward minute of use	\$.020
Per inward minute of use	\$.020

- c. When two or more Foreign Exchange Service lines are arranged in the same rotary group, they will be considered one service group for purposes of determining usage charges, i.e., usage for all FX lines in the rotary group will be combined before applying the usage charges.
- d. The toll rates to access lines or PBX trunks connected for Foreign Exchange Service are the same as regularly apply to access lines and PBX trunks located in the Foreign Exchange area.

FOREIGN EXCHANGE SERVICE AND FOREIGN CENTRAL OFFICE SERVICE

A. FOREIGN EXCHANGE (FX) SERVICE (Cont'd)

2. Rates and Charges (United Telephone exchanges only) (Cont'd)

- g. Where the applicant for Foreign Exchange Service is so located that it would be more economical for the Company to provide the Foreign Exchange Service direct from the Foreign Exchange to the applicant's location by the extension or utilization of existing plant, and where such facilities do not cross LATA boundaries, an Interoffice Channel charge will not apply.
- h. The rates and charges quoted for Foreign Exchange service provide for the furnishing of the service where suitable facilities are available and where the construction of the necessary facilities does not involve excessive costs. When the revenue to be derived from the service is not sufficient to warrant the Company assuming the unusual cost of providing the necessary construction, or if the service life of the constructed facilities will be unusually short or unknown, the customer and/or customers will be required to pay such cost in accordance with the regulations in Section A5 of this tariff.

FOREIGN EXCHANGE SERVICE AND FOREIGN CENTRAL OFFICE SERVICE

A. FOREIGN EXCHANGE (FX) SERVICE (Cont'd)

3. Rates and Charges (Central Telephone exchanges only)

- a. Foreign Exchange service is provided in accordance with the rates, rules and regulations set forth in Section A20 of this tariff for the closed end, or station end rate elements for local channels, interoffice channels and bridging equipment as described in Section A20
- b. The open end, or dial tone end, which is located in the Foreign Exchange where network switching of the call occurs will be rated at the usage charges following, unless the FX service is provided in a central office where technical constraints prohibit measurement of terminating usage, then a combination of usage and flat rate will apply. Service connection charges for flat rate individual access line service, rotary line service, or PBX trunk service are applicable.
- c. Usage charges for all calls originating and terminating within the local calling area of the foreign exchange:

1) Originating Usage, per minute of use or fraction thereof	\$.020
2) Terminating usage, per minute of use or fraction thereof	\$.020

A. E911 EMERGENCY REPORTING SERVICES

1. UNITED TELEPHONE EXCHANGES

NOTE: See Limited Availability Svc. Offerings, Sec. A2, Para. J.

a. General

- 1) Enhanced Universal Emergency Number Service, also referred to as Enhanced 911 or E911, is a telephone exchange communication service whereby a Public Safety Answering Point (PSAP) designated by the customer may receive telephone calls dialed to the telephone number 911. E911 Service includes lines and equipment necessary for the answering, transferring, and dispatching of public emergency telephone calls originated by persons within the serving area who dial 911.
- 2) Enhanced 911 Service is offered subject to availability of facilities.
- 3) The E911 customer may be a municipality or other state or local governmental unit, or an authorized agent of one or more municipalities or other state or local government units to whom authority has been lawfully delegated. The customer must be legally authorized to subscribe to the service and have public safety responsibility by law to respond to telephone calls from the public for emergency police, fire or other emergency services within the telephone central office areas arranged for 911 calling.

b. Explanation of Terms

- 1) ALTERNATE ROUTING (AR) - A feature provided to allow E911 calls to be routed to a designated alternate location if, (1) all E911 exchange lines to the primary PSAP (see definition below) are busy, or (2) the primary PSAP closes down for a period (night service). This is a standard feature of E911 Service.
- 2) AUTOMATIC LOCATION IDENTIFICATION (ALI) - A feature by which the address associated with the calling party's telephone number (identified by ANI as designated below) is forwarded to the PSAP for display.
- 3) AUTOMATIC NUMBER IDENTIFICATION (ANI)- A feature by which the calling party's ANI telephone number is forwarded to the E911 Control Office and to the PSAP's ANI/ALI Display Transfer Units.

b. Explanation of Terms (Cont'd)

- 4) DATA MANAGEMENT SYSTEM (DMS) - A system of manual procedures and computer programs used to create, store, and update the data required to provide the Selective Routing (SR) and ALI features.
- 5) DEFAULT ROUTING (DR)- A feature activated when an incoming E911 call cannot be selectively routed due to an ANI feature, garbled digits, or other causes. Such incoming calls are routed from the E911 Control Office to a default PSAP. Each incoming E911 facility group to the Control Office is assigned to a designated default PSAP. This is a standard feature of E911 Service.
- 6) ANI/ALI DISPLAY TRANSFER UNIT - A console and associated common equipment for displaying ANI and/or ALI at the PSAP attendant position and used by the attendant to activate Fixed and/or Selective Transfer functions.
- 7) END OFFICE - The central office(s) in the E911 System which receive originating E911 calls.
- 8) ENHANCED 911 (E911) CONTROL OFFICE - The office providing tandem switching capability for E911 calls. It controls switching of ANI information to the PSAP and also provides the SR feature, standard ESS Speed Calling features, call transfer capability, and certain maintenance functions for each PSAP.

b. Explanation of Terms (Cont'd)

- 9) ENHANCED 911 SERVICE AREA - The geographic area in which the customer will respond to all E911 calls and dispatch appropriate emergency assistance.
- 10) FIXED TRANSFER - A feature which enables a PSAP attendant to transfer incoming E911 calls to secondary PSAPs by use of a single button on the ANI/ALI Display Transfer Unit.
- 11) FORCED DISCONNECT - A function of the E911 central office trunk circuit which enables the PSAP attendant to release a connection even though the calling party has not hung up. This feature prevents the jamming of the E911 exchange lines and is a standard feature of E911 Service.
- 12) IDLE TONE APPLICATION - A feature which allows the PSAP attendant to distinguish between calls that have been abandoned before they are answered and calls where the calling party is unable to speak for some reason. If the caller abandoned the line before the PSAP attendant answered, a distinct tone is heard by the attendant. If the caller is still on the line but unable to speak, no tone will be heard. This is a standard feature of E911 Service.

b. Explanation of Terms (Cont'd)

- 13) MANUAL TRANSFER - A feature that enables the PSAP attendant to transfer an incoming call by depressing the switch hook of the associated telephone or the "add" button on the ANI/ALI Display Transfer Unit and dialing either a 7-digit or 10-digit telephone number or a 2-digit Speed Calling Code. Manual Transfer is associated with the E911 trunk unit and is a standard feature of E911 Service.
- 14) PUBLIC SAFETY ANSWERING POINT (PSAP) - An answering location for E911 calls originating in a given area. A PSAP may be designated as Primary or Secondary, which refers to the order in which calls are directed for answering. Primary PSAPs respond first; secondary PSAPs receive calls on a transfer basis only. PSAPs are public service agencies such as police, fire, or emergency medical or a common bureau serving a group of such entities.
- 15) SELECTIVE ROUTING (SR) - A feature that routes an E911 call from a central office to the designated primary PSAP based upon the identified number of the calling party.
- 16) SELECTIVE TRANSFER - A feature providing persons at the PSAP the ability to transfer an incoming call to another agency by depressing a single button labeled with the type of agency, e.g., "Fire", on the ANI/ALI Display Transfer Unit. This type of transfer is only available when the SR feature is provided.

b. Explanation of Terms (Cont'd)

- 17) SERVICE CENTRAL OFFICE - The central office from which a PSAP, either primary or secondary, is served.
- 18) UNIVERSAL EMERGENCY NUMBER SERVICE - An exchange communication service for receiving telephone calls placed by persons in need of assistance who dial the number 911. Such calls are answered at PSAPs established and operated by the customer. The lines and equipment associated with the service arrangement for the answering, transferring, and dispatching of public emergency telephone calls are included.
- 19) UNIVERSAL EMERGENCY NUMBER SERVICE CUSTOMER - A municipality or other state or local government unit or an authorized agent of one or more municipalities or other state or local governmental units to whom authority has been lawfully delegated within a defined geographic area to respond to public emergency telephone calls, at the minimum for police and fire service.

c. Rules and Regulations

- 1) This service is limited to the use of central office telephone number 911 as the universal emergency telephone number. Only one E911 service will be provided within any government agency's locality.

1. UNITED TELEPHONE EXCHANGES (Cont'd)

c. Rules and Regulations (Cont'd)

- 2) The 911 emergency telephone number is not intended as a total replacement for the telephone service of the various public safety agencies which participate in the use of this number. The public safety agencies will subscribe to other exchange telephone service as provided in other sections of this tariff.
- 3) The service is furnished to the customer only for the purpose of receiving reports of emergencies by the public. Residential customers whose telephone services have been temporarily denied for non-payment will continue to have access to 911 Service (outgoing service only). Service will be provided on a "where available" basis.
- 4) E911 Service is classified as Business Exchange Service and is arranged for 1-way incoming service to the appropriate PSAP. Outgoing calls can only be made on a transfer basis.
- 5) E911 Service is provided solely for the benefit of the customer operating the PSAP. The provision of E911 Service by the Company shall not be interpreted, constructed, or regarded, either expressly or implied, as being for the benefit of or creating any Company obligation toward any third person or legal entity other than the customer.
- 6) The Company does not undertake to answer and forward 911 calls, but furnishes the use of its facilities to enable the customer's personnel to respond to such calls on the customer's premises.
- 7) Terminal equipment as offered in this section of the tariff may be provided by the Company for use with this service.

1. UNITED TELEPHONE EXCHANGES (Cont'd)

c. Rules and Regulations (Cont'd)

- 8) Temporary suspension of service is not provided for any part of the E911 Service.
- 9) E911 information consisting of the name, address, and telephone number of telephone customers whose listings are not published in directories or listed in Directory Assistance Offices is confidential. Information will be provided on a call-by-call basis only for the purpose of responding to emergency calls.
- 10) The E911 calling party forfeits the privacy afforded by nonlisted and nonpublished service to the extent that the telephone number, address, and name associated with the originating station location are furnished to the PSAP.
- 11) Central offices that are not currently equipped to transmit ANI will not be modified to provide ANI just for E911 Service. When the Selective Routing feature is provided, in such circumstances, Default Routing and central office identification will be provided in lieu of Selective Routing and ANI Display.
- 12) The Company's entire liability to any person for interruption or failure of E911 Service shall be limited to the terms set forth in this section and other sections of this tariff. The Company shall not be liable to any person or entity for any damages whatsoever resulting from or in connection with the provision of access to E-911 Service during the temporary denial of a residential subscriber service for non-payment.

- b) After establishment of service, it is the customer's responsibility to continue to verify the accuracy of the routing information contained in the master address file, and to advise the Company of any changes in street names, establishment of new streets, changes in address numbers used on existing streets, closing and abandonment of streets, changes in police, fire, ambulance, or other appropriate agencies' jurisdiction over any address, annexations, and other changes in municipal and county boundaries, incorporation of new cities or any other matter that will affect the routing of E911 calls to the proper PSAP.
- c) The Company will provide to the customer on request a complete written copy of the master address file to permit the customer to verify the accuracy of the police, fire and ambulance PSAP routing designations.
- d) Changes, deletions, and additions which the customer desires to have made in the master address file should be submitted on an "as occurred" basis.
- e) The Company will furnish a written copy to the customer for verification showing each change, deletion, and addition to the master address file.

21) (Cont'd)

f) The Company will bill "911" local option fees in accordance with Chapter 365, Florida Statutes, as amended. Each customer imposing a "911" local option fee agrees to release, indemnify, defend and hold harmless the Company from any and all loss, claims, demands, suits or other action, or any liability whatsoever, whether suffered, made, instituted or asserted by the customer or by any other party or person, arising out of the Company's good faith compliance with the instructions of the customer concerning the imposition, billing, collection or remittance of the "911" fee, whether or not the act of complying with the customer's instructions is deemed to be negligent.

d. Service Features

1) E911 Service is available in five service feature offerings:

- a) Automatic Number Identification
- b) Selective Routing
- c) Automatic Number Identification and Selective Routing
- d) Automatic Number Identification and Automatic Location Identification
- e) Automatic Number Identification, Automatic Location Identification, and Selective Routing

2) The following standard features are included with each of the service offerings:

- a) Forced Disconnect
- b) Idle Tone Application
- c) Default Routing
- d) Alternate Routing (Night Service)
- e) Speed Calling
- f) Central Office Transfer Arrangements

3) PSAP equipment deemed essential to the operation of E911 service may be provided by the customer or by the Company under the terms and rates as specified in this section of the tariff. If provided by the Company, such equipment is offered to Public Service Agencies responsible for the provision of E911 service only and includes the ANI/ALI Display Transfer equipment. This Display Transfer equipment consists of a microprocessor controller, stored program system capable of serving up to 64 incoming lines and 16 Display and Transfer units with a combination of 16 total parts for printers.

e. Rates for PSAP Equipment

This equipment is provided subject to an initial contract period of three or five years or a one-time payment as selected by the customer. Termination charges, as prescribed elsewhere in this tariff, are applicable in the event termination occurs prior to expiration of the initial contract.

	<u>Tier A</u>		<u>Tier B</u>
	<u>1 Mo.</u>	<u>36 Mo.</u>	<u>60 Mo.</u>

1. UNITED TELEPHONE EXCHANGES (Cont'd)

f. All Counties (Cont'd)

2) Rates (Cont'd)

- c) When the Selective Routing feature is selected by the county, a testing charge of \$27 per thousand access lines and PBX trunks per month is applicable for each month of pre turn-up system testing requested by the county.
- d) Each county's Nonrecurring and Service Establishment charges are calculated at the time E911 Service is established and are based on the number of access lines and PBX trunks, per thousand, in service in the respective county. The Nonrecurring charge is applied also annually thereafter per thousand access lines and trunks added during the year.
- e) Each county's Monthly Charge is applied based on the number of access lines and PBX trunks, per thousand, that have access to that county's E911 Service. The total billed amount is subject to annual adjustment to reflect changes in the number of access lines served.
- f) The Monthly Rate provides normal maintenance 7 days a week including holidays provided trouble is reported between hours of 8 a.m. and 12 midnight. Trouble reported outside this time period will be cleared and billed on a per occasion per hour rate.
- g) Appropriate rates in this tariff and other tariffs in which the Company concurs are applicable in addition to the rates shown in A10.A.1.f.2 of this tariff.

N11 SERVICES

A. E911 EMERGENCY REPORTING SERVICES (Cont'd)

2. CENTRAL TELEPHONE EXCHANGES

a. General

- 1) When requested by local government authorities, and subject to the availability of facilities, the Company will provide a universal emergency number 911 for use of Public Safety Answering Points (PSAPs) engaged in assisting local governments in the protection and safety of the general public.
- 2) Two types of services are offered, basic 911 and Enhanced 911 (E911) service. Selection of the appropriate service to serve various customers will be made jointly by the Company and the customer and will be based on a thorough analysis of customer needs at each location and on the availability of facilities in each area.
- 3) Rates and charges for basic 911 and E911 service are based on the costs for a municipal or county wide system. Because of the unique requirements of each system, the system will be tarified specifically for each municipality or county.
- 4) Terminal equipment will be provided by the Company for 911 service. Where not specifically itemized in this tariff, said equipment, including moves, rearrangements or changes, will be provided at rates and charges based upon costs.

b. Explanation of Terms

- 1) ALTERNATE ROUTING (AR) - A feature provided to allow E911 calls to be routed to a designated alternate location if (1) all E911 exchange lines to the primary PSAP are busy, or (2) the primary PSAP closes down for a period (night service). This is a standard feature of E911 service.
- 2) ATTENDANT CONSOLE - A selector console and associated common equipment for displaying ANI numbers at the PSAP attendant position and used by the attendant to activate Fixed and/or Selective Transfer functions.
- 3) AUTOMATIC LOCATION IDENTIFICATION (ALI) - A feature by which the name and address associated with the calling party's telephone number (identified by ANI as defined below) is forwarded to the PSAP for display. Telephones associated with a calling party's telephone number but which are physically located elsewhere (off premises extensions, secondary locations, etc.) will also be identified with the same address associated with the calling party's telephone number at the primary location. No ALI data is provided when a call is sent to Default Routing (DR).
- 4) AUTOMATIC NUMBER IDENTIFICATION (ANI) - A feature by which the calling party's telephone number is forwarded to the E911 Control Office and to the PSAP's display.

2. CENTRAL TELEPHONE EXCHANGES (Cont'd)

b. Explanation of Terms (Cont'd)

- 5) DEFAULT ROUTING (DR)- A feature activated when an incoming E911 call cannot be selectively routed due to an ANI failure, garbled digits or other causes. Such incoming calls are routed from the E911 Control Office to a default PSAP. Each incoming E911 facility group to the Control Office is assigned to a designated default PSAP. This is a standard feature of E911 service. No ANI/ALI data is provided when a call is sent to Default Routing.
- 6) END OFFICE - The Central Office(s) in the E911 system from which E911 calls are originated.
- 7) ENHANCED 911 SERVICE AREA - The geographic area in which the customer will respond to all E911 calls and dispatch appropriate emergency assistance.
- 8) FIXED CALL EXTENSION - A feature which enables a PSAP attendant to extend incoming E911 calls to secondary PSAPs by use of a single button on the attendant console.
- 9) FORCED DISCONNECT - A function of the E911 Central Office trunk circuit which enables the PSAP attendant to release a connection even though the calling party has not hung up. This feature prevents the jamming of the E911 exchange lines and is a standard feature of E911 service.

2. CENTRAL TELEPHONE EXCHANGES (Cont'd)

b. Explanation of Terms (Cont'd)

- 10) MANUAL TRANSFER - A feature that enables the PSAP attendant to transfer an incoming call by depressing the switch hook of the associated telephone or the "add" button on the Display and Transfer Unit and dialing either a 7 digit or 10-digit telephone number or a 2-digit Speed Calling Code. Manual Transfer is associated with the E911 trunk unit and is a standard feature of the E911 service.
- 11) PUBLIC SAFETY ANSWERING POINT (PSAP) - An answering location for 911 calls originating in a given area. A PSAP may be designated as Primary or Secondary, which refers to the order in which calls are directed for answering. Primary PSAPs respond first; Secondary PSAPs receive calls on a transfer basis only. PSAPs are public service agencies such as police, fire, or emergency medical or a common bureau servicing a group of such entities.
- 12) SELECTIVE ROUTING (SR) - A feature that routes an E911 call from a Central Office to the designated primary PSAP based upon the identified number of the calling party.
- 13) SERVING CENTRAL OFFICE - The central office from which a PSAP, either primary or secondary, is served.
- 14) UNIVERSAL EMERGENCY NUMBER SERVICE - A telephone exchange communication service for receiving telephone calls placed by persons in need of assistance who dial the number 911. Such calls are answered at PSAPs established and operated by the customer. The lines and equipment associated with the service arrangement for the answering, transferring and dispatching of public emergency telephone calls are included.

b. Explanation of Terms (Cont'd)

15) UNIVERSAL EMERGENCY NUMBER SERVICE CUSTOMER - A municipality or other county or local governmental unit or an authorized agent of one or more municipalities or other county or local governmental units to whom authority has been lawfully delegated within a defined geographic area to respond to public emergency telephone calls, at the minimum for police and fire service.

16) WIRE CENTER - The term "wire center" denotes the local telephone dial switching office serving subscribers in a well defined area.

c. Rules and Regulations

1) 911 service is provided by the Company where facilities and operating conditions permit.

2) This offering is limited to the use of central office number 911 as the universal emergency number and only one 911 service will be provided within any geographical area.

3) The 911 emergency number is not intended to replace the telephone service of the various public safety agencies which may participate in the use of this number. The customer must subscribe for additional local exchange service at the PSAPs for administrative purposes for placing of outgoing calls and for receiving other emergency calls, including any which might be relayed by Company operators.

- 4) The service is furnished to municipalities and other governmental agencies only for the purpose of voice reporting emergencies by the public.
- 5) When the use of service or facilities furnished by the Company is interrupted due to any cause other than the negligence or willful act of the subscriber or the failure of the facilities provided by the subscriber, a pro rata adjustment of the fixed monthly charges involved will be allowed as covered by Section A2 of this tariff. Where allowances on features which are affected by the interrupted service shall be considered; and further, only those access lines on the interrupted portion of a service shall be considered in determining the number of access lines affected.
- 6) It will be the intent of the Company to provide facilities designed to provide a call blocking probability of one call per hundred during normal busy hours for 911 service.
- 7) This service is offered solely as an aid in handling assistance calls in connection with fire, police and other emergencies and does not create any relationship or obligation, direct or indirect, to any person other than the customer contracting for 911 service. In the event of any interruption of the service, the Company shall not be liable to any person, corporation or other entity for any loss or damage in an amount greater than an amount equal to the pro rata allowance of the tariff rate for the service or facilities provided to the customer for the time such interruption continues, after notice to the Company. No allowance shall be made if the interruption is due to the negligence or willful act of the customer of the service.

(2) Coordinating the Emergency Service Numbers (ESNs) with street address ranges or other routing criteria in the E911 serving area for all agencies that are part of the system, including those with separate agreements, if any. Such ESNs will be assigned to permit routing of E911 calls to the primary and secondary PSAPs responsible for handling calls from each telephone in the E911 serving area.

(3) After establishment of the E911 service, coordinating the accuracy of the routing information, and to advise the Company of any changes in street names, establishment of new streets, changes in address numbers used on existing streets, closing and abandonment of streets, changes in police, fire, ambulance or other appropriate agencies' jurisdiction over any address, annexation and other changes in local jurisdictional boundaries, incorporation of new cities or any other matter that will affect the routing of E911 calls to the proper PSAP for all agencies that are part of the system, including those with separate contracts, if any.

5) Performance Criteria

a) Grade of Service

The E911 system should be designed to provide P01 grade of service. This will result in an average of one busy indication in one hundred attempts to reach the primary PSAP.

b) Design Specifications

- (1) The E911 system should be designed to provide a minimum of seven (7) primary PSAPs with growth capacity.
- (2) The E911 system should be designed to handle 60,000 subscriber numbers with growth capability of 10 percent per year.
- (3) The E911 system should be designed to handle a minimum of 100 trunks.
- (4) The E911 system should be designed to provide automatic alarms if system failure occurs or if any portion of the system has failure.
- (5) The E911 system PSAP should be designed to process a minimum of 23 calls per second.

- (6) The E911 system PSAP equipment should be designed to handle a minimum of 12 answering positions.
- (7) The E911 system should be designed so that the ANI will display at the same time that the 911 call is answered at the primary PSAP.
- (8) The E911 system should be designed so that ALI information appears on the ALI CRT in a minimum of 3 seconds.
- (9) The E911 system should be designed so that evaluation and performance reporting can be obtained.
- (10) The E911 system should be designed to provide default routing of 911 calls. Default routing should take place when
 - (a) ANI failure occurs.
 - (b) Retrieval of the calling number is not found in the selective routing data base.
 - (c) All trunks to the correct PSAP are busy.

(10) (Cont'd)

(d) A primary PSAP is out of service.

(11) The E911 system should be designed to provide transfer capability so that a primary PSAP can transfer a 911 call to any other primary PSAP and ANI will also transfer so that the receiving PSAP will retrieve ALI.

(a) The transfer arrangement should be designed so that after a 911 call is transferred, the transferring PSAP can drop off without disconnecting the 911 caller and the PSAP transfer.

(b) The transfer arrangement should be designed so that a primary PSAP can transfer a 911 caller to any seven digit number or secondary PSAP including transfer of ALI and ANI.

(c) The transfer arrangement should be designed so that if a primary PSAP receives a busy signal after an attempt to transfer a call, that transfer can be cancelled without disconnecting the 911 caller.

3. WIRELESS E911 PHASE 2

a. Description of Service

Wireless E911 Phase 2 is only available in combination with E911 as specified in this section of the tariff and is subject to the regulations specified herein.

In accordance with the FCC's Report and Order 94-102, Wireless E911 Phase 2 provides PSAPs with the wireless E911 caller's location and callback number (CBN) information, as specified by the FCC. The FCC has adopted specific handset-based and network-based location accuracy and reliability solutions standards for the Wireless Service Providers (WSPs).

b. General Regulations

- 1) The Company is not responsible for the location determination technology, the accuracy of the location determination technology, or the investigation or maintenance of said technologies. Only the data required and specified by the FCC in its Report and Order 94-102 will be delivered by the Company to the PSAP. This required data includes the cell site or sector location, the callback number, and the latitude/longitude of the caller. Each customer agrees that delivery, or lack of delivery, of additional data elements which may be provided by the WSP will not be the responsibility of the Company and the Company assumes no responsibility or liability for such information.
- 2) PSAPs must have all required elements of Wireless E911 Phase 1, utilizing p-ANI routing and cell site/sector location based information, in place before implementing Phase 2. This is necessary to accommodate loading of the respective p-ANIs also known as Emergency Service Routing Key/Emergency Service Routing Digit into the Company's Database Management System. In addition, the following requirements must be met for Phase 2 implementation:
 - a) PSAPs must order both the Company's Extended ALI Display Format and the ALI Database Upgrade for Wireless Phase 2 to accommodate the x/y data provided by Wireless E911 Phase 2 Service. See rates in 3.F. following.
 - b) WSPs must have Position Determining Entity (PDE) and a Mobile Position Center (MPC)/Gateway Mobile Location Center (GMLC) in their network.
 - c) WSPs or their designated database provider must have obtained an interface to the Company's ALI database that complies with the Company's existing operating standard. This interface will be used by the WSP to provide the Phase 2 data.

N11 SERVICES

A. E911 EMERGENCY REPORTING SERVICES (Cont'd)

3. WIRELESS E911 PHASE 2 (Cont'd)

c. Definition of Terms

1) Callback Number (CBN)

The wireless caller's 10-digit handset telephone number. The CBN is used by the PSAP to reestablish a call in the event the call was prematurely disconnected.

2) Interface

A reference point for a data path that exists between an MPC/GMLC and an ESME (the ALI database). The data that traverses the interface is made up of an Emergency Services Position Request and the response. The interface is not provided by and is not the responsibility of the Company.

3) Emergency Services Message Entity (ESME)

An entity in the emergency services network which serves as the point of interface to an MSC for common channel emergency services messaging. ESME is another term for the ALI database.

4) Enhanced MF Signaling (EMFS)

A signaling protocol for sending 10 or 20 digits of ANI from the 911 Tandem to the PSAP. EMF signaling is required when an interconnecting WSP selects Phase 2 NCAS mode without WLS911.

5) Mobile Position Center (MPC)

The interface between the wireless network and the Company's ALI database. The MPC serves as the wireless network entity which retrieves, forwards, stores, and controls position data within the wireless location network. The MPC is not provided by and is not the responsibility of the Company. Global System for Mobile (GSM) communication Gateway Mobile Location Centers (GMLCs) will be treated as MPCs by the Company.

6) Mobile Switching Center (MSC)

The wireless equivalent of a Central Office, which provides switching functions for wireless calls. The MSC is not provided by and is not the responsibility of the Company.

7) Phase 2 NCAS

In this mode the p-ANI and the CBN both are sent to the Selective Router. The trunk between the Selective Router and the PSAP must support transport of at least two 10-digit numbers.

Director

SECTION A10
First Revised Sheet 69.3
Cancelling Original Sheet 69.3
Effective: June 11, 2004

N11 SERVICES

A. E911 EMERGENCY REPORTING SERVICES (Cont'd)

3. WIRELESS E911 PHASE 2 (Cont'd)

c) Definition of Terms (Cont'd)

8) Position Determining Entity (PDE)

The PDE determines the geographic location of a wireless handset when the wireless caller places a 911 call or while the call is in process. The PDE is not provided by and is not the responsibility of the Company.

9) Pseudo-ANI (P-ANI)

A pseudo, non-dialable telephone number assigned to a cell site or a sector of a cell site to provide location identification for wireless E911 calls.

10) WLS911

The Company solution that sends either eight or ten digits of ANI to the PSAP and dynamically updates the static cell site or sector information with the CBN as provided by the WSP. This solution when used in conjunction with a WSP's interface allows WSPs to comply with the FCC's order without requiring PSAPs to upgrade their PSAP equipment to utilize Enhanced MF signaling.

11) Wireless Service Provider (WSP)

A person or entity that provides Commercial Mobile Radio Service (CMRS). The term wireless includes service provided by any wireless real-time, two-way voice communication device, including radio-telephone communications used in cellular telephone service, personal communication service (PCS), or functional or competitive equivalent. The term does not include service providers whose customers do not have access to 911 or 911-like services.

12) Wireline Compatibility Mode

Occurs when the WSP sends only p-ANI to the Company E911 tandem and the PSAP receives eight or ten digits of ANI.

13) X,Y Coordinates

The latitude and longitude of the 911 wireless caller's location.

Director

SECTION A10
First Revised Sheet 69.4
Cancelling Original Sheet 69.4
Effective: June 11, 2004

N11 SERVICES

A. E911 EMERGENCY REPORTING SERVICES (Cont'd)

3. WIRELESS E911 PHASE 2 (Cont'd)

d) Enhanced MF

Enhanced MF (EMF) is a new signaling protocol from the 911 Tandem to the PSAP. Enhanced MF accommodates either ten or 20 digits of ANI. Enhanced MF is not a requirement of Wireless Phase 2 implementation but EMF must be used by PSAPs when an interconnecting Wireless Service Provider chooses the Phase 2 NCAS Mode (as defined in J-STD-036 Annex D, Table D.1.2. and/or D.2.), without WLS911. If an interconnecting WSP chooses a Phase 2 NCAS solution without WLS911, the PSAP's equipment must be 20-digit Enhanced MF capable. The PSAP must request the Company convert them to EMF signaling when preparing to accept Phase 2 calls from a WSP utilizing Phase 2 NCAS without WLS911. Once a PSAP has been converted to 20 digit EMF Signaling the functionality of WLS911 is disabled for all WSPs serving that PSAP.

e) Wireless E911 Phase 2 Service

This service is comprised of two components, Extended ALI Display Format and ALI Database Upgrade for Wireless Phase 2. Both components are required for implementation of this service.

1) Extended ALI Display Format

The PSAP's Automatic Location Identification (ALI) display format must be changed to the Company's Extended ALI Display Format to accommodate the latitude and longitude, or x,y coordinates. The provision and delivery of the x,y information to the PSAP requires an interface between the ALI database and the WSP's Mobile Position Center (MPC)/Gateway Mobile Location Center (GMLC). The provisioning of the interface is the responsibility of the WSP.

2) ALI Database Upgrade for Wireless Phase 2

The ALI Database Upgrade for Wireless Phase 2 enables the PSAP to query and retrieve wireless caller location information from the Company's Automatic Location Identification (ALI) database. Location information may include cell site sector location, longitude and latitude of the wireless caller's location, and the wireless caller's callback number (CBN). This upgrade will enable the necessary interfaces, software, and databases to permit the wireless caller's location information to be populated in the Company's ALI database and/or retrieved when queried by the customer's PSAP equipment.

4. Private Switch Database Service

a. Description of Service

- 1) Private Switch Database Service is available to companies that use a Private Branch Exchange (PBX) or Centrex to manage their individual telephones and want to provide specific location information for each of these telephones to the Public Safety Answering Point (PSAP) responsible for responding to an emergency.
- 2) Private Switch Database Service allows a customer with a multi-line private switch to facilitate reception of either (1) Automatic Number Identification (ANI) or (2) a combination of ANI and Automatic Location Identification (ALI) information by a PSAP for emergency "9-1-1" calls originating from the location served by the customer's multi-line private switch. A private switch is customer premises equipment (CPE) at the end user customer's location.

b. General Regulations

- 1) The customer is responsible for validating address information through Master Street Access Guide (MSAG) and for coordinating with the Company to provide the National Emergency Number Association (NENA) standard format of telephone numbers and address data. The Company will allow the customer to update records no more frequently than on a daily basis. The data may originate from the customer's private switch, when technically feasible, or from a manually created list.
- 2) The Company will:
 - a) Be responsible for uploading a NENA formatted data file to its ALI database;
 - b) Hold the information in confidence and protect it in accordance with state and federal rules applicable to emergency 911 services; and
 - c) Use the information only in connection with providing emergency services to PSAPs.
- 3) The Company may immediately terminate a customer's use of Private Switch Database Service if, in the Company's sole judgment, the customer falsifies the information provided or fails to comply with any other provisions of this tariff.
- 4) The Company will only provide Private Switch Database Service where the Company is the primary 911 database provider for the PSAP serving the customer's location
- 5) The Company will provide a software package that will allow the customer to load the database information in the appropriate NENA format for transmission to the Company's data center
- 6) The Company will charge the private switch customer a monthly recurring charge for maintenance of the data in the national ALI database for delivery upon a 911 call to the PSAP.

4. Private Switch Database Service (Cont'd)

c. Limitations

- 1) The Company offers no warranty or representation with respect to the accuracy or completeness of the Private Switch Database Service. The Company relies on its customers for all private switch information placed in the Company's database management system.
- 2) The Company does not warrant or represent that its database management system will be compatible with every type of private switch equipment. Customers who wish to provide automated updates to the Company's database management system are responsible for acquiring their own private switch equipment and for testing the compatibility of that equipment with the Company's database management system.

d. Obligations of the Customer

- 1) When implementing Private Switch Database Service, the customer must contact the Telephone Company's E-911 representative to negotiate trunking, hardware and software requirements associated with the Private Switch Database Service.
- 2) The customer will be responsible for loading address information into the Private Switch Database Service software package and transmitting that information to the Telephone Company.

(1) Up to 1000, per 1000 Station Records	\$100.00
(2) 1001 - 4000, per 1000 Station Records	70.00
(3) Over 4000, per 1000 Station Records	60.00

2) Separate charges, not specified in this section of the tariff, are applicable for network connectivity from the customer's private switch to the Company's central office facilities.

3) Each Private Switch Database Service customer's Installation Charge and Monthly Rate is calculated at the time Private Switch Database Service is established and is based on the number of station records in service for the customer. The total number of station records are audited annually by the Telephone Company and applied to the account.

¹ The Monthly Rate is calculated based on the total number of station records submitted by the customer at installation or at the time of the annual audit. For example, 900 station records = \$100 MRC; 3900 station records = \$70 X 4 = \$280 MRC; 4500 station records = \$60 X 5 = \$300 MRC.

N11 SERVICES

A. E911 EMERGENCY REPORTING SERVICES (Cont'd)

5. Reverse Notification Telephone Number Database Service

a. Description of Service

- 1) The Company offers Reverse Notification Telephone Number Database Service (Reverse Database Service) to support the ability of Public Safety Answering Points (PSAPs) to make broadcast notification calls to areas under their jurisdiction in the event of emergencies.

b. General Regulations

- 1) Reverse Database Service is offered solely for the purpose of permitting PSAPs to make broadcast notifications to particular geographic areas and associated local telephone numbers in the event of emergencies. PSAPs ordering Reverse Database Service must provide the Company with written certification of their authority to make public emergency notifications.
- 2) PSAPs may not use Reverse Database Service information in connection with E911 Emergency Reporting Services.
- 3) PSAPs subscribing to Reverse Database Service will receive CD-ROM downloads of information from the Company's Automatic Location Indicator (ALI) database. The Company will provide ten-digit telephone numbers, associated addresses, and names to the extent that information is present in the Company's ALI database.
- 4) Reverse Database Service will include ALI information obtained by the Company from other local exchange carriers serving a PSAP's jurisdiction, when there are multiple local exchange carriers in a PSAP's jurisdiction. Reverse Database Service will include ALI information obtained from customers who operate private switches and have requested that carriers maintain appropriate information in the carrier's ALI database.
- 5) The Company will provide Reverse Database Service only for the jurisdictional area where a PSAP is authorized to provide emergency services. PSAPs will not be able to obtain foreign listings, foreign exchange cross-listings, foreign central office subscriptions, and multiple listings through Reverse Database Service.

N11 SERVICES

A. E911 EMERGENCY REPORTING SERVICES (Cont'd)

5. Reverse Notification Telephone Number Database Service (Cont'd)

b. General Regulations (Cont'd)

- 6) The Company considers all information provided to a PSAP under Reverse Database Service to be confidential and proprietary. Information received through Reverse Database Service may contain the names, addresses and telephone numbers of individuals whose listings are not published in directories and/or are not listed in directory assistance databases. The PSAP must:
 - a) Hold all Reverse Database Service information in confidence and protect it in accordance with the security regulations by which it protects its own proprietary or confidential information;
 - b) Restrict disclosure of the information solely to those PSAP employees and/or agents with a need to know and not disclose or resell such information to any other parties;
 - c) Use the information only when delivering broadcast notifications of emergencies; and
 - d) Notify the Company immediately of any confirmed or suspected misuse of Reverse Database Service information.
- 7) The PSAP represents and warrants that it will use information received through Reverse Database Service only in emergency situations. A PSAP may not access, use, import, export, copy, print, distribute or release information for any purpose other than what is necessary to make outbound telephone emergency notifications.
- 8) The Company may immediately terminate a PSAP's use of Reverse Database Service and demand the return of all Reverse Database Service information furnished to the PSAP if, in the Company's judgment, the PSAP misuses the information provided or fails to comply with any other provision of this tariff.
- 9) A PSAP's modification, merger or enhancement of information received through the Reverse Database Service will not relieve the PSAP from any provision of this tariff.

5. Reverse Notification Telephone Number Database Service (Cont'd)

c. Limitations

- 1) The Company offers no warranty or representation with respect to the accuracy or completeness of the Reverse Database Service. The Company may rely on other local exchange carriers or private switch customers for certain information used in the Reverse Database Service.
- 2) The Company does not warrant or represent that the Reverse Database Service will be compatible with every type of reverse notification equipment. PSAPs are responsible for acquiring their own broadcast notification equipment and for testing the compatibility of that equipment with the Reverse Database Service.
- 3) By offering Reverse Database Service, the Company makes no warranties or representations for the operation of customer's broadcast notification equipment or for the availability or performance of any telephone network facilities, including the Company's facilities, during a broadcast notification.

d. Liability of the Company

- 1) By subscribing to Reverse Database Service, a PSAP agrees to hold harmless and indemnify the Company, along with its employees, directors, officers, agents, and subcontractors, from and against all claims or suits arising out of or resulting from the provision of Reverse Database Service, specifically including, but not limited to, all claims or suits resulting from or allegedly resulting from errors or omissions in the file or the use of such information by the PSAP or its agents.
- 2) To the extent that the PSAP claims sovereign immunity or other statutory limitations against third party claims, the PSAP will extend that same protection to the Company in connection with the PSAP's use of the Reverse Database Service.

N11 SERVICES

B. 711 SERVICE FOR TELECOMMUNICATIONS RELAY SERVICES (TRS)

1. General

- a. 711 Dialing Code ("711") is a three digit local dialing arrangement for telephone voice transmission access to all certified Telecommunications Relay Services entities as a toll free call. Pursuant to Order 00-257, issued by the Federal Communications Commissions (FCC) in CC Docket 92-105, the FCC assigned 711 dialing code for nationwide access to Telecommunications Relay Services (TRS) entities, to be implemented not later than October 1, 2001.
- b. 711 is available the Company within the Company's service area only. To provide access to 711 to end users in another company service area or to a Competitive Local Exchange Carrier (CLECs) end users within the local calling area, the TRS entity must make appropriate arrangements with the other company or CLEC serving that territory. The TRS entity should work separately with competing local providers to ascertain that its end user customers will be able to reach relay services provided by dialing 711.
- c. This service is subject to the availability of the 711 dialing code.
- d. 711 can be delivered via regular exchange access lines (by individual business lines, PBX trunks, etc.).
- e. Limitations and use of service are as stated in Section A2 of this Tariff.
- f. Directory Listings may be provided for 711 at rates and regulations as specified in Section A6 of this Tariff.
- g. Access to 711 is not available to the following classes of service:
 - Hotel/Motel/Hospital Service (toll call only)
 - 1+
 - 0+, 0- (Credit Card, Third-Party Billing, Collect Calls)
 - Inmate Service
 - 101XXXX
 - Cellular - Type 2AIn addition, operator assisted calls to 711 will not be completed.

B. 711 SERVICE FOR TELECOMMUNICATIONS RELAY SERVICES (TRS) (Cont'd)

2. Obligations of the TRS Entity

- a. The TRS entity must, prior to provisioning of the service, sign a written acknowledgement of possible recall of the 711 dialing code by the FCC and an agreement to return the code upon receipt of 6 months written notice of such a recall from the Company or regulating entity and abide by all terms and conditions which may be identified by the FCC in CC Docket 92-105 regarding the use and return of the 711 dialing code. If a recall is affected, the Company will work with the TRS entity affected by such recall to transfer their service arrangements, to a 7 or 10-digit dialing arrangement within the 6-month notice period. The TRS entity will be required to migrate to any access arrangement the telecommunications relay services subsequently agreed to by the industry and approved by the FCC. The TRS entity will be charged the appropriate tariff rates for the establishment of the new access arrangement.
- b. The TRS entity should work separately with wireless companies to ascertain their end user customers will be able to reach telephone relay services provided by dialing 711.
- c. The TRS entity should work separately with competitive local exchange companies to ascertain their end user customers will be able to reach telephone relay services provided by dialing 711.
- d. The TRS entity is restricted from selling or transferring the 711 dialing code to an unaffiliated entity, either directly or indirectly.
 - 1) An "affiliate" of a TRS entity is any entity that directly, or indirectly through one or more intermediaries, controls, is controlled by, or is under common control with the TRS entity. The term "control" (including the terms "controlling," "controlled by," and "under common control with") means the possession, direct or indirect, of the power to direct or cause the direction of the management and policies of an entity, whether through the ownership of voting securities, by contract, or otherwise.

N11 SERVICES

B. 711 SERVICE FOR TELECOMMUNICATIONS RELAY SERVICES (TRS) (Cont'd)

2. Obligations of the TRS Entity (Cont'd)

- e. The 711 Dialing Code will be provided by the Company to the TRS entity under the following conditions:
 - 1) For network sizing and protection, the TRS entity must provide an estimate of annual call volumes, the expected busy hour and the expected holding time for each call to the 711 dialing code.
 - 2) The TRS entity will subscribe to adequate telephone facilities initially and subsequently as may be required, in the judgment of the Company, to adequately handle calls to 711 without impairing the Company's general telephone service or telephone facilities.
 - 3) The TRS entity is responsible for obtaining all necessary permission, licenses, written consents, waivers, releases and all other rights from all persons whose work, statements or performance are used in connection with the 711 dialing code, and from all holders of copyrights, trademarks, and patents used in connection with said service.
- f. If a pre-recorded announcement is provided by the TRS entity, the following conditions apply:
 - 1) The TRS entity will provide announcements. The company will provide only the delivery of the call.
 - 2) The provision of access to the 711 network by the Company for the transmission of announcement is subject to availability of such facilities and the requirements of the local exchange network.
 - 3) The TRS entity assumes all financial responsibility for all costs involved in providing announcement including, but not limited to, the recorder-announcement equipment located on the TRS entity's premises.
 - 4) The TRS entity assumes, according to other specific rates and charges under tariff, all financial responsibility for all facilities required, to connect the recorder-announcement equipment located on the TRS entity's premises.

B. 711 SERVICE FOR TELECOMMUNICATIONS RELAY SERVICES (TRS) (Cont'd)

3. Obligations of the Company

- a. Once the 711 Dialing Code has been assigned and the subscriber has provided the Company the appropriate toll free number, implementation of the 711 Dialing Code will begin on or after July 16, 2001. The Company will implement the TRS entity's request within a reasonable time, given the complexity of the order.

If, during or at the end of the provisioning period, the TRS entity has failed to establish service or decides to discontinue service establishment, the 711 code will be recalled and the number will be considered available for reassignment.

- b. When a 711 Service call is placed by the calling party via interconnection with an interexchange carrier, the Company cannot guarantee the completion of said 711 Service call, the quality of the call or any features that otherwise may be provided with 711 dialing service.

4. Obligations of the Competitive Local Exchange Carrier (CLEC)

- a. In those instances where a CLEC provides the 711 dialing code to its end user within the local calling area, terms and conditions for 711 dialing code are as defined in the appropriate Interconnection Agreement.

1) For purposes of providing a CLEC end user access to the TRS entity within the local calling area, appropriate arrangements must be made by the CLEC with the TRS entity serving the local calling area.

2) A CLEC may negotiate the provision of directory listing as defined in the Interconnection Agreement.

B. 711 SERVICE FOR TELECOMMUNICATIONS RELAY SERVICES (TRS) (Cont'd)

5. Liability

- a. The TRS entity is responsible for, and shall indemnify, protect, defend and save harmless the Company against all suits, actions, claims, demands and judgments, and of all costs, expenses and counsel fees incurred on account thereof, arising out of and resulting directly or indirectly from the service or in connection therewith, including, but not limited to, any loss, damage, expense or liability resulting from any infringement or claim of infringement, of any patent, trademark, copyright, or resulting from any claim of liable and slander. Unless otherwise specifically provided in this Tariff, the Company shall be authorized to disconnect any tariffed service provided to the TRS entity utilized, directly or indirectly, with the 711 dialing code, which fails to comply with regulations and conditions set forth herein, upon five (5) days of notice to the subscriber. Disconnection may be suspended at the discretion of the Company if it receives written certification that the TRS entity is in compliance with regulations and conditions of the tariffs. Continual noncompliance shall be cause for disconnection without notice at the discretion of the Company.
- b. The TRS entity shall respond promptly to any and all complaints lodged with any regulatory authority against any service provided via the 711 dialing code. If requested by the Company, the TRS entity shall assist the Company in responding to complaints made to the Company concerning the 711 dialing code.
- c. A written notice will be sent to any TRS entity following oral notification when their service unreasonably interferes with or impairs other services rendered to the public by the Company. If after notification the TRS entity makes no modification in method of operation or in the service arrangements that are deemed service-protective by the Company, or if the TRS entity is unwilling to accept the modifications, or if the TRS entity continues to cause service impairment, the Company reserves the right, at any time, without further notice, to institute protective measures, up to and including termination of service. In an emergency situation as defined by the Company, the Company reserves the right, at any time, without notice, to institute protective measures up to and including termination of service.
- d. The Company may take all legal and practical steps to disassociate itself from the TRS entity providing services whose business and/or public conduct (whether demonstrated or proposed) is of a type that in the Company's discretion generates unacceptable levels of complaints by end users.

5. Liability (Cont'd)

- e. In no event shall the Company be liable for any losses or damages of any kind resulting from the unavailability of its equipment or facilities or for any act, omission or failure of performance by the Company, or its employees, or agents, in connection with this Tariff. The Company shall not be responsible for calls that cannot be completed as a result of repair or maintenance difficulties on Company facilities and equipment nor on equipment owned or leased by the TRS entity.

6. Other Terms and Conditions

- a. Only one 10-digit toll free number may be used as the lead number per basic local calling area.
- b. The 711 Dialing Code is provided where facilities permit.
- c. The 711 Service will not provide calling number information in real time to the TRS entity. If this type of information is required, the TRS entity must subscribe to compatible Caller ID Service as described in Section A13 of this Tariff.
- d. The 711 Service is provided solely for the benefit of the TRS entity. The provision of the 711 Service by the Company shall not be interpreted, constructed, or regarded, either expressly or implied, as being for the benefit of or creating any Company obligation toward any third person or legal entity other than the TRS entity.

7. Rates and Charges

- a. The 711 Service is ordered by the FCC to be provided without charge. Therefore, there are no rates or charges for the 711 Service.

N11 SERVICES

C. 211 SERVICE FOR COMMUNITY INFORMATION AND REFERRAL SERVICES

1. General

- a. The 211 Dialing Code ("211") is a three-digit local dialing arrangement for local access to community information and referral services as a toll free call. Pursuant to Order 00-256, issued by the Federal Communications Commission (FCC) in CC Docket 92-105, the Florida Public Service Commission (FPSC) assigned the 211 Dialing Code for access to Local Community Information and Referral Service Agencies (Local Agencies) to be determined within each local exchange.
- b. The 211 Service allows a Company subscriber to access a Local Agency call center by dialing only the 211 Dialing Code.
- c. Subject to other terms and conditions of this Tariff, Company subscribers shall be able to make, and assigned Local Agencies shall be able to receive, calls using the 211 Dialing Code as part of their local exchange service. The 211 Dialing Code is supplemental to and is not a replacement for either party's local exchange service.
- d. All 211 Dialing Code calls shall be local in nature and shall not result in any Extended Calling Scope ("ECS"), TOLLPAC, Optional Extended Local Calling ("OELC"), Optional Extended Area Service ("OEAS"), intraLATA toll, interLATA long distance or pay-per-call charges to Company subscribers.
- e. 211 Dialing Code calls may result in local measured service charges where Company subscribers' service plans include such charges as part of home and EAS exchange calling.
- f. The 211 Service is not available for the following classes of service: inmate service, 1+ and 0+ calling, 0- operator assisted calling and 101XXXX calling. The 211 Service is otherwise available wherever local service is available.

C. 211 SERVICE FOR COMMUNITY INFORMATION AND REFERRAL SERVICES (Cont'd)

2. Obligations of the Local Community Information and Referral Services Agencies

- a. The Local Agencies shall make written application for the 211 Dialing Code to the Company at the local exchange level. The Local Agencies may establish the 211 Dialing Code in all, in part or in none of the Company's local exchanges.
- b. The Local Agency's written application to establish the 211 Dialing Code in a Company local exchange shall include the following:
 - 1) The local, foreign exchange, or toll free number into which the Company is to translate the dialed 211 code. If a Local Agency desires to change the telephone number into which the 211 Dialing Code is translated in an exchange, then the Local Agency shall make a new application.
 - 2) A location description of the Local Agency call center where 211 calls made from the Company local exchange will be routed.
 - 3) For network sizing and protection, an estimate of annual call volumes, the expected busy hour and holding time for each call to the 211 Dialing Code.
 - 4) An acknowledgement of the possibility that the FCC's designation of the 211 Dialing Code may be recalled at any time.
- c. Local Calling for Company Subscribers
 - 1) The Company, in cooperation with the Local Agencies, will make reasonable efforts to ensure that all 211 Dialing Code calls are local in nature and do not generate ECS, TOLL PAC, OELC, OEAS, intraLATA toll, interLATA long distance or pay-per-call charges for Company subscribers.
 - 2) When the Local Agencies make application for the 211 Dialing Code in a Company local exchange, Local Agencies shall supply the Company with a seven (7) or ten (10) digit telephone number that terminates within the Company local exchange or one of the local exchange's EAS exchanges. The Company's exchange facilities will translate the dialed 211 Dialing Code into the telephone number the Local Agency provides once 211 Dialing Code is established in the local exchange.
 - 3) When a Local Agency makes application for the 211 Dialing Code in a Company local exchange and a Local Agency call center is not located within the local exchange or one of the local EAS exchanges, then the Local Agency shall establish Foreign Exchange Service or supply the Company with a toll free telephone number so that Company subscribers' 211 Dialing Code calls remain local in nature.

C. 211 SERVICE FOR COMMUNITY INFORMATION AND REFERRAL SERVICES (Cont'd)

2. Obligations of the Local Community Information and Referral Services Agencies (Cont'd)

- d. The Local Agencies shall be liable for and shall indemnify, protect, defend and hold harmless the Company against all suits, actions, claims, demands and judgments, plus any expenses and counsel fees incurred by the Company on account thereof, whether suffered, made, instituted or asserted by the Local Agency or any party or person, for any personal injury to or death of any person or persons, or for any loss, damage or destruction of any property, whether owned by the Local Agency or others, arising out of or resulting directly or indirectly from the 211 Dialing Code.
- e. The Local Agencies shall develop an appropriate method for responding to 211 calls directed to it out of confusion or in error by Company subscribers.
- f. The Local Agencies must be prepared to receive all calls to the 211 Dialing Code during normal business hours. To this end, the Local Agencies agree to subscribe to termination facilities and lines in sufficient quantities to provide adequate service to the public.
- g. The Local Agencies shall comply with all present and future rules pertaining to the 211 abbreviated dialing code, including any and all requirements to relinquish the 211 Dialing Code in the event of a national assignment contrary to that made by the FPSC.
- h. The Local Agencies are responsible for obtaining all necessary permissions, licenses, written consents, waivers and releases and all other rights from all persons whose work, statements or performances are used in connection with the 211 Dialing Code, and from all holders of copyrights, trademarks and patents used in connection with said service.
- i. The Local Agencies shall respond promptly to any and all complaints lodged with any regulatory authority against the 211 Dialing Code. If requested by the Company, the Local Agencies shall assist the Company in responding to complaints made to the Company concerning the 211 Dialing Code.
- j. The Local Agencies shall not promote the 211 Dialing Code with the use of an autodialer or broadcasting of tones that dial the 211 Dialing Code.
- k. The Company can only make the 211 Dialing Code available to end users located in Company local exchanges. To establish the 211 Dialing Code to end users in non-Company local exchanges, the Local Agencies must make appropriate arrangements with the companies serving those local exchanges, even where Company subscribers may make local calls to the non-Company local exchanges.
- l. The Local Agencies should work separately with Competitive Local Exchange Carriers ("CLEC") operating and serving customers in the Company's local exchanges to ascertain whether the 211 Dialing Code will be available to their end users.

3. Obligations of the Company

- a. The Company shall provision the 211 Dialing Code within ninety (90) days of the Company's receipt of the Local Agencies' completed application(s) for service.
- b. When a 211 Dialing Code call is placed by the calling party via interconnection with an inter-exchange carrier, the Company cannot guarantee the completion of the 211 call, the quality of the call or any features that may otherwise be provided with 211 Dialing Code.
- c. The Company does not undertake to answer and forward 211 Service calls, but furnishes the use of its facilities to enable the Local Agencies to respond to such call at the Local Agencies' established call centers.
- d. The rates charged for the 211 Dialing Code do not contemplate the inspection or constant monitoring of facilities to discover errors, defects, and malfunctions in service, nor does the Company undertake such responsibility. The Local Agencies shall make such operational tests as, in the judgment of the Local Agencies, are required to determine whether the Company's facilities are functioning properly for its use. The Local Agencies shall promptly notify the Company in the event the Company's facilities are not functioning properly.

4. Liability

- a. The liability of the Company for losses or damages of any kind arising out of mistakes, omissions, interruptions, delays or defects in transmission, or failure or defects in any facility furnished by the Company, occurring in the course of furnishing the 211 Dialing Code, or of the Company in failing to maintain proper standards of maintenance and operation or to exercise reasonable supervision, shall in no event exceed an amount equivalent to the proportionate charge to the Local Agencies for the 211 Dialing Code and local exchange services for the period of service during which such mistake, omission, interruption, delay, error or defect in transmission or defect or failure in facilities occurs.
- b. The Company has no liability for losses or damages caused by the negligence of the Local Agencies.
- c. The Company's entire liability to any person for interruption or failure of the 211 Dialing Code shall be limited to the terms set forth in this section and other sections of this Tariff.
- d. The FPSC's local assignment and the Local Agencies' use of the 211 Dialing Code are subject to preemption by the FCC. The Company shall not be liable to the Local Agencies for any damages the Local Agencies may incur that result from a national assignment of the 211 Dialing Code.

5. Other Terms and Conditions

- a. The 211 Dialing Code will not provide calling number information in real time to the Local Agencies. If this type of information is required, the Local Agencies must subscribe to compatible Caller ID service as described in Section A13 of this Tariff.
- b. The 211 Dialing Code is provided solely for the benefit of the Local Agencies. The provision of the 211 Dialing Code by the Company shall not be interpreted, constructed or regarded, either expressly or implied, as being for the benefit of or creating any Company obligation toward any third person or legal entity other than the Local Agencies.
- c. A written notice will be sent to the Local Agency following oral notification when its 211 service unreasonably interferes with or impairs other services rendered to the public by the Company or by other subscribers of abbreviated dialing codes. If, after notification, the Local Agency makes no modification in method of operation or in the service arrangements that are deemed service-protective by the Company, or if the Local Agency is unwilling to accept the modifications, or if the Local Agency continues to cause service impairment, the Company reserves the right at any time, without further notice, to institute protective measures, up to and including termination of service.
- d. In an emergency situation as determined by the Company, the Company reserves the right, at any time, without notice, to institute protective measures, up to and including termination of service.

6. Rates and Charges

- a. Subject to other terms and conditions of the Tariff, Company subscribers shall be able to make and Local Agencies shall be able to receive calls using the 211 Dialing Code as part of both parties' local exchange service. The 211 Dialing Code is supplemental to and is not a replacement for either party's local exchange service.
- b. The Local Agencies shall pay a nonrecurring Central Office Charge for each company host central office out of which the 211 Dialing Code is established.
 - 1) Some Company local exchanges are served by more than one host central office. In order to establish the 211 Dialing Code in such an exchange, the Local Agency shall pay a Central Office Charge for each host central office in the Company local exchange.
 - 2) Some host central offices serve more than one Company local exchange. If the Local Agency makes applications to establish the 211 Dialing Code in multiple Company local exchanges served by the same host central office, then only one Central Office Charge shall apply. However, the Local Agency shall pay the full Central Office Charge whether or not it requests the 211 Dialing Code in all the Company local exchanges served by the host central office.

C. 211 SERVICE FOR COMMUNITY INFORMATION AND REFERRAL SERVICES (Cont'd)

6. Rates and Charges (Cont'd)

c. Where applicable, the Local Agency shall pay a nonrecurring Exclusion Charge.

- 1) When the Local Agency does not make contemporaneous applications to establish the 211 Dialing Code in every Company local exchange served by a host central office, the Local Agency shall pay an Exclusion Charge for each Company local exchange served by the host central office where the 211 Dialing Code is not established.
- 2) When a Company local exchange is once excluded, but the Local Agency later makes application to establish the 211 Dialing Code in the Company local exchange, then an Exclusion Charge shall again apply.
- 3) When the Approved Information and Referral Service Provider requests a different telephone number be translated to the 211 abbreviated dialing code in a participating central office other than the telephone number translated to the 211 abbreviated dialing code in the host central office.

d. The Local Agency shall pay a nonrecurring Number Change Charge when it makes application to change the telephone number into which the 211 Dialing Code is translated. The Number Change Charge shall be applied on a per telephone number, per host central office basis.

e. Applicable Service Order Charges as specified in Section A4 of the Tariff will apply in addition to the rates listed below.

f. Florida 211 Dialing Code Offering Non-Recurring Costs:

<u>Rate Elements</u>	<u>Non-Recurring Rate</u>
Central Office Charge(1)	\$250.00
Exclusion Charge(2)	325.00
Number Change Charge	50.00

(1) This is applied at the host central office only, and covers all offices that are part of that host complex with a single translated number. If more than one translated number is desired, apply the charge as many times as there are numbers. Any given office must have one number translated to – this cost does not cover cases where the Local Agency wants two or more translated numbers. Such a case would require class marking or a database.

(2) This is applied at the host office only, and could cover any number of offices that would not have access to the 211 Dialing Code.

N11 SERVICES

D. 511 SERVICE FOR TRAVEL INFORMATION SERVICES

1. General

- a. The Federal Communications Commission ("FCC") has nationally assigned the three digit 511 abbreviated dialing code to traveler information services. In CC Docket 92-105, Order 00-236, the FCC concluded that a governmental entity may request 511 assignment from wireline providers in order to provide intelligent transportation systems and other transportation information. The FCC also concluded that state public utility commissions may continue to exercise jurisdiction over N11 codes to ensure that carriers comply with transportation agencies' requests to deploy 511 expeditiously.
- b. The three digit 511 abbreviated dialing code the Approved Travel Information Service Provider ("511 Provider") for use in providing community travel Information services to the public by way of voice grade facilities.
- c. The Company makes the 511 abbreviated dialing code available to the 511 Provider as a tariffed, local calling area based service ("511 Service"). The 511 Service allows a Company subscriber to access the 511 Provider's call center by dialing only the 511 abbreviated dialing code using voice grade facilities. Subject to other terms and conditions of this tariff, Company subscribers shall be able to make and the 511 Provider shall be able to receive calls using the 511 Service as part of their local exchange services. The 511 Service is supplemental to and is not a replacement for either party's local exchange service.
- d. All 511 abbreviated dialing code calls must be local in nature and will not result in any extended calling scope (ECS), \$.20 EAS, intraLATA toll, interLATA long distance or pay-per-call charges to Company subscribers. However, 511 Service calls may result in measured service charges where Company subscribers' service plans include such charges as part of local measured service or home exchange service calling plans.
- e. The 511 Service is not available for the following classes of service:
 1. Hospital service.
 2. Inmate Service.
 3. 1+ and 0+ calling.
 4. 0-operated assisted calling.
 5. 101XXXXX calling.

N11 SERVICES

D. 511 SERVICE FOR TRAVEL INFORMATION SERVICES

2. Obligations of the Approved Travel Information Services Provider

- a. The 511 Provider must submit a written application to the Company for 511 Service at the local exchange level. The 511 Provider may establish 511 Service in all or part of the Company's local exchanges.
- b. The 511 Provider's written application to establish 511 Service in a Company local exchange must include the following:
 1. The local, foreign exchange or toll free telephone number into which the Company should translate the dialed 511 abbreviated code. If the 511 Provider desires to change the telephone number into which the 511 abbreviated dialing code is translated, the 511 Provider must pay a Number Change Charge as found in Section A10.
 2. A location description of the 511 Provider call center where 511 calls made from the Company local exchange will be routed.
 3. For network sizing and protection, an estimate of annual call volumes and holding time for calls to the 511 Service.
- c. Local Calling for Company Subscribers
 1. The 511 Provider, in cooperation with the Company, will assure that all 511 Service calls are local and do not generate extended calling scope (ECS), \$.20 EAS, intraLATA toll, interLATA long distance or pay-per-call charges for Company subscribers.
 2. When the 511 Provider applies for 511 Service in a Company local exchange, the 511 Provider must supply the Company with a seven or ten digit telephone number that terminates within the Company local exchange's local calling area. The Company will translate the 511 digits into the telephone number provided by the 511 Provider.
 3. When the 511 Provider applies for 511 Service in a Company local exchange and a 511 Provider call center is not located within the local exchange's local calling area, the 511 Provider must establish foreign exchange service or supply the Company with a toll free telephone number so that Company subscribers' 511 Service calls do not incur toll charges.

D. 511 SERVICE FOR TRAVEL INFORMATION SERVICES

2. Obligations of the Approved Travel Information Services Provider (Cont'd)

- d. The 511 Provider is liable for and will indemnify, protect, defend and hold harmless the Company against all suits, actions, claims, demands and judgments, plus any expenses and counsel fees incurred by the Company on account thereof, whether suffered, made, instituted or asserted by the 511 Provider or any other party or person, for any personal injury to or death of any person or persons, or for any loss, damage or destruction of any property, whether owned by the 511 Provider or others, arising out of or resulting directly or indirectly from the 511 Service.
- e. The 511 Provider must develop an appropriate method for responding to 511 calls directed to it out of confusion or in error by Company subscribers.
- f. The 511 Provider must subscribe to termination facilities and lines in sufficient quantities to provide adequate service to the public, and enable the 511 Provider to receive calls to the 511 Service during normal business hours.
- g. The 511 Service is provided on the condition that the 511 Provider subscribes to termination facilities and lines in sufficient quantities to adequately handle calls to the 511 Service without interfering with or impairing any services offered by the Company. There will be one path available for each line to which to 511 Provider subscribes.
- h. The 511 Provider must comply with all present and future state and federal rules pertaining to abbreviated dialing codes.
- i. The 511 Provider is responsible for obtaining all necessary permissions, licenses, written consents, waivers and releases and all other rights from all persons whose work, statements or performances are used in connection with the 511 Service. The 511 Provider is also responsible for obtaining all necessary permissions, licenses, written consents, waivers and releases and all other rights from all holders of copyrights, trademarks and patents used in connection with the said service.
- j. The 511 Provider must respond promptly to all complaints lodged with any regulatory authority against the 511 Service. If requested by the Company, the 511 Provider must assist the Company in responding to complaints made to the Company concerning the 511 Service.
- k. The 511 Provider shall not promote the 511 Service with the use of an autodialer or broadcasting of tones that dial the 511 abbreviated dialing code.

N11 SERVICES

D. 511 SERVICE FOR TRAVEL INFORMATION SERVICES

2. Obligations of the Approved Travel Information Services Provider (Cont'd)

- I. The 511 Service is available only to end users located in Company local exchanges. To establish 511 calling to end users in non-Company local exchanges, the 511 Provider must make appropriate arrangements with the companies serving those local exchanges, even where Company subscribers may make local calls to the non-Company local exchanges.
- m. The 511 Provider must work separately with competitive local exchange carriers ("CLECs") operating and serving customers in the Company's local exchanges to ascertain whether 511 abbreviated dialing will be available to their end users.

3. Obligations of the Company

- a. The Company will establish the 511 Service within ninety days after receipt of the 511 Provider's completed application(s) for service or the effective date of this tariff, whichever is later.
- b. When a 511 Service call is placed by the calling party via interconnection with an interexchange carrier, the Company cannot guarantee the completion of said 511 Service call, the quality of the call or any features that may otherwise be provided with 511 Service.
- c. The Company does not undertake to answer and forward 511 Service calls but furnishes the use of its facilities to enable the 511 Provider to respond to such calls at the 511 Provider established call centers.
- d. The rates charged for 511 Service do not contemplate the inspection or constant monitoring of facilities to discover errors, defects, and malfunctions in service, nor does the Company undertake such responsibility. The 511 Provider must conduct such operational tests as, in the judgment of the 511 Provider, are required to determine whether the Company's facilities are functioning properly for its use. The 511 Provider must promptly notify the Company in the event the Company's facilities are not functioning properly.

D. 511 SERVICE FOR TRAVEL INFORMATION SERVICES

4 Liability

- a. The liability of the Company for losses or damages of any kind arising out of mistakes, omissions, interruptions, delays, errors or defects in transmission, or failure or defects in any facility furnished by the Company, occurring in the course of furnishing 511 Service, or of the Company in failing to maintain proper standards of maintenance and operation or to exercise reasonable supervision, shall in no event exceed an amount equivalent to the proportionate charge to the 511 Provider for the 511 Service and local exchange services for the period of service during which such mistake, omission, interruption, delay, error or defect in transmission or defect or failure in facilities occurs.
- b. The Company is not liable for any losses or damages caused by the negligence of the 511 Provider.
- c. The Company's entire liability to any person for interruption or failure of the 511 Service is limited to the terms set forth in this and other sections of this Tariff.

5. Other Terms and Conditions

- a. The 511 Service will not provide calling number information in real time to the 511 Provider. If this type of information is required, the 511 Provider must subscribe to compatible Caller ID service as described in Section 13 of this tariff. The Caller ID service will only provide calling number information as described in Section 13 of this tariff.
- b. The 511 Service is provided solely for the benefit of the 511 Provider. The provision of the 511 Service by the Company shall not be interpreted, constructed or regarded, either expressly or implied, as being for the benefit of or creating any Company obligation toward any third person or legal entity other than the 511 Provider.
- c. A written notice will be sent to the 511 Provider following oral notification when its 511 Service unreasonably interferes with or impairs other services rendered to the public by the Company or by other subscribers of abbreviated dialing codes. If after notification the 511 Provider makes no modification in method of operation or in the service arrangements that are deemed service-protective by the Company, or if the 511 Provider is unwilling to accept the modifications, or if the 511 Provider continues to cause service impairment, the Company reserves the right, at any time, without further notice, to institute protective measures, up to and including termination of service.
- d. In an emergency situation as determined by the Company, the Company reserves the right, at any time, without notice, to institute protective measures, up to and including termination of service.

6. Rates and Charges

- a. A Central Office Charge applies for each Company host central office out of which the 511 Provider orders 511 Service, as follows:
 1. When a Company local exchange is served by more than one host central office, a Central Office Charge is applicable for each host central office in that local exchange.
 2. If the 511 Provider establishes 511 Service in multiple Company local exchanges served by the same host central office, only one Central Office Charge applies.
- b. An Exclusion Charge in lieu of a Central Office Charge applies for the establishment of 511 Service as follows:
 1. When the 511 Provider does not make simultaneous applications to establish 511 Service in every Company local exchange served by a host central office, the 511 Provider must pay an Exclusion Charge per host central office if any local exchange(s) are excluded from the translation.
 2. When a Company local exchange is once excluded, but the 511 Provider later makes application to establish 511 Service in the Company local exchange, then an Exclusion Charge applies per host central office when a local exchange continues to be excluded from the translation.
 3. When the 511 Provider requests a different telephone number be translated to the 511 abbreviated dialing code in a participating Company local exchange other than the telephone number translated to the 511 abbreviated dialing code in the host central office, then an Exclusion Charge applies per host central office.
- c. A Number Change Charge applies when the 511 Provider applies to change the telephone number into which the 511 abbreviated dialing code is translated. The Number Change Charge is applied on a per telephone number, per host central office basis.

E. NON-EMERGENCY 311 SERVICE (Cont'd)

1. General

- a. Non-Emergency 311 Service (NE311) is a local telephone exchange communications service which allows Company subscribers to reach non-emergency local government services by dialing an abbreviated telephone number. The Federal Communications Commission (FCC) reserved the abbreviated telephone number, 3-1-1, for non-emergency access to public services. NE311 Service is an optional service which may be purchased by a local municipality, state or local governmental unit to whom authority has been lawfully delegated. The NE311 Service Provider must be granted authority by the appropriate city, county, or state officials to provide the service.
- b. NE311 Service allows a Company subscriber to access an approved NE311 Service Provider by dialing only the 311 abbreviated dialing code. Subject to other terms and conditions of this Tariff, Company subscribers shall be able to make and the NE311 Service Provider shall be able to receive calls using the NE311 Service as part of their local exchange services. The NE311 Service is supplemental to and is not a replacement for either party's local exchange service.
- c. All NE311 Service calls must be local in nature and shall not result in any intraLATA toll, interLATA long distance or pay-per-call charges to Company subscribers. However, NE311 Service calls may result in local measured service charges where Company subscribers' service plans include such charges as part of Home and Extended Area Service (EAS) exchange calling. NE311 Service calls are not permitted where local calling is restricted.
- d. The NE311 Service is not available for the following classes of service: inmate service, 1+ and 0+ calling, 0- operated assisted calling and 101XXXX calling. NE311 Service is otherwise available wherever local service is accessible.
- e. Only calls originating within a NE311 Service Provider's area of jurisdiction (the "NE311 Service Area") will be routed to a call center/answering point designated by the NE311 Service Provider. There can be only one NE311 Service Provider in each geographic area. NE311 Service areas may not overlap. This assures that NE311 calls from a telephone line within a NE311 Service Area can be routed to a unique NE311 call center/answering point.
- f. NE311 Service is offered subject to the availability of facilities.

E. NON-EMERGENCY 311 SERVICE (Cont'd)

2. Obligations of the Non-Emergency 311 Service Provider

- a. The NE311 Service Provider must submit a written application for NE311 Service on a Company local exchange by local exchange basis. The NE311 Service Provider may establish NE311 Service in all or part of the Company's local exchanges.
- b. The NE311 Service Provider's written application to establish NE311 Service in a Company local exchange shall include the following:
 - 1) The unpublished local telephone number into which the Company is to translate the dialed NE311 abbreviated code. If the NE311 Service Provider desires to change the telephone number into which the NE311 abbreviated dialing code is translated in an exchange, then the NE311 Service Provider must pay the Number Change Charge specified in Section E.7.h.(1)(c).
 - 2) A location description of the NE311 Service Provider call center where NE311 calls made from the Company local exchange will be routed.
 - 3) For network sizing and protection, an estimate of annual call volumes, the expected busy hour and holding time for each call to the NE311 Service.
 - 4) An acknowledgment of the possibility that the assignment of the NE311 abbreviated dialing code may be recalled at any time. The assignment of the dialing code is provided on a first come first served basis.
- c. Local Calling for Company Subscribers
 - 1) The NE311 Service Provider, in cooperation with the Company, shall assure that all NE311 Service calls are local in nature and do not generate local, intraLATA toll, interLATA long distance or pay-per-call charges for Company subscribers.
 - 2) When the NE311 Service Provider makes application for NE311 Service in a Company local exchange, the NE311 Service Provider shall supply the Company with an unpublished seven or ten digit telephone number that terminates within the Company local exchange or one of the local exchange's EAS exchanges. The Company's exchange facilities will translate the dialed NE311 dialing code into the telephone number the NE311 Service Provider provides once NE311 Service is established in the local exchange.
 - 3) When the NE311 Service Provider makes application for NE311 Service in a Company local exchange and a NE311 Service Provider call center is not located within the local exchange or one of the local exchange's EAS exchanges, then the NE311 Service Provider shall establish foreign exchange service or supply the Company with a toll free telephone number so that Company subscribers' NE311 Service calls remain local in nature.

E. NON-EMERGENCY 311 SERVICE (Cont'd)

2. Obligations of the Non-Emergency 311 Service Provider (Cont'd)

- d. The NE311 Service Provider is liable for and will indemnify, protect, defend and hold harmless the Company against all suits, actions, claims, demands and judgments, plus any expenses and counsel fees incurred by the Company on account thereof, whether suffered, made, instituted or asserted by the NE311 Service Provider or any other party or person, for any personal injury to or death of any person or persons, or for any loss, damage or destruction of any property, whether owned by the N11 Service Provider or others, arising out of or resulting directly or indirectly from the NE311 Service.
- e. The NE311 Service Provider must develop an appropriate method for responding to NE311 calls directed to it out of confusion or in error by Company subscribers. This includes calls from customers that reside within the Company local exchange but outside the legally designated jurisdiction of the NE311 Service Provider (i.e. exchange boundaries that cross county borders.)
- f. The NE311 Service Provider must be prepared to receive all calls to the NE311 Service during normal business hours. To this end, the NE311 Service Provider agrees to subscribe to termination facilities and lines in sufficient quantities to provide adequate service to the public.
- g. NE311 Service is provided on the condition that the NE311 Service Provider subscribes to termination facilities and lines in sufficient quantities to adequately handle calls to the NE311 Service without interfering with or impairing any services offered by the Company. For each line subscribed to by the NE311 Service Provider, there will be one path available.
- h. The NE311 Service Provider must comply with all present and future rules pertaining to abbreviated dialing codes.
- i. The NE311 Service Provider is responsible for obtaining all necessary permissions, licenses, written consents, waivers and releases and all other rights from all persons whose work, statements or performances are used in connection with the 311 Service, and from all holders of copyrights, trademarks and patents used in connection with the said service.
- j. The NE311 Service Provider must respond promptly to any and all complaints lodged with any regulatory authority against the NE311 Service. If requested by the Company, the NE311 Service Provider shall assist the Company in responding to complaints made to the Company concerning the NE311 Service.
- k. The NE311 Service Provider shall not promote the NE311 Service with the use of an autodialer or broadcasting of tones that dial the NE311 abbreviated dialing code.

E. NON-EMERGENCY 311 SERVICE (Cont'd)

2. Obligations of the Non-Emergency 311 Service Provider (Cont'd)

- i. The Company can only make NE311 Service available to end users located in Company local exchanges. To establish NE311 calling to end users in non-Company local exchanges, the NE311 Service Provider must make appropriate arrangements with the companies serving those local exchanges, even where Company subscribers may make local calls to the non-Company local exchanges.
- m. The NE311 Service Provider must work separately with competitive local exchange carriers operating and serving customers in the Company's local exchanges to ascertain whether NE311 abbreviated dialing will be available to their end users.
- n. In the event that an end user mis-dials and reports an emergency by dialing 311, the NE311 Service Provider agrees to release, indemnify, defend, and save harmless the Company from claims, suits, actions, damages, costs, judgments, actions of every name and description arising out of or due to acts or omissions of the NE311 Service Provider, its agents and its employees while answering and dispatching 311 calls.

3. Obligations of the Company

- a. The Company shall provision the NE311 Service within ninety days of the Company's receipt of the NE311 Service Provider's completed application(s) for service. If the Company receives an application from an approved NE311 Service Provider prior to the effective date of this tariff, the Company will provision the 311 Service within ninety days of the effective date of the tariff.
- b. When an NE311 Service call is placed by the calling party via interconnection with an interexchange carrier, the Company cannot guarantee the completion of said NE311 Service call, the quality of the call or any features that may otherwise be provided with NE311 Service.
- c. The Company will route NE311 calls originating from end users on the Company's local exchange network whether they purchase service directly from the Company or from another provider reselling Company service. Otherwise, the Company is not responsible for establishing NE311 Service for calls originating from other telecommunications providers.
- d. The Company does not undertake to answer and forward NE311 Service calls but furnishes the use of its facilities to enable the NE311 Service Provider to respond to such calls at NE311 Service Provider established call centers.

E. NON-EMERGENCY 311 SERVICE (Cont'd)

3. Obligations of the Company (Cont'd)

- e. The rates charged for NE311 Service do not contemplate the inspection or constant monitoring of facilities to discover errors, defects, and malfunctions in service, nor does the Company undertake such responsibility. The NE311 Service Provider shall make such operational tests as, in the judgment of the NE311 Service Provider, are required to determine whether the Company's facilities are functioning properly for its use. The NE311 Service Provider shall promptly notify the Company in the event the Company's facilities are not functioning properly.
- f. NE311 Service is furnished subject to all operating failures and interruptions, including, but not limited to, equipment breakdowns, errors, defects, malfunctions and interruptions of service experienced in the regular telephone exchange system. The rates provided for this service are subject to the limitations which appear in this section and in other applicable sections of this and other tariffs. The Company does not undertake to provide a higher level of service reliability and quality than the telephone exchange service being provided in the exchange that NE311 Service is offered.

4. Liability

- a. The liability of the Company for losses or damages of any kind arising out of mistakes, omissions, interruptions, delays, errors or defects in transmission, or failure or defects in any facility furnished by the Company, occurring in the course of furnishing NE311 Service, or of the Company in failing to maintain proper standards of maintenance and operation or to exercise reasonable supervision, shall in no event exceed an amount equivalent to the proportionate charge to the NE311 Service Provider for the NE311 Service and local exchange services for the period of service during which such mistake, omission, interruption, delay, error or defect in transmission or defect or failure in facilities occurs. The Company has no liability for losses or damages caused by the negligence of the NE311 Service Provider.
- b. The Company's entire liability to any person for interruption or failure of the NE311 Service shall be limited to the terms set forth in this section and other sections of this Tariff.
- c. The local assignment and the NE311 Service Provider's use of the 311 abbreviated dialing code is subject to preemption by the Federal Communications Commission. The Company shall not be liable to the NE311 Service Provider for any damages the NE311 Service Provider may incur that results from a national assignment of the 311 abbreviated dialing code.
- d. The Company accepts no responsibility for obtaining subscriber record information from telephone end users.
- e. The Company will make every effort to route NE311 calls to the appropriate NE311 Service Provider calling center, however, the Company will not be held responsible for routing mistakes or errors.

E. NON-EMERGENCY 311 SERVICE (Cont'd)

5. Other Terms and Conditions

- a. The NE311 Service will not provide calling number information in real time to the NE311 Service Provider. If this type of information is required, the NE311 Service Provider must subscribe to compatible Caller ID service as described in Section 13 of this tariff.
- b. The NE311 Service is provided solely for the benefit of the NE311 Service Provider. The provision of the NE311 Service by the Company shall not be interpreted, construed or regarded, either expressly or implied, as being for the benefit of or creating any Company obligation toward any third person or legal entity other than the NE311 Service Provider.
- c. A written notice will be sent to the NE311 Service Provider following oral notification when its NE311 Service unreasonably interferes with or impairs other services rendered to the public by the Company or by other subscribers of abbreviated dialing codes. If after notification the NE311 Service Provider makes no modification in method of operation or in the service arrangements that are deemed service-protective by the Company, or if the NE311 Service Provider is unwilling to accept the modifications, or if the NE311 Service Provider continues to cause service impairment, the Company reserves the right, at any time, without further notice, to institute protective measures, up to and including termination of service. In an emergency situation as defined by the Company, the Company reserves the right, at any time, without notice, to institute protective measures, up to and including termination of service.

6. Optional Features

- a. Call Summary Report: The NE311 Service Provider may choose to receive a monthly call summary report that provides the NE311 Service Provider with a summary of their NE311 traffic. The data is delivered using electronic mail distribution to the NE311 Service Provider and is reported as the number of calls by central office by month.

7. Rates

- a. The nonrecurring charges associated with the initial NE311 Service establishment are specified in E.7.h. following. These are one-time charges which apply only when the NE311 Service Provider establishes or modifies NE311 Service.
- b. The NE311 Service Provider shall pay a nonrecurring Central Office Charge for each Company host central office out of which NE311 Service is established.
 - 1) Some Company local exchanges are served by more than one host central office. In order to establish NE311 Service in such an exchange, the NE311 Service Provider shall pay a Central Office Charge for each host central office in the Company local exchange.
 - 2) Some host central offices serve more than one Company local exchange. If the NE311 Service Provider makes applications to establish NE311 Service in multiple Company local exchanges served by the same host central office, then only one Central Office Charge shall apply. However, the full Central Office Charge applies whether or not the NE311 Service Provider requests NE311 Service in all the Company local exchanges served by that host central office.
- c. An Exclusion Charge Applies in lieu of a Central Office Charge for the establishment of NE311 Service as follows:
 - 1) When the NE311 Service Provider does not simultaneously establish NE311 Service in every Company local exchange served by a host central office, the NE311 Service Provider shall pay an Exclusion Charge per host central office if any local exchange(s) are excluded from the translation.
 - 2) When a Company local exchange is once excluded, but the NE311 Service Provider later applies to establish NE311 Service in the Company local exchange, an Exclusion Charge again applies per host central office when a local exchange continues to be excluded from the translation.
 - 3) When the NE311 Service Provider requests a different telephone number be translated to the 311 abbreviated dialing code in a participating Company local exchange other than the telephone number translated to the 311 abbreviated dialing code in the host central office, then an Exclusion Charge applies per host central office.
- d. A nonrecurring Number Change Charge applies when the NE311 Service Provider changes the telephone number into which the NE311 abbreviated dialing code is translated. The Number Change Charge shall be applied on a per telephone number, per host central office basis.
- e. Applicable service ordering charges as specified in Section 4 of this tariff will apply in addition to the rates listed below.
- f. The charges associated with the Call Summary Report are monthly charges.
- g. The minimum service period for NE 311 Service is one month.

CENTREX SERVICE (Central Telephone exchanges only)

A. CENTREX SERVICE

1. General

- a. Centrex Service is a central office communications system package provided on individual access lines from central office equipment located on Company premises. Centrex Service is offered on a per customer premises basis at the following rates, terms and conditions. Customers subscribing to Centrex Service with 26 or more Centrex access lines may, but are not required to, subscribe to Centrex Service as a Special Service Arrangement as provided in Section A5.E. of this tariff.
- b. Customer premises for the purposes of this tariff section is defined as a single or as multiple structures on the same customer's contiguous property and the Centrex Service is provisioned via a single entrance facility and a single network interface device (NID). All cable, wires, facilities and customer premises equipment on the customer side of the NID are non-regulated and are the responsibility of the customer.
- c. Centrex Service is provided subject to the availability of facilities and central office equipment as determined by the Company.
- d. Centrex Service does not include terminal equipment on the customer's premises. Provision of the telephone instruments or other equipment is the responsibility of the customer. Some features require customer provided customer premises equipment (CPE).
- e. Directory listings are furnished in accordance with the rates and regulations specified in Section A6 of this tariff.
- f. Service Ordering Charges as specified in Section A4 of this tariff apply to the services offered in this section and are in addition to the Centrex Service Establishment Translation Charge in this section of the tariff. For feature changes after the initial installation, the Secondary Service Ordering Charge will apply in addition to applicable nonrecurring charges.
- g. The minimum service period for Centrex Service is one month. For customers with contracts prior to May 10, 2002, if at any time during the contract period the Company increases the monthly recurring rates for the service, the customer may terminate the service without incurring any early termination liability.

CENTREX SERVICE
(Central Telephone exchanges only)

A. CENTREX SERVICE (Cont'd)

1. General (Cont'd)

- h. The quality of transmission for calls utilizing call forwarding or conferencing may vary depending on the distance and routing involved.
- i. Directory Assistance charges, as specified in Section A3 of this tariff, apply to the services offered in this section.
- j. Call Forward/Busy - Call Forward/Busy shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment in whole or in part of message toll charges that would regularly be applicable between the station originating the call and the station to which the call is transferred.
- k. Temporary Suspension of Service (Vacation Service), as specified in Section A2 of this tariff, is not allowed for Centrex Service.
- l. Not all Centrex Service features are compatible. Some combinations of features will not work when applied on the same line.
- m. Other services requested by the customer will be provided in accordance with applicable tariff sections.
- n. Centrex Service terminating into a PBX system are at the rates specified in Section A3.D.16.n.2) or A.3.D.16.n.3) of this tariff.

CENTREX SERVICE
(Central Telephone exchanges only)

A. CENTREX SERVICE (Cont'd)

1. General (Cont'd)

- p. The assignment of telephone numbers and the sequence of the numbers assigned to a Centrex Service are made at the discretion of the Company. The Company does not guarantee to provide telephone numbers arranged in a consecutive manner. If the customer requests telephone numbers under a special numbering arrangement to be terminated in a Centrex customer group, then additional recurring and non-recurring charges may apply as determined on an Individual Case Basis (ICB) per Section A5.
- q. Centrex Service is not provided in association with local measured service and is not available on residential lines.
- r. All exchange access lines terminating in a Centrex system must be served by the same central office or associated remote switch. Centrex access lines may be provided as Foreign Exchange (FX) Service or Foreign Central Office (FCO) at the rates and charges specified in Section A9 of this tariff.
- s. The rates and charges applicable to Extended Area Service (EAS), Extended Calling Scope (ECS), TOLL-PAC and 25/25 Plan, as specified in Section A3 of this tariff also applies in addition to the rates and charges applicable to Centrex Service. Optional Extended Local Calling (OELC) and OEAS are not available to Centrex Service.

CENTREX SERVICE
(Central Telephone exchanges only)

A. CENTREX SERVICE (Cont'd)

2. Definitions

ABBREVIATED DIALING¹

Allows a station abbreviated dialing (i.e., 3, 4, or 5 digit dialing) to other station members within the same customer group.

AUTO ANSWER BACK¹

Allows any incoming call to the Primary Directory Number of the set to be automatically answered after four seconds. Compatible only on a digital, hands free business set.

AUTOMATIC CALL DISTRIBUTION (ACD)²

Automatic Call Distribution is a digital central office service that provides advanced call distribution and queuing capabilities as an integrated function of Centrex service. The customer must subscribe to and maintain a minimum of two Automatic Call Distribution positions and at least one Automatic Call Distribution group.

AUTOMATIC LINE²

Provides an automatic connection between a calling station that goes off-hook and a predetermined location. Available on MDC sets only.

CALL FORWARD - UNIVERSAL, BUSY, AND NO ANSWER¹

Allows a customer to have incoming calls to a station automatically forwarded to a predetermined telephone number, either on all calls and/or busy calls and/or calls not answered.

CALL HOLD¹

Allows the user to hold one call for any length of time by flashing and dialing a special code providing neither party goes "on-hook"; the station line is then free to originate another call. Dialing the hold code a second time retrieves the first call.

CALL PARK¹

Allows a station to park a call against its own directory number. The parked call can be retrieved from any station by dialing a feature access code and the directory number against which the call is parked.

1. Standard feature

2. Optional feature

Effective: May 10, 2002

CENTREX SERVICE
(Central Telephone exchanges only)

A. CENTREX SERVICE (Cont'd)

2. Definitions (Cont'd)

CALL PICK-UP¹

Allows a station to answer incoming calls to another station within a pre-set pick-up group. Calls are answered according to the member who has been ringing the longest.

CALL TRANSFER¹

Allows a station to transfer an incoming call to another user.

CALL WAITING¹

Informs a station user by tone, while on an established call, that a second call is waiting.

CLASS OF SERVICE RESTRICTIONS²

Defines the specific features and calling patterns available to stations and attendants within a customer group. Access code restrictions can be set up to restrict stations and attendants from trunk types such as local, toll, DID, and WATS. The following options are available:

Fully Restricted Service – Allows intragroup dialing only, must dial 9

Toll Restricted Service – Allows intragroup and local dialing only, must dial 9

Unrestricted Service – Allows full access to all facilities, must dial 9

Unrestricted Assume Dial 9 – Same as unrestricted; however, user cannot utilize abbreviated dialing

Note: 900 and 976 block available with all options

DIRECT INWARD DIALING¹

This service allows for incoming calls from the exchange network to reach a specific station. The calling party dials the seven-digit directory number to reach the station.

DIRECT OUTWARD DIALING¹

With this service, a Centex station user can place external calls to the exchange network by dialing the access code (usually the digit 9) receiving an optional second dial tone, then dialing the number.

CENTREX SERVICE
(Central Telephone exchanges only)

A. CENTREX SERVICE (Cont'd)

2. Definitions (Cont'd)

DISTINCTIVE RINGING¹

Produces a different ringing cadence for calls within and outside the customer group. One (1) long ring for internal calls, two (2) short rings for external calls.

LAST NUMBER REDIAL¹

Enables the subscriber to redial the last called number by pressing a single key rather than dialing the entire number.

MEET-ME-CONFERENCE²

Allows up to six (6) conferees to hold a conference call by dialing a pre-determined directory number at a specified time.

MULTIPLE APPEARANCE-DIRECTORY NUMBER (MADN)²

A directory number that is assigned to more than one station may be arranged as a single business set or per customer group.

MUSIC-ON-HOLD²

Provides the music-on-hold capability to calls that terminate on business sets within a customer group. When a call is put on hold, the caller hears music, announcement, silence, or a combination of the three treatments. Music source can be provided by the subscriber or the central office and requires an additional Centrex line to do so.

RING AGAIN¹

Allows a station user encountering a busy station to be notified when the busy station becomes idle and to be placed automatically in a ring-again mode.

2. Definitions (Cont'd)

SECONDARY DIRECTORY NUMBER²

Directory number not associated with a line, but assigned for use with priority hunting.

SPEED CALL LONG - CUSTOMER GROUP (30)²

Allows user to store up to 30 frequently dialed numbers and be called using a 2-digit code.

SPEED CALL LONG - CUSTOMER GROUP (50)²

Allows user to store up to 50 frequently dialed numbers and be called using a 2-digit code.

SPEED CALL SHORT (10)¹

Allows user to store up to 10 numbers that can be dialed automatically by using single digit codes.

STATION CONTROL CONFERENCE²

Enables a Centrex station user to establish a conference call consisting of up to thirty (30) conferees without the assistance of the attendant.

STATION HUNTING (sequential, circular, multiline)¹

When a called access line is busy, the call will be routed to a vacant (if available) access line in the hunt (rotary) group.

THREE-WAY CONFERENCE WITH CONSULTATION HOLD AND TRANSFER¹

Allows a station to include a third party in a call and optionally to transfer the call to the third party and performs consultation hold.

UNIFORM CALL DISTRIBUTION (UCD)²

This service allows for an even distribution of incoming calls to a listed directory number over a group of Unity or other 500/2500 type sets. Each station has its own directory number. Included with this feature is the provision of message announcement for calls in queuing. The customer will be responsible for providing the compatible tape and the announcement.

CENTREX SERVICE
(Central Telephone exchanges only)

A. CENTREX SERVICE (Cont'd)

4. Term Discount Plan (TDP)

- a. Term Discount Plans (TDPs) are available for Centrex Service. TDPs provide the customer with discounted rates. The customer agrees to a minimum service commitment period for Centrex Service when the TDP is established. The customer must order a TDP in writing to the Company. A TDP may be ordered based on the following plan options:

Plan A:	12 months
Plan B:	36 months

- b. The customer must specify the length of the initial service period at the time the service is ordered. When a customer converts to a TDP, no Centrex Service Establishment Translation Charge is applied toward Centrex facilities in-service at that time. If a customer moves from a month to month plan to a TDP, or upgrades from a 12 month TDP to a 36 month TDP, then no Centrex Service Establishment Translation Charge is applied.
- c. If a TDP customer disconnects service prior to the end of the TDP, the customer is liable for 100% of the payments remaining for the rest of the term plan. If Special Construction Charges were applied to the service being terminated, any termination charges associated with Special Construction Charges will also apply.
- d. Rate increases or decreases will automatically be applied to the monthly term plan rates for the remaining term of the TDP. If Company initiated rate increases to any rate element or combination of rate elements causes the charges for the entire Centrex service under the TDP to increase by 10% or more annually, then the customer may cancel the TDP without incurring termination liability charges provided that the customer notifies the Company within 30 days after the effective date of the rate increase.
- e. TDP commitment periods can be extended by the customer at any time during the term of the plan, up to a maximum of 36 months. The number of months accrued in the current plan will apply toward the new plan selected.
- f. At the end of the TDP service commitment period, the customer may subscribe to a new TDP at the prevailing rates set forth in Section A11.A.5. following. At the end of the TDP service commitment period there is no automatic renewal of the TDP, so the rates will convert to the prevailing month to month rates unless the customer selects a new TDP.
- g. Customers under a TDP who change physical locations will not be subject to termination charges if the customer subscribes to a new Centrex TDP at the new location.
- h. Special Construction Charges may apply as specified in Section A5.

b. Centrex Service Establishment Translation Charge

The charge for performing the central office translation associated with configuring a Centrex customer's network parameters.

- 1) Applies to each Centrex customer group translation activity performed.

Nonrecurring Charge (per Centrex customer group) \$50.00

- 2) Service Ordering Charges as specified in Section A4 of this tariff apply to the services offered in this section and are in addition to the Centrex Service Establishment Translation Charge.

c. Feature Changes After Initial Installation

- 1) Nonrecurring Charge (per line) \$10.00
Maximum charge of \$50 per order.

- 2) For feature changes after the initial installation, the Secondary Service Ordering Charge will apply in addition to applicable nonrecurring charges.

- 3) This applies to both standard features and optional features.

- d. Subscriber Line Charge (SLC)/End User Common Line Charge (EULC) is applicable and will be billed on a per line basis. For rates see Subscriber Line Charge/End User Common Line Charge in Section 4 of the Interstate Access Tariff.

CENTREX SERVICE
(Central Telephone exchanges only)

C. EXPRESSTOUCHSM CENTREX FEATURES

1. General

ExpressTouch Centrex features are central office call management features offered to Centrex customers in addition to the optional features offered previously in this section of the tariff.

2. Regulations

a. The following regulations apply to the features listed in 3. following:

- 1) ExpressTouch Centrex features are provided subject to the availability of facilities. Additionally, the features described will only operate on call originating and terminating within the Custom Local Area Signaling Services (CLASS) serving areas.
- 2) In no event shall the Company be held liable for any losses or damages arising from the unavailability or failure of its equipment or facilities, or for any act, omission or failure of performance by the Company or its employees or agents in connection with this service.

b. The following regulations apply to the Caller ID feature only, in addition to the regulations listed in a. preceding.

- 1) If an incoming call is from a caller utilizing a PBX trunk or a rotary line group, the telephone number displayed may be the main number of that PBX or rotary group rather than the directory number accessed by the caller.

Fifth Revised Sheet 8
Cancelling Fourth Revised Sheet 8
Effective: May 10, 2002

CENTREX SERVICE
(Central Telephone exchanges only)

C. EXPRESSTOUCH CENTREX FEATURES (Cont'd)

2. Regulations (Cont'd)

- b. The following regulations apply to the Caller ID feature only, in addition to the regulations listed preceding.
 - 2) The Company will deliver all numbers, subject to the technical limitations defined in this tariff, including telephone numbers associated with Nonpublished Listing Service as described in Section A6 of this tariff.
 - 3) Telephone numbers transmitted via Caller ID are intended solely for the use of the Caller ID subscriber. Resale of this information is prohibited by the tariff.
 - 4) Calling numbers will not be displayed on operator-handled calls, access lines where Calling Number Delivery Blocking has been activated, or with calls originating outside of the CLASS serving area.

3. Features

- a. Repeat Dialing - When activated, Repeat Dialing automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed and the caller will be notified with a distinctive ring.
- b. Return Call - Return Call enables a customer to place a call to the telephone number associated with the most recent call received, whether or not the call was answered.
- c. Caller ID - this feature enables the customer to view on a display unit the directory number of an incoming telephone call. The display unit may be an ancillary device which is attached to the customer's telephone set or may be a special telephone set with the display unit built-in. The calling number will display between the first and second ring.
- d. Calling Number Delivery Blocking - This service is provided at no charge to the subscriber. The service will be provided as described in Section A13.

CENTREX SERVICE
(Central Telephone exchanges only)

C. EXPRESSTOUCHSM CENTREX FEATURES (Cont'd)

3. Features (Cont'd)

e. Call Tracing

- 1) Call Tracing enables the customer to initiate an automatic trace of the last call received. A usage charge will be assessed on a per-occasion basis for each successful trace made. A trace is considered successful when the customer is informed by the voice response unit that the Call Tracing has been successfully completed. Certain types of calls, i.e., out of the area long distance, cannot be traced using this feature.
- 2) Upon activation by the customer, the call tracing information (calling and called number, the time the call was received, and the time the trace was activated) is recorded and stored until requested by an authorized law enforcement agency. The information collection process is instantaneous and the customer using the feature will be notified immediately if the trace was successful and will then be instructed to contact the local law enforcement agency if they wish to file a complaint. The customer is not provided the traced number.
- 3) If the customer receives another call prior to activating the trace, or receives a Call Waiting indication during the call to be traced, Call Tracing will record the last call, which may not be the call the call trace activation was intended to record.

- f. Call Tracing Denial - This service allows the Call Tracing feature to be blocked. To initiate the blocking feature, the customer must contact the Company. The Company will then install the blocking feature on the customer's line. The blocking feature cannot be deactivated by the customer. This feature is provided at no charge to the customer.

4. Rates and Charges

Effective: March 1, 2003

CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS
(UNITED TELEPHONE EXCHANGES ONLY)

A. CENTREX SERVICE

1. General

- a. Centrex Service is a central office communications system package provided in association with individual line exchange business and residence services furnished where available from digital central office equipment located in Company buildings. Centrex is not provided in association with PBX trunks or pay telephone service.
- b. Centrex is offered as a customer option and may be provided subject to the availability of facilities and central office equipment as determined by the Company.
- c. A combination of business and residence lines in a Centrex system is not permitted. All exchange lines in a Centrex system must be of the same type, i.e., must be either flat rate or measured service, and must be billed to the same account.
- d. Centrex provides for a system accommodating from one to twenty-five central office lines. All exchange access lines terminating in a Centrex system must be served by the same central office.
- e. Suspension of service as provided in Section A2 of this Tariff, is permitted in connection with Centrex.

CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS
(UNITED TELEPHONE EXCHANGES ONLY)

A. CENTREX SERVICE (Cont'd)

1. General (Cont'd)

- g. The quality of transmission for calls utilizing call forwarding or conferencing may vary depending on the distance and routing involved.
- h. Customer premises equipment associated with this service is provided by the customer.
- i. Payment Plans
 - 1) A minimum term payment plan of twelve months shall be applicable to Basic Centrex Systems.
 - 2) The termination liability for the Basic Centrex System is such that if a subscriber terminates their Centrex service prior to the expiration of the twelve month period, the subscriber shall immediately pay a termination liability in the amount of 100% of the monthly charges remaining in that twelve month period.
 - 3) At the expiration of the 12 month service period, the subscriber's service period will automatically renew for successive periods of 12 months each at the then current tariff rates, unless the subscriber provides written or verbal notice of termination at least thirty (30) days in advance of any scheduled renewal.

2. Basic System

a. Standard Features

- 1) Call Hold
Allows a station user to place a call on hold by flashing the switchhook and dialing a code.
- 2) Call Pickup
Allows a station user to answer another station users incoming call within a defined group by dialing a code.
- 3) Ring Again (Camp On)
Allows a station user encountering a busy station, within the same station group, to be notified when the busy station becomes idle and to be placed automatically in a ring again mode.

CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS
(UNITED TELEPHONE EXCHANGES ONLY)

A. CENTREX SERVICE (Cont'd)

2. Basic System (Cont'd)

a. Standard Features (Cont'd)

4) Station-To-Station Calling

Allows stations within a group to complete calls to other stations within the same group without the assistance of an attendant, by dialing a 2 through 7 digit number.

5) Three-Way Conference/Transfer/Consultation Hold

Allows a station user to establish three-way conference calls and provides the capability to transfer incoming, outgoing, and intragroup calls. The user may also place a call on hold to consult privately with a third party.

b. Optional Features

1) Call Forward - Don't Answer

Allows for forwarding of an incoming call to a preselected line within the system when the called line does not answer after a predetermined number of rings.

2) Call Forward - Busy

Allows for forwarding of an incoming call to a preselected line within the system when the called station is in use.

3) Call Forwarding

Allows all calls to a line equipped with Centrex to be automatically forwarded to a selected line within the system or outside the system.

4) Call Waiting

Provides the station user, who is busy on an existing call, with a private tone signal which indicates that another call is waiting. The station user may then ignore the waiting call; or terminate the original call and answer the waiting call; or, through the use of switchhook flashes, put the original call on hold and receive the waiting call; or alternately talk on both calls until one is terminated. (This feature cannot be utilized if Call Forward - Busy or Call Forward - Don't Answer is activated.)

5) Class-of-Service Restrictions

Provides the ability to allow or deny all calls originating or terminating on individual stations and tie trunks. Three types are offered.

a) Fully Restricted Service - stations are denied access to the exchange network.

b) Toll Restricted Service - restricts stations from toll calls.

c) Unrestricted Service - no restriction on calls.

6) Station Controlled Conference

Allows a station user to establish a conference call consisting of three to six conferees.

7) Meet-Me-Conference

Provides one six-party conference bridge and directory number for conferees to dial at a specified time to hold a conference.

C. ENHANCED CENTREX SERVICE (Cont'd)

2. Regulations (Cont'd)

- n. The number of simultaneous exchange and toll network calls to and from main station lines and attendant positions of an Enhanced Centrex system is limited by the number of Network Access Registers subscribed to by the customer. Each Network Access Register may be arranged for two-way, one-way incoming or one-way outgoing operation depending upon the option of the customer at the time the Network Access Register is installed. When a change in the type of operation is requested by the customer, the appropriate Service Charges as specified in Section A4 of this Tariff apply per Network Access Register affected.
- o. Service charges, as specified in Section A4 of this Tariff, apply to all Enhanced Centrex systems except as provided in C. 5. of this Tariff.
- p. Enhanced Centrex installation charges are due on initial installation or subsequent additions unless deferred over a predetermined period of time as specified in Section A22 of this Tariff.
- q. Enhanced Centrex main station lines may be restricted from dialing three-digit central office and service codes by applying Code Restriction to the line. The three-digit codes which may be restricted constitute those codes to which Public Announcement, Directory Assistance or Dial-It type pay-to-listen services (e.g., 900 and 976 calls) are assigned which could generate billing to the originating main station line. Code Restriction arrangements may also be used to prohibit toll calls to a carrier other than the Presubscribed Interexchange Carrier (dialed 101XXXX). InterLATA calls dialed 0-(operator handled) calls cannot be restricted.

C. ENHANCED CENTREX SERVICE (Cont'd)

2. Regulations (Cont'd)

q. (Cont'd)

- 1) At the time a Code Restriction arrangement is installed, the Enhanced Centrex system will be arranged for the Code Restriction specified by the customer and the main station lines designated by the customer will be so equipped. When the customer requests the subsequent addition or removal of code restriction on a main station line, the appropriate Service Charges as specified for a change in line termination apply per main station line affected. No such charges apply when the Code Restriction arrangement is disconnected in its entirety.
 - 2) Where Code Restriction applies to a particular central office code, direct outward dialed main station line access is denied to telephone numbers associated with that central office code.
 - 3) Code Restriction arrangements to deny access to Directory Assistance and/or Public Announcement Services are not guaranteed. These features are intended to limit main station line direct dialed outgoing calls, but such calls may, in certain circumstances, be completed and will be charged for in the normal manner.
- r. The first system established per customer within a central office must consist of a minimum of twenty-six (26) main station lines.

ACCESS LINES TO CUSTOMER PROVIDED FEATURES

Allows dial access from Enhanced Centrex service for connection to customer provided features. (Code Calling, Loudspeaker Paging, Radio Paging, Dictation and Music)

ATTENDANT AUTODIAL

This feature permits an attendant to dial frequently called numbers by depressing the Autodial feature key, which is programmed with the number.

ATTENDANT CAMP-ON AND CAMP-ON MODE OPTIONS

This feature allows incoming listed number calls, which the attendant attempts to complete to a busy main station line, to be held waiting and then automatically connected when the called main station line becomes available. An indication of camp-on will be given to the busy main station line each time the attendant attempts a completion.

ATTENDANT CONFERENCE

Using a six-port conference circuit, an attendant may interconnect up to five conferees on one call. The sixth port is required for attendant access.

ATTENDANT GROUP TRUNK ACCESS CONTROL

This feature utilizes special keys on the customer provided attendant console to serve as a common interface for trunk group busy and trunk group access for all trunk groups allocated to the customer group.

ATTENDANT POSITION

Customer-provided terminal equipment utilized for attendant control and call connecting functions.

ATTENDANT RECALL TIMER

This feature returns attendant-extended calls to a main station to the attendant after a prescribed waiting period if the main station user is unable to answer.

ATTENDANT SERVICE

Incoming calls to the main listed number are answered by an attendant, who may complete the call to the desired main station line by means of the Call Transfer feature. An unrestricted or semi-restricted main station line user may dial the attendant over attendant lines to secure help in the completion of an outgoing call by means of Dial "O" calling.

AUTOMATIC CALLBACK/RING AGAIN

Automatic Callback permits a main station line user who attempts an intercommunication call to a busy main station line to be automatically connected to that line when both called and calling lines are subsequently idle.

AUTOMATIC LINE

See Direct Connect Number.

AUTOMATIC ROUTE SELECTION

Automatic Route Selection is an optional feature, available where facilities permit, that allows station users, by dialing a preselected code to automatically select the preferred route subscribed for by a customer for network calls. Alternate routing to other facilities, subscribed to by the customer, is also provided. This arrangement is available for use with Foreign Exchange (FX), WATS, CCSA off-net, tie lines and Interexchange Carrier (IC) access lines which are compatible with Automatic Route Selection and toll network facilities.

CALL FORWARDING - ALL CALLS

Automatically routes all incoming calls to the attendant or a predetermined telephone number.

CALL FORWARDING-BUSY LINE

Automatically routes calls to the attendant or preselected main station line when the called main station line is busy.

CALL FORWARDING-NO ANSWER

Automatically routes calls to the attendant or preselected main station line when the called main station line doesn't answer within the preset ringing cycle.

CALL HOLD

Allows a main station line user to place any call involving their main station line on hold by flashing and dialing a special code. The main station line is then free to originate another call. The first call is retrieved by dialing the hold code a second time.

CALL PARK

Call Park allows the attendant to park calls against any directory in the attendant customer group. The parked call may be retrieved from any station by dialing the feature access code for retrieval plus the directory number.

C. ENHANCED CENTREX SERVICE (Cont'd)

3. Definitions (Cont'd)

CALL PICKUP

Allows a main station line user to answer calls directed to another main station line within the same preset call pick-up group.

CALL TRANSFER

Call Transfer provides for the transfer of calls by an Enhanced Centrex station. The Call Transfer feature is needed in addition to Three-way Calling if the station's type of call transfer is different from the call transfer type selected for the customer's group.

CALL WAITING-DIAL

The Dial Call Waiting feature provides the ability for originating main station lines to invoke call waiting service on selected intragroup calls by dialing an access code followed by the extension number of the main station line to be call waited.

CALL WAITING-EXEMPT

Prevents the Call Waiting-Originating or the Dial Call Waiting features from being imposed on the line when the station is busy.

CALL WAITING-ORIGINATING

Allows an equipped main station line to send the Call Waiting tone to any busy main station line in the same system.

3. Definitions (Cont'd)

CALL WAITING-TERMINATING

Informs a busy main station line, when the main station line is so equipped, that an incoming call is waiting (burst of tone). Permits holding the present connection while answering the new call then return to the original connection.

CODE RESTRICTION ARRANGEMENTS

A Code Restriction Arrangement automatically denies a portion of all main station lines of a Enhanced Centrex system direct outward dialing access to one or more three-digit codes within the local calling area in which the system is located. Code restriction provides a distinctive tone to indicate that access is not permitted on call attempts.

CONFERENCE CALLING-STATION

Allows a main station user to establish a conference connection of up to six conferees (including the originator) without the aid of the attendant.

CONSULTATION HOLD-ALL CALLS

Allows a main station user to place a call on hold by depressing the switchhook, at which time dial tone is returned. The station user may then proceed to establish connection with another internal station or outside party, and after speaking with the "consulted" party, the station user may (1) return to the call initially held, (2) depress the switchhook thereby effecting Add-On Conference or (3) hang up and effect transfer of the initial call to the consulted party.

CUSTOMER GROUP

A Customer Group is that portion of the memory storage in the serving central office that contains the features for a specific system.

DATA CALL PROTECTION

Data Call Protection prevents calls from being interrupted by call waiting tones, testing or busy verification attempts. Data call protection is not customer changeable and lines assigned this feature may not utilize call transfer or conference capabilities.

DIAL "O" CALLING

Dial "O" Calling permits a main station line user to reach an attendant position by dialing the single digit "O".

DIAL CODE SENDING (CODE CALLING) FEATURE

Code Calling provides dial access to customer-premises located code calling equipment by main station line, attendant access and tie lines of an Enhanced Centrex system. The dialed two or three digit code activates signaling devices on the customer's premises to produce a coded signal corresponding to the dialed code. The called party, upon recognition of the signal, is automatically connected to the calling party by dialing a special code from any main station line in the system.

3. Definitions (Cont'd)

NETWORK CLASS OF SERVICE

This feature provides the capability to allow or deny types of calls to a station on both an incoming and an outgoing basis.

OFF-HOOK QUEUE

See Queuing.

PERMANENT HOLD

Allows a main station user to place any call involving their main station line on hold by flashing the switchhook and dialing a special code. When Permanent Hold is activated no calls can be originated or terminated from the main station line. The first call is retrieved by going off-hook. If the call is not retrieved within a time designated by the customer, the station line will ring and the held call will be returned.

QUEUING

Queuing permits station users to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queuing arrangements are available:

- A Call-Back Queue, in which case the calling station goes on-hook and is called back when a facility becomes available.

QUEUING (Cont'd)

- An Off-Hook Queue, in which case the calling station remains off-hook and is held in queue until a facility becomes available.

RING AGAIN

See Automatic Callback.

SPEED CALLING

Lets the main station line user place calls to a list of frequently called telephone numbers by dialing fewer digits than the complete directory number.

STATION DIRECT INWARD DIALING RESTRICTION

Permits the customer to have selected main station lines restricted from receiving Direct In-Dialed calls from the MTS network. Direct In-Dial call attempts will be routed to the attendant.

STATION HUNTING ARRANGEMENTS

Directory Number Hunt, Distributed Line Hunt and Uniform Call Distribution are optional main station line hunt arrangements for searching over and distributing calls in a hunt group. These hunts are extensions of the basic multi line hunting feature included in Enhanced Centrex service.

STATION HUNTING ARRANGEMENTS (Cont'd)

Directory Number Hunting

Each line in a Directory Number Hunt group has its own unique directory number. The hunt group is accessed by dialing any number in the hunt group. The number of lines hunted depends on the hunting option (i.e., circular or sequential assigned to the group).

- Circular hunt permits a complete hunt over all the terminals in the group starting and ending with the dialed number.
- Sequential hunting starts at the number dialed and ends at the last number in the group.

Distributed Line Hunting

With Distributed Line Hunting, hunting starts after the first idle line found by the previous hunt and continues until the starting point is reached. Provides for an equal distribution of calls.

STATION HUNTING ARRANGEMENTS (Cont'd)

Uniform Call Distribution (Cont'd)

Multi-Line Hunt Group (Basic)

When a call is originated to a busy station line in a basic multi-line hunting group, the call hunts once in a prearranged order for an idle station through all remaining station lines in that group.

Uniform Call Distribution

Uniform Call Distribution provides an even distribution of incoming network and intercom calls among the individual main station lines of a hunt group and includes Circular Hunt.

- Call Queuing is an option that may be added to the Uniform Call Distribution arrangement. Queuing permits calls, in excess of main station lines in a Uniform Call Distribution group, to be held in the central office and distributed in their order of arrival to main station lines in the group as the main station lines become available.

STATION IDENTIFICATION

An itemized list of toll calls is shown on the toll bill with the number of each originating main station line.

STATION MESSAGE DETAIL RECORDING - (SMDR)

Station Message Detail Recording (SMDR) is an arrangement to provide a record by main station line number of originating intercity traffic routing over dial type tie lines, WATS, CCSA, interexchange carrier access lines and/or the Toll Network.

The station message detail will include the calling main station line number, the called number, date, time of day, duration of call and the type of facility used. The record will be provided on magnetic tape to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in routes selected by the customer for Station Message Detail Recording.

C. ENHANCED CENTREX SERVICE (Cont'd)

9. Optional Service Features (Cont'd)

c. Station Message Detail Recording (SMDR)

1) General

- a) Station Message detail recording (SMDR) is an arrangement to provide a record, by main station line number, of originating intercity traffic routing over dial type tie lines, WATS, CCSA, interexchange carrier access lines and/or the Toll Network.
- b) The station message detail will include the calling main station line number, the called number, date, time of day, duration of call and the type of facility used. The record will be provided on magnetic tape to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in routes selected by the customer for Station Message Detail Recording.

2) Regulations

- a) Station Message Detail Recording (SMDR) may be offered to main station lines of customers where facilities permit and where the Company's message billing process has been arranged to provide this optional feature.

9. Optional Service Features (Cont'd)

c. Station Message Detail Recording (Cont'd)

2) Regulations (Cont'd)

- b) Station Message Detail Recording is not represented to be a provision of billing detail.
- c) Station Message details will be provided on magnetic tape. The tape density and number of tracks will be that used by the program and data processing system in use by the Company's accounting center furnishing the tape. The format may be changed at the discretion of the Company in which case the customer will be responsible for making the tape compatible with his data processing equipment.
- d) Station Message details may be provided on all facilities subscribed to by the customer including Message Telecommunications Service (MTS), but will not include intercom calls originated by the station users. The customer may designate the group or groups of facilities on which SMDR is to be provided. Where the facility designated by the customer is the MTS network, the magnetic tape file will include a record of each message itemized on the customer's bill; e.g., messages received collect or billed to the customer as third number billing will be on the tape file in addition to DDD messages originated by the station user.

D. EXPRESSTOUCH CENTREX FEATURES

1. General

ExpressTouch Centrex features are central office call management features offered to Centrex Basic and Enhanced customers in addition to the optional features offered previously in Section A12 of the tariff.

2. Regulations of Service

a. The following regulations apply to the features listed in D.3.:

- 1) ExpressTouch Centrex features are provided subject to the availability of facilities. Additionally, the features described will only operate on calls originating and terminating within the Custom Local Area Signaling Services (CLASS) serving areas.
- 2) ExpressTouch Centrex features are available to both Basic and Enhanced Centrex Service subscribers.

D. EXPRESSTOUCH CENTREX FEATURES (Cont'd)

2. Regulations of Service (Cont'd)

a. The following regulations apply to the features listed in D.3.: (Cont'd)

3) In no event shall the Company be held liable for any losses or damages arising from the unavailability or failure of its equipment or facilities, or for any act, omission or failure of performance by the Company or its employees or agents in connection with this service.

b. The following regulations apply to the Caller ID feature only, in addition to the regulations listed in a. preceding:

1) If an incoming call is from a caller utilizing a PBX trunk or a rotary line group, the telephone number displayed may be the main number of that PBX or rotary group rather than the directory number accessed by the caller.

2) The Company will deliver all numbers, subject to the technical limitations defined in this tariff, including telephone numbers associated with Non- Published Listing Service as described in Section A6 of this tariff.

3) Telephone numbers transmitted via Caller ID are intended solely for the use of the Caller ID subscriber. Resale of this information is prohibited by this tariff.

4) Calling numbers will not be displayed on operator-handled calls, access lines where Calling Number Delivery Blocking has been activated, or with calls originating outside of the CLASS serving area as specified in Section A13.

Effective: May 29, 1997

CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS
(UNITED TELEPHONE EXCHANGES ONLY)

D. EXPRESSTOUCH CENTREX FEATURES (Cont'd)

3. Features

- a. Repeat Dialing - When activated, Repeat Dialing automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed and the caller will be notified with a distinctive ring.
- b. Call Return - Call Return enables a customer to place a call to the telephone number associated with the most recent call received, whether or not the call was answered.
- c. Caller ID - This feature enables the customer to view on a display unit the directory number of an incoming telephone call. The display unit may be an ancillary device which is attached to the customer's telephone set or may be a special telephone set with the display unit built-in. The calling number will display between the first and second ring.
- d. Calling Number Delivery Blocking - This service is provided at no charge to the subscriber. The service will be provided as described in Section A13.
- e. Call Tracing
 - 1) Call Tracing enables the customer to initiate an automatic trace of the last call received. A usage charge will be assessed on a per-occasion basis for each successful trace made. A trace is considered successful when the customer is informed by the voice response unit that the Call Tracing has been successfully completed. Certain types of calls, e.g., out of the area long distance, cannot be traced using this feature.

3. Features (Cont'd)

e. Call Tracing (Cont'd)

- 2) Upon activation by the customer, the call tracing information (calling and called number, the time the call was received, and the time the trace was activated) is recorded and stored until requested by an authorized law enforcement agency. The information collection process is instantaneous and the customer using this feature will be notified immediately if the trace was successful and will then be instructed to contact the local law enforcement agency if they wish to file a complaint. The customer is not provided the traced number.
- 3) If the customer receives another call prior to activating the trace, or receives a Call Waiting indication during the call to be traced, Call Tracing will not record the correct number.

SECTION A13
First Revised Sheet 1
Cancelling Original Sheet 1
Effective: January 1, 1997

MISCELLANEOUS SERVICE ARRANGEMENTS

A. GENERAL

1. The following monthly rates and charges with their associated regulations apply for the equipment and facilities listed following.
2. For work functions required on miscellaneous equipment items that are connected, moved or changed, a secondary service Ordering Charge for residence or business, as appropriate to the service with which it is associated, will be applicable in addition to the charges specified in this section of the tariff, except as provided hereafter.

B. AUTOMATIC TIME/TEMPERATURE/WEATHER ANNOUNCEMENT SYSTEMS
UNITED TELEPHONE EXCHANGES ONLY

1. General
 - a. The Company will provide facilities, when available, in the exchanges specified herein, for customers for their use in providing automatic announcements by telephone to calling parties simultaneously.
 - b. The Company will furnish all facilities required for such announcements, including the automatic announcement equipment, associated apparatus and announcement lines. The automatic announcement equipment shall be located on the premises of the Company unless the Company agrees to a location elsewhere.

MISCELLANEOUS SERVICE ARRANGEMENTS

B. AUTOMATIC TIME/TEMPERATURE/WEATHER ANNOUNCEMENT SYSTEMS
UNITED TELEPHONE EXCHANGES ONLY (Cont'd)

1. General (Cont'd)

- c. The customer will contract for a unit of such capacity and for as many announcement lines and terminal equipment initially and subsequently as may be required in the judgment of the Company to adequately handle calls to announcement equipment without impairing the Company's general telephone service or telephone plant.
- d. Facilities shall be used for such announcement, together with such other announcement as may be desired by the customer, provided, however, that the contents and length of such announcements shall be subject to the approval of the Company.
- e. The Company will furnish said announcement facilities to its customers for use by such customers in providing announcements, only within the limits of the local service area serving the customer, including the limits of other local service areas having access to the location of the announcement facilities on a local service basis. This limitation, however, is not intended to preclude the completion of any incoming sent paid message toll calls placed to the time announcement number.
- f. Telephone users calling the announcement numbers are automatically disconnected after elapsing of time for one full announcement.

MISCELLANEOUS SERVICE ARRANGEMENTS

B. AUTOMATIC TIME/TEMPERATURE/WEATHER ANNOUNCEMENT SYSTEMS
UNITED TELEPHONE EXCHANGES ONLY (Cont'd)

1. General (Cont'd)

- g. The customer indemnifies and saves the Company harmless against claims for libel, slander, or infringement of copyright arising from the material transmitted over facilities furnished hereunder; and against all other claims arising out of any act or omission of the customer in connection with facilities provided by the Company.
- h. The liability of the Company for damages arising out of mistakes, omissions, interruptions, delays, or errors or defects in transmission occurring in the course of furnishing service or other facilities and not caused by the negligence of the customer, or of the Company in failing to maintain proper standards of maintenance and operation and to exercise reasonable supervision, shall in no event exceed an amount equivalent to the proportionate charge to the customer for the period of service during which such mistake, omission, interruption, delay, or error or defect in transmission occurs.
- i. One directory listing without charge will be furnished with each service, said listing to appear under the caption heading for the service furnished with the name of the customer listed there under. Additional listings will be furnished at rates shown in the "Directory Listings" section of this tariff.
- j. If requested, a monitoring line may be terminated on the premises of the customer when the announcement equipment is located in the Company's central office. The rate for this service is equal to the mileage charges from the serving central office to the location of the line termination.

B. AUTOMATIC TIME/TEMPERATURE/WEATHER ANNOUNCEMENT SYSTEMS
UNITED TELEPHONE EXCHANGES ONLY (Cont'd)

1. General (Cont'd)

- k. The Company is not obligated to furnish record or message strip changes prior to sixty (60) days after the date of an order for such record or message strip changes.
- l. Service will be furnished in any dial exchange where all the necessary facilities, as determined by the Company, are available or can be made available within a reasonable time, at reasonable expense.
- m. Contracts for announcement lines are taken for an initial period of one month.
- n. No material which is prohibited by law or deemed objectionable by the Company may be transmitted over the facilities furnished hereunder.
- o. Contracts for announcement equipment are taken for initial periods of thirty-six (36) months unless otherwise specified. Contracts may be terminated prior to their expiration at any time upon reasonable notice in writing and upon payment of all full monthly charges for the remainder of the initial contract period (i.e., all charges due for the period service has been rendered, plus a termination charge computed by reducing the basic termination charge as appropriate for each month the service has been in effect).

D. CUSTOM CALLING FEATURES

1. General

- a. Custom calling features consist of optional central office features which are intended to provide subscribers with a greater efficiency of the use of their telephone service.
- b. Custom calling features are limited to those areas served by electronically controlled central offices equipped for custom calling features, and will be offered as available.
- c. Custom calling features are furnished only in connection with individual line service and rotary line service when available, exclusive of pay telephone service.
- d. Call Forwarding services and Three-Way Calling Service contemplate that normal transmission performance quality cannot be guaranteed on all calls and cannot be effected in all instances depending on the distance and routing necessary to complete the call(s) involved.
- e. When custom calling features are furnished in connection with rotary line service, charges apply for each rotary line that the subscriber requests to be so equipped.

SECTION A13
Third Revised Sheet 17
Cancelling Second Revised Sheet 17
Effective: August, 1, 2005

MISCELLANEOUS SERVICE ARRANGEMENTS

E. CUSTOM CALLING FEATURES (Cont'd)

2. Feature Descriptions

a. Call Forward Features

Call Forward Features permit the forwarding of incoming calls under a variety of conditions to another telephone number either by dialing an activation code or via pre-programming by the Company. Calls may be forwarded to any number subject to the availability of the necessary facilities in the central office from which the calls are to be transferred. The customer subscribing to this service is responsible for applicable usage charges. Only one call forwarding arrangement, consisting of a single calling path, will be provided per exchange service line for which the customer subscribes to this feature.

Call Forward Features shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment in whole or in part, of usage charges that would regularly be applicable between the station originating the call and the station to which the call is ultimately transferred.

Effective: August, 1, 2005

MISCELLANEOUS SERVICE ARRANGEMENTS

E. CUSTOM CALLING FEATURES (Cont'd)

2. Feature Descriptions (Cont'd)

a. Call Forward Features (Cont'd)

1. Call Forwarding

This feature permits the manual forwarding of incoming calls to another telephone number. When activated, all calls will forward; calls cannot be answered from a line with Call Forwarding activated. Call Forwarding overrides Call Forward No Answer and Call Forward Busy, but those features resume functionality when Call Forwarding is deactivated.

- a) Call Forwarding (FCF1FLC) – Provides a customer the capability to control activation/deactivation and the forward-to number of the service by using dialing tones.
- b) Call Forward Fixed (FCF1FLC FIX) - Provides a customer the capability to control activation/deactivation of the service by using dialing tones. The customer selected forward-to number is preprogrammed by the Company at the time service is established and can only be changed via service order.

2. Call Forward No Answer

This feature permits the automatic forwarding of an incoming call to another telephone number when the called telephone remains unanswered for a predetermined number of rings, usually four or five.

Where facilities are available, this feature also includes Call Forwarding of Call Waiting when the customer is also subscribed to Call Waiting or Enhanced Call Waiting. Call Forwarding of Call Waiting forwards unanswered waiting calls to a customer-designated telephone number using Call Waiting and Call Forward No Answer. An incoming call to a busy line first receives a Call Waiting tone. If the call is not answered within a set period of time, the incoming call is forwarded to a customer-designated telephone number.

- a) Call Forward No Answer-Fixed (FCD1FLC) – This feature is activated and the customer selected forward-to number is preprogrammed by the Company at the time service is established and can only be changed via service order.
- b) Call Forward No Answer-Customer Programmable (FCD1FLC PRG) – Provides a customer the capability to control activation/deactivation and the forward-to number of the service by using dialing tones.
- c) Call Forward No Answer-Customer Controlled (FCD1FLC CC) – Provides a customer the capability to control activation/deactivation of the service by using dialing tones. The customer selected forward-to number is preprogrammed by the Company at the time service is established and can only be changed via service order.

2. Feature Descriptions (Cont'd)

a. Call Forward Features (Cont'd)

3. Call Forward Busy

This feature permits the automatic forwarding of an incoming call to another telephone number when the called telephone is already in use. Call Forward Busy shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment of Rotary Line/Hunting Service.

- a) Call Forward Busy-Fixed (FCB1FLC) – This feature is activated and the customer selected forward-to number is preprogrammed by the Company at the time service is established and can only be changed via service order.
- b) Call Forward Busy-Customer Programmable (FCB1FLC PRG) – Provides a customer the capability to control activation/deactivation and the forward-to number of the service by using dialing tones.
- c) Call Forward Busy-Customer Controlled (FCB1FLC CC) – Provides a customer the capability to control activation/deactivation of the service by using dialing tones. The customer selected forward-to number is preprogrammed by the Company at the time service is established and can only be changed via service order.

2. Feature Descriptions (Cont'd)

a. Call Forward Features (Cont'd)

4. Call Forward Remote Activation (FCG1FLC)

This feature allows the Call Forwarding subscriber to change the Call Forwarding status of their telephone line from a remote location using a touch-tone telephone. To redirect Call Forwarding from a remote location, the subscriber dials a remote-access directory number. Once the subscriber's authorization code is verified, the subscriber can activate, deactivate, or change call forwarding to a new destination.

- b. Three-Way Calling Service - This service permits an existing call to be held, and by dialing, a second telephone call can be established and added to the connection.

Three-Way Calling is available on a flat rate or a usage sensitive basis. The usage sensitive option is only available to residence and business single line customers. Under the usage sensitive option, the customer will incur an activation charge on a completed call. The provision of this service on a usage sensitive basis is subject to technical limitations and is provided on a where available basis.

Cancelling Third Revised Sheet 22
Effective: August 14, 2003

MISCELLANEOUS SERVICE ARRANGEMENTS

E. CUSTOM CALLING FEATURES (Cont'd)

2. Feature Descriptions (Cont'd)

i. Three-Way Calling with Transfer - This feature allows a business customer to hold an in-progress call and complete a second call while maintaining privacy from the first call, or to add on the previously held call for a three-way conference. Incoming calls may be transferred to another access arrangement on an inter- or intra-switch basis, except as specified in Section A13.E.2.i.3) following.

1) The subscriber can transfer the caller to the secondary destination in one of three ways:

a) Blind Transfer

By placing the original caller on hold, dialing the secondary destination, and upon hearing the ring, hang up, resulting in the original caller being connected to the secondary destination.

b) Announced Transfer

By placing the original caller on hold, dialing the secondary destination, and upon the party at the secondary destination answering the phone, the subscriber announces the transfer of the call (on hold at the time) and hangs up (on hook), resulting in the original caller being connected to the secondary destination.

c) Three-Way Conferencing with Option to Transfer

By placing the original caller on hold, dialing the secondary destination, and upon the party at the secondary destination answering the phone, taking the original caller off-hold; resulting in a three way connection. The subscriber can then hang up, resulting in the original caller continuing to be connected to the caller at the secondary destination.

2) The subscriber of Three-Way Calling with Transfer can receive or originate the initial call. Three-Way Calling with Transfer allows the subscriber to originate both legs of a three-way connection and subsequently disconnect, enabling the other parties to remain connected.

3) Where the subscriber originates both legs of a three-way call, those legs will remain bridged together when the subscriber goes on hook when at least one of the legs is a call for which both the originating and terminating points are served by the same switch. Where the subscriber originates two inter-switch legs of a three-way call, both legs remain bridged when the subscriber goes on hook where the serving switch is not a 5ESS switch. For such calls in a 5ESS switch, both inter-switch legs are disconnected when the subscriber goes on hook.

2. Feature Descriptions

a. Return Call

- 1) This feature enables a customer to place a call to the telephone number associated with the most recent call received, whether or not the call was answered or the number is known.
- 2) The customer must dial a code to request that the network place the call. Where facilities permit, upon activation of the feature, the customer will receive a voice announcement stating that Return Call has been accessed. In addition, the announcement will provide the Directory Number (DN) of the last incoming call. The Return Call user will then be prompted to enter an additional digit to continue with the feature activation, or to hang up to abort the activation. If the called line is not busy, the call is placed. If the called line is busy, a confirmation announcement is heard, the customer hangs up, and a queuing process begins. For the next 30 minutes, both the calling and called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone handset the call will automatically be placed.

a. Return Call (Cont'd)

- 3) This feature is not available on operator handled calls. In connection with Return Call, the Company will deliver all numbers, subject to technical limitations, including telephone numbers associated with Non-Published Listing Service.
- 4) If the last incoming call originated from a telephone where delivery of the number was suppressed, either via per call or per line blocking, the Return Call subscriber will receive an announcement stating the last incoming call was private and the call cannot be returned.

If the last incoming call number is unavailable for any reason other than suppression via blocking, the Return Call subscriber will receive an announcement stating that Return Call cannot be activated at this time because the telephone number is not in the Company's serving area. In this instance, Return Call will not be activated.

- 5) If the incoming call is from a caller served by a PBX, only the main number of the PBX is transmitted and available for the voice announcement.
- 6) If the incoming call is from a SignalRing customer, the telephone number transmitted and available for voice announcement will be the main Directory Number rather than any dependent SignalRing service number.
- 7) If the incoming call originates from a multi-line hunt group, the telephone number transmitted and available for the voice announcement will always be the main number of the hunt group, unless the telephone numbers are identified within the group.

The provision of this service on a usage sensitive basis is subject to technical limitations and is provided on a where available basis .

c. Call Tracing

- 1) Call Tracing enables the customer to initiate an automatic trace of the last call received. A usage charge will be assessed on a per occasion basis for each successful trace made. A trace is considered successful when the customer is informed by the voice response unit that the Call Tracing has been successfully completed. Certain types of calls, i.e., out of the area long distance, cannot be traced using this feature.
- 2) Upon activation by the customer, the call tracing information (calling and called number, the time the call was received, and the time the trace was activated) is recorded and stored until requested by an authorized law enforcement agency. The information collection process is instantaneous and the customer using this feature will be notified immediately if the trace was successful and will then be instructed to contact the local law enforcement agency if they wish to file a complaint. The customer is not provided the traced number.

2. Feature Descriptions (Cont'd)

c. Call Tracing (Cont'd)

- 3) If the customer receives another call prior to activating the trace, or receives a Call Waiting indication during the call to be traced, Call Tracing will not record the correct number.
- 4) In situations where the Call Tracing functionality is initiated by a subscriber, information pertaining to nonpublished numbers will be provided to any authorized law enforcement agency upon request.

d. Selective Call Ring

- 1) Selective Call Ring allows the customer to define up to twelve telephone numbers which, when calling, will ring differently from a regular telephone call.
- 2) The customer creates a screening list through an interactive dialing process for up to twelve telephone numbers. When a call is received from one of the programmed numbers, the customer is alerted with a distinctive ring. Calls from numbers not programmed will ring normally. The numbers on the list may be changed or reprogrammed at any time by the customer.

e. Selective Call Rejection

- 1) Selective Call Rejection allows the customer to create a list of up to twelve numbers which, when calling, will be blocked from ringing the customer's telephone and will be sent to an appropriate recording.

Effective: May 2, 2001

MISCELLANEOUS SERVICE ARRANGEMENTS

F. EXPRESSTOUCH SERVICE (Cont'd)

2. Feature Descriptions (Cont'd)

e. Selective Call Rejection (Cont'd)

- 2) The feature enables the customer to prevent incoming calls from up to twelve specific telephone numbers by allowing the customer to program twelve telephone numbers into a screening list. When a call is received from a number on the screening list, and if Selective Call Rejection is activated, the call is forwarded to a recording. If Selective Call Rejection is not activated, the call is completed as usual. Numbers may be added or deleted by the customer at any time.

f. Selective Call Forward

- 1) Selective Call Forward allows subscribers to give priority treatment to certain calls by transferring only those calls originating from a subscriber-designated list of telephone numbers. The subscriber may include up to twelve telephone numbers from the ExpressTouch® service area on the Selective Call Forward list. The feature screens incoming calls against the subscriber's list. Calls coming from a number on the subscriber's list are forwarded to another telephone number designated by the subscriber.
- 2) Subscribers activate and deactivate the feature by dialing an access code. Automatic announcements tell subscribers whether the feature is activated or deactivated, what directory numbers are on the screening list, and the forward-to directory number. Subscribers can modify this information in response to prompts from the Company's central office equipment.

g. Selective Call Acceptance

- 1) Selective Call Acceptance screens incoming calls against a list of subscriber-specified directory numbers and accepts only those calls from numbers on the list. Calls from other numbers within the ExpressTouch® service area are denied access to the subscriber's line; callers receive an announcement stating that the called party is not accepting calls at this time. Calls from outside the ExpressTouch® service area will ring normally.
- 2) This feature also controls access to computer lines for security reasons by restricting directory numbers that can terminate to computer lines.
- 3) Subscribers can include up to twelve numbers from within the ExpressTouch® service area on the Selective Call Acceptance list. Subscribers dial an access code to activate or deactivate the feature, determine status of the feature, review the Selective Call Acceptance list, and add or delete numbers from the list.

7. Anonymous Call Rejection (ACR)

- a. This feature allows customers to automatically reject incoming calls when the call originates from a telephone number which has invoked a blocking feature that prevents the delivery of their number to the called party. When ACR is activated on the customer's line and an incoming call marked private is received, the called party's telephone will not ring. The call will be routed to an announcement and subsequently terminated. The announcement informs the calling party that the person he/she is trying to reach will not accept the call as long as the calling number is not delivered. Incoming calls are checked for acceptance or rejection by ACR regardless of the current state of the ACR customer's line (i.e., off-hook or idle).
- b. This service will be offered where technically available.

I. REMOTE CALL FORWARDING (RCF)

1. General

- a. Remote Call Forwarding (RCF) is a service whereby a call placed from an originating number (Calling Party) to a customer's Remote Call Forwarding (RCF customer) telephone number (the call forwarding location) is automatically forwarded by Company central office equipment to another telephone number (the terminating number) designated by the RCF customer.

2. Regulations

- a. RCF service is offered only from suitably equipped central offices and is subject to the availability of facilities.
- b. Each RCF service allows for forwarding one call at a given time. A subsequent RCF service or path is necessary for each additional call to be forwarded simultaneously.
- c. RCF service will be provided on the condition that the customer subscribes to sufficient facilities to adequately handle calls without interfering with or impairing any services offered by the Company.
- d. When the RCF number is to be located in a multi-office exchange, the Company will determine the serving office.
- e. Customers are prohibited from using Remote Call Forwarding for the purpose of bypassing toll service (e.g. Long Distance Message Telecommunications Service and/or Extended Calling Service (ECS) Routes).
- f. Transmission characteristics may vary depending on the distance and routing necessary to complete the forwarded call.
- g. RCF service is not represented as suitable for satisfactory transmission of data.
- h. RCF service is not offered when the terminating number for a forwarded call is a Pay Telephone access line service.

MISCELLANEOUS SERVICE ARRANGEMENTS

I. REMOTE CALL FORWARDING (RCF) (Cont'd)

2. Regulations (Cont'd)

- i. The Company will not provide identification of the originating telephone number to the RCF customer.
- j. One listing in the alphabetical section of the Directory covering the exchange in which the RCF central office is located is provided without additional charge. Additional listings as shown in Section A6 may be subscribed to.
- k. Neither RCF nor Call Forwarding will be available as a feature on the RCF terminating number.
- l. If the use of RCF Service is primarily or substantially of business, professional, institutional, or otherwise occupational nature, i.e., nonresidential, or if the listing used is such as to indicate nonresidential use, then calls will not be forwarded to any telephone number for which residential rates apply.
- m. RCF Service may not be used, switched, or otherwise connected through a Cellular Mobile Carrier's RCF Service for the provision of through calling from a landline telephone to another landline telephone.
- n. RCF is not eligible for Vacation Service.
- o. The minimum contract period for this service is one month.

I. REMOTE CALL FORWARDING (RCF) (Cont'd)

3. Rates and Charges

- a. The subscriber to RCF is responsible for all applicable local and long distance charges between the RCF central office and the terminating number.
 - 1) Appropriate long distance message detail will be provided to the subscriber for toll calls from the RCF central office to the terminating telephone number.
 - 2) Message detail is not provided for local calls when RCF is used on a local basis.
- b. The calling party will be responsible for any applicable local or long distance charges from the originating number to the RCF telephone number that is being called.
- c. The following monthly rates for RCF allows for forwarding one call at a given time. An additional RCF path is required for each additional call to be forwarded simultaneously.

<u>Remote Call Forwarding</u>	<u>Monthly Rate</u>
Per initial call path	\$21.50
Per additional call path	\$21.50

- d. The following measured rate is in addition to the monthly rate when the central office which forwards the calls and the terminating number are in the same local calling area. Calls terminating to a number outside the local calling area will be billed the monthly rate plus the applicable toll rate.
 - 1) Measured rates – UNITED ONLY
Per minute of use \$.03
- e. Service charges as shown in Section A4 of this tariff apply as follows:
 - 1) For the initial or subsequent installation of RCF a Primary Service Order Charge shall apply.
 - 2) To change the number at the RCF location, the number for the terminating location or both numbers on the same order, a Secondary Service Order Charge shall apply.

5. Billing Breakdown Charge

a. General

- 1) A Billing Breakdown describes the products and services being charged on the local monthly bill. The breakdown reflects the customer billing name, telephone number and address. It provides the local service offering name and description of the product or service, including the quantity and rate of the product or service.
- 2) A Billing Breakdown Charge is applicable whenever a subscriber, or authorized agent of the subscriber, requests a breakdown of the billing record.
- 3) The Billing Breakdown will be provided only to the customer of record, regardless of whether the request is received from the actual subscriber or an authorized agent of the subscriber.
- 4) The Billing Breakdown Charge will be applied per billing number.
- 5) The Billing Breakdown Charge is not eligible for employee concession.

MISCELLANEOUS SERVICE ARRANGEMENTS

L. CALL SCREENING SERVICES

1. Residence and Business Operator Screening - United Telephone Exchanges Only
 - a. Operator screening enables a single line residence customer, business customer, or PATS provider subscribing to the flat rate option, by means of telephone company operator identification, to restrict outgoing telephone calls from station users to only those calls which are placed as credit card, third party billed or collect to the called telephone. This applies to all 0+ and 0- calls as specified following. Operator Screening for PBX trunks is located in Section A11 of this tariff.
 - b. All calls to Company numbers such as Repair Service, Directory Assistance and Public Emergency Service numbers (911) will be permitted from the originating station unless the customer also subscribes to specific Custom Code Restrictions.
 - c. Operator Screening is limited to those areas served by central offices arranged for this service and is subject to the availability of facilities at rates following.

MISCELLANEOUS SERVICE ARRANGEMENTS

L. CALL SCREENING SERVICES (Cont'd)

1. Residence and Business Operator Screening -
United Telephone Exchanges Only (Cont'd)
 - d. Operator Screening is provided for intraLATA calling through Company operators. Screening for interLATA calling is the responsibility of the interLATA carriers who choose to acknowledge the network screening signals passed to them.
 - e. The Company will not be responsible for screening calls placed by the caller which are not routed through a Company operator. Calls routed through Alternate Operator Services cannot be screened by the Company.
 - f. Rates and Charges
 - 1) Operator Screening, per line, per month \$4.00
 - 2) Service Ordering Charges in Section A4 are also applicable.
2. Billed Number Screening - United Telephone Exchanges Only
 - a. General
 - 1) Billed Number Screening is a service which, through Operator Screening, prevents third number and collect calls from being billed to a telephone line.
 - 2) Billed Number Screening is available to all classes of residence and single line business services, and PATS providers subscribing to the flat rate option, which utilize the public switched network for long distance calling.

M. BLOCKING SERVICES

1. 976/900/N11
 - a. 976/900/N11 Blocking Service will provide a dialing restriction for all 1+900, 976, 1+976 and N11 calls placed from access lines so arranged for the Service.
 - b. 976/900/N11 Blocking Service is available to basic exchange customers with single-party residence service, business service, PATS service and PBX service.
 - c. Calls to 1+900, 976 and 1+976, and N11 from subscribers to this blocking service will be forwarded to a recorded announcement. It will be the responsibility of the subscriber to inform users of his/her services that these type calls cannot be reached for any reason.
 - d. This blocking service is furnished only from central offices which have been arranged to provide the service and it will be subject to the availability of services.
 - e. The Company shall not be liable to any person for damages of any kind or nature arising out of, resulting from, or in connection with the provision of this blocking service.
 - f. Per the Commission's Order No. 25252 in Docket No. 910060-TP, the Company will provide blocking of 976/900 calls at the customer's request at no charge. Blocking of N11 calls will also be provided at no charge.
 - g. When a customer refuses to pay a disputed 976/900/N11 call charge and the Company determines the charge is valid, the Company may implement 976/900/N11 Blocking Service on all the customer's lines at the same location at no charge.

b. Blocking/Screening Options (Cont'd)

- 7) Option G - Two-Way Service. Provides central office blocking of 976, 1+DDD, 1+900 calls and 011+ calls. Provides screening information to the operator to prevent operator assisted sent-paid calls from being billed to the line.
- 8) Option H¹ - Outward Only Service. Provides central office blocking of 976, 1+DDD, 1+900, and 011+ calls. Provides screening information to the operator to prevent operator assisted sent-paid calls from being billed to the line.

c. Rates

<u>Option</u>	<u>Monthly Rate</u>
1) Option C	\$3.50
2) Option C1	3.50
3) Option D	3.50
4) Option D1	3.50
5) Option E	3.50
6) Option F	3.50
7) Option G	3.50
8) Option H	3.50

d. Limitations/Requirements

- 1) Billed Number Screening (BNS) service as provided in Section A13.L. of this tariff is a mandatory service feature for central office blocking with Operator Screening Service - all options.
- 2) Operator Screening is provided for intraLATA calling through Company operators. Screening for interLATA calling is the responsibility of the interLATA carriers who choose to acknowledge the network screening signals passed to them by the Company.

Certain material now residing on this page was previously located in Section 13, First Revised Sheet 88.

Note 1: Options D, F, and H may only be provided for placement in correctional institutions, schools, hospitals, and other locations for which the Public Service Commission may grant a specific exemption.

M. BLOCKING SERVICES (Cont'd)

5. Third Party Block Service

a. General

Pursuant to Florida Public Service Commission Order No. PSC-00-1117-FOF-TP, issued June 19, 2000, the Company will offer a service that blocks the placing of monthly recurring charges on customers' telephone bills by third party service providers. This blocking service will give subscribers the ability to prevent unauthorized charges from appearing on their bill by not allowing third party service providers the capability to place monthly recurring charges on customers bills without proper verification.

SECTION A13
First Revised Sheet 88.1
Cancelling Original Sheet 88.1
Effective: March 1, 2001

MISCELLANEOUS SERVICE ARRANGEMENTS

M. BLOCKING SERVICES (Cont'd)

5. Third Party Block Service (Cont'd)

b. Regulations

- 1) The third party service provider may not submit charges to a customer's local exchange carrier without first obtaining a letter of authorization ("LOA") from an authorized individual for the telephone account.
- 2) The Company will not remove a third party service provider block without first calling the customer and obtaining his or her verbal approval.
- 3) Third party blocking is available to all customers at no monthly charge and no service connection charges apply for the installation of the third party block service.
- 4) Customers cannot block charges coming from their preferred local carrier, preferred intraLATA carrier, or preferred interLATA carrier. Customers may choose to block all third party service providers or may selectively block specific third party service providers.
- 5) The Company may not disconnect a customer's regulated local telephone service for non-payment of disputed third party charges.
- 6) Authorized casual billing of toll calls such as collect, third party and calls to a carrier's toll access number as well as authorized charges for directory advertising, are excluded from this blocking service. In addition, monthly recurring charges related to casual toll billing cannot be blocked (e.g., surcharges such as Universal Service Fund).

c. Limitations

- 1) The Company does not guarantee that by placing a bill block on the subscriber's account that unauthorized third party charges cannot be billed to the subscriber's account. The Company shall not be liable for any damages that may occur if unauthorized third party charges are billed to the subscriber as long as the Company has fully complied with the requirements specified in the Tariff.
- 2) Due to billing system limitations, charges from some third party service providers billed through billing aggregators or billing clearinghouses can only be blocked by blocking the billing aggregator or billing clearinghouse thereby effectively blocking all other third party service providers billing through that aggregator or clearinghouse.
- 3) Charges billed prior to the placement of a block may appear on subsequent customer bills because many such charges are billed in arrears.

MISCELLANEOUS SERVICE ARRANGEMENTS

M. BLOCKING SERVICES (Cont'd)

6. Toll and Casual Dialing Restriction Service

1. Description

- a. Where central office facilities permit, Toll and Casual Dialing Restriction prevents the completion of certain types of calls. Toll and Casual Dialing Restriction may be provided with individual line residence and business exchange services in exchanges equipped to program Toll and Casual Dialing Restriction without alteration of the central office equipment.

2. Terms and Conditions

- a. Toll and Casual Dialing Restriction Options 1 and 2 restrict access to 1+, 0+ 0-, and 00-, and restrict access to 01/011+ numbers outside of the North American Numbering Plan. Access to 900, 976, 500 and 700 numbers is also restricted in addition to Directory Assistance and the casual dialing of toll calls (by preceding the telephone number with 101XXXX+). Option 1 additionally restricts access to Toll Free Code numbers. Option 3 only restricts access to 01/011+ numbers outside of the North American Numbering Plan.
- b. Restriction of access to operator services prevents the customer from dialing an operator for all purposes, including emergencies, assistance and the placing of toll calls. Operator Services will not be accessible from a line with Toll and Casual Dialing Restriction Option 1 or 2. The customer indemnifies and saves harmless the Company from any and all claims, losses, or damages caused by restriction of access to operator services.
- c. Directory Assistance (411, 1411, 555-1212, 1-555-1212, or 1-NPA-555-1212) will not be accessible from a line with Toll and Casual Dialing Restriction Option 1 or 2.
- d. All local calls and non-chargeable calls to Company numbers (such as repair service) will be permitted.
- e. Where facilities allow, N11 (except 411) will only be restricted with Option 1 and 2 if the call terminates outside the local calling area or to a non-toll-free number.
- f. Toll and Casual Dialing Restriction does not restrict calls to 911 emergency reporting service or to 1+710 Government Emergency Telecommunications Service Calls.
- g. Customers are responsible for calls charged to their number via third number billing, collect or credit card.

N. SIMPLIFIED MESSAGE DESK INTERFACE (SMDI) SERVICE

1. General

- a. Simplified Message Desk Interface (SMDI) is a feature available to providers of voice messaging systems and secretarial in-dialing services. SMDI provides an integrated, automated interface for the transport of call-related information regarding the origin and destination of messages for end-user clients of voice messaging systems and secretarial in-dialing services.
- b. SMDI is provided on an intra office basis. Call-related information is passed to the provider's system via a data link from the SMDI central office to the provider's premises.
- c. SMDI provides the voice mail system and in-dialing service with the following information on intra office calls:
 - 1) called and calling numbers identification
 - 2) call forward reasons, i.e., no answer, busy
 - 3) a request to activate the client's message waiting indicator
- d. End-user clients who are subscribers to a voice messaging system or in-dialing service with SMDI are notified of messages by an audible message waiting indicator (stuttered dial tone).
- e. Queuing can be provided as an option to SMDI. Queue announcements are also available with either Company- or customer-provided recordings.

2. Regulations

- a. The system provider must subscribe to rotary service access lines from the same SMDI central office as the data link. The rotary service access lines are arranged for terminating traffic only.
- b. SMDI queuing is available as an optional feature on an intra office basis where available.
- c. Stuttered dial tone is included in each SMDI system at no additional charge.
- d. Optional queuing provides for one queued call for each incoming access line arranged for queuing.
 - 1) Queuing may include both an initial and a continued delay announcement.
 - 2) The queue announcements may be provided by the Company or the customer at the rates specified following.
- e. The system provider may subscribe to additional blocks of telephone numbers to serve as addresses for voice mail boxes at the rates for DID numbers in Section A16 of this tariff.
- f. The Company will not be a party to any controversies which may arise between the SMDI subscriber and the end-user client regarding the quality of service provided by the voice messaging system or the options which may or may not be selected by the SMDI subscriber.

MISCELLANEOUS SERVICE ARRANGEMENTS

P. TELECOMMUNICATIONS SERVICE PRIORITY (TSP) SERVICE

1. General

- a. The Telecommunications Service Priority (TSP) System was developed to satisfy the requirements of the National Communications System (NCS) of the federal government and provides the regulatory, administrative and operational procedures authorizing the priority installation and/or priority restoration of National Security Emergency Preparedness (NSEP) telecommunications services. TSP applies only to NSEP telecommunications services and authorizes the Company to take priority action in the provision and restoration of such services. Installation and/or restoration of services not receiving TSP designation which affect public health and safety will be provisioned and maintained in accordance with Rule 25-4.070(4), Florida Administrative Code.
- b. Priority installation and/or priority restoration of NSEP telecommunications services shall be provided in accordance with Part 64.401, Appendix A, of the Federal Communications Commission's (FCC's) Rules and Regulations, and in accordance with the guidelines set forth in the TSP System for NSEP Service Vendor Handbook (NCS Handbook 3-1-2), dated July 11, 1989.
- c. The customer requesting TSP service must be the same customer for which the associated telecommunications service is provided.

Cancelling Original Sheet 94
Effective: January 1, 1997

MISCELLANEOUS SERVICE ARRANGEMENTS

P. TELECOMMUNICATIONS SERVICE PRIORITY (TSP) SERVICE (Cont'd)

1. General (Cont'd)

- d. Certain conditions may require that one or more customer services with a lower or no restoration priority be preempted in order to install or restore NSEP telecommunications service(s) of a higher priority. When such preemption is necessary, the Company will make every reasonable effort to notify the preempted customer of the action to be taken. Credit allowances for such service preemption shall be made according to the provisions set forth in A2 preceding.
- e. In obtaining TSP, the customer authorizes the Company to provide certain customer record information to the manager, NCS, of the federal government so that the government can maintain and administer its TSP system. This customer record information will include only the customer's name, TSP authorization code, Company circuit ID, customer telephone number and customer mailing address.
- f. In order to provide priority restoration service in compliance with Part 64.401, Appendix A, of the FCC's rules and regulations, the Company may be unable to notify the customer in advance where additional labor charges apply, as set forth in A2 preceding, before the required additional labor is undertaken. The customer, in obtaining a restoration priority, recognizes that quoting charges and obtaining permission to proceed with the restoration of certain telecommunications services will cause unnecessary delays and, as a result, would be contrary to the aforementioned Rules and Regulations.

Changing from one type of service to another type of service is considered as a disconnect and a new connect and not an inside move.

T. HOT LINE SERVICE (HLS) (CENTRAL TELEPHONE EXCHANGES ONLY)

1. General

a. HLS is a central office arrangement whereby a prearranged local or toll number is automatically dialed when the calling party's instrument receiver is taken off-hook. The arrangement is a feature available with Business one-party local exchange service.

b. HLS will be provided under the following conditions:

- 1) Service is offered subject to availability of suitable facilities in central offices equipped with this feature.
- 2) Service is not offered where the station at which calls will be answered is a coin telephone.

T. HOT LINE SERVICE (HLS) - CENTRAL TELEPHONE EXCHANGES ONLY (Cont'd)

I. General (Cont'd)

- 3) Service for the local exchange access line associated with this feature will be non-published.
- 4) Local exchange access lines arranged with this feature will be taken with the understanding that absolutely no other calls can be originated by the associated station except to the prearranged number.
- 5) Exchange access lines associated with HLS are also capable of receiving calls, the charges for which are the full responsibility of the customer.
- 6) HLS is provided on the condition that the customer subscribes to sufficient arrangements and terminating telephone numbers to adequately handle calls from the HLS-arranged line without interfering with or impairing any service offered by the Telephone Company. If in the opinion of the Telephone Company additional arrangements or terminating telephone numbers are required, the customer will be responsible for subscribing to such additional arrangements or terminating telephone numbers or the HLS feature shall be subject to termination.

MISCELLANEOUS SERVICE ARRANGEMENTS

U. TOLL TERMINAL SERVICE - CENTRAL TELEPHONE EXCHANGES ONLY

1. General

- a. Toll Terminal Service consists of Company facilities specifically arranged to complete only outward long distance toll calls. The Company will provide either of the following pre-arranged Toll Terminal Services.
 - 1) Wholly Operator Assisted - on each and every call (whether "0+, 0-, or 1+") an operator will enter the call process to obtain pertinent billing information from the caller, and then complete the call.
 - 2) Operator Assisted, with Direct Distance Dialing Option either of two general types of calls may be placed over this type of service:
 - a) Operator Assisted - Calls will be directed to a Company Operator (via "0+ or 0-" dialing) who will enter the call process to obtain pertinent billing information from the caller, and then complete the call, or
 - b) Direct Distance Dialing (DDD) Option - Calls will be completed and billed at sent-paid, station-to- station rates where the customer allows guests or others to dial DDD (via 1 + 7 or 10 digits) on toll calls.
- b. Toll terminals may not be used for completing incoming calls or outgoing local exchange calls.

W. EXTENSION LINE MILEAGE - United Telephone Exchanges Only

1. General

- a. Where extension lines are provided at other than the same building as the main access line, and for other circuit extensions of similar character, extension line mileage charges are applicable, in addition to the basic rates applicable to the particular service against which mileage charges are assessed.
- b. Where, for the purpose of furnishing extension lines, it is necessary to lay underground conduit or to set poles on the subscriber's premises, the subscriber may be required to provide and install such underground conduit and to provide and erect such poles, or the Company will do the work at the subscriber's expense. Where the work is performed by the subscriber, it must be in accordance with the standard specifications of the Company.
- c. When it is known or realized that the life of all or part of the outside circuit extensions will be shorter than the normal life of the plant, or the cost of providing the plant is such as to render inadequate the mileage charges quoted herein, the plant required to furnish such service will be provided on the following basis:
 - 1) The subscriber may be required to pay construction and installation charges based upon the costs incurred in addition to mileage charges.

MISCELLANEOUS SERVICE ARRANGEMENTS

Y. PRIVACY ID

1. General

- a. Privacy ID provides Caller ID subscribers with the ability to identify unavailable, unknown, blocked and private numbers. Privacy ID intercepts all unidentified calls before the subscriber's telephone rings then asks the caller to state their name or company. Once the calling party has responded, the service rings the subscriber and announces the calling party's information. The subscriber has the option to accept the call, reject the call, play an announcement to the calling party or forward the call to voicemail.
- b. The Privacy ID subscriber may provide calling parties with a Caller's Access Code. Use of this access code allows the calling party to bypass Privacy ID.

2. Terms and Conditions

- a. Privacy ID is provided subject to availability of facilities.
- b. Privacy ID is not offered in conjunction with ISDN, Centrex, Payphone Line and PBX Service.
- c. When the Call Trace and Return Call features are activated on calls intercepted by Privacy ID, the telephone number captured is that of the Service Node, which performs Privacy ID, not the telephone number of the calling party.
- d. Caller ID Service is required in order to subscribe to Privacy ID.

3. Rates and Charges

	<u>S&E Code</u>	<u>Monthly Rate</u>

Z. TALKING CALL WAITING

1. General

- a. Talking Call Waiting allows customers to know who is calling while they are on the telephone with another party. Talking Call Waiting enhances Call Waiting by allowing the customer to hear who is calling after hearing the call waiting tone while the customer is on the line. Any and all names will be voiced to the subscriber. This includes "private" or "unavailable" to be voiced in the appropriate situation. Talking Call Waiting Service subscribers will hear both a call waiting tone plus the name of the calling party on an incoming call. The customer then presses the switch hook or flash button to place the current call on hold and talk to the call waiting party.

2. Terms and Conditions

- a. Talking Call Waiting is provided subject to availability of facilities.
- b. Talking Call Waiting is available on a monthly subscription basis. This service requires no additional adjunct or telephone display equipment.
- c. Talking Call Waiting is available to single-line business and residence customers.
- d. Talking Call Waiting is not offered in conjunction with Centrex, DID, PBX, ISDN, Pay Telephone Service or Coin Line Service.
- e. A Call Waiting Custom Calling Feature, including but not limited to, Call Waiting Service, Enhanced Call Waiting, Call Waiting Options or any package containing the Call Waiting feature, is required in order to subscribe to Talking Call Waiting Service.

3. Rates and Charges

- a. Service charges and monthly rates for exchange access lines and other services with which this service is associated apply, as appropriate.

Monthly Rate

Per Residence Line	\$2.95
Per Business Line	\$2.95

- b. Sprint Talking Call Waiting is available as an add-on to Package 5, Package 7, Ideal Solution, Sure Solution II, Sprint Home II Solution and Progressive Plan. The monthly recurring charge is \$2.00 for Residence or Business.

AUXILIARY EQUIPMENT

A. TELECOMMUNICATIONS DEVICES (TDD's), HANDSETS AND SIGNALING EQUIPMENT FOR THE HEARING IMPAIRED

1. General

- a. A telecommunications device (TDD) is a portable unit which permits a hearing impaired individual to communicate over the telephone network with other persons using compatible equipment. Handsets and signaling equipment provided in this section is of special design for use by the hearing impaired and for the most part is portable in nature.
- b. TDD units and other items are available for purchase or lease as specified below and at the rates shown in 2. following.
 - 1) Purchase - a one-time payment. The customer is responsible for all maintenance and repairs. Manufacturer's warranty, if any, applies.
 - a) Cash in full at time of purchase.
 - b) To qualifying customers, payment in full when billed on the customer's telephone bill.
 - 2) Installment Plan - Payment on an installment basis as established for a specific product in Rates following. The customer is responsible for all maintenance and repairs. Manufacturer's warranty, if any, applies.

CONNECTIONS OF CUSTOMER-PROVIDED TERMINAL
EQUIPMENT AND COMMUNICATIONS SYSTEMS

A. REGULATIONS

1. General Provisions

a. General

Terminal equipment and communications systems provided by the customer may be connected at the customer's premises to telecommunications services furnished by the Company where such connections are made in accordance with the provisions of this section. Telecommunications services as used herein include exchange service, Long Distance Message Telecommunications Service (LDMTS), and Wide Area Telecommunications Service (WATS).

b. Responsibility of the Customer

- 1) The customer shall be responsible for the installation, operation, and maintenance of any customer-provided terminal equipment or communications systems. No combination of customer-provided terminal equipment or communications systems shall require change in or alteration of the equipment or services of the Company, cause electrical hazards to Company personnel, damage to Company equipment, malfunction of Company billing equipment, or degradation of service to persons other than the user of the subject terminal equipment or communications system, his calling or called party. Upon notice from the Company that a customer-provided terminal equipment or communications system is causing such hazard, damage, malfunction, or degradation of service, the customer shall make such changes as shall be necessary to remove or prevent such hazard, damage, malfunction, or degradation of service.

b. Responsibility of the Customer (Cont'd)

- 2) The customer shall be responsible for the payment of a Trouble Location Charge as covered in Section A4 of this tariff, for visits by a Company employee to the customer's premises when a service difficulty or trouble report results from the use of customer-provided terminal equipment or communications system.

c. Responsibility of the Company

- 1) Telecommunications services are not represented as adapted to the use of customer-provided terminal equipment or communications systems. Where customer-provided terminal equipment or communications systems are used with telecommunications services, the responsibility of the Company shall be limited to the furnishing of service components suitable for telecommunications services and to the maintenance and operation of service components in a manner proper for such services. Subject to this responsibility the Company shall not be responsible for (1) the through transmission of signals generated by the Customer-provided terminal equipment or communications systems or for the quality of, or defects in, such transmission, or (2) the reception of signals by customer-provided terminal equipment or communications systems, or (3) address signaling where such signaling is performed by customer-provided signaling equipment.

1. General Provisions (Cont'd)

c. Responsibility of the Company (Cont'd)

- 2) The Company will, at the customer's request, provide information concerning interface parameters, including the number of ringers which may be connected to a particular telephone line, needed to permit customer-provided terminal equipment to operate in a manner compatible with telecommunications services.
- 3) The Company may make changes in its telecommunications services, equipment, operations or procedures, where such action is consistent with Part 68 of the Federal Communications Commission's Rules and Regulations. If such changes can be reasonably expected to render any customer's terminal equipment or communications system incompatible with telecommunications services, or require modification or alteration of such customer-provided terminal equipment or communications systems, or otherwise materially affect its use or performance, the customer will be given adequate notice, in writing, to allow the customer an opportunity to maintain uninterrupted service.

A. REGULATIONS (Cont'd)

1. General Provisions (Cont'd)

d. Recording of Telephone Conversations

Telecommunications services furnished by the Company are not represented as adapted to the recording of telephone conversations. However, when customer-provided voice recording equipment is directly, acoustically or inductively connected with telecommunications services, the customer-provided voice recording equipment shall be so arranged that at the will of the user, it can be activated or deactivated. In addition, the following condition must apply.

- 1) All parties to the telephone conversation must give their prior consent to the recording of the conversation and the prior consent must be obtained in writing or be part of, and obtained at the start of the recording.
- 2) Requirements for the condition as specified in 1.d.1) preceding are not required:
 - a) When used by a Federal Communications Commission licensed broadcast station customer for recording of telephone conversations solely for broadcast over the air.

3) Grandfathered Connections of Communications Systems

Subject to the provisions of 1)a)(1) and (2) preceding, customer-provided communications systems may be connected at the customer's premises to telecommunications services in accordance with the following:

- a) Such telecommunications service or customer-provided communications system is utilized for the origination or termination of communications at the customer's premises where the connection is made.
- b) The connection shall be through a network control signaling unit and connecting arrangement furnished by the Company.
- c) The provisions relating to minimum protection criteria set forth in c. following shall apply to the connection of customer-provided communications systems. As related to minimum protection criteria and when applied to the connection of customer-provided communications systems, the term "Customer's Premises" shall include any premises on which the customer-provided communications system is terminated.

CONNECTIONS OF CUSTOMER-PROVIDED TERMINAL
EQUIPMENT AND COMMUNICATIONS SYSTEMS

A. REGULATIONS (Cont'd)

3. Connections of Grandfathered Terminal Equipment and Grandfathered Communications Systems (Cont'd)

c. Minimum Protection Criteria for Electrical Connections

- 1) To prevent excessive noise and crosstalk in the network, it is necessary that the power of the signal at the central office not exceed 12dB below one milliwatt when averaged over any three second interval. To insure that this limit is not exceeded, the power of the signal which may be applied by the customer-provided equipment to the Company interface located on the customer's premises will be specified for each customer location but in no case shall it exceed one milliwatt.
- 2) To protect other services, it is necessary that the signal which is applied by the customer-provided equipment to the Company interface located on the customer's premises meet the following limits:
 - a) The power in the band from 3,995 Hertz to 4,005 Hertz shall be at least 18dB below the power of the signal as specified in 1) above.
 - b) The power in the band from 4,005 to 10,000 Hertz shall not exceed 16dB below 1 milliwatt.
 - c) The power in the band from 10,000 Hertz to 25,000 Hertz shall not exceed 36dB below 1 milliwatt.

c. Minimum Protection Criteria for Electrical Connections' (Cont'd)

2) (Cont'd)

d) The power in the band from 25,000 Hertz to 40,000 Hertz shall not exceed 36dB below 1 milliwatt.

e) The power in the band above 40,000 Hertz shall not exceed 50dB below 1 milliwatt.

3) To prevent the interruption or disconnection of a call, or interference with network control signaling, it is necessary that the signal applied by the customer-provided equipment to the Company interface located on the customer's premises at no time have energy solely in the 2450 to 2750 Hertz band. If signal power is in the 2450 to 2750 Hertz band, it must not exceed the power present at the same time in the 800 to 2450 Hertz band.

d. Connections Under Certification Programs

Equipment that was connected under the following programs is also considered grandfathered as of their expiration date:

1) Attestation Program, which expired July 1, 1980.

2) Conformance Program, which expired July 1, 1979.

Effective: January 1, 1997

CONNECTIONS OF CUSTOMER-PROVIDED TERMINAL
EQUIPMENT AND COMMUNICATIONS SYSTEMS

A. REGULATIONS (Cont'd)

4. Acoustic or Inductive Connections

a. General

- 1) Customer-provided voice or data terminal equipment (including telephotograph equipment) and customer-provided communications systems may be acoustically or inductively connected at the customer's premises to the telecommunications network provided the acoustic or inductive connection is made externally to the network control signaling unit when such unit is provided by the Company.
- 2) Customer-provided tone-type address signaling is permitted through such connections, however, the services of the Company are not designed for such use and the Company makes no representation as to the reliability of address signaling which is performed in such manner.

b. Minimum Protection Criteria

- 1) To prevent excessive noise and crosstalk in the network, it is necessary that the power of the signal which is applied by the customer-provided equipment to the network control signaling unit, located on the customer's premises, be limited so that the signal power at the output of the network control signaling unit (i.e., at the input to the Company line) does not exceed 9dB below 1 milliwatt when averaged over any 3 second interval.

A. REGULATIONS (Cont'd)

4. Acoustic or Inductive Connections (Cont'd)

b. Minimum Protection Criteria (Cont'd)

1) (Cont'd)

However, to permit each customer, independent of distance from the central office to supply signal power which at the central office approximates 12dB below 1 milliwatt when averaged over any 3 second interval, the Company, at the customer's request, will specify, for each customer location, the signal power at the output of the network control signaling unit, which in no case exceed 1 milliwatt.

2) To protect other services, it is necessary that the signal which is applied by the customer-provided equipment to the network control signaling unit located on the Customer's premises meet the following limits at the output of the network control signaling unit:

- a) The power in the band from 3,995 Hertz to 4,005 Hertz shall be at least 18dB below the power of the signal as specified in 1) preceding.
- b) The power in the band from 4,005 Hertz to 10,000 Hertz shall not exceed 16dB below 1 milliwatt.
- c) The power in the band from 10,000 Hertz to 25,000 Hertz shall not exceed 24dB below 1 milliwatt.

PRIVATE BRANCH EXCHANGE SERVICE

A. DIRECT INWARD DIALING (DID) SERVICE

1. General

- a. DID service permits calls incoming to Customer Premises Equipment requiring outpulsing of digits from the network to reach a specific station line without the assistance of an attendant. DID service is provided subject to the availability of facilities and telephone numbers and other conditions as specified in Section A2, General Regulations and Section A15, Connections Of Customer-Provided Terminal Equipment And Communications Systems, of this tariff.
- b. The rates specified herein are in addition to the rates shown elsewhere in the tariff for the services with which this offering is associated (e.g., central office PBX Trunks, ISDN-PRI Service, Shared Tenant Service, Digital Trunking Service, etc.).
- c. DID service includes central office switching equipment necessary for in-dialing from the network directly to stations associated with customer premises switching equipment. Subscribers to DID service will be required to maintain an adequate number of trunks as determined by the Company in order to provide quality grade of service and prevent network degradation.
- d. The service must be provided on all lines in a trunk group arranged for inward service. Where DID is required on more than one group of trunks or central office lines, each such group shall be considered as a separate DID service.
- e. The assignment of telephone numbers and the sequence of the numbers assigned to a DID service is made at the discretion of the Company. Where the equipment configuration requires the assignment of blocks of telephone numbers or where the customer requests additional blocks of telephone numbers held in reserve for future use, rates and charges as shown in Section A16.A.2.a)1)(b) are applicable for each unused block of telephone numbers.
- f. The rates herein contemplate the use of standard Company equipment and serving arrangements. When equipment or service of a special type arrangement is requested and provided, rates and charges are based on the costs involved to meet the individual requirements of each case.
- g. Operational characteristics of interface signals between the Company-provided connecting arrangements and the customer-provided switching equipment must conform to the rules and regulations the Company considers necessary to maintain proper standards of service.

PRIVATE BRANCH EXCHANGE SERVICE

A. DIRECT INWARD DIALING (DID) SERVICE (Cont'd)

1. General (Cont'd)

- h. The Company shall not be responsible to the customer or authorized user if changes in protection criteria or in any of the facilities, operations, or procedures of the Company render any of the facilities provided by a customer or authorized user obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance.
- i. Directory listings will be provided in accordance with the regulations of Section A6, Directory Listings, of this tariff for PBX Trunks. DID numbers furnished herein are not entitled to directory listings without charge. Where clients of a subscriber to DID service have no local exchange service but want to list one of these numbers, Interconnection of Local Exchange Services to Shared Tenant Services in Section A26, of this tariff will be applicable.
- j. All switching systems must be arranged by the customer to provide for the intercepting of assigned but unused station numbers.
- k. At the customer's request and at the discretion of the Company, subject to operating limits and the availability of facilities, DID service may be provided outside the customer's normal serving central office. Where a DID trunk group is served from a central office other than the customer's normal serving central office, the appropriate rates for Foreign Exchange service and Foreign Central Office service, per trunk will apply.
- l. In addition to the rates and charges specified in Section A16.A.2, appropriate Service Charges are applicable to the establishment or rearrangement of trunks and numbers in connection with providing DID service.
- m. Installation charges for DID central office switching equipment are not applicable if the customer presently subscribes to DID service and changes the type of customer premises switching equipment. The following provisions apply:
 - 1) The customer must maintain at least the same level of DID service requirements.
 - 2) The replacing customer premises equipment must be served by the same central office as the existing customer premises equipment.
 - 3) Central office switching equipment additions or modifications must not be required in order to provide DID service to the replacing customer premises switching equipment.
 - 4) Rates and charges are applicable to additional DID service requirements which exceed the customer's existing level of DID arrangements.

A. DIRECT INWARD DIALING (DID) SERVICE (Cont'd)

1. General (Cont'd)

- n. The removal of one or more numbers from a DID number block is offered subject to the availability of facilities at the charge specified in A16.A.2.a)1)(d) following. In such cases, the customer shall continue to pay the appropriate rate for the original block of DID numbers.

The re-instatement of one or more numbers to a DID number block is offered, subject to the availability of facilities, at the charge specified in A16.A.2.a)1)(e) following.

- o. A DID customer may reuse his DID numbers for non-DID purposes when the customer's DID service is disconnected. Rates and charges will be determined by the appropriate tariffs for the new services.
- p. In cases where a customer converts a larger block of numbers into one or more smaller blocks of numbers, or converts one or more smaller blocks of numbers into a larger block of numbers, it will constitute a disconnection and the appropriate installation charges will apply to establish the new number block(s). However, the customer may be required to accept different numbers from those in the original number block(s).
- q. Special steps are required for PBX customers to have 9-1-1 service features consistent with those provided to other end users in the same 9-1-1 service area. Automatic Number Identification, Automatic Location Identification and/or Selective Routing are only available through coordination with the governmental agency responsible for 9-1-1 service within the area served by the PBX in accordance with the provisions of Section A10, N11 Services, of this tariff.

B. CALL SCREENING SERVICES FOR PBX TRUNKS

1. Operator Screenings

- a. Operator Screening enables a customer, by means of telephone company operator identification, to restrict outgoing telephone calls from station users to only those calls which are placed as credit card, third party billed or collect to the called telephones. This applies to all 0+ and 0- calls as specified in d. And e. following.
- b. All calls to Company numbers such as Repair Service, Directory Assistance and Public Emergency Service numbers (911) will be permitted from the originating station.
- c. Operator Screening is limited to those areas served by central offices arranged for this service and is subject to the availability of facilities at rates as specified following.
- d. Operator Screening is provided for Company-provided intraLATA calling through Company operators. Screening for intraLATA and interLATA calling not carried by the Company is the responsibility of the intraLATA and interLATA carriers who chose to acknowledge the network screening signals passed to them.
- e. The Company will not be responsible for screening calls placed by the PBX customer which are not routed through a Company operator. Calls routed through Alternate Operator Services cannot be screened by the Company.

PERSONAL DIAL PAGING SERVICES

A. Definitions

1. Personal Dial Paging Service

A communication service which provides a paging signal originating at any dial telephone and carried over a radio channel to a miniature pocket radio receiver carried by a customer.

2. Mem-o-lert Deferred Paging

An optional feature of certain miniature pocket radio receivers which enables the customer to defer the paging signal (beep tone portion only) until a later time.

B. Service Limitations

Service is available only to pocket receivers equipped for service, when within range of a base station through which such service is furnished, subject to transmission, atmospheric and like limitations.

C. Service Areas

Personal dial paging service is offered only at the following locations where the service has been installed and is available:

Tallahassee, Florida
Fort Walton Beach, Florida

LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE

A. APPLICATION

This tariff applies to long distance message telecommunications service furnished or made available by the Company and its connecting companies between two or more points which are located in the same Local Access and Transport Area (LATA) within the State of Florida where the respective rate centers of such points also are located in said state.

B. GENERAL

1. Long distance message telecommunications service is that of furnishing facilities for communications between stations in different rate centers for either two-point or conference service.
2. Rates for service between points are based on airline mileage between rate centers. In general, each point is designated as a rate center except that certain small towns or communities are assigned adjacent rate centers with which they are closely associated for communications purposes or by community of interest. Airline mileages between rate centers are determined as proved in Section A18.C. following.
3. In case a shortage of facilities exists at any time, either for temporary or protracted periods, the establishment of long distance message telecommunications service shall take precedence over all others.

Director

SECTION A18
Second Revised Sheet 2
Cancelling First Revised Sheet 2
Effective: January 30, 1998

LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE

C. AIRLINE MILEAGE BETWEEN RATE CENTERS

1. General

- a. For the purposes of determining airline mileages vertical, and horizontal grid lines have been established across the State of Florida. The spacing between adjacent vertical grid lines and between horizontal grid lines represents a distance of one coordinate unit. This unit is the square root of 0.1, expressed in airline miles. A vertical (V) and horizontal (H) coordinate is computed for each rate center from its latitude and longitude location by use of appropriate map-projection equations. These rate centers and the V and H coordinates are shown in Section A18.C.3. A pair of V-H coordinates locates a rate center, for determining airline mileages, at a particular intersection of an established vertical grid line with an established horizontal grid line. The distance between any two rate centers is the airline mileage computed as explained in Section A18.C.2. following.
- b. The rate centers in this Tariff are listed alphabetically in Section A18.C.3. following, with columns headed "V" and "H" which contain the vertical and horizontal coordinates for each of these rate centers.

Director

SECTION A18
First Revised Sheet 3
Cancelling Original Sheet 3
Effective: January 1, 1997

LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE

C. AIRLINE MILEAGE BETWEEN RATE CENTERS (Cont'd)

2. Determination of Airline Mileages

a. To determine the rate distance between any two rate centers proceed as follows:

- 1) Obtain the V and H coordinates for each rate center.
- 2) Obtain the difference between the V coordinates of the two rate centers. Obtain the difference between the H coordinates.¹
- 3) Divide each of the differences obtained in Step 2) by three, rounding each quotient to the nearest integer.
- 4) Square these two integers and add the two squares. If the sum of the squares is greater than 1777, divide the integers obtained in Step 3) by three and repeat Step 4). Repeat this process until the sum of the squares obtained is less than 1778.

¹ The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.

Cancelling Original Sheet 4
Effective: January 1, 1997

LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE

C. AIRLINE MILEAGE BETWEEN RATE CENTERS (Cont'd)

2. Determination of Airline Mileages (Cont'd)

a. (Cont'd)

- 5) The number of successive divisions by three in Steps 3) and 4) determines the value of "N". Multiply the final sum of the two squares obtained in Step 4) by the multiplier specified in the following table for the value of "N" preceding.

<u>N</u>	<u>Multiplier</u>	<u>Minimum Rate Mileage</u>
1	0.9	-
2	8.1	41
3	72.9	121
4	656.1	361
5	5,904.9	1,081
6	53,144.1	3,241

- 6) Obtain the square root of the product in 5), and, with any resulting fraction, round up to the next higher integer. This is the message rate mileage except that when the mileage so obtained is less than the minimum rate mileage shown in 5) preceding, the minimum rate mileage corresponding to the "N" value is applicable.

a) Example:

1) City One	$\frac{V}{8539}$	$\frac{H}{0904}$
City Two	8246	0796
2) Difference	113	108

GENERAL EXCHANGE TARIFF

SECTION A18
Second Revised Sheet 5
Cancelling First Revised Sheet 5
Effective: January 30, 1998

LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE

C. AIRLINE MILEAGE BETWEEN RATE CENTERS (Cont'd)

2. Determination of Airline Mileages (Cont'd)

a. (Cont'd)

6. (Cont'd)

- b) Divide each difference by three and round to the nearest integer =

$$113 / 3 = 37.6, \text{ round to } 38$$

$$108 / 3 = 36$$

- c) Square integers and add $38 \times 38 = 1,444$

$$36 \times 38 = 1,296$$

$$2,740$$

- d) Sum of integers is greater than 1777, so divide integers obtained in Step 3) by 3 and repeat Step 4):

$$\text{Divide by 3: } 38 / 3 = 12.67, \text{ round to } 13$$

$$36 / 3 = 12$$

$$\text{Square: } 13 \times 13 = 169$$

$$12 \times 12 = \underline{144}$$

$$\text{Sum of squares: } 313$$

- e) The sum of the squared integers is now less than 1777 and was obtained after two successive divisions by 3; therefore, $N = 2$.

GENERAL EXCHANGE TARIFF

SECTION A18
Second Revised Sheet 6
Cancelling First Revised Sheet 6
Effective: January 30, 1998

LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE

C. AIRLINE MILEAGE BETWEEN RATE CENTERS (Cont'd)

2. Determination of Airline Mileages (Cont'd)

a. (Cont'd)

6) (Cont'd)

- f) Multiply the final sum of the squared integers by a factor of 8.1 (corresponding to N = 2).

$$\begin{array}{r} 313 \\ \times 8.1 \\ \hline 2535.3 \end{array}$$

- g) The square root of 2535.3 = 50.35, which is rounded up to 51 miles (fractional miles being considered full miles). The 51 miles is larger than the minimum of 41 rate miles applicable when N = 2, so the message rate mileage is 51 miles.

LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE

D. TWO-POINT SERVICE (Cont'd)

1. Service Between Land Wire Telephones (Cont'd)

c. Timing of Messages

- 1) The time when connection is established, as provided in Section A18.D.1.c 2) through Section A18.D.1.c 5) following, determined in accordance with the time - standard or daylight saving - observed at the location of the rate center of the calling station, determines what rate schedule applies. This rule applies whether the call is originated as paid or collect.
- 2) On Station-to-Station calls, chargeable time begins when connection is established between the calling station and the called telephone station, Miscellaneous Common Carrier mobile radio system or branch exchange system.
- 3) On Person-to-Person calls, chargeable time begins when connection is established between the calling person and the particular person or station specified or an agreed alternate.
- 4) Chargeable time ends when the calling station "hangs up" thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telephone network or by the operator.
- 5) Chargeable time does not include time lost because of faults or defects in the service.

d. Reversal of Charges

- 1) Collect calls are permissible for all telephone calls except calls to which Dial Station-to-Station rates apply.
- 2) The regularly established Operator Station-to-Station and Person-to-Person rates apply.

e. Collection of Charges at Coin Telephones

Charges for calls to be collected at the coin box telephones will be the total charge as provided in Section A18.D.1.h. following computed and rounded to the nearest multiple of \$.05.

f. Rates Applicable on Certain Holidays

On Christmas Day (December 25) and on New Year's Day (January 1), Independence Day (July 4), Thanksgiving Day and Labor Day the rate applicable is the Evening rate unless a lower rate would normally apply.

g. Rates for Hearing or Speech Impaired Persons

- 1) Rates for certain MTS calls are reduced for a customer who meets the following requirements:
 - a) The customer is certified to the Company as having a hearing or speech impairment that prevents telephone voice communication.

4. Business Sense Local Toll (Cont'd)

b. Regulations (Cont'd)

- 4) The service is furnished with two monthly minimum commitments levels: \$50 a month and \$200 a month. If the customer's in-service level falls below the commitment level, the Company reserves the right to bill the customer for the entire commitment level. For example, a customer that commits to a \$200 monthly minimum, but only spends \$175 in a given month, may be billed \$200 for the month.
- 5) The service is furnished with an option of three term periods: no-term (i.e., month-to-month), one year and two years. The minimum period for the non-term plan is one month. The minimum period for the one year plan is 12 consecutive months. The minimum period for the two year plan is 24 months. If a customer chooses to discontinue participation on the plan prior to the expiration of the one year or two year term periods, the Company reserves the right to assess Termination Liability charges. The assessed charges would be based on the number of months remaining in the term plan and the minimum monthly commitment level agreed to by the customer.
- 6) Changes to and from Business Sense Local Toll Service may be effective only on the subscriber's next bill date.
- 7) Business Sense Local Toll is not available to a customer who subscribes to any other Company-offered optional calling plan or for use with pay telephone service.

5. Enterprise Service

a. General

- 1) Enterprise service is an arrangement whereby charges for toll messages will be reversed to the called customer without specific request of the calling party. It is not available for calls to a pay telephone.
- 2) The Company assigns a special call number designation for the use of patrons in each exchange (or group of exchanges for which telephone directories have been merged into one alphabetical list) in which the service is to be furnished. One directory listing in the alphabetical section is provided without charge for each such exchange (or group of exchanges for which telephone directories have been merged into one alphabetical list). Additional directory listings are provided a charges shown in the "Directory Listings" section of this tariff.
- 3) Calls for the special number designation are accepted only on a station-to-station basis and when originated at telephones located in the exchange(s) to which the special number has been assigned. Only those toll calls placed by calling the special number are considered as coming within the scope of service.
- 4) Customers subscribing to Enterprise Service assume all charges for completed calls made to their special numbers.

LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE

D. TWO-POINT SERVICE (Cont'd)

9. Simply Five

a. General

- 1) The Company's Simply Five is an optional Intrastate IntraLATA long distance flat rated service with rates which are non-distance sensitive. Simply Five is available only to subscribers who have selected The Company as the subscriber's primary intraLATA long distance carrier. Simply Five is available to residence and business customers. Customers subscribing to Simply Five will be charged the rates listed in A18.D.9.d. following.

b. Regulations

- 1) Simply Five applies to all IntraLATA 1+ Direct Distance Dialed (DDD), Station-to-Station long distance messages originating in the Company's exchanges.
- 2) The service will be ordered and billed on a per primary billing number (i.e., per account) basis. All applicable calls placed from lines associated with the same primary billing number will be included in the service.
- 3) Message details are included in the charges specified in A18.D.9.d. following.

c. Applicability

- 1) The service is furnished for a minimum period of one month.
- 2) Simply Five is not available to a customer who subscribes to any other Company offered optional calling plan or for use with pay telephone service.

LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE

E. CONFERENCE SERVICE (United Telephone Only)

1. General

- a. Long distance message telecommunications conference service is that of furnishing connections between three or more land telephone numbers within the same LATA on one connection at the same time.
- b. Service is furnished where and to the extent that facilities permit.
- c. All stations on a conference connection may be so interconnected that each may communicate with all the others or arrangements may be made whereby one station will be the transmitting station and all others receiving stations.
- d. One class of service only is offered whether the call is to specified persons or specified stations.
- e. The Company, upon request, will attempt to arrange for the establishment of a conference call at a specified time.

2. Rate and Charge Application

- a. The initial period is one minute or any fraction thereof and the additional period is one minute or fraction thereof.
- b. Rate airline distances are determined as provided in Section A18.E following.

F. INTRALATA LONG DISTANCE VERIFICATION AND EMERGENCY INTERRUPT SERVICE

1. General

Verification and Emergency Interrupt Service is furnished where and to the extent that facilities permit. The customer shall indemnify and save the Company harmless against all claims that may arise from either party to the interrupted call or any person.

a. Verification

- 1) The Company furnishes Verification Service for the purpose of aiding subscribers with legitimate call completion problems. Upon request, the operator will verify and provide the line status condition of a subscriber line within the intraLATA calling area but outside the local calling area.
- 2) A subscriber-originated request for verification of an intraLATA long distance number other than an emergency agency number is a chargeable verification request if a Company operator determines that the line is in use. No charge applies if the line is out of order.

WIDE AREA TELECOMMUNICATIONS SERVICE

A. GENERAL

1. Wide Area Telecommunications Service (WATS) is the furnishing of facilities by the Company and, when applicable, an interLATA carrier for dial type telecommunications between a station associated with a WATS access line and stations using the public switched network within the State of Florida in accordance with the regulations and schedule of charges specified in this tariff and, when applicable, the tariff of the interLATA carrier. The WATS charges set forth in this tariff are in payment for the service furnished between the calling and called stations within Florida. For Combined Toll Free Code (TFC) Service the intraLATA and interLATA portions are only offered in combination with each other and may not be subscribed to separately. For Outward WATS, the intraLATA service may be subscribed to separately, or may be offered in combination with an interLATA WATS. For bi-jurisdictional WATS Access Line "1+" and "0" intraLATA usage, refer to D.1.e following.
 - a. The rates and charges specified herein for WATS provide for a WATS access line. The WATS access line consists of all Central Office line equipment and all outside plant facilities up to and including the Company provided Network Interface as defined in Section A1 of this tariff.
 - b. WATS access line extensions associated with an intraLATA WATS access line must be located within the same LATA as the WATS access line.¹ WATS access line extensions associated with an intraEAEA WATS access line must be located within the same EAEA² as the WATS access line.
 - c. Jack charges for Company provided jacks, other than the Network Interface used in association with WATS will be provided on a deregulated basis.

Note 1: Refer to the interLATA carrier's tariff for rates and charges applicable to WATS access line extensions terminated in a LATA other than the WATS access line.

Note 2: Refer to Section E10.2.2 of the Florida Access Service Tariff for the definition of EAEA.

SECTION A19
First Revised Sheet 2
Original Sheet 2
Effective: January 1, 1997

WIDE AREA TELECOMMUNICATIONS SERVICE

A. GENERAL (Cont'd)

2. Dial type telecommunications as specified in Section A1 preceding, is a call dialed and completed from or to a WATS access line without the assistance of a Company Operator, except that a Company operator will reestablish a call which has been interrupted after the called number has been reached.
3. Each WATS access line will be arranged at the customer's option for either outward WATS or TFC service but not for both, subject to the provisions and regulations outlined herein and in Section A2 of this tariff.
4. WATS arranged for statewide¹ or combined outward service provides for the origination of calls from a station associated with WATS for telecommunications with stations within this State by way of the WATS access line and the public switched network.
5. WATS arranged for intraLATA only outward service provides for the origination of calls from a station associated with WATS for telecommunications with stations within the same LATA within Florida by way of the WATS access line and the public switched network.
6. WATS arranged for intraEAEA only outward service provides for the origination of calls from a station associated with WATS for telecommunications with stations within the same EAEA within Florida by way of the WATS access line and the public switched network.
7. WATS arranged for interLATA only outward service provides for the origination of calls from a station associated with WATS for telecommunications with stations in a different LATA and the same state by way of the WATS access line and the public switched network.¹

Note 1: Refer to the interLATA carrier's tariff for rates applicable to interLATA usage. Refer to the statewide carrier's tariff for rates applicable to statewide usage.

By: F. B. Poag
Director

SECTION A19
First Revised Sheet 3
Original Sheet 3
Effective: January 1, 1997

WIDE AREA TELECOMMUNICATIONS SERVICE

A. GENERAL (Cont'd)

8. Combined intraLATA/interLATA TFC service provides for the termination of calls from stations within this State, for telecommunications with a station associated with a TFC service access line located within this State. The interLATA and statewide carrier's tariff should be referred to for rates applicable to interLATA usage.
9. WATS is furnished only if the necessary facilities are available in the offices technically capable of providing the service.
10. Combined outward WATS is furnished only in offices where the interLATA carrier has purchased appropriate Feature Groups C or D access facilities.
11. Directory Assistance Service for customers requesting telephone numbers of subscribers who are located outside their local calling area but within the same Number Plan Area is furnished under the provision of Section A18 of this tariff. Such calls will be included in the determination of WATS usage charges.
12. Service groups
 - a. The term "Service Group" as used in connection with outward WATS denotes one or more Outward WATS access lines for the same service area terminated in the same multi-line terminating system at the same premises.
 - B. The term "Service Group" as used in connection with TFC Service denotes the access lines arranged in Central Office equipment furnished by the Company as part of a given hunting arrangement.

SECTION A19
First Revised Sheet 4
Original Sheet 4
Effective: January 1, 1997

WIDE AREA TELECOMMUNICATIONS SERVICE

B. USE OF THE SERVICE

1. WATS is provided for use by the subscriber and may be used by others, when so authorized by the subscriber, providing that all such usage shall be subject to the provisions of this tariff.
2. Orders, including installation, rearrangements, or discontinuance of service, will be accepted by the Company only from the customer.
3. Resale or shared use of WATS is permitted. Exchange access to such resold or shared services will be provided via business exchange service at rates and charges for flat rate PBX trunks as specified in Section A3 of this tariff. Entities reselling intrastate WATS are required to obtain a Certificate of Public Convenience and Necessity from the Florida Public Service Commission.
4. The service is furnished subject to the condition that all applicable regulations stipulated in Section A2 of this tariff will be adhered to and that there will be no abuse or fraudulent use of the service. Abuse or fraudulent use of the service includes:
 - a. The placing or acceptance of a WATS call by a WATS subscriber, his agent, employee, or representative, in response to an uncompleted long distance call which was not completed in order to transmit or receive intelligence without payment of the applicable long distance charge.
 - b. The obtaining, or attempting to obtain, or assisting another to obtain, or to attempt to obtain, WATS by arranging, tampering with, or making connection with any facilities of the Company, or by any trick, scheme, false representation, or false credit device, or by or through any other fraudulent means or device whatsoever, with intent to avoid the payment, in whole or in part, of the regular charge for such service.

B. USE OF THE SERVICE (Cont'd)

5. WATS is available for use with customer-provided data transmitting and receiving equipment, including telewriter equipment, and teletypewriter equipment for the transmission and reception of data signals.
6. TFC service facilities are available for use with Public Announcement Services and are subject to the provisions and regulations outlined herein and in Section A2 of this tariff.

C. LIMITATION OF SERVICE

1. WATS does not include person-to-person, collect, conference, or other calls requiring operator handling except as provided in A.2. preceding.
2. WATS is not represented as adapted for connection to other services of the Company. This service contemplates the provision of satisfactory transmission only between the access line and the called or calling station.
3. Extensions from WATS access lines are restricted to the use of the subscriber, his representatives and associates and are furnished only on the same or different premises of the same subscriber except that extensions from TFC service may be located on other than the subscriber's premises for the purpose of answering calls when the subscriber is not available at the main station and except that WATS access line extensions may be shared, provided those extension lines are located on the customer's premises.
4. Connection of WATS to other services is permitted on a switched basis only. No permanent connection between WATS and other service may be established. However, satisfactory transmission cannot be assured when the WATS access line is connected to other Company services or to customer-provided equipment or services.

Effective: January 1, 1997

WIDE AREA TELECOMMUNICATIONS SERVICE

C. LIMITATION OF SERVICE (Cont'd)

5. WATS may be terminated at a premises where telecommunications management functions are performed on behalf of the customer only if the customer has a requirement to communicate over the WATS line to or from premises of that customer located in the State of Florida. In such cases the premises where telecommunications management functions are performed will be considered a customers premises. WATS access lines and extensions will be terminated only at premises located within this State.
6. TFC service is furnished upon condition that the customer accepts and makes use of the terminations or connections provided in accordance with A.5. preceding, and that the customer obtain a sufficient number of access lines to prevent the percent of calls completed to calls attempted (including busy and unanswered calls) from falling below 50% for two consecutive months. Customers falling below the 50% level of completions will be required to subscribe to additional access lines to handle the incoming calls with at least a 50% completion level. Should the customer refuse to subscribe to these lines, the Company, without incurring any liability, may terminate the TFC service, provided that, in case of termination by mail or in person of the Company's intention to terminate the service for such cause.
7. Any arrangement permitting customer control of the number of calls completed to a TFC service access line is not permitted.

SECTION A19
First Revised Sheet 18
Original Sheet 18
Effective: January 1, 1997

WIDE AREA TELECOMMUNICATIONS SERVICE

D. RATES AND CHARGES (Cont'd)

3. Method of determining usage charges (Cont'd)

a. (Cont'd)

- 2) Determine the equivalent hours used for each rate period by applying the minimum average time requirement of 30 seconds (1 call x 30 seconds).
- 3) Determine the total actual hours used for each rate period for each service group, rounded to the nearest tenth (one decimal place).
- 4) Determine the total chargeable hours for each rate period for each service group. This is the greater of D.3.a.(2) or D.3.a.(3) preceding, rounded to the nearest tenth (one decimal place).
- 5) Determine the number of access lines, within each service group, in service during the month. Access lines in service for a fraction of a month are based on the number of days in service divided by 30 days. The result is rounded to the nearest hundredth (two decimal places). The same number of access lines is used for each rate period.
- 6) Determine the average usage for each rate period for each access line in each service group by dividing chargeable hours in D.3.a.(4) preceding by the number of access lines in D.3.a.(5) preceding.

First Revised Sheet 19
Original Sheet 19
Effective: January 1, 1997

WIDE AREA TELECOMMUNICATIONS SERVICE

D. RATES AND CHARGES (Cont'd)

3. Method of determining usage charges (Cont'd)

a. (Cont'd)

- 7) Determine the usage charge per rate period for each access line by multiplying the hourly rate in the appropriate taper(s) by the number of hours used in each taper and totaling these charges.^{1, 2}
- 8) Determine the total usage charge for each rate period for each service group by multiplying the usage charge per rate period in D.3.a.(7) preceding by the number of access lines in D.3.a.(5) preceding.
- 9) Determine the total usage charge in a service group for all rate periods by adding the results from each rate period in D.3.a.(8) preceding.

4. Fractional Periods

- a. The charges for a fractional part of a month will be a proportionate part of the monthly recurring charge based on the actual number of days the service is provided plus the usage charges applicable for that month.

Note 1: If the subscriber had service for a fraction of a month, the usage charge applicable will be the actual usage charge divided by 30 days times the number of days of service.

Note 2: To the preceding usage charge must be added the appropriate monthly WATS access line charge as specified in D.3.a. preceding to arrive at the total minimum charge.

Cancelling Original Sheet 33
Effective: January 1, 1997

WIDE AREA TELECOMMUNICATIONS SERVICE

D. RATES AND CHARGES (Cont'd)

11. Allowance for Interruptions (Cont'd)

Allowance for interruptions applies to each WATS access line as set forth in 1 - 6 following.
(Cont'd)

b. (Cont'd)

2) (Cont'd)

b) Interruption over 24 hours

Credit will be allowed in one day multiples for each two hour period of interruption, not to exceed one full day's credit for any period of 24 hours.

3) For the purpose of determining the amount of the above credit allowances, every month is considered to have 30 days.

a) None of the above credit allowances will be made for:

(1) Non-completion of WATS messages due to busy network conditions.

(2) Interruption of service due to customer provided equipment or systems.

(3) Interruption of service due to negligence of the customer.

(4) Interruption of service during any period in which the Company is not afforded access to the premises at which the WATS access line is terminated.

WIDE AREA TELECOMMUNICATIONS SERVICE

D. RATES AND CHARGES (Cont'd)

11. Allowance for Interruptions (Cont'd)

Allowance for interruptions applies to each WATS access line as set forth in 1 - 6 following.
(Cont'd)

b. (Cont'd)

3) (Cont'd)

a) (Cont'd)

(5) Interruption of service during any period when the customer has released the WATS access line to the Company for maintenance purposes, or implementation of a customer order for a change in service arrangement.

b) Long distance message telecommunications service furnished at a customer's request, when his WATS is interrupted, is charged for at the long distance telecommunications rates.

12. Timing of Calls

a. Chargeable time begins when connection is established between a station associated with the WATS access line and the calling or called station, and ends when the calling station "hangs up" thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released by automatic timing equipment in the telephone network.

b. When a connection is established in one rate period and ends in another, the rate in effect for each rate period applies to the portion of the connection occurring during that rate period.

Second Revised Sheet 35
Cancelling First Revised Sheet 35
Effective: May 29, 1997

WIDE AREA TELECOMMUNICATIONS SERVICE

D. RATES AND CHARGES (Cont'd)

12. Timing of Calls (Cont'd)

- c. The rate charged is determined by the day and time (standard or daylight savings) at the WATS access line location.
- d. When TFC service is directly connected (i.e., not connected through a Multiline Terminating System) at a customer's premises to a communications system, chargeable time begins when the TFC service call terminates in or passes through the first multiline terminating system or terminal equipment on that communications system. It is the Customer's responsibility to furnish appropriate answer supervision to the point of connection with the TFC service so that chargeable time may begin.

13. Directory Listing (TFC Service Only)

Directory listings are provided at rates applicable for additional business listings as covered in Section A6 of this tariff.

a. Directory Listing Charge (TFC service)

	<u>Monthly Rate</u>
<u>United Telephone</u> each directory listing	\$-
<u>Central Telephone</u> each directory listing	\$1.25

WIDE AREA TELECOMMUNICATIONS SERVICE

E. Opportunity 800 Service (UNITED TELEPHONE EXCHANGES ONLY) (Cont'd)

1. Description

- a. Opportunity 800 Service is a common line termination service that provides, where facilities are available, for the termination of intraLATA TFC calls on residence and business local exchange access lines.
- b. Opportunity 800 Service provides reverse charge dial-type telecommunications to a local exchange access line arranged for Opportunity 800 Service from other stations within the customer's LATA using the public switched network.
- c. Opportunity 800 Service may be established on a new or existing local exchange access line.

2. Regulations

- a. The Opportunity 800 Service customer is furnished with a TFC service number to be associated with an individual line or trunk. Opportunity 800 Service is not an access line.
- b. Opportunity 800 Service terminating on common line is subject to the regulations of local exchange access lines as specified elsewhere in this tariff.
- c. An Opportunity 800 Service subscriber may not have more than one TFC telephone number terminating on the same local exchange telephone number.
- d. Opportunity 800 Service is furnished subject to the availability of the service.
- e. Opportunity 800 Service is not available on pay telephone or remote call forwarding services.
- f. Opportunity 800 Service provides for termination of calls only.

Cancelling First Revised Sheet 37
Effective: May 29, 1997

WIDE AREA TELECOMMUNICATIONS SERVICE

E. OPPORTUNITY 800 SERVICE (UNITED TELEPHONE EXCHANGES ONLY) (Cont'd)

2. Regulations (Cont'd)

- g. Opportunity 800 Service calls must be dialed and completed without the assistance of a Company operator except when the facilities or conditions do not allow for a customer dialed call completion or to reestablish a bad connection. Person-to-person, collect, conference, or other calls requiring operator handling are not permitted to be completed to the Opportunity 800 Service telephone number.
- h. An Opportunity 800 Service call must originate and terminate within the same LATA.
- i. Opportunity 800 Service can be provided to a customer by the Company on a complementary basis with an Interexchange Carrier (IXC) in order to furnish a statewide or national TFC service. The rates and charges for the TFC number(s) and intraLATA usage are billed as specified herein. All interLATA usage is subject to the rates and charges specified in the tariff of the IXC.
- j. Connection of Opportunity 800 Service to other services is permitted on a switched basis only. No permanent connection between Opportunity 800 Service and other services may be established.
- k. An Opportunity 800 Service customer must subscribe to and make use of a sufficient number of exchange access lines so that use of the service does not interfere with another customer's service or proper operation of the public switched network as described in C.6. preceding.
- l. Opportunity 800 Service directory listings are provided at rates applicable for additional listings as covered in Section A6 of this tariff.

Cancelling First Revised Sheet 38
Effective: May 29, 1997

WIDE AREA TELECOMMUNICATIONS SERVICE

E. OPPORTUNITY 800 SERVICE (UNITED TELEPHONE EXCHANGES ONLY) (Cont'd)

2. Regulations(Cont'd)

- m. All rules and regulations applicable for the class of service with which Opportunity 800 Service is associated will be specified in this and other sections of this tariff.
- n. In the provisioning of Opportunity 800 Service, the Company will be the responsible organization (RESPORG). The Company will require the ten-digit POTS number for intraLATA screening.
 - 1) The RESPORG provides for the assignment and administration of ten-digit TFC number(s), i.e., TFC+NXX+XXX, to the Opportunity 800 Service customer. As the RESPORG, the Company will select the TFC number(s) to be assigned to the customer unless the customer requests a specific TFC number. If the requested number is available, the Company will make a reasonable effort to comply with the customer's request for a specific TFC number in accordance with the Number Administration Service Center guidelines.
 - 2) The RESPORG will not reserve TFC numbers for customers that will not be activated within a one month period.
 - 3) The Company will assign TFC numbers on a first come, first serve basis. The Company will not be party to or take part in controversies between Opportunity 800 Service customers regarding the assignment of specific TFC numbers.

3. Rates and Charges

- a. Monthly Opportunity 800 Service usage rates are based upon the total number of minutes of use according to a discounted rate schedule (see Section A19.F.3.h.) There is no minimum usage requirement. There is no charge to the originator of the call.
- b. Total minutes of use for each Opportunity 800 Service customer will be rated at the per minute rate based upon the discounted rate schedule. Any remaining fractions of a minute will be rounded to the nearest tenth of a minute and will be rated based upon the percentage of a minute used multiplied by the per minute rate.
- c. The rate schedule requires a separate monthly charge for each TFC telephone number independent of usage.
- d. A service order charge, as covered in Section A4, will apply for each change or addition required as a result of Opportunity 800 Service.
- e. Chargeable time begins when a connection is established between an access line associated with Opportunity 800 Service and the calling access line.
- f. Chargeable time ends when the calling access line "hangs up" thereby releasing the network connection. If the called access line "hangs up" but the calling access line does not, chargeable time ends when the network connection is released by automatic timing equipment in the telecommunications network.

F. EXPEDITED ORDER CHARGE FOR WATS/TFC SERVICES (UNITED TELEPHONE EXCHANGES ONLY)

1. General

- a. If a customer desires that WATS or TFC Service be provided on an earlier date than that which has been established for the installation of the service, the customer may request that service be provided on an expedited basis. If the Company agrees to provide the service on an expedited basis, an Expedited Order Charge will apply.
- b. If the Company is subsequently unable to meet an agreed upon expedited service date, no Expedited Order Charge will apply unless the missed service date was caused by the customer.

SECTION A19
Second Revised Sheet 41
Cancelling First Revised Sheet 41
Effective: May 29, 1997

WIDE AREA TELECOMMUNICATIONS SERVICE

F. EXPEDITED ORDER CHARGE FOR WATS/TFC SERVICES (UNITED TELEPHONE EXCHANGES ONLY) (Cont'd)

1. General (Cont'd)

- c. If the Company receives a request for an expedited service date at the time a service order is placed, the Expedited Order Charge is calculated by summing all the nonrecurring charges associated with the provisioning of the service and then dividing this total by the number of days in the standard provisioning interval. The charge is then applied on a per day of improvement basis, per order.
- d. When the Company receives a request for expediting a pending order, the Expedited Order Charge is based on the extent to which the service order has been processed at the time the Company agrees to the service date improvement and is calculated as follows:
 - (1) Based on the critical dates associated with the provisioning of a service, as defined in G.2.b. following, the Company will determine which critical date will be completed next in the provisioning interval.
 - (2) Using the table in G.3. following and the critical date as determined preceding, the Company will determine the percent of the provisioning interval not yet completed by subtracting the percentage associated with the last completed critical date from one hundred percent.
 - (3) The Company will apply this percentage to the sum of all the nonrecurring charges associated with the provisioning of the service and will divide the result by the number of days remaining in the original provisioning interval.
 - (4) The per day charges so developed will then be applied on a per day of improvement basis, per order.

2. Company Critical Dates

- a. Certain Company critical dates are associated with the standard service order provisioning interval. These dates are used by the Company to monitor the progress of the provisioning process. At any point in the service order provisioning interval, the Company is able to determine which critical date was last completed and can thus determine what percentage of the Company's provisioning costs have been incurred as of that critical date.
- b. The critical dates tracked by the Company are as follows:
 - Application Date (APP): The date the customer provides to the Company (a) a firm commitment for service and (b) sufficient information to enable the Company to begin service provisioning. This is also the order date.
 - Scheduled Issue Date (SID): The date that the order is to be entered in the Company's order distribution system.

PRIVATE LINE SERVICES

A. PRIVATE LINE SERVICES

1. General Regulations

- a. The following regulations and rates apply to both intraexchange and interexchange private line service and channels furnished or made available by the Company over facilities between two or more points. Services consisting of Local Channels, Interoffice Channels, and Optional Features and Functions are classified by series. The various series are sub-divided into different types and are described in terms of circuit characteristics and use. The Channel Services are Voice Grade (Series 2000).
- b. Customers may order local channels which are designed to meet specific communications requirements. The customer is responsible for determining that terminal equipment is compatible with the service provided by the Company.
- c. Where multi-point service is furnished, the local channels are bridged in the wire center.
- d. When the Company receives a request for service which will follow a route over loaded facilities, then the customer may request these facilities be unloaded or the service requested may require unloaded facilities. Accordingly, there will be a charge for the arrangement based on the current cost of labor, plus materials, should the Company agree to do so.
- e. Entities purchasing Intraexchange or Interexchange Private Line Services for the purpose of resale must purchase the service or any portion of the service from the Company's Dedicated Access Service Tariff, Section 7.
 - 1) Entities purchasing Intraexchange Private Line Service for the purpose of resale must hold Alternative Access Vendor (AAV) or Alternative Local Exchange Company (ALEC) certification. (Intraexchange Private Line Service provides a dedicated transmission path between two end-users within the same exchange.)

2. Liability of the Company (Cont'd)

b. (Cont'd)

The Company shall not be liable for damages arising out of mistakes, omissions, preemptions, interruptions, delays, errors or defects in transmission or other injury, including but not limited to injuries to person or property from voltages or currents transmitted over the service of the Company, (1) caused by customer-provided equipment (except where a contributing cause is malfunctioning of a Company-provided connecting arrangement, in which event the liability of the Company shall not exceed an amount equal to a proportional amount of the Company billing for the period of service during which such mistakes, omissions, preemptions, interruptions, delays, errors or defects in transmission or other injury occurs), and (2) not prevented by customer-provided equipment but which would have been prevented had Company-provided equipment been used.

c. In the event that a shortage of facilities exists, either for temporary or protracted periods, the establishment of Exchange and Long Distance Message Telecommunications Services will take precedence over all other services.

3. Allowance for interruptions

No allowance is made for interruptions of less than 24 hours. For interruptions of 24 hours or more, credit is allowed for the proportionate part of the monthly charge in multiples of 1 day for each 24 hours or major fraction thereof, or interruption for the portion of the facilities rendered inoperative by reason of the interruption.

4. Provision of Facilities

The Company will provide, maintain and repair all facilities and equipment necessary for Private Line Service with the exception that the customer or authorized user may provide his own equipment, communications systems, and station apparatus for use with such service.

5. Regulations Applicable to Private Line Services

a. The Service

Private line service is that of furnishing the requisite facilities, including channels, to enable the customer or authorized user to communication between specified locations for continuous use, or, for the customer and authorized users only, for regularly recurring periods at stated hours; it is furnished on a contract basis, subject to the availability of such facilities and the requirements of the Company's telephone service.

b. Use of the Service

The service is intended only for communications in which the customer or an authorized user has a direct interest. The service shall not be used for any purpose for which a payment or other compensation shall be received by either the customer or any authorized user from any other person, firm or corporation for use, or in the collection, transmission or delivery of any communication for others. This provision does not prohibit an arrangement between the customer and the authorized users to share the cost of the private line service. The contract or any rights acquired there under by the customer may not be assigned or in any manner transferred.

e. Maintenance and Repairs

- 1) All ordinary expense of maintenance and repair, in connection with equipment, facilities, and services furnished by the Company, unless otherwise specified in the Company's tariffs, is borne by the Company. In case of damage, loss or destruction of any of the Company's equipment or facilities due to the negligence or willful act of the customer or authorized user and not due to ordinary wear and tear, fire or other causes beyond the control of the customer, the customer shall be responsible for the cost of replacing the equipment destroyed or for the cost of restoring the equipment to its original condition. A customer or authorized user may not rearrange, disconnect, remove or attempt to repair or permit others to rearrange, disconnect, remove or attempt to repair any equipment or facilities installed by the Company, except upon the written consent of the Company.
- 2) The customer shall be responsible for obtaining permission for Company agents or employees to enter the premises of the customer or authorized user at any reasonable hour for the purpose of installing, inspecting, repairing, or, upon termination of the service, removing the facilities of the Company.
- 3) The customer will make Company facilities available periodically for maintenance purposes at a time agreeable to both the Company and the customer. No allowance will be made for the period during which the service is interrupted for such purposes.

PRIVATE LINE SERVICES

A. PRIVATE LINE SERVICES (Cont'd)

6. Provision of Service

a. Rate Categories

1) Local Channels

a) A local channel provides for a communications path between a designated customer premises and the serving wire center of that premises. One local channel charge applies per channel termination.

b) When service is provided by non-wire center connected channels, a non-wire center connected channel charge applies in lieu of local channel charges.

2) Interoffice Channels

This rate category provides for the transmission facilities between serving wire centers associated with two customer premises, between serving wire centers associated with a customer premises and a Company hub, or between two Company hubs.

Interoffice mileage consists of a flat rate and a rate per mile. For contract rates, interoffice mileage is portrayed in mileage bands. A flat-rate and a rate per mile applies to each band. For method of determining mileage, see Section A20.A.8.c.

3) Non-Wire Center Connected Channels

Served Direct channels are provided on a direct basis and are limited to one airline mile in length. These channels will be provided only at the option of the Company.

4) Optional Features and Functions

This rate category provides for features and functions which may be added to a service to improve its quality or utility to meet specific communications requirements.

4) Optional Features and Functions (Cont'd)

These are not specific equipment, but rather represent the end result in terms of the performance characteristics which may be obtained. This category includes a) and b) following:

a) Hub Functions

A hub is a Company designated wire center where bridging or multiplexing functions are performed i.e., connecting three or more customer premises in a multipoint arrangement or channelizing analog or digital services requiring a lower capacity or bandwidth.

b) Provides for such things as signaling, conditioning, bridging, etc.

b. Service Configurations

1) There are two types of service configurations which can be provided. These are described as follows:

a) Two-Point Service

A two-point service connects two customer premises either directly through a serving wire center(s) or through a Company hub where additional functions are performed. A two-point service may utilize non-wire center connected channels only at the option of the Company.

b. Service Configurations ((Cont'd)

1) There are two types of service configurations which can be provided. These are described as follows: (Cont'd)

b) Multipoint Service

(1) Multipoint service connects three or more customer premises through a Company hub.

(2) There is no limitation on the number of mid-links available with Multipoint Service. However, when more than three mid-links are provided in tandem, the quality of the service may be degraded. A mid-link is a channel between hubs (i.e., bridging locations).

(3) Voice Grade (Series 2000) Multipoint Channel services for data use have a limit of 6 two-wire facility type local channels or 20 four-wire facility type local channels when used with customer-provided station equipment.

(4) The types of service available for multipoint applications are designated in the service descriptions set forth in Section A20.A.10.b.(2). following.

c. Special Routing of Channels

1) The private line services furnished in the tariff are provided over such routes as the Company may elect.

2) Special routing is involved where, in order to comply with requirements specified by the customer, the Company furnishes the private line service in a manner which includes one or both of the following conditions.

8. Rate Regulations

a. Types of Rates and Charges

1) Monthly Rates

Monthly Rates are recurring charges that apply each month or fraction thereof that a service is provided. For billing purposes, each month is considered to have 30 days.

2) Nonrecurring Charges

Nonrecurring Charges are one-time charges that apply for a specific work activity. The three types of charges that apply are installation of service, installation of features and functions and service rearrangements.

a) Installation of Service

Nonrecurring charges apply for each service terminated at the customer's premises. For the installation of local channels when more than one of the same type of service, between the locations, for the same customer is ordered and installed at the same time, one at each location is billed at the First Service Installed rate and the others are billed at the Additional Service Installed rate. If additional services are installed at a later date, then the First Service Installed rate and the Additional Service rated would apply to those services regardless of what service already existed.

The nonrecurring charges for the Installation of Services are set forth in Section A20.11 following as Nonrecurring Charges for the Local Channel and Interoffice Channel rate elements.

Effective: January 1, 1997

PRIVATE LINE SERVICES

A. PRIVATE LINE SERVICES (Cont'd)

8. Rate Regulations

a. Types of Rates and Charges (Cont'd)

2) Nonrecurring Charges (Cont'd)

b) Installation of Optional Features and Functions

Nonrecurring charges apply for the installation of features and functions available with the various services. For some features and functions there is a lower charge if installed coincident with the service and a higher charge if installed subsequent to the service. The "Initial" nonrecurring charge applies when the feature or function is installed at the same time as the service is installed. If the feature or function is installed after the service is established, then the "Subsequent" nonrecurring charge applies.

c) Service Rearrangements

- (1) Service rearrangements are changes to existing (installed) services which do not result in either a change in the minimum period requirements or a change in the physical location of the point of termination at a customer premises. Changes which result in the establishment of new minimum period obligations are treated as disconnects and starts. Changes in the physical location of the point of termination are treated as moves and are described and charged for as set forth in Section A20.A.8.a 2).c.(2).

The charge to the customer for the service rearrangement is dependent on whether the change is administrative only in nature or involves actual physical change to the service.

8. Rate Regulations (Cont'd)

a. Types of Rates and Charges (Cont'd)

2) Nonrecurring Charges (Cont'd)

c) Service Rearrangements (Cont'd)

(1) (Cont'd)

Administrative changes will be made without charge(s) to the customer. Such changes require the continued provision and billing of the Private Line Service to the same entity (i.e., customer remains responsible for all outstanding indebtedness for the service). Administrative changes are as follows:

- Change of customer name (i.e., the customer of record does not change but rather the customer of record changes name).
- Change of customer or customer's premises address when the change of address is not a result of a physical relocation or equipment.
- Change in billing data (name, address or contact name or telephone number).

(2) All other service rearrangements will be charged for as follows:

- If the change involves the addition of other customer designated premises to an existing multipoint service, the nonrecurring charge for the local channel rate element will apply. The charges will apply only for the location(s) that is being added.

c) Service Rearrangements (Cont'd)

(2) All other service rearrangements will be charged for as follows:
(Cont'd)

- If the change involves the addition of an optional feature or function which has a separate nonrecurring charge, that nonrecurring charge will apply.
- If the change involves changing the type of signaling on a voice grade service the subsequent nonrecurring charge will apply for the new type signaling. The charge will apply per service termination affected.
- For all other changes, including a change of the customer of record involving no physical changes to the service provided or the addition of optional features without separate nonrecurring charges, a charge equal to a local channel rate element nonrecurring charge will apply. Only one such charge will apply per service, per change.

A. PRIVATE LINE SERVICES (Cont'd)

8. Rate Regulations (Cont'd)

b. Moves

- 1) A move involves a change in the physical location of one of the following:
 - a) The point of interface at the customer premises.
 - b) The customer's premises.
- 2) The charges for the move are dependent on whether the move is to a new location within the same building or to a different building.

a) Moves Within the Same Building

When the move is to a new location within the same building, the charge for the move will be an amount equal to one-half the nonrecurring (i.e., installation) charge for the affected service termination at the customer's premises. There will be no change in the minimum period requirements. If a move is made at the same time a service rearrangement is made, the total charge will never exceed a full nonrecurring charge for the basic service.

b) Moves To a Different Building

Moves to a different building will be treated as a discontinuance and start of service and all associated nonrecurring charges will apply. New minimum period requirements will be established at the new location. The customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

8. Rate Regulations (Cont'd)

c. Mileage Measurements

- 1) When station locations of a private line service are located in different wire center serving areas, interoffice channel charges apply. Charges are based on the direct airline distance measured between the serving wire centers. Mileage is determined in accordance with the following:
 - a) Obtain the "V" and "H" coordinates for each wire center, as listed in the National Exchange Carrier Association Tariff FCC No. 4.
 - b) Obtain the difference between the "V" coordinates of the two wire centers. Obtain the difference between the "H" coordinates. (The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.)
 - c) Square each difference obtained in (b) preceding.
 - d) Add the squares of the "V" difference and the "H" difference obtained in (c) preceding.
 - e) Divide the sum of the squares obtained in (d) preceding by 10.

A. PRIVATE LINE SERVICES (Cont'd)

8. Rate Regulations (Cont'd)

c. Mileage Measurements (Cont'd)

1) (Cont'd)

- f) Obtain the square root of the result obtained in (e) preceding. This is the rate distance in miles. (Fractional miles being considered as full miles.)

EXAMPLE: The rate distance is required between City One and City Two

	<u>V</u>	<u>H</u>
City One	7260	2083
City Two	7364	1865
Difference	104	218
Squared	10,816 + 47,524 = 58,340	
	58,340 divided by 10 = 5834	
	Square root of 5834 = 76.38 = 77 Airline Miles	

- 2) When a private line is furnished over facilities which the Company elects to provide on a direct basis and is not routed through a central office, one two-point channel charge will apply. The arrangement is limited to channels not more than one airline mile in length.
- 3) On a multipoint circuit, each channel connecting a hubbing wire center with a serving wire center, or a hubbing wire center with another hubbing wire center or a serving wire center with another serving wire center is considered a separate channel for which a mileage charge is independently computed. The total charge for a multi-point circuit channel is the combination of individual legs that connect all points. Bridging charges apply when three or more channels connect at the same location.

8. Rate Regulations (Cont'd)

c. Mileage Measurements (Cont'd)

- 4) For Series 2000 channels the customer may specify the sequence in which the service points are to be connected in which case the rate mileage is the shortest airline mileage determined in accordance with paragraph 3) preceding which will connect the wire centers of the service points in the specified sequence.

d. Service Order Modifications

1) Service Date Change Charge

- a) Service Order service dates for installation of new services or rearrangements of existing services may be changed, but the new service date may not exceed the original service date by more than 30 calendar days.
- b) When, for any reason, the customer indicates that service cannot be accepted for a period not to exceed 30 calendar days, and the Company accordingly delays the start of service, a Service Date Change Charge will apply. If the customer requested service date is more than 30 calendar days after the original service date, the order will be cancelled by the Company and reissued with appropriate cancellation charges applied unless the customer indicates that billing for the service is to commence as set forth in Section A20.A.8.d.2) following.

2) Cancellation Charge (Cont'd)

b) Cont'd)

(4) Charges applicable as specified in A20.A.8.d. 2) b) (3) preceding are based on the estimated costs incurred by the Company at the time the order is cancelled. The estimated costs incurred are determined based on the following:

(a) Certain Company critical dates are associated with a service order provisioning interval, whether standard or negotiated. These dates are used by the Company to monitor the progress of the provisioning process. At any point in the service order interval the Company is able to determine which critical date was last and can thus determine what percentage of the Company's provisioning costs have been incurred as of that critical date.

(b) The critical dates tracked by the Company are as follows:

Application Date (APP): The date the customer provides to the Company, (1) a firm commitment for service and (2) sufficient information to enable the Company to begin service provisioning. This is also the order date.

Scheduled Issue Date (SID): The date that the order is to enter the Company's order distribution system.

g. Billing of Private Line Service Provided by Multiple Companies Where an Exchange Telephone Company Does Not Concur in This Tariff

- 1) Each company will bill for the portion of the private line service provided by their respective tariff based on their regulations, rates and charges as appropriate.
- 2) The charges billed by each company for the interoffice channel between exchange telephone company central offices, are determined as follows:
 - a) The total mileage for the services is computed using the V&H coordinates set forth in the National Exchange Carrier Associated Tariff FCC No. 4 (NECA No. 4).
 - b) A billing factor is determined from the NECA No. 4 tariff. This factor represents the percentage of the distance between exchange telephone company central offices that will be billed by each company. The billing factor is multiplied by the total charge for all of the miles to determine the amount to be billed by the Company.
 - c) For the Fixed recurring rate element and the Nonrecurring Charge associated with the interoffice channel between exchange telephone company central offices, 50 percent of each company's rate will apply for each end of the interoffice channel provided. If the company does not bill for either end of the interoffice channel, then the fixed recurring charge and nonrecurring charges shall not apply.

9. Regulations Applicable to Channels

a. General Undertaking of the Company

- 1) Channels are electrical paths suitable for the purpose furnished and are to be derived from facilities in such a manner as the Company may elect. The Company will furnish channels for specific purposes, as described hereinafter, on a contract basis, subject to the availability of facilities and the requirements of the Company's telephone service and to such other conditions as are specified in this tariff.
- 2) The customer will provide all station apparatus used with the channels exclusive of the equipment necessary to derive the channel.
- 3) The channels are furnished under contract for use between two or more designated premises. The channels are intended only for communications in which the customer or an authorized user has a direct interest. The service shall not be used for any purpose for which a payment or other compensation shall be received by either the customer or any authorized user from any other person, firm or corporation for such use, or in the collection, transmission or delivery of any communication for others. This provision does not prohibit an arrangement between the customer and the authorized users to share the cost of the private line service. The contract or any rights acquired there under by the customer may not be assigned or in any manner transferred.

b. Channels Used for More than One Purpose or Combination of Channels Used for a Single Purpose

A channel is furnished to a customer for a definite primary purpose of use; the use of a channel for purposes which are incidental to the main use is permitted without additional charge, provided the channel is suitable for such use and unless otherwise indicated. Additional primary uses of the same channel are permitted only at additional charges except as provided in this tariff.

c. Use of Channels by Customer

- 1) The customer may not create additional channels from facilities provided by the Company except as provided in this tariff.
- 2) The magnitude and the character of the voltages and currents impressed on the Company channel by the customer-owned equipment and wiring and the operation and maintenance of such equipment and wiring shall be such as not to interfere with any of the services offered by the Company or interfere with others. The characteristics of the customer -owned apparatus shall be such that its connection to the Company channel does not interfere with service over other Company circuits or channels or impair privacy of conversations over such circuits or channels.
- 3) The Company may, upon suitable notification to the customer, make such tests and inspections as may be necessary to determine that the above requirements are being complied with in the installation, operation and maintenance of customer owned equipment. The Company may interrupt the channel if at any time such action should become necessary in order to protect any of its services because of departure from these requirements.

10. Service Descriptions (Cont'd)

b. Voice Grade Service (Series 2000)

- 1) Series 2000 voice grade service provides for voice and/or data communications on a two-point or multipoint basis for service 7 days per week, 24 hours per day, for a minimum period of one month. Channels which provide Tie Line Service will not be furnished to connect a flat-rate system with a message rate system. The transmission characteristics and various types of services furnished within this Series are described in 2) and 3) following.
- 2) Basic parameters and specifications for Series 2000 voice grade service are described for the end to end operation as follows:

<u>Basic Parameters</u>	<u>For Speech Application</u>	<u>For Data Application</u>
Net Loss	Local Channels used with terminal equipment: Limit as specified in the following Local Channel descriptions. Losses or gains present in CPE have not been included.	
DC Resistance	Local Channel limit as specified in the following Local Channel descriptions. Does not imply or guarantee end to end DC continuity.	
Frequency Error Frequency Response	Plus or Minus 5 Hz (Referenced to 1000 Hz loss)	Plus or Minus 5 Hz
300 - 3000 Hz	-3dB to + 12 dB	-3dB to + 12 dB
500 - 2500 Hz	-2dB to + 8 dB	-2dB to + 8 dB

3) Transmission parameters for voice grade service are described following:

- a) Type 2230 (2001/2101) - A two-wire interface with effective two-wire facilities engineered for a 1004 Hz net loss of 0 - 10dB. Generally furnished for voice transmission - Private Line Telephone, Mobile Radio Telephone or Supervisory Control Use. Multipoint service may be provided at charges specified in Section A20. 11. c. 1) following.
- b) Type 2231 (2012/2112) - A two-wire interface with two or four-wire facilities engineered for a 1004 Hz net loss of 0dB to 4.5dB. This is generally used for PBX (or similar system) main or extension station services. Signaling is required for this service.
- c) Type 2432 (2014/2114) - A two or four-wire interface with effective four-wire facilities engineered for tie line service use between PBX's or customer-provided communications systems. Signaling is required for this service.

3) (Cont'd)

- d) Type 2434 (2015/2115) - A two or four-wire interface for connection to the serving wire center where loop facilities are not required. This channel is suitable for tie line service (with E&M signaling) between Centrex services, or between Centrex service and ETS service, and may be connected with Type 2432 local channels.
- e) Type 2435 - A four-wire interface with effective four-wire facilities engineered for a 1004 Hz net loss of 0dB to 16dB. Generally furnished for voice transmission. Multipoint service may be provided at charges specified in A20.11.c.1) following.
- f) Type 2260 (2021/2121) - A two-wire¹ interface with effective two-wire facilities engineered for 1004 Hz net loss of 16dB. Generally used in the provision of low speed (1200 baud or less) half duplex data services.
- g) Type 2261 (2040/2140) - A two-wire interface with effective two-wire facilities engineered for use in Dataphone (Data) Select-A-Station Service or Telemetry/Alarm Bridging Service (TABS).

Note 1: Transmission data characteristics can only be met and guaranteed for the two-wire interface when the airline distance from the serving wire center to the customer's premises is one mile or less and the interoffice channel is not greater than 4 airline miles between serving wire centers.

5) Dataphone Select-A-Station Service (Data Service, Analog)

Dataphone Select-A-Station Service is a multi-station, voice grade private line data system designed to establish point-to-point connections rapidly between a master station and a number of remote stations one at a time. This service is suitable for Alarm Service and uses channel types 2261 and 2462 described in 3) preceding. Direct transmission between remote stations is not possible, nor is simultaneous communications from the master to more than one remote station possible.

a) Regulations

The regulations specified herein are in addition to the regulations contained in A20.A.1. of this Section. The service name "Data Service, Analog" previously used in the Central Telephone area will be changed to the service name "Dataphone Select-A-Service" as of the effective date of this tariff.

- (1) Dataphone Select-A-Station Service requires the use of equipment as described herein A20.A.10.b.5)b) and type 2261 and 2462 voice grade channels as described in A20.A.10.b.3) preceding.
- (2) The Company will furnish, subject to availability of facilities, Dataphone Select-A-Station Service channels suitable for voice grade data transmission.

5) Dataphone Select-A-Station Service (Data Service, Analog) (Cont'd)

a) Regulations (Cont'd)

(3) Dataphone Select-A-Station Service channels are not provided for alternate voice-data transmission or DC continuity.

(4) The customer shall provide terminal equipment in accordance with interface specifications as described in Technical Reference PUB 41014, "Data Communications Using Dataphone Select-A-Station Service".

b) A Primary Data Station Selector, PDSS, provides the connection between the master station and any one of up to 128 (125 for addressable operations) two-wire or four-wire voice grade data channels. Where more than one DSS is required, the DSS that is directly connected to the master station (SCU) is termed the Primary Data Station Selector (PDSS). Additional DSS's designated Secondary Data Selectors (SDSS) connected to the PDSS, may be provided.

c) A Selector Control Unit SCU, will be provided at the master station location. The SCU is used by the customer to transmit control and/or address signals to the DSS's and to receive supervisory signals from DSS's.

5) Dataphone Select-A-Station Service (Data Service, Analog) (Cont'd)

d) Dataphone Select-A-Station Service arranged for the sequential mode of operation requires customer specification, prior to installation, of the order of connections from the DSS to the remote stations. The customer also must specify one of the following three DSS options to accommodate customer operating procedures and circuit structure:

(1) Automatic Step¹

A DSS option in which the duration and order of connections are fixed.

(2) Automatic Step with Reset

A DSS option in which the duration and order of connections are fixed, but the DSS will reset to the beginning of the connection cycle upon command from the master station.

(3) Controlled Step

A DSS option which allows the customer to have in-service control over the duration of the connection. However, the order of the connections is fixed.

NOTE 1: A DSS optioned for automatic step or automatic step with reset cannot be connected to a secondary DSS.

6) Telemetry/Alarm Bridging Service (TABS) (Alarm Service)

a) Regulations

- (1) This tariff section contains the regulations applicable for Telemetry/Alarm Bridging Service (TABS). The service name "Alarm Service" previously used in the Central Telephone area will be changed to the service name "Telemetry/Alarm Bridging Service (TABS)" as of the effective date of this tariff.
- (2) Except as otherwise specified following, the regulations contained herein are in addition to the regulations found in other sections of this tariff.
- (3) TABS requires the use of equipment as specified herein and Type 2261 or 2462 voice grade local channels described in Section A20. 10. b. 3) preceding.
- (4) Terminal equipment provided by the customer for use with TABS must meet specifications for such customer-provided equipment found in other sections of this tariff.
- (5) No more than 128 remote stations may be connected to master station over an individual Split Band Active Bridge.

6) Telemetry/Alarm Bridging Service (TABS) (Alarm Service) (Cont'd)

a) Regulations (Cont'd)

- (6) In Split Band Active Bridging arrangements, secondary bridges must be directly connected to the primary bridge via mid-link channels. Secondary bridges cannot be connected through other secondary bridges to allow additional layers of tandeming.
- (7) Secondary bridges, utilized in Split Band Active Bridging arrangements, reduce the two-wire remote station capacity of the primary bridge. The initial secondary bridge reduces the primary bridge capacity by twelve two-wire remote station connections. Each subsequent secondary bridge reduces the primary bridge capacity by four additional two-wire remote station connections.
- (8) Standard multipoint bridging charges as provided in other sections of this tariff are not applicable to TABS.
- (9) Access over four-wire master station channels for Split Band Active Bridging is provided using a Type 2462 local channel.

6) Telemetry/Alarm Bridging Service (TABS) (Alarm Service) (Cont'd)

a) Regulations (Cont'd)

(10) Access over remote station channels is provided through a Type 2261 local channel and through the appropriate channel connection as contained in Section A20.A.11.c.1)a)(5) following. Interconnection of remote stations located outside the serving wire center where the bridge to which they are to be connected is located will require interoffice channels at charges contained in Section A20.A.11.b of this tariff.

(11) Access over each four-wire mid-link channel for Split Band Active Bridging is through voice grade interoffice channels at charges contained in Section A20.A.11.c.1)a)(5) following.

b) Service Description

(1) Telemetry/Alarm Bridging Service (TABS) is a multi-station, voice frequency, private line service designed to provide connections between a master station and a number of remote stations simultaneously. Direct transmission between remote stations is not intended. This service is intended for application in multipoint, voice frequency, data or tone signaling arrangements with transmission at rates up to 400 baud.

3) Conditioning (Voice Grade Services)

Conditioning provides more specific transmission characteristics for data services. There are two types of C-conditioning and one type of D-conditioning, each with different technical specifications. C-Type conditioning controls attenuation distortion and envelope delay distortion. D-Type conditioning controls the signal to C-notched noise ration and intermodulation distortion.

Conditioning is charged for on a per Local Channel basis for two-point and multipoint service. For two-point services the parameters apply to each service. For multipoint services the parameters apply to any path between any two service points.

B. DIGITAL ACCESS CROSS CONNECT SERVICE

CENTRAL TELEPHONE ONLY

1. General

- a. Digital Access Cross Connect Service (DACCS) provides for the management and reconfiguration of digital networks. It allows a single digit (DS0) circuit or multiples of up to 24 DS0 circuits.
- b. The basic unit of service is a single 64 kbps (DS0) channel. Services are also provided for DS1 (1.544 Mbps) and DS3 (45 Mbps) digital circuits or synchronous subrate digital circuits (19.2 kbps).
- c. This service is provided only from serving wire centers equipped with a Digital Cross Connect Device (DCD) and is subject to the availability of facilities.
- d. Service must be ordered for a minimum of three months.
- e. Suspension of service is not allowed.

2. Definitions

- a. Digital Cross Connect Device (DCD) - The DCD provides DS0 cross connection. It can connect multiples of up to 24 DS0 circuits.
- b. "DS0" refers to a North American hierarchy of digital signal levels. It means Digital Signal Level 0 which is a 64 kbps signal. Customer bit rates are limited to a 56 kbps signal.
- c. "DS1" refers to a North American hierarchy of digital signal levels. It means Digital Signal Level 1 which is a 1.544 Mbps signal.

B. DIGITAL ACCESS CROSS CONNECT SERVICE (Cont'd)

CENTRAL TELEPHONE ONLY

2. Definitions (Cont'd)

- d. "DS3" refers to North American hierarchy of digital signal levels. It means Digital Signal Level 3 which is a 45 Mbps signal.
- e. An Access Line is the circuit between the customer's premises and his serving wire center plus interoffice facilities to the DCD if the DCD is not in the customer's serving wire center.
- f. A Multipoint Channel is any connection which terminates three or more channels on the same bridging port.

3. Connections

- a. This tariff applies to connection between channels at the DS0 level only or 24 consecutive DS0 channels.
- b. DS0, DS1 and DS3 signals as defined in the Company's technical references may be terminated on this service. Other multiplexing formats must be converted at standard D4 format.
- c. A Trouble Location Charge as defined in Section A4 of this tariff will apply if a reported trouble is found to be in the customer's premises equipment.

Effective: November 30, 1999

PRIVATE LINE SERVICES

E. EXPEDITED ORDER CHARGE

1. General

- a. If a customer desires that service be provided on an earlier date than that which has been established for the service order, the customer may request that service be provided on an expedited basis. If the Company agrees to provide the service on an expedited basis, an Expedited Order Charge will apply.
- b. If the Company is subsequently unable to meet an agreed upon expedited service date, no Expedited Order Charge will apply unless the missed service date was caused by the customer.
- c. The Expedited Order Charge is based on the extent to which the service order has been processed at the time the Company agrees to the service date improvement and is calculated as follows:
- d. Based on the critical dates associated with the service order, the Company will determine which critical date will be next completed on the order. The critical dates tracked by the Company are as follows:
 - 1) Application Date (APP): The date the customer provides to the Company, (1) a firm commitment of service and (2) sufficient information to enable the Company to begin service provisioning. This is also the order date.
 - 2) Scheduled Issue Date (SID): The date that the order is to enter the Company's order distribution system.
 - 3) Loop Assignment and Make-up Date (LCAM): The date by which Local Loop Assignment and Make-up information must be available.
 - 4) Records Issue Date (RID): The date that all design and assignment information is to be sent to the central office and installation forces.

PRIVATE LINE SERVICES

E. EXPEDITED ORDER CHARGE (Cont'd)

1. General (Cont'd)

d. (Cont'd)

- 5) Material Issue Date (MID): The date material is shipped by the warehouse to field personnel for provisioning of service.
 - 6) Designed, Verified, and Assigned Date (DVA): The date by which field implementation groups must report that all documents and materials have been received.
 - 7) Wired and Office Tested Date (WOT): The date by which all intraoffice wiring is to be completed, all plug-ins optioned, aligned, and frame continuity established, and the interoffice facilities, if applicable, tested. In addition, switching equipment, including translation loading, is to be installed and tested.
 - 8) Plant Test Date (PTD): The date on which overall testing of the service is to be started.
 - 9) Due Date (DD): The date on which service is to be made available to the customer.
- e. Using the table in D.2. following and the critical date, as determined preceding, the Company will determine the percent of the provisioning interval not yet completed.
- f. The Company will apply this percentage to the sum of all the nonrecurring charges associated with the order and divide this sum by the number of days remaining in the original service interval.
- g. The per day charges so developed will then be applied on a per day of improvement basis, per order, but in no event shall the charge exceed fifty percent of the total nonrecurring charges associated with the service order.

G. OPTIPOINT SERVICE

1. REGULATIONS

a. Description of Service

OptiPoint Service consists of a basic channel to which a technical specifications package (customized or predefined), channel interface(s) and, when desired, optional features and functions are added to construct the service desired by the customer. Each of the components of the service is described in this section.

Customized technical specifications packages will be provided where technically feasible. If the Company determines that the requested parameter specifications are not compatible, the customer will be advised and given the opportunity to change the order.

When a customized channel is ordered the customer will be notified whether Additional Labor Charges apply. In such cases, the customer will be given an estimate of the hours to be billed before any further action is taken on the order.

OptiPoint Service provides point-to-point high speed synchronous optical fiber-based full duplex data transmission capabilities for intraLATA intraexchange and interexchange communications. There are two levels of OptiPoint Service: OptiPoint-3 (OC3) is provided at a terminating bit rate of 155.52 Mbps; and OptiPoint-12 (OC12) is provided at a terminating bit rate of 622.08 Mbps.

OptiPoint Service is provided for periods of one, three, or five years. When a customer orders OptiPoint Service, the customer and the Company will work cooperatively to plan, engineer, provision and manage OptiPoint Service.

The required format and interface specifications are contained in Technical Reference Publication GR-253.

1) Channel Termination

OptiPoint Service Channel Terminations may be used to connect the following:

- a customer designated premises to another customer designated premises, configured at wire center locations between the two premises; or
- a customer designated premises to a Company location where service configuration is performed.

a) Based on customer requirements, OC3 service may be provisioned in the following configurations:

- (1) OC3 - three Synchronous Transport Signals (STS1) channels which each contain the following:
 - one DS3 that is STS1 mapped;
 - up to 28 DS1s that are VT mapped;
 - an STS1 channel without constraint to payload mapping when the STS1 channel does not terminate via a service configuration function to DS1 or DS3 services within the network; or

a. Description of Service (Cont'd)

1) Channel Termination (Cont'd)

a) (Cont'd)

(2) A single concatenated OC3c channel that is STS3c mapped.

b) Based on customer requirements, OC12 service may be provisioned in the following configurations:

(1) OC12 - twelve STS1 channels which each contain:

- one DS3 that is STS1 mapped;
- up to 28 DS1s that are VT mapped;
- an STS1 channel without constraint to payload mapping when the STS1 channel does not terminate via a service configuration function to DS1 or DS3 services within the network;

(2) Up to four concatenated OC3c channels that are STS3c mapped;

(3) From one to three OC3c channels that are STS3c mapped and mixed with from three to nine STS1 channels subject to utilization of the total OC12 capacity; or

(4) A single concatenated OC12c channel that is STS12c mapped.

PRIVATE LINE SERVICES

G. OPTIPOINT SERVICE (Cont'd)

1. REGULATIONS (Cont'd)

a. Description of Service (Cont'd)

1) Channel Termination (Cont'd)

Current SONET standards do not provide for asynchronous DS3 to DS1 multiplexing. An STS1 channel may be mapped for either one DS3 or 28 DS1s. However, DS1s within a DS3 are not accessible within the SONET architecture, and their performance cannot be guaranteed for this reason. When the customer requests that an OC3 or OC12 service be configured with a combination of DS3 and DS1 channels, a DS3 to DS1 multiplexing arrangement, will be required as set forth in Section A20.F.9.c.1) of this tariff.

Upon ordering OptiPoint Service, the customer is responsible for identifying the STS signal configuration to be contained in each OC3 or OC12 service connection and each STS1, STS3, and/or STS12 payload content. This information is used in determining the route and connection in the network. If a new configuration is requested subsequent to the initial activation, a service reconfiguration charge will apply on a per service basis, as set forth in A20.G.8.b. following. The service reconfiguration charge is in addition to all applicable configuration card charges associated with the new configuration.

OptiPoint Service is provided with electronics that automatically activate in case of failure of the primary electronics. Since OptiPoint is a point-to-point service, SONET ring survivability will not be available. Rates for additional protection options requested by the customer will be quoted on an individual case basis and are in addition to the rates for OC3 and OC12 service.

OptiPoint Channel Terminations provided to a customer's designated premises will be installed in a single, common space under Company control. An OptiPoint entrance facility may not be split between premises or terminated in multiple locations within a premises. The customer must provide suitable floor space, environmental controls and non-switched AC power to support the OptiPoint entrance facility at the customer's premises location.

PRIVATE LINE SERVICES

G. OPTIPOINT SERVICE (Cont'd)

1. REGULATIONS (Cont'd)

a. Description of Service (Cont'd)

1) Channel Termination (Cont'd)

OptiPoint Channel Terminations will be provided with or without Company provided terminal equipment at the customer's premises. When a customer elects to furnish its own terminal equipment at the customer's premises, the customer will work cooperatively with the Company to provide a compatible physical interface, and will identify approved equipment types for use in conjunction with Company provided equipment. The customer is responsible for providing all facilities and cabling necessary to connect customer provided equipment to this interface.

OptiPoint Channel Terminations are available only where facilities and operating conditions permit. The Company will work cooperatively with the customer to determine if suitable existing Company SONET based facilities are available to provide the service. The Company will not provision this service on facilities which are not suitable for OptiPoint. Where facilities and/or operating conditions do not permit the provision of OptiPoint Service, and the customer desires the Company to provision OptiPoint Service, Charges Applicable Under Special Conditions, as set forth in Section A5 of this tariff, may apply.

Channel mileage can be connected between serving wire centers at a lower OC-n speed than the Channel Termination, if the channel mileage is between a lower speed configuration function and one of the following:

- another lower speed configuration function;
- another lower speed Channel Termination; or

All of the above terminations must be provided at the same speed as the transport.

G. OPTIPOINT SERVICE (Cont'd)

1. REGULATIONS (Cont'd)

a. Description of Service (Cont'd)

2) Service Configuration

- a) Configuration Card - provides for the interface at which a channelized or lower speed service terminates or originates from an OptiPoint optical line terminated at a customer designated premises or a Company central office. DS1, DS3, and OC3 concatenated cards are available for interfacing OptiPoint-3 service with lower level signals. DS1, DS3, OC3, OC3 concatenated, and OC12 concatenated cards are available for interfacing with OptiPoint-12 service.

Whenever a customer requests their OptiPoint Service to be configured for lower level service, card rate elements will apply. Configuration Cards will be required based upon the characteristics of the OptiPoint Service. Monthly rates for the Configuration Cards are set forth in A20.G.7.c. following.

Due to the technical limitations of SONET facilities, additional regeneration equipment may be required for essential detection and retransmission of SONET signals between the customer's premises and the Company serving wire center for that premises. Additional regeneration equipment will only be provided by the Company when the actual fiber facility distance between the customer's premises and serving wire center exceeds SONET design limits. A monthly recurring OptiPoint Regeneration Charge, as set forth in A20.G.7.d. following, will apply for each regenerator required for the provision of OptiPoint Service.

1. REGULATIONS (Cont'd)

a. Description of Service (Cont'd)

- 3) Multipoint service is not available with OptiPoint Service.
- 4) A Channel Service Unit (CSU) or appropriate termination equipment provided by the customer is required at a customer's or authorized user's premises to perform such functions as:
 - proper termination of the service
 - amplification
 - signal shaping
 - remote loop-back
- 5) The design, maintenance and operation of OptiPoint Service contemplates communications originating and terminating as (1) a customer premises to customer premises channel via the Company's Serving Wire Center and/or through remote Serving Wire Centers; (2) a customer premises to the Serving Wire Center and/or remote Serving Wire Centers - partial channel (link); or (3) a central office to central office (interoffice) partial channel (link).
- 6) Unless specified following, the regulations for OptiPoint Service specified herein apply in addition to the regulations set forth in other sections of this tariff.
- 7) Suspension of Business and Residence Service (Vacation Service) at the customer's request, as defined in Section A2 of this tariff, is not allowed.

b. Definitions

- 1) Channel Mileage - Channel Mileage provides for the end office equipment and the transmission channel between the Serving Wire Centers associated with two customer designated premises. Channel Mileage is comprised of Channel Mileage Facility (per mile) and Channel Mileage Termination (fixed) rates.
 - a) Channel Mileage Facility (Per Mile) - The Channel Mileage Facility (per mile) recovers the cost for the transmission path that extends between the Company Serving Wire Centers and includes primarily outside plant used to provide the facility.
 - b) Channel Mileage Termination (Fixed) - Channel Mileage Termination (fixed) recovers the cost for end office equipment associated with terminating the facility (i.e., basic circuit equipment and terminations at Serving Wire Centers).
- 2) Channel Service Unit (CSU) - The term "Channel Service Unit (CSU)" denotes equipment provided by the customer to terminate a digital facility on the customer's premises.
- 3) Channel Termination - The local facility from the customer's designated premises to the Serving Wire Center.
- 4) OC3 - This denotes a channel service expressed in terms of optical line rates in accordance with North American standards for synchronous optical networks. It has a 155.52 Mbps transmission data rate.
- 5) OC12 - This denotes a channel service expressed in terms of optical line rates in accordance with North American standards for synchronous optical networks. It has a 622.08 Mbps transmission data rate.
- 6) Nonrecurring Charge - A one-time charge for the initial installation, the installation of functions and features and service rearrangements.
- 7) Serving Wire Center - The local telephone central office assigned to subscribers in a predetermined geographic area.

c. Connections

- 1) Customer-Provided Terminal Equipment, Customer-Provided Derivation Equipment and Customer-Provided Communications Systems may be connected to OptiPoint Service when such connection is made in accordance with the provisions specified in 2), 3) and 4) following.
- 2) Responsibility of the Company
 - a) The responsibility of the Company shall be limited to the furnishing and maintenance of OptiPoint Service to a network interface on the customer's premises where provision is made for the connection of local service.
 - b) The Company shall not be responsible for installation, operation or maintenance of any terminal equipment or communications systems provided by the customer. OptiPoint Service is not represented as adapted for the use of such equipment or system. Where such equipment or system is connected to Company facilities, the responsibility of the Company shall be limited to the furnishing of facilities suitable for OptiPoint Service and to the maintenance and operation in a manner proper for such digital service. The Company shall not be responsible for:
 - The through transmission of signals generated by such equipment or system, or for the quality of, or defects in, such transmission, or
 - The reception of signals by such equipment or systems, or
 - Damage to terminal equipment or communications systems provided by a customer or authorized user due to testing.
 - c) The Company shall not be responsible to the customer if changes in any of the facilities, operations or procedures of the Company utilized in the provision of OptiPoint Service render any facilities or equipment provided by a customer obsolete, or require modification or alteration of such equipment or system or otherwise affects its use or performance.

1. REGULATIONS (Cont'd)

c. Connections (Cont'd)

2) Responsibility of the Company (Cont'd)

d) The Company is responsible for maintaining and repairing the facilities it furnishes. The customer may not rearrange, disconnect, remove or attempt to repair any equipment installed by the Company without prior written consent of the Company.

e) In order to maintain the quality of OptiPoint Service, the Company reserves the right to perform preventative maintenance and software updates to the network. The Company has classified maintenance as follows:

(1) Scheduled Maintenance

Scheduled maintenance is performed for functions such as hardware and software upgrades and network optimization. The Company will perform these tasks in a maintenance window that is anticipated to minimize disruption of customer service and activity. The Company will provide advance notice of all scheduled maintenance.

(2) Demand Maintenance

Demand maintenance may occur as a result of unexpected events and is performed when OptiPoint Service network elements are in jeopardy. The Company will perform this type of maintenance at its discretion. Due to the nature of demand maintenance, prior notification may not be possible; however, the customer will be informed when the maintenance has been completed.

3) Responsibility of the Customer

a) The customer is responsible for installing and testing the customer premises equipment or facilities to insure that when they are connected to OptiPoint Service such equipment or facilities are operating properly.

G. OPTIPOINT SERVICE (Cont'd)

1. REGULATIONS (Cont'd)

c. Connections (Cont'd)

3) Responsibility of the Customer (Cont'd)

b) The operating characteristics of the customer premises equipment or facilities shall be such as to not interfere with any of the services offered by the Company. Such use is subject to the further provisions that the equipment provided by a customer does not: endanger the safety of Company employees or the public; damage, require change in or alteration of the equipment or other facilities of the Company; interfere with the proper functioning of such equipment or facilities; impair the operation of the Company's facilities or otherwise injure the public in its use of the Company's services. Upon notice that the equipment provided by a customer is causing or is likely to cause such hazard or interference, the customer shall take such steps as shall be necessary to remove or prevent such hazard or interference.

c) The customer's responsibility shall include cooperative testing with the Company as may be necessary. Where regeneration and/or equalization adjustments or changes may be required to compensate for rearrangements and/or changes in outside plant facilities, the customer will be responsible for all expenses incurred in changes to his customer premises equipment.

4) Connection of Customer-Provided Terminal Equipment, Customer-Provided Derivation Equipment and Customer-Provided Communications Systems

a) The following provisions will apply:

(1) Customer-Provided Terminal Equipment and/or Customer-Provided Communications Systems may be connected at the premises of the customer to OptiPoint Service.

(2) The customers, by use of their own derivation equipment, may create digital bit streams from OptiPoint Service and such equipment may be connected for transmission of such bit streams when connected through a customer-provided CSU.

(3) The undertaking of the Company is to furnish OptiPoint Service as ordered and specified by the customer except as specified in d) following.

b) Connections to Other Services Furnished by the Company to the Same Customer

OptiPoint Service furnished by the Company may be connected by the customer to another service or to other services furnished by the Company as specified in 2) preceding. Connected services are subject to all rules and regulations governing the provisioning of those services.

c) Connections to Other Services Furnished by the Company to Different Customers

The customer may connect at the premises of the customer, to another OptiPoint Service or other services furnished by the Company to different customers as specified in 2) preceding. Connected services are subject to all rules and regulations governing provisioning of those services.

d) Connection of Channel Service Units

A Channel Service Unit (CSU) or appropriate termination equipment must be provided by the customer to connect a Company-provided digital facility. This equipment must comply with the technical requirements outlined in Part 68 of the FCC Rules and Regulations.

e) The customer is responsible for payment of a Trouble Location Charge, as set forth in Section A4 of this tariff, for visits by the Company to the customer's premises when a service difficulty resulting in a trouble report is caused by the use of equipment or facilities provided by the customer.

f) The customer may not rearrange, disconnect, remove or attempt to repair any equipment installed by the Company without the prior written consent of the Company.

g) For maintenance purposes, upon request of the Company, the customer will be responsible for notifying the Company of the type of digital terminating equipment used.

2. TERM PLAN

- a. The minimum service period is one year. A term plan provides the customer with discounted rates for OptiPoint Service. OptiPoint Service may be ordered under a term plan for fixed periods of one year, three years, or five years. All rate elements within the same OptiPoint Service facility must be ordered under the same commitment period. The customer must order the term plan in writing to the Company.
- b. The customer must specify the length of the initial service period at the time the service is ordered.
- c. At the end of the term plan the customer may subscribe to a new term plan at the prevailing rates set forth in A20.G.7 following. If the customer does not specify renewal terms in writing 90 days prior to the expiration of the three or five year service period, the commitment period and OptiPoint Service rates for the one year term will automatically be applied. If the customer does not specify renewal terms in writing prior to the expiration of the one year service period, the commitment period and the OptiPoint Service rates in effect at the time of expiration will automatically renew. The customer can terminate OptiPoint Service at the end of the minimum commitment period with no penalty or obligation to continue the service.
- d. Rate increases or decreases will automatically be applied to the monthly term plan rates for the remaining term of the term plan. If Company initiated rate increases to any rate element or combination of rate elements causes the charges for the entire OptiPoint Service under the term plan to increase by 10% or more annually, then the customer may cancel the term plan without incurring termination liability charges provided the customer notifies the Company within 30 days after the effective date of the rate increase.
- e. The customer can extend term plan commitment periods at any time during the term of the plan, up to a maximum of five years. The number of remaining months in the original term plan will become part of the total term in the new term plan.

G. OPTIPOINT SERVICE (Cont'd)

3. TERMINATION LIABILITY CHARGES

- a. If a customer under a term plan disconnects all or a portion of OptiPoint Service prior to the expiration of the term plan, then a Termination Liability Charge will apply to those services that are disconnected. The Termination Liability Charge will be a one-time charge equal to sum of 50% of the payments remaining for the rest of the term plan.
- b. Customers may move Channel Terminations and not be subject to Termination Liability Charges providing the terms of the term plan are maintained. If charges as specified in A20.G.6.a. following were applied to the service being terminated or moved, any termination or move charges associated with that construction apply, as well as any construction charges at the new location.
- c. Termination Liability Charges will not apply when a service or rate element under a term plan is disconnected prior to the expiration of a selected service period as a result of a change in tariff jurisdiction and/or a customer requested upgrade to a next generation service offering, under the following conditions:
 - 1) The service period of the new term plan for the new service offering is a period equal to or exceeding the remaining service period of the disconnected term plan, and
 - 2) The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between the installation of the new service and the disconnection of the old service, and
 - 3) The service orders to install the new service and disconnect the old service are for the same customer at the same location.
- d. The Company will determine whether the replacement service qualifies as a next generation service offering.
- e. Nonrecurring charges and Service Charges for the new service will apply according to the requirements of the new service.

G. OPTIPOINT SERVICE (Cont'd)

4. MONTHLY RATE CATEGORIES

There are three monthly rate categories which apply to OptiPoint Service:

- Channel Termination
- Channel Mileage
- Configuration Cards

a. Channel Termination

The Channel Termination rate category provides for the communications path between a customer designated premises and the Serving Wire Center. Included as part of the Channel Termination is a standard channel interface arrangement which defines the technical characteristics associated with the type of facilities to which the service is to be connected at the point of termination (POT) and the type of signaling capability if any. The signaling capability itself is provided as a part of this rate category. One Channel Termination charge applies per customer designated premises at which the channel is terminated. The charges applicable to the Channel Termination vary based on distance, as set forth in A20.G.7.a. following.

b. Channel Mileage

The Channel Mileage rate category provides for the end office equipment and the transmission channel between the Serving Wire Centers associated with two customer designated premises. Channel Mileage rates are made up of the Channel Mileage Facility (per mile) rate and the Channel Mileage Termination (fixed) rate. Channel Mileage charges are set forth in A20.G.7.b.

1) Channel Mileage Facility (Per Mile)

The Channel Mileage Facility (per mile) rate recovers the cost for the transmission path, which extends between the Company Serving Wire Centers and includes primarily outside plant used to provide the facility.

2) Channel Mileage Termination (Fixed)

The Channel Mileage Termination (fixed) rate recovers the cost for end office equipment associated with terminating the facility (i.e., basic circuit equipment and terminations at Serving Wire Centers). The Company applies a 50% billing percentage to the channel mileage fixed rate on jointly owned circuits, and applies 100% on wholly owned circuits. When the Channel Mileage Facility (per mile) is zero (i.e., collocated Serving Wire Centers), neither the Channel Mileage Facility (per mile) rate nor the Channel Mileage Termination (fixed) rate will apply.

G. OPTIPOINT SERVICE (Cont'd)

4. MONTHLY RATE CATEGORIES (Cont'd)

c. Configuration Card

Configuration Card provides for the interface at which a channelized or lower speed service terminates or originates from an OptiPoint optical line terminated at a customer designated premises or a Company central office. DS1, DS3, and OC3 concatenated cards are available for interfacing OptiPoint-3 service with lower level signals. DS1, DS3, OC3, OC3 concatenated, and OC12 concatenated cards are available for interfacing with OptiPoint-12 service. The charges applicable to Configuration Cards are set forth in A20.G.7.c. following.

d. OptiPoint Regeneration Charge

An OptiPoint Regeneration Charge will be required when the actual fiber facility distance between the customer's premises and serving wire center exceeds SONET design limits. A monthly recurring OptiPoint Regeneration Charge, as set forth in A20.G.7.d. following, will apply for each regenerator required for the provision of OptiPoint Service.

e. Multiplexed Service Connection

A Multiplexed Service Connection is an arrangement that allows one DS1, DS3, OC3, or OC12 channel of a multiplexed Company service to be connected to one DS1, DS3, OC3, or OC12 channel with like signaling of another Company service. For example, the lesser speed may be a LightLink DS3 channel connected between a multiplexed OptiPoint Service. A Multiplexed Service Connection will be provided at all Company locations where Central Office Multiplexing is performed. The charges applicable to the Multiplexed Service Connection are set forth in A20.G.7.e. following.

G. OPTIPOINT SERVICE (Cont'd)

5. NONRECURRING CHARGE CATEGORIES

a. OptiPoint- Reconfiguration Charge

If a new configuration is requested subsequent to the initial activation, a OptiPoint Reconfiguration Charge will apply on a per service basis, as set forth in A20.G.8.a. following. The OptiPoint Reconfiguration Charge is in addition to all applicable Configuration Card charges associated with the new configuration.

b. Optical Service Rearrangements

Service rearrangements are changes to existing (installed) services which do not result in either a change in the minimum period requirements or a change in the physical location of the point of termination at a customer designated premises. Changes in the type of service or service termination are treated as disconnects and starts.

For service rearrangements involving OC3 or OC12 OptiPoint Service, a charge equal to one half the Optical Service Charge set forth A20.G.8.b. will apply for each node rearranged.

c. Charges Applicable Under Special Conditions

Charges Applicable Under Special Conditions, as set forth in Section 5 of this tariff, may apply where facilities and/or operating conditions do not permit the provision of OptiPoint Service and the customer desires the Company to provision the OptiPoint Service.

G. OPTIPOINT SERVICE (Cont'd)

6. APPLICATION OF RATES

- a. The rates specified for OptiPoint Service in A20.G.7 following contemplate the provision of a digital quality facility utilizing existing interoffice carrier equipment and/or exchange fiber facilities compatible with this service. If equipment, new facilities or changes to existing facilities are required for the provision of this service, then charges as specified in Section 5, Charges Applicable Under Special Conditions, will apply in addition to the rates for OptiPoint Service.
- b. Each OptiPoint Service facility may be comprised of one or two Channel Terminations. Where both customer premises are served by the same Serving Wire Center, the service will consist of two Channel Terminations. Where each customer premises is served by different Serving Wire Centers, the service will consist of two Channel Terminations, one Channel Mileage Termination (fixed) and the Channel Mileage Facility (per mile) between Serving Wire Centers. Where one customer premises is involved, the Channel Termination of a lower bandwidth service can be replaced with an OptiPoint Service Channel Termination. For example, the Local Channel Termination associated with LightLink Service can be replaced with an OptiPoint Service Channel Termination to connect the LightLink Service to the Serving Wire Center of the customer's designated premises.
- c. The Channel Termination rate element for OptiPoint Service will vary based on distance. The mileage used to determine the monthly rate for Channel Terminations located outside a Company central office is the airline distance between the customer's designated premises and the Company's Serving Wire Center. The mileage measurement is determined by utilizing exchange maps and mileage tables located in designated Company offices for such purposes.
- d. Intraexchange channels furnished between company central offices will be charged at rates based on airline distance between the central offices. Interexchange channels will be charged at rates based on airline distance between Company central offices. Fractional mileage will be rounded up to the next full mile.
- e. Whenever facilities are provided jointly by the Company and another telephone company, the regulations, rates and charges of the other telephone company shall apply for the equipment and facilities furnished by the other telephone company for use in connection with OptiPoint Service. The Company applies a 50% billing percentage to the Channel Mileage Termination (fixed) rate on jointly owned circuits, and applies 100% on wholly owned circuits. When the Channel Mileage Facility (per mile) is zero (i.e., collocated Serving Wire Centers), neither the Channel Mileage Facility (per mile) rate nor the Channel Mileage Termination (fixed) rate will apply.

H. SONET RING SERVICE

1. REGULATIONS

a. Description of Service

SONET Ring Service is a dedicated high capacity network (bandwidth) designed to provide the customer reliable functionality for the transmission of voice, data, and video via a self-healing ring topology between multiple customer designated locations and Company central offices. SONET Ring Service will only be offered using 2-fiber unidirectional path switch ring (UPSR) topology. The SONET Ring Service network will consist of fiber optic facilities routed through Local, Alternative Central Office, Internodal, and/or Interoffice Channel facilities that transmit DS1, DS3, OC3, OC3c, and OC12 channel services simultaneously over primary and alternative diverse paths between customer designated locations and Company central offices. Continuous monitoring of the DS1, DS3, OC3, OC3c, and/or OC12 service quality will occur. Detection of a failure within the system will result in automatic self-healing around the point of failure to ensure that the DS1, DS3, OC3, OC3c, and/or OC12 services between locations within the SONET Ring Service network will continue.

SONET Ring Service provides survivable facilities and high speed synchronous optical fiber-based full duplex data transmission capabilities. There are two levels of SONET Ring Service: OC3 is provided at a terminating bit rate of 155.52 Mbps; and OC12 is provided at a terminating bit rate of 622.08 Mbps.

SONET Ring Service is provided for periods of one, three, or five years. When a customer orders SONET Ring Service, the customer and the Company will work cooperatively to plan, engineer, provision and manage SONET Ring Service.

The required format and interface specifications are contained in Technical Reference Publication GR-253.

Current SONET standards do not provide for asynchronous DS3 to DS1 multiplexing. An STS1 channel may be mapped for either one DS3 or 28 DS1s. However, DS1s within a DS3 are not accessible within the SONET architecture, and their performance cannot be guaranteed for this reason. When the customer requests that an OC3 or OC12 service be configured with a combination of DS3 and DS1 channels, a DS3 to DS1 multiplexing arrangement, as set forth in Section A20.F.9.c. 1) will be required.

The customer ordering SONET Ring Service must order a minimum of two nodes, one of which must be a Customer Node and one of which must be a Central Office Node. The maximum number of nodes will be determined by the technical characteristics and capability of the ring configuration requested.

H. SONET RING SERVICE (Cont'd)

1. REGULATIONS (Cont'd)

a. Description of Service (Cont'd)

Customers of SONET Ring Service will need to provide the Company with a matrix detailing the configuration interface assignments desired among the nodes on the dedicated ring. The matrix must provide detail by node, by STS group. This matrix will assist the Company in ensuring that node to node channels are linked appropriately. Customers must provide suitable floor space, controlled environment, and source of non-switched suitable power to support the service.

1) Customer Node

Customer Nodes provide ring switching capabilities at customer designated locations other than the Company central offices that are part of SONET Ring Service. This rate element offers OC3 and OC12 network capacities and is provided with or without Company provided equipment. Customer Node equipment provided by the customer must be compatible with that of the Company. When a customer elects to furnish its own node equipment at the customer's premises, the Company will install a cross-connect device on the Company side of the demarcation point, allowing the customer to connect their node equipment.

2) Central Office Node

Central Office Nodes provide ring switching capabilities at Company central offices that are part of SONET Ring Service. This rate element offers OC3 and OC12 network capacities.

3) Configuration Card

A Configuration Card provides DS1, DS3 and OC3c electrical channelization and/or OC3 and OC12 optical channelization that may take place at each Customer or Central Office Node located on SONET Ring Service. The Configuration Card rate element applies for every interface capacity that originates or terminates at a Customer or Central Office Node. When the customer elects to furnish its own terminal equipment at the Customer Node, the rate for the Configuration Card at the Customer Node does not apply.

H. SONET RING SERVICE (Cont'd)

1. REGULATIONS (Cont'd)

a. Description of Service (Cont'd)

4) Local Channel

The Local Channel provides for the communications path between a Customer Node and the serving wire center of the premises where the Customer Node is located. One Local Channel rate element will apply per customer designated premises for each Local Channel terminated.

Monthly recurring rates for Local Channels apply for each air mile increment of the channel. Air mileage is measured using V&H coordinates between nodes. Fractions of an airline mile are rounded up to the next mile. The minimum charge is one airline mile except when the customer designated premises and the serving wire center are located in the same Company building, or where both customer designated premises are in the same building. In those instances, the Intraoffice Channel charge, as set forth in 8) following, will apply in lieu of the one-mile minimum Local Channel charge.

5) Alternate Central Office Channel

The Alternate Central Office Channel provides for the communications path between a Customer Node and an Alternate Central Office. The primary Central Office Node and any Alternate Central Office Node and applicable Configuration Cards must be associated with the same SONET Ring Service. Monthly recurring rates for Alternative Central Office Channels apply for each air mile increment of the channel. Air mileage is measured using V&H coordinates between nodes. Fractions of an airline mile are rounded up to the next mile. The minimum charge is one airline mile.

6) Interoffice Channel

The Interoffice Channel provides for the communications path between directly connected Company Central Offices located on a SONET Ring Service. This rate element does not apply where Central Office Nodes are adjacently connected in the same central office on the same SONET Ring Service for the purposes of providing additional node capacity. Monthly recurring rates for Interoffice Channels apply for each air mile increment of the channel. Air mileage is measured using V&H coordinates between nodes. Fractions of an airline mile are rounded up to the next mile. The minimum charge is one airline mile.

H. SONET RING SERVICE (Cont'd)

1. REGULATIONS (Cont'd)

a. Description of Service (Cont'd)

7) Internodal Channel

The Internodal Channel provides for the communications path between two directly connected Customer Nodes of a given SONET Ring Service located (a) in the same serving wire center area, (b) in the same office park /campus environment or contiguous property located in contiguous serving wire center areas, or (c) in different serving wire center areas. Monthly recurring rates for Internodal Channels apply for each air mile increment of the channel. Air mileage is measured using V&H coordinates between nodes. Fractions of an airline mile are rounded up to the next mile. The minimum charge is one airline mile.

8) Intraoffice Channel

The Intraoffice Channel provides for the communications path when the customer designated premises and the serving wire center are located in the same Company building, or where both customer designated premises are in the same building. Flat rated monthly recurring rates apply for each Intraoffice Channel.

9) SONET Ring Service Reconfiguration Charge

SONET Ring Service Reconfiguration Charge allows the customer to request that the Company reallocate Configuration Cards located at each Customer or Central Office Node subsequent to the initial service installation.

If a new configuration is requested at the Customer or Central Office Node subsequent to the initial activation, a SONET Ring Service Reconfiguration Charge will apply on a per service basis, as set forth in A20.H.6.a. following. The SONET Ring Service Reconfiguration Charge is in addition to all applicable Configuration Card charges associated with the new configuration.

10) SONET Ring Service Regeneration Charges

Due to the technical limitations of SONET facilities, additional regeneration equipment may be required for essential detection and retransmission of SONET signals between nodes. Additional regeneration equipment will only be provided by the Company when the actual fiber facility distance between the nodes exceeds SONET design limits. A monthly recurring SONET Ring Service Regeneration Charge, as set forth in A20.H.5.e. following, will apply for each regenerator required for the provision of SONET Ring Service.

H. SONET RING SERVICE (Cont'd)

1. REGULATIONS (Cont'd)

a. Description of Service (Cont'd)

11) SONET Ring Service Rearrangements

For service rearrangements involving OC3 or OC12 SONET Ring Service, a charge equal to one half the Optical Service Charge set forth A20.H.6.b. will apply for each Customer or Central Office Node rearranged. The Optical Service Charge recovers the labor involved with designing, provisioning, and installing Customer and Central Office Nodes.

Service rearrangements are changes to existing (installed) services which do not result in either a change in the minimum period requirements or a change in the physical location of the point of termination at a customer designated premises. Changes in the type of service or service termination are treated as disconnects and starts. Changes in the physical location of the point of the termination are treated as moves and are described and charged for as set forth in A20.H.6.d. following.

12) Multiplexed Service Connection

A Multiplexed Service Connection is an arrangement that allows one DS1, DS3, OC3, or OC12 channel of a multiplexed Company service to be connected to one DS1, DS3, OC3, or OC12 channel with like signaling of another Company service. For example, the lesser speed may be a LightLink DS3 channel connected between a multiplexed SONET Ring Service. A Multiplexed Service Connection will be provided at all Company locations where Central Office Multiplexing is performed.

13) Multipoint service is not available with SONET Ring Service.

14) A Channel Service Unit (CSU) or appropriate termination equipment provided by the customer is required at a customer's or authorized user's premises to perform such functions as:

- proper termination of the service
- amplification
- signal shaping
- remote loop-back

15) Unless specified following, the regulations for SONET Ring Service specified herein apply in addition to the regulations set forth in other sections of this tariff.

16) Suspension of Business and Residence Service (Vacation Service) at the customer's request, as defined in Section A2 of this tariff, is not allowed.

c. Connections

- 1) Customer-Provided Terminal Equipment, Customer-Provided Derivation Equipment and Customer-Provided Communications Systems may be connected to SONET Ring Service when such connection is made in accordance with the provisions specified in 2), 3) and 4) following.
- 2) Responsibility of the Company
 - a) The responsibility of the Company shall be limited to the furnishing and maintenance of SONET Ring Service to a network interface on the customer's premises where provision is made for the connection of local service.
 - b) The Company shall not be responsible for installation, operation or maintenance of any terminal equipment or communications systems provided by the customer. SONET Ring Service is not represented as adapted for the use of such equipment or system. Where such equipment or system is connected to Company facilities, the responsibility of the Company shall be limited to the furnishing of facilities suitable for SONET Ring Service and to the maintenance and operation in a manner proper for such digital service. The Company shall not be responsible for:
 - The through transmission of signals generated by such equipment or system, or for the quality of, or defects in, such transmission, or
 - The reception of signals by such equipment or systems, or
 - Damage to terminal equipment or communications systems provided by a customer or authorized user due to testing.
 - c) The Company shall not be responsible to the customer if changes in any of the facilities, operations or procedures of the Company utilized in the provision of SONET Ring Service render any facilities or equipment provided by a customer obsolete, or require modification or alteration of such equipment or system or otherwise affects its use or performance.

c. Connections (Cont'd)

2) Responsibility of the Company (Cont'd)

d) The Company is responsible for maintaining and repairing the facilities it furnishes. The customer may not rearrange, disconnect, remove or attempt to repair any equipment installed by the Company without prior written consent of the Company.

e) In order to maintain the quality of SONET Ring Service, the Company reserves the right to perform preventative maintenance and software updates to the network. The Company has classified maintenance as follows:

(1) Scheduled Maintenance

Scheduled maintenance is performed for functions such as hardware and software upgrades and network optimization. The Company will perform these tasks in a maintenance window that is anticipated to minimize disruption of customer service and activity. The Company will provide advance notice of all scheduled maintenance.

(2) Demand Maintenance

Demand maintenance may occur as a result of unexpected events and is performed when SONET Ring Service network elements are in jeopardy. The Company will perform this type of maintenance at its discretion. Due to the nature of demand maintenance, prior notification may not be possible; however, the customer will be informed when the maintenance has been completed.

3) Responsibility of the Customer

a) The customer is responsible for installing and testing the customer premises equipment or facilities to insure that when they are connected to SONET Ring Service such equipment or facilities are operating properly.

1. REGULATIONS (Cont'd)

c. Connections (Cont'd)

3) Responsibility of the Customer (Cont'd)

b) The operating characteristics of the customer premises equipment or facilities shall be such as to not interfere with any of the services offered by the Company. Such use is subject to the further provisions that the equipment provided by a customer does not: endanger the safety of Company employees or the public; damage, require change in or alteration of the equipment or other facilities of the Company; interfere with the proper functioning of such equipment or facilities; impair the operation of the Company's facilities or otherwise injure the public in its use of the Company's services. Upon notice that the equipment provided by a customer is causing or is likely to cause such hazard or interference, the customer shall take such steps as shall be necessary to remove or prevent such hazard or interference.

c) The customer's responsibility shall include cooperative testing with the Company as may be necessary. Where regeneration and/or equalization adjustments or changes may be required to compensate for rearrangements and/or changes in outside plant facilities, the customer will be responsible for all expenses incurred in changes to his customer premises equipment.

4) Connection of Customer-Provided Terminal Equipment, Customer-Provided Derivation Equipment and Customer-Provided Communications Systems

a) The following provisions will apply:

(1) Customer-Provided Terminal Equipment and/or Customer-Provided Communications Systems may be connected at the premises of the customer to SONET Ring Service.

(2) The customers, by use of their own derivation equipment, may create digital bit streams from SONET Ring Service and such equipment may be connected for transmission of such bit streams when connected through a customer-provided CSU.

(3) The undertaking of the Company is to furnish SONET Ring Service as ordered and specified by the customer except as specified in d) following.

4) Connection of Customer-Provided ... (Cont'd)

b) Connections to Other Services Furnished by the Company to the Same Customer

SONET Ring Service furnished by the Company may be connected by the customer to another service or to other services furnished by the Company as specified in 2) preceding. Connected services are subject to all rules and regulations governing the provisioning of those services.

c) Connections to Other Services Furnished by the Company to Different Customers

The customer may connect at the premises of the customer, to another SONET Ring Service or other services furnished by the Company to different customers as specified in 2) preceding. Connected services are subject to all rules and regulations governing provisioning of those services.

d) Connection of Channel Service Units

A Channel Service Unit (CSU) or appropriate termination equipment must be provided by the customer to connect a Company-provided digital facility. This equipment must comply with the technical requirements outlined in Part 68 of the FCC Rules and Regulations.

e) The customer is responsible for payment of a Trouble Location Charge, as set forth in Section A4 of this tariff, for visits by the Company to the customer's premises when a service difficulty resulting in a trouble report is caused by the use of equipment or facilities provided by the customer.

f) The customer may not rearrange, disconnect, remove or attempt to repair any equipment installed by the Company without the prior written consent of the Company.

g) For maintenance purposes, upon request of the Company, the customer will be responsible for notifying the Company of the type of digital terminating equipment used.

H. SONET RING SERVICE (Cont'd)

2. TERM PLAN

- a. The minimum service period is one year. A term plan provides the customer with discounted rates for SONET Ring Service. SONET Ring Service may be ordered under a term plan for fixed periods of one year, three years, or five years. All rate elements within the same SONET Ring Service facility must be ordered under the same commitment period. The customer must order the term plan in writing to the Company.
- b. The customer must specify the length of the initial service period at the time the service is ordered.
- c. At the end of the term plan the customer may subscribe to a new term plan at the prevailing rates set forth in A20.H.5 following. If the customer does not specify renewal terms in writing 90 days prior to the expiration of the three or five year service period, the commitment period and SONET Ring Service rates for the one year term will automatically be applied. If the customer does not specify renewal terms in writing prior to the expiration of the one year service period, the commitment period and the SONET Ring Service rates in effect at the time of expiration will automatically renew. The customer can terminate SONET Ring Service at the end of the minimum commitment period with no penalty or obligation to continue the service.
- d. Rate increases or decreases will automatically be applied to the monthly term plan rates for the remaining term of the term plan. If Company initiated rate increases to any rate element or combination of rate elements causes the charges for the entire SONET Ring Service under the term plan to increase by 10% or more annually, then the customer may cancel the term plan without incurring termination liability charges provided the customer notifies the Company within 30 days after the effective date of the rate increase.
- e. The customer can extend term plan commitment periods at any time during the term of the plan, up to a maximum of five years. The number of remaining months in the original term plan will become part of the total term in the new term plan.

3. TERMINATION LIABILITY CHARGES

- a. If a customer under a term plan disconnects all or a portion of SONET Ring Service prior to the expiration of the term plan, then a Termination Liability Charge will apply to those services that are disconnected. The Termination Liability Charge will be a one-time charge equal to sum of 50% of the payments remaining for the rest of the term plan.
- b. Customers may move Customer Nodes and/or Central Office Nodes on the SONET Ring Service and not be subject to Termination Liability Charges providing the terms of the term plan are maintained. If charges as specified in A20.H.4.a. following were applied to the service being terminated or moved, any termination or move charges associated with that construction apply, as well as any construction charges at the new location.
- c. Termination Liability Charges will not apply when a service or rate element under a term plan is disconnected prior to the expiration of a selected service period as a result of a change in tariff jurisdiction and/or a customer requested upgrade to a next generation service offering, under the following conditions:
 - 1) The service period of the new term plan for the new service offering is a period equal to or exceeding the remaining service period of the disconnected term plan, and
 - 2) The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between the installation of the new service and the disconnection of the old service, and
 - 3) The service orders to install the new service and disconnect the old service are for the same customer and central office locations.
- d. The Company will determine whether the replacement service qualifies as a next generation service offering.
- e. Nonrecurring charges and Service Charges for the new service will apply according to the requirements of the new service.

H. SONET RING SERVICE (Cont'd)

4. APPLICATION OF RATES

- a. The rates specified for SONET Ring Service in A20.H.5 following contemplate the provision of a digital quality facility utilizing existing interoffice carrier equipment and/or exchange cable facilities compatible with this service. If equipment, new facilities or changes to existing facilities are required for the provision of this service, then charges as specified in Section 5, Charges Applicable Under Special Conditions, will apply in addition to the rates for SONET Ring Service.
- b. The rates and charges for SONET Ring Service are set forth in A20.H.5, following, and are in addition to any applicable rates and charges set forth in other sections of this tariff. The applicable rates for SONET Ring Service include monthly recurring rates and nonrecurring charges, both of which are billed in advance.
- c. Monthly recurring rates for Local, Alternative Central Office Interoffice, and Internodal Channels apply for each air mile increment of the channel. Air mileage is measured using V&H coordinates between nodes. Fractions of an airline mile are rounded up to the next mile. The minimum charge is one airline mile, except when the customer designated premises and the serving wire center are collocated in the Company building, or where both customer designated premises are in the same building. In those instances, the Intraoffice Channel monthly recurring rate would apply rather than the initial one mile minimum.
- d. For Internodal Channels, monthly recurring charges apply, as appropriate, for the same serving wire center area or contiguous serving wire center areas. Monthly recurring rates for Customer and Central Office Nodes apply per node and are based upon the capacity of the ring configuration.
- e. Monthly recurring rates for Configuration Cards apply for each origination and each termination of an activated DS1, DS3, OC3, OC3c, and/or OC12 at the Customer or Central Office Node.
- f. The service period for SONET Ring Service is one, three or five years.
- g. Charges Applicable Under Special Conditions, as set forth in Section 5 of this tariff, may apply where facilities and/or operating conditions do not permit the provision of SONET Ring Service and the customer desires the Company to provision the SONET Ring Service.
- h. Customers may be required to pay Charges Applicable Under Special Conditions when a four fiber optical service configuration is requested in lieu of the two fiber UPSR topology for SONET Ring Service.

Where dual entrance facilities currently exist to a customer premises, special construction charges will not be assessed when the customer requests connection at both entrance facilities.

LINK SERVICES

A. LINK SERVICES

1. GENERAL

- a. DigiLink, TransLink, and LightLink Services are furnished for Private Line IntraLATA Intraexchange and Interexchange communications by the Company.
- b. DigiLink, TransLink, and LightLink Services are for the transmission of digital signals and uses digital transmission facilities.
- c. DigiLink Service provides for the simultaneous two-way transmission of synchronous digital signals at speeds of 19.2 Kbps, 56.0 Kbps, and 64.0 Kbps, where facilities exist.

TransLink Service provides for the simultaneous two-way transmission of isochronous digital signals at speeds of 128 Kbps, 256 Kbps, 384 Kbps, 512 Kbps, and 1.544 Mbps (DS1), where facilities exist.

LightLink Service provides for the simultaneous two-way transmission of isochronous digital signals at speeds of 44.736 Mbps (DS3), where facilities exist.

- d. To ensure satisfactory operation, the terminal equipment provided by the customer must be compatible with the DigiLink, TransLink, and LightLink Service channel facility provided by the Company.
- e. Unless specified following, the regulations for DigiLink, TransLink, and LightLink Services specified herein apply in addition to the regulations set forth in other sections of this tariff.
- f. The rates specified for DigiLink, TransLink, and LightLink Services in A.7. following contemplate the provision of a digital quality facility utilizing existing interoffice carrier equipment and/or exchange cable facilities compatible with this service. If equipment, new facilities or changes to existing facilities are required for the provision of this service, then charges as specified in Section 5, Charges Applicable Under Special Conditions , will apply in addition to the rates for DigiLink, TransLink, and LightLink Services.
- g. Suspension of Service (Vacation Service) as defined in Section 2 of this tariff, is not allowed.
- h. The minimum period for which DigiLink and TransLink Services are furnished and for which charges are applicable is six (6) months. The minimum period for LightLink Service is twelve (12) months.

LINK SERVICES

A. LINK SERVICES

2 REGULATIONS

a. Description of Service

DigiLink Service

- (1) DigiLink Service is furnished for the simultaneous two-way transmission of digital signals at synchronous rates of 19.2 Kbps, 56.0 Kbps, and 64.0 Kbps between two or more points located within a LATA. The required format and interface specifications are contained in Technical Reference Publications TR-NWT-000341 and MDP-326-726.
- (2) DigiLink is furnished for duplex operation only.
- (3) Multipoint service is available with DigiLink Service and involves applications requiring three or more locations.

TransLink Service

- (4) TransLink Service provides a high capacity channel for the transmission of 1.544 Mbps isochronous serial data having a line code of Bipolar Return-to-Zero (BPRZ). TransLink Service is provided between two points located within a LATA. The required format and interface specifications are contained in Technical Reference Publications GR-54 and GR-342.
- (5) Fractional DS1 channels are also available and provide simultaneous, two-way transmission at contiguous bit rates of 128, 256, 384 and 512 Kbps. Fractional DS1 Channels operate over the combined bandwidth of adjacent channels to create a contiguous bit rate. Due to technical limitations associated with the provision of Fractional DS1 Channels, this service will be offered only in end offices where a compatible channel bank exists and the distance between the central office and the customer designated premises is less than or equal to twelve thousand (12,000) feet.
- (6) Multipoint service is not available with TransLink Service.

LightLink Service

- (7) LightLink Service provides a high capacity channel for the transmission of 44.736 Mbps isochronous serial data having a line code of bipolar three zero substitution (B3ZS). LightLink Service is provided between two points located within a LATA. LightLink Service is available utilizing an electrical interface. The interface will have the characteristics of its respective signal at the point of demarcation. The required format and interface specifications are contained in Technical Reference Publication 62508 and 62411, and the associated Addendum TR-INS-000342 and TR-NPL-000054.
- (8) Multipoint service is not available with LightLink Service.

DigiLink, TransLink, and LightLink Services

(11) Service Configurations

There are two types of service configurations over which Link Services are provided: two-point service and multipoint service.

Two-Point Service

A two-point service connects two customer designated premises, either on a directly connected basis or through a hub where multiplexing functions are performed or a customer designated premises.

Applicable rate elements are:

- Channel Terminations
- Channel Mileage (as applicable)
- Optional Features and Functions (when applicable)

The following diagram depicts a two-point service connecting two customer designated premises located 15 miles apart.

Applicable rate elements are:

- Channel Terminations (2 applicable)
- Channel Mileage (1 Termination and 15 Facility)

2 REGULATIONS

a. Description of Service (Cont'd)

DigiLink, TransLink, and LightLink Services (Cont'd)

(11) Service Configurations (Cont'd)

Multipoint Service

Multipoint service connects three or more customer designated premises through a Company hub. There is no limitation on the number of mid-links available with multipoint service. However, when more than three mid-links are provided in tandem, the quality of the service may be degraded. A mid-link is a channel between hubs (i.e., bridging locations).

Applicable rate elements are:

- Channel Terminations (one per customer designated premises)
- Channel Mileage (as applicable between each designated customer premises and the hub, and between hubs)
- Additional Optional Features and Functions (when applicable)

The following diagram depicts a service connecting four customer premises via two customer specified bridging hubs.

2 REGULATIONS (Cont'd)

b. Definitions

- (1) Central Office Bridging Capability - Provides for the parallel connection of one virtual circuit to another virtual circuit without interrupting the integrity or continuity of the first. This service is only available from a Company-designated digital hub.
- (2) Channel Mileage - Channel Mileage provides for the end office equipment and the transmission channel between the Serving Wire Centers associated with two customer designated premises, between a Serving Wire Center associated with a customer designated premises and a Company hub, or between two Company hubs. Channel Mileage is comprised of Channel Mileage Facility (per mile) and Channel Mileage Termination (fixed) rates.
 - (a) Channel Mileage Facility (Per Mile) - The Channel Mileage Facility (per mile) recovers the cost for the transmission path that extends between the Company Serving Wire Centers and/or hub(s) and includes primarily outside plant used to provide the facility.
 - (b) Channel Mileage Termination (Fixed) - Channel Mileage Termination (fixed) recovers the cost for end office equipment associated with terminating the facility (i.e., basic circuit equipment and terminations at Serving Wire Centers).
- (3) Channel Service Unit (CSU) - The term "Channel Service Unit (CSU)" denotes equipment provided by the customer which performs one or more of the following functions: termination of a digital facility, regeneration of digital signals, detection and/or correction of signal format errors and remote loop back.
- (4) Channel Termination – The local facility from the customer's designated premises to the Serving Wire Center.
- (5) Data Amplification – Data Amplification provides for data transmission when the customer is located beyond the normal range for high speed digital data service. Channel Terminations greater than five (5) cable route miles in length for 19.2 Kbps service or three (3) miles in length for 56 Kbps and 64 Kbps service may require circuit repeaters and associated equipment be installed to regenerate the digital signal in order for accurate and acceptable data transmission to occur. The distances given are an indication of the potential requirement for Data Amplification. The actual distance is dependent on decibel (db) loss and not just physical loop length and is a function of the specific Company cable between the Serving Wire Center and the customer's location.

LINK SERVICES

A. LINK SERVICES (Cont'd)

2. REGULATIONS (Cont'd)

b. Definitions (Cont'd)

- (6) Clear Channel Capability (CCC) - The term "Clear Channel Capability" denotes the transport of twenty-four, 64 Kbps channels over a 1.544 Mbps TransLink Service via B8ZS line code format.
- (7) Customer Designated Premises - The term "Customer Designated Premises" denotes the premises specified by the customer for the provision of Link Services.
- (8) DS3 - This denotes a channel service expressed in terms of its digitally encoded data bit rate in accordance with the North American hierarchy of digital signal levels. It has a 44.736 Mbps transmission data rate, and provides for the two-way simultaneous transmission of randomized Non-Return-to-Zero (NRZ) signals with B3ZS format.
- (9) Hub - A hub is a Company designated Serving Wire Center at which bridging or multiplexing functions are performed. The bridging functions performed may be used to connect three or more customer designated premises in a multipoint arrangement. The multiplexing functions are to channelize digital facilities to individual services requiring a lower capacity or bandwidth.
- (10) Multipoint Service - Multipoint service connects three or more customer designated premises through a Company hub. There is no limitation on the number of mid-links available with multipoint service. However, when more than three mid-links are provided in tandem, the quality of the service may be degraded. A mid-link is a channel between hubs (i.e., bridging locations).
- (11) Nonrecurring Charge - A one-time charge for the initial installation, the installation of functions and features and service rearrangements.
- (12) Serving Wire Center - The term "Serving Wire Center" denotes the wire center from which the customer designated premises would normally obtain dial tone from the Company.
- (13) Two-Point Service - A two-point service connects two customer designated premises, either on a directly connected basis or through a hub where multiplexing functions are performed or a customer designated premises.

A. LINK SERVICES (Cont'd)

2. REGULATIONS (Cont'd)

c. Connections

(1) Customer-Provided Terminal Equipment, Customer-Provided Derivation Equipment and Customer-Provided Communications Systems may be connected to DigiLink, TransLink and LightLink Services when such connection is made in accordance with the provisions specified in (2), (3) and (4) following.

(2) Responsibility of the Company

(a) The responsibility of the Company shall be limited to the furnishing and maintenance of DigiLink, TransLink and LightLink Services to a network interface on the customer's premises where provision is made for the connection of local service.

(b) The Company shall not be responsible for installation, operation or maintenance of any terminal equipment or communications systems provided by the customer. DigiLink, TransLink and LightLink Services is not represented as adapted for the use of such equipment or system. Where such equipment or system is connected to Company facilities, the responsibility of the Company shall be limited to the furnishing of facilities suitable for DigiLink, TransLink and LightLink Services and to the maintenance and operation in a manner proper for such digital service. The Company shall not be responsible for:

- The through transmission of signals generated by such equipment or system, or for the quality of, or defects in, such transmission, or
- The reception of signals by such equipment or systems, or
- Damage to terminal equipment or communications systems provided by a customer or authorized user due to testing.

A. LINK SERVICES (Cont'd)

2. REGULATIONS (Cont'd)

c. Connections (Cont'd)

(2) Responsibility of the Company (Cont'd)

(c) The Company shall not be responsible to the customer if changes in any of the facilities, operations or procedures of the Company utilized in the provision of DigiLink, TransLink and LightLink Services render any facilities or equipment provided by a customer obsolete, or require modification or alteration of such equipment or system or otherwise affects its use or performance.

(d) The Company is responsible for maintaining and repairing the facilities it furnishes. The customer may not rearrange, disconnect, remove or attempt to repair any equipment installed by the Company without prior written consent of the Company.

(e) DigiLink, TransLink and LightLink Services are designed to meet or exceed a performance objective of 99% error-free seconds of transmission per 1000 seconds on a daily basis and 99.9% availability on an annual basis when measured through the digital termination equipment.

(f) In order to maintain the quality of DigiLink, TransLink and LightLink Services, the Company reserves the right to perform preventative maintenance and software updates to the network. The Company has classified maintenance as follows:

(i) Scheduled Maintenance

Scheduled maintenance is performed for functions such as hardware and software upgrades and network optimization. The Company will perform these tasks in a maintenance window that is anticipated to minimize disruption of customer service and activity. The Company will provide advance notice of all scheduled maintenance.

(ii) Demand Maintenance

Demand maintenance may occur as a result of unexpected events and is performed when DigiLink, TransLink and LightLink Services network elements are in jeopardy. The Company will perform this type of maintenance at its discretion. Due to the nature of demand maintenance, prior notification may not be possible; however, the customer will be informed when the maintenance has been completed.

A. LINK SERVICES (Cont'd)

2. REGULATIONS (Cont'd)

c. Connections (Cont'd)

(3) Responsibility of the Customer

(a) The customer is responsible for installing and testing the customer premises equipment or facilities to insure that when they are connected to DigiLink, TransLink and LightLink Services such equipment or facilities are operating properly.

(b) The operating characteristics of the customer premises equipment or facilities shall be such as to not interfere with any of the services offered by the Company. Such use is subject to the further provisions that the equipment provided by a customer does not: endanger the safety of Company employees or the public; damage, require change in or alteration of the equipment or other facilities of the Company; interfere with the proper functioning of such equipment or facilities; impair the operation of the Company's facilities or otherwise injure the public in its use of the Company's services. Upon notice that the equipment provided by a customer is causing or is likely to cause such hazard or interference, the customer shall take such steps as shall be necessary to remove or prevent such hazard or interference.

(c) The customer's responsibility shall include cooperative testing with the Company as may be necessary. Where regeneration and/or equalization adjustments or changes may be required to compensate for rearrangements and/or changes in outside plant facilities, the customer will be responsible for all expenses incurred in changes to his customer premises equipment.

(4) Connection of Customer-Provided Terminal Equipment, Customer-Provided Derivation Equipment and Customer-Provided Communications Systems

(a) The following provisions will apply:

(i) Customer-Provided Terminal Equipment and/or Customer-Provided Communications Systems may be connected at the premises of the customer to DigiLink, TransLink and LightLink Services.

c. Connections (Cont'd)

(4) Connection of Customer-Provided ... (Cont'd)

(a) The following provisions will apply: (Cont'd)

(ii) The customers, by use of their own derivation equipment, may create digital bit streams from DigiLink, TransLink and LightLink Services and such equipment may be connected for transmission of such bit streams when connected through a customer-provided CSU.

(iii) The undertaking of the Company is to furnish DigiLink, TransLink and LightLink Services as ordered and specified by the customer except as specified in (d) following.

(b) Connections to Other Services Furnished by the Company to the Same Customer

DigiLink, TransLink and LightLink Services furnished by the Company may be connected by the customer to another service or to other services furnished by the Company as specified in (2) preceding. Connected services are subject to all rules and regulations governing the provisioning of those services.

(c) Connections to Other Services Furnished by the Company to Different Customers

The customer may connect at the premises of the customer, to another DigiLink, TransLink and LightLink Services or other services furnished by the Company to different customers as specified in (2) preceding. Connected services are subject to all rules and regulations governing provisioning of those services.

(d) Connection of Channel Service Units

A Channel Service Unit (CSU) or appropriate termination equipment must be provided by the customer to connect a Company-provided digital facility. This equipment must comply with the technical requirements outlined in Part 68 of the FCC Rules and Regulations.

GENERAL EXCHANGE TARIFF

2. REGULATIONS (Cont'd)

c. Connections (Cont'd)

(4) Connection of Customer-Provided ... (Cont'd)

- (e) The customer shall be responsible for payment of a trouble location charge, as set forth in Section A4 of this tariff, for visits by the Company to the Customer's premises where the service difficulty or trouble report results from the use of equipment or facilities provided by the Customer.
- (f) The customer may not rearrange, disconnect, remove or attempt to repair any equipment installed by the Company without the prior written consent of the Company.
- (g) For maintenance purposes, upon request of the Company, the customer will be responsible for notifying the Company of the type of digital terminating equipment used.

3. TERM DISCOUNT PLAN (TDP)

- a. A Term Discount Plan (TDP) provides the customer with discounted rates for DigiLink, TransLink and LightLink Services. DigiLink, TransLink and LightLink Service may be ordered under a TDP for fixed periods of 12 - 23 months, 24 - 35 months, 36 - 59 months, and 60 - 84 months. For LightLink Service, month-to-month rates may apply only after the expiration of a TDP. All rate elements within the same DigiLink, TransLink and LightLink Service facilities must be ordered under the same commitment period and under the same service date. The customer must order the TDP in writing to the Company. A TDP may be ordered in one-month increments, (e.g. a 28-month commitment period or a 37-month commitment period).
- b. The customer must specify the length of the initial service period at the time the service is ordered. When a customer converts to a TDP, Nonrecurring Charges do not apply toward facilities in-service at that time. If a customer converts from month-to-month rates to a TDP or upgrades from one TDP to another, Nonrecurring Charges and Service Ordering Charges do not apply.
- c. At the end of the TDP the customer may subscribe to a new TDP at the prevailing rates set forth in A.7. following. If the customer does not select a new TDP, the rates will convert to the prevailing month-to-month rates.

SECTION A21
First Revised Sheet 14
Cancelling Original Sheet 14
Effective: January 6, 2003

LINK SERVICES

A. LINK SERVICES (Cont'd)

3. TERM DISCOUNT PLAN (TDP) (Cont'd)

- d. Rate increases or decreases will automatically be applied to the monthly term plan rates for the remaining term of the TDP. If Company initiated rate increases to any rate element or combination of rate elements causes the charges for the entire DigiLink, TransLink or LightLink Service under the TDP to increase by 10% or more annually, then the customer may cancel the TDP without incurring termination liability charges provided the customer notifies the Company within 30 days after the effective date of the rate increase.
- e. The customer can extend TDP commitment periods at any time during the term of the plan, up to a maximum of 84 months. The number of remaining months in the original term plan will become part of the total term in the new term plan.

4. TERMINATION LIABILITY CHARGES

- a. If a customer under a Term Discount Plan (TDP) disconnects all or a portion of DigiLink, TransLink or LightLink Service prior to the expiration of the TDP, then a Termination Liability Charge will apply to those services that are disconnected. The Termination Liability Charge will be a one-time charge equal to sum of 50% of the payments remaining for the rest of the TDP.
- b. Customers may move Channel Terminations and not be subject to Termination Liability Charges providing the terms of the TDP are maintained. If charges as specified in A.1.f. were applied to the service being terminated or moved, any termination or move charges associated with that construction apply, as well as any construction charges at the new location.
- c. Termination Liability Charges will not apply when a service or rate element under a TDP is disconnected prior to the expiration of a selected service period as a result of a change in tariff jurisdiction and/or a customer requested upgrade to a next generation service offering, under the following conditions:
 - (1) The service period of the new TDP for the new service offering is a period equal to or exceeding the remaining service period of the disconnected TDP, and
 - (2) The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between the installation of the new service and the disconnection of the old service, and
 - (3) The service orders to install the new service and disconnect the old service are for the same customer at the same location.
- d. The Company will determine whether the replacement service qualifies as a next generation service offering.
- e. Nonrecurring charges and Service Ordering Charges for the new service will apply according to the requirements of the new service.

LINK SERVICES

A. LINK SERVICES (Cont'd)

5. RATE CATEGORIES

DIGILINK SERVICE

There are two rate categories which apply to DigiLink Service:

- Channel Termination
- Channel Mileage

a. Channel Termination

The Channel Termination rate category provides for the communications path between a customer designated premises and the Serving Wire Center. Included as part of the Channel Termination is a standard channel interface arrangement which defines the technical characteristics associated with the type of facilities to which the service is to be connected at the point of termination (POT) and the type of signaling capability if any. The signaling capability itself is provided as a part of this rate category. One Channel Termination charge applies per customer designated premises at which the channel is terminated. Channel Termination charges are set forth in A.7.a.

b. Channel Mileage

The Channel Mileage rate category provides for the end office equipment and the transmission channel between the Serving Wire Centers associated with two customer designated premises, between a Serving Wire Center associated with a customer designated premises and a Company hub, or between two Company hubs. Channel Mileage rates are made up of the Channel Mileage Facility (per mile) rate and the Channel Mileage Termination (fixed) rate. Channel Mileage charges are set forth in A.7.b.

(1) Channel Mileage Facility (Per Mile)

The Channel Mileage Facility (per mile) rate recovers the cost for the transmission path, which extends between the Company Serving Wire Centers and/or hub(s) and includes primarily outside plant used to provide the facility.

(2) Channel Mileage Termination (Fixed)

The Channel Mileage Termination (fixed) rate recovers the cost for end office equipment associated with terminating the facility (i.e., basic circuit equipment and terminations at Serving Wire Centers). The Company applies a 50% billing percentage to the channel mileage fixed rate on jointly owned circuits, and applies 100% on wholly owned circuits. When the Channel Mileage Facility (per mile) is zero (i.e., collocated Serving Wire Centers), neither the Channel Mileage Facility (per mile) rate nor the Channel Mileage Termination (fixed) rate will apply.

5. RATE CATEGORIES (Cont'd)

TRANSLINK SERVICE

There are two rate categories which apply to TransLink Service:

- Channel Termination
- Channel Mileage

c. Channel Termination

The Channel Termination rate category provides for the communications path between a customer designated premises and the Serving Wire Center. Included as part of the Channel Termination is a standard channel interface arrangement which defines the technical characteristics associated with the type of facilities to which the service is to be connected at the point of termination (POT) and the type of signaling capability if any. The signaling capability itself is provided as a part of this rate category. One Channel Termination charge applies per customer designated premises at which the channel is terminated. Channel Termination charges are set forth in A.7.a.

d. Channel Mileage

The Channel Mileage rate category provides for the end office equipment and the transmission channel between the Serving Wire Centers associated with two customer designated premises, between a Serving Wire Center associated with a customer designated premises and a Company hub, or between two Company hubs. Channel Mileage rates are made up of the Channel Mileage Facility (per mile) rate and the Channel Mileage Termination (fixed) rate. Channel Mileage charges are set forth in A.7.b.

(1) Channel Mileage Facility (Per Mile)

The Channel Mileage Facility (per mile) rate recovers the cost for the transmission path, which extends between the Company Serving Wire Centers and/or hub(s) includes primarily outside plant used to provide the facility.

(2) Channel Mileage Termination (Fixed)

The Channel Mileage Termination (fixed) rate recovers the cost for end office equipment associated with terminating the facility (i.e., basic circuit equipment and terminations at Serving Wire Centers). The Company applies a 50% billing percentage to the channel mileage fixed rate on jointly owned circuits, and applies 100% on wholly owned circuits. When the Channel Mileage Facility (per mile) is zero (i.e., collocated Serving Wire Centers), neither the Channel Mileage Facility (per mile) rate nor the Channel Mileage Termination (fixed) rate will apply.

5. RATE CATEGORIES (Cont'd)

LIGHTLINK SERVICE

There are two rate categories which apply to LightLink Service:

- Channel Termination
- Channel Mileage

e. Channel Termination

The Channel Termination rate category provides for the communications path between a customer designated premises and the Serving Wire Center. Included as part of the Channel Termination is a standard channel interface arrangement which defines the technical characteristics associated with the type of facilities to which the service is to be connected at the point of termination (POT) and the type of signaling capability if any. The signaling capability itself is provided as a part of this rate category. One Channel Termination charge applies per customer designated premises at which the channel is terminated. The charges applicable to the Channel Termination vary based on distance, as set forth in A.7.a. following.

f. Channel Mileage

The Channel Mileage rate category provides for the end office equipment and the transmission channel between the Serving Wire Centers associated with two customer designated premises, between a Serving Wire Center associated with a customer designated premises and a Company hub, or between two Company hubs... Channel Mileage rates are made up of the Channel Mileage Facility (per mile) rate and the Channel Mileage Termination (fixed) rate. Channel Mileage charges are set forth in A.7.b.

(1) Channel Mileage Facility (Per Mile)

The Channel Mileage Facility (per mile) rate recovers the cost for the transmission path, which extends between the Company Serving Wire Centers and/or hub(s) includes primarily outside plant used to provide the facility.

(2) Channel Mileage Termination (Fixed)

The Channel Mileage Termination (fixed) rate recovers the cost for end office equipment associated with terminating the facility (i.e., basic circuit equipment and terminations at Serving Wire Centers). The Company applies a 50% billing percentage to the channel mileage fixed rate on jointly owned circuits, and applies 100% on wholly owned circuits. When the Channel Mileage Facility (per mile) is zero (i.e., collocated Serving Wire Centers), neither the Channel Mileage Facility (per mile) rate nor the Channel Mileage Termination (fixed) rate will apply.

A. LINK SERVICES (Cont'd)

5. RATE CATEGORIES (Cont'd)

g. Optional Features and Functions - Applicable to TransLink and LightLink Service

Optional Features and Functions may be added to improve the quality or utility to meet the customer's specific communications requirements. These are not necessarily identifiable with specific equipment, but rather represent the end result in terms of performance characteristics, which may be obtained. These characteristics may be obtained by using various combinations of equipment. Optional Features and Functions that are available include the following:

(1) Central Office Multiplexing

DS3 to DS1 - An arrangement that converts a 44.736 Mbps channel to 28 DS1 channels using digital time division multiplexing. Central Office Multiplexing is not available at the customer's premises.

DS1 to DS0 - An arrangement that converts a 1.544 Mbps channel to 24 64.0 Kbps channels utilizing digital time division multiplexing. Central Office Multiplexing is not available at the customer's premises.

(2) Clear Channel Capability (CCC)

Clear Channel Capability (CCC) is an arrangement that alters a DS1/1.544 Mbps signal with unconstrained information bits to meet pulse density requirements outlined in Technical Reference Publications GR-54 and GR-342. This will allow a customer to transport an all zero octet over a DS1/1.544 Mbps channel providing an available combined maximum 1.536 Mbps data rate. This arrangement requires the customer signal at the channel interface to conform to Bipolar with 8 Zero Substitution (B8ZS) line code as described in Technical Reference Publications GR-54 and GR-342.

CCC is provided on DS1/1.544 Mbps channels of a TransLink and LightLink Service facility between two customer designated premises and is subject to the availability of facilities. This optional feature may be ordered at the same time the TransLink and LightLink Service channel is ordered, or it may be ordered as an additional feature of an existing TransLink and LightLink Service channel.

LINK SERVICES

A. LINK SERVICES (Cont'd)

5. RATE CATEGORIES (Cont'd)

g. Optional Features and Functions - Applicable to TransLink and LightLink Service (Cont'd)

(3) Extended Superframe Format (ESF)

The ESF optional feature is available at suitably equipped end offices, and passes a customer provided framing format for 1.544 Mbps service. ESF extends the customer's 1.544 Mbps framing structure from twelve (12) to twenty-four (24) frames and divides the 8 Kbps 193rd bit position pattern into three distinct functionalities: 2 Kbps for frame synchronization, 2 Kbps for cyclic redundancy checking, and 4 Kbps used primarily for performance monitoring information.

(4) Multiplexed Service Connection

For TransLink Service, a Multiplexed Service Connection is an arrangement that allows one DS0 channel of a multiplexed Company service to be connected to one DS0 channel with like signaling of another Company service. A Multiplexed Service Connection will be provided at all Company locations where Central Office Multiplexing is performed.

For LightLink Service, a Multiplexed Service Connection is an arrangement that allows one DS1 channel of a multiplexed Company service to be connected to one DS1 channel with like signaling of another Company service. For example, the lesser speed may be an ISDN-PRI DS1 channel connected between a multiplexed DS3 service. A Multiplexed Service Connection will be provided at all Company locations where Central Office Multiplexing is performed.

Effective: January 6, 2003

LINK SERVICES

A. LINK SERVICES (Cont'd)

6. APPLICATION OF RATES

DIGILINK SERVICE

- a. Each DigiLink Service facility may be comprised of two or more Channel Terminations. Where both customer premises are served by the same Serving Wire Center, the service will consist of two or more Channel Terminations. Where each customer premises is served by different Serving Wire Centers, the service will consist of two or more Channel Terminations, one Channel Mileage Termination (fixed) and the Channel Mileage Facility (per mile) between Serving Wire Centers and/or hub(s).
- b. Intraexchange channels furnished between Company central offices will be charged at rates based on airline distance between the central offices. Interexchange channels will be charged at rates based on airline distance between Company central offices. Fractional mileage will be rounded up to the next full mile. The mileage measurement is determined by utilizing exchange maps and mileage tables located in designated Company offices for such purposes.
- c. Whenever facilities are provided jointly by the Company and another telephone company, the regulations, rates and charges of the other telephone company shall apply for the equipment and facilities furnished by the other telephone company for use in connection with DigiLink Service. The Company applies a 50% billing percentage to the Channel Mileage Termination (fixed) rate on jointly owned circuits, and applies 100% on wholly owned circuits. When the Channel Mileage Facility (per mile) is zero (i.e., collocated Serving Wire Centers), neither the Channel Mileage Facility (per mile) rate nor the Channel Mileage Termination (fixed) rate will apply.
- d. Data Amplification provides for data transmission when the customer is located beyond the normal range for high speed digital data service. Local channel terminations greater than five (5) cable route miles in length for 19.2 Kbps service or three (3) miles in length for 56 Kbps and 64 Kbps service may require circuit repeaters and associated equipment be installed to regenerate the digital signal in order for accurate and acceptable data transmission to occur. The distances given are an indication of the potential requirement for Data Amplification. The actual distance is dependent on decibel (db) loss and not just physical loop length and is a function of the specific Company cable between the serving wire center and the customer's location. Applications requiring Data Amplification may also require special construction charges, Charges Applicable Under Special Conditions, as specified in Section A5 of this tariff.
- e. One Central Office Bridging Capability charge applies per port. When more than one Serving Wire Center is involved, the origin of the bridge(s) will dictate if there are additional interoffice transport charges (i.e., Channel Mileage Facility, Per Mileage). Refer to diagrams in A.2.a.(11) preceding.

6. APPLICATION OF RATES (Cont'd)

LIGHTLINK SERVICE

- i. Each LightLink Service facility may be comprised of one or two Channel Terminations. Where both customer premises are served by the same Serving Wire Center, the service will consist of two Channel Terminations. Where each customer premises is served by different Serving Wire Centers, the service will consist of two Channel Terminations, one Channel Mileage Termination (fixed) and the Channel Mileage Facility (per mile) between Serving Wire Centers and/or hub(s). Where one customer premises is involved, the Channel Termination of a lower bandwidth service can be replaced with a LightLink Service Channel Termination. For example, the Channel Termination associated with ISDN-PRI Service, referred to as an ISDN-PRI Primary Rate Access Line, can be replaced with a LightLink Service Channel Termination to connect the ISDN-PRI Service to the Serving Wire Center of the customer's designated premises.
- j. The Channel Termination rate element for LightLink Service will vary based on distance. The mileage used to determine the monthly rate for Channel Terminations located outside a Company central office is the airline distance between the customer's designated premises and the Company's Serving Wire Center. The mileage measurement is determined by utilizing exchange maps and mileage tables located in designated Company offices for such purposes.
- k. Intraexchange channels furnished between Company central offices will be charged at rates based on airline distance between the central offices. Interexchange channels will be charged at rates based on airline distance between Company central offices. Fractional mileage will be rounded up to the next full mile.
- l. Whenever facilities are provided jointly by the Company and another telephone company, the regulations, rates and charges of the other telephone company shall apply for the equipment and facilities furnished by the other telephone company for use in connection with LightLink Service. The Company applies a 50% billing percentage to the Channel Mileage Termination (fixed) rate on jointly owned circuits, and applies 100% on wholly owned circuits. When the Channel Mileage Facility (per mile) is zero (i.e., collocated Serving Wire Centers), neither the Channel Mileage Facility (per mile) rate nor the Channel Mileage Termination (fixed) rate will apply.

GENERAL EXCHANGE TARIFF

Embarq Florida, Inc.

By: F.B. Poag
Director

Section A22
First Revised Sheet 1
Cancelling Original Sheet 1
Effective: January 1, 1997

LOCAL TELEPHONE SERVICE FOR STATE OF FLORIDA GOVERNMENTAL AGENCIES (CENTRAL TELEPHONE ONLY)

A. GENERAL PROVISIONS

1. General

This section of the tariff covers the Service Agreement between Embarq Florida, Inc., (the Company) and the Division of Communications of the Department of Management Services of the State of Florida or successor agencies (the Customer or the State) for and in behalf of all state agencies in the Tallahassee exchange, and specifying the arrangement under which local telephone service is furnished to such state agencies. This tariff covers the central office switching and associated peripheral equipment.

2. Service

Service furnished the Customer under this tariff shall be for the exclusive use of the State of Florida, its agencies, their respective officials, employees and others as may be authorized by law. Any service furnished to other tenants or occupants of the premises of the Customer will be furnished under separate agreements between the Company and said tenants or occupants.

3. Right of Ingress and Egress

The Company, its duly authorized agents and employees, shall have the right, free of any rental or charge, of ingress and egress upon State property as may be required by the Company for the furnishing of services and equipment as required by this Section, and all right-of-way on State property as may be required by the Company for the furnishing of services and equipment as required by this Section of the tariff. All right-of-way on State property for distribution of communications facilities required by this tariff shall be furnished free of cost to the Company. Electrical current required to operate Company equipment located on the Customer's premises shall be furnished at no charge to the Company.

Section A22
First Revised Sheet 2
Cancelling Original Sheet 2
Effective: January 1, 1997

LOCAL TELEPHONE SERVICE FOR STATE OF FLORIDA
GOVERNMENTAL AGENCIES (CENTRAL TELEPHONE ONLY)

A. GENERAL PROVISIONS (Cont'd)

4. Conduit and Terminal Boxes

All conduit, duct, moulding, and terminal boxes necessary on the Customer's premises shall be provided, installed, and maintained at the expense of the Customer. The premises property line is considered the point of connection for outside duct or conduit.

5. Training

The Company shall provide, at no additional cost, centrex access line feature training during the term of the Service Agreement. Terminal equipment training is covered in the Service Agreement.

6. Definitions

"Exchange", "exchange area", "premises" or "Customer Provided Communications Systems", "service charges", "initial nonrecurring charges (I.N.C.s)", and other terms shall have the same meaning as used by the Company in its other tariff sections.

B. DURATION AND TERMINATION

1. Duration

This tariff shall be in full force and effect for a period of seven years commencing on August 1, 1992. Upon completion of this term, this tariff shall remain in effect on a month-to-month basis until the Service Agreement is canceled in writing by either party. During the term of the Service Agreement, Section A22 of this Tariff shall not be changed unless by mutual agreement of the parties or as a result of a Florida Public Service Commission action taken after the commencement date of this Service Agreement.

Section A22
First Revised Sheet 3
Cancelling Original Sheet 3
Effective: January 1, 1997

LOCAL TELEPHONE SERVICE FOR STATE OF FLORIDA
GOVERNMENTAL AGENCIES (CENTRAL TELEPHONE ONLY)

B. DURATION AND TERMINATION (Cont'd)

2. Termination

The Customer may terminate service covered by this tariff and the Service Agreement, before installation of the services is completed, by payment to the Company of all costs related to the service which have been incurred by the Company at the time of the termination.

C. SERVICE AND CHARGES

1. Service Area

The Company agrees to connect the system with the Company's central offices in Tallahassee, Florida by means of central office facilities and to furnish service in the Tallahassee exchange area.

2. Additional Services

Additional equipment and services ordered after the effective date of the Service Agreement shall be furnished at rates and charges to be determined at the time the additional services and equipment are ordered.

3. System Features

Service furnished to the Customer by the Company shall consist of a system with options and features as listed in A22.F of this tariff. This tariff covers switching equipment only, telephone instruments and/or other terminal equipment may be provided under a separate contract or agreement. The rates contained in this tariff do not include any applicable taxes, including but not limited to, the Florida Gross Receipts Tax.

GOVERNMENTAL AGENCIES (CENTRAL TELEPHONE ONLY)

C. SERVICE AND CHARGES (Cont'd)

4. Legislative Appropriation

The State of Florida's performance and obligation to pay under this contract is contingent upon an annual appropriation by the Legislature.

D. MISCELLANEOUS PROVISIONS

1. Maintenance of Repair

All ordinary expense of maintenance and repairs, unless otherwise specified in this tariff is borne by the Company. In case of damage, loss, theft, or destruction of any of the Company's property due to the negligence or willful act of the subscriber, and not due to ordinary wear and tear or causes beyond the control of the subscriber, the subscriber shall be required to pay the expense incurred by the Company in connection with the replacement of the property damaged, lost, stolen, or destroyed, or the expense incurred in restoring it to its original condition, subject to the limitations of Section 768.28, Florida Statutes (1985).

2. Limitation of Service

Service and equipment shall be provided on conditions agreed to by the Customer and the Company governing the manner and type of use by the Customer. The Customer is limited by statute, regulation and tariffs from using service or equipment illegally or to the detriment of other persons, the telephone network or the equipment itself.

D. MISCELLANEOUS PROVISIONS (Cont'd)

3. Indemnification

The Company shall not be responsible to the Customer for any and all claims of third parties which arise from the provision, interruption, or use of service equipment or listings.

4. Transfer of Rights

The Customer shall not assign, transfer, pledge or hypothecate its rights hereunder without prior written consent of the Company.

5. Verbal Representation

The Customer agrees that no verbal representation of any salesman, agent, officer or employee of the Company shall operate to vary the written terms hereof.

6. Tariff References

References made to other specific tariff sections and sheets refer to the reference location in effect on the date the Service Agreement was signed.

Tariff reference locations may be subsequently changed due to format or content changes approved by the Florida Public Service Commission.

f. UCD Queue-Status Lamp

When assigned to a Uniform Call Distribution (UCD) group, this option provides an indication at the customer's premises of how long the first call in the incoming call queue has been waiting for an agent.¹

	Monthly <u>Rate</u>
Rate Per Lamp	\$ 2.05

g. Customer Specific Recorded Announcements

In offices equipped with the technology and capacity; digital recorded announcement machines may be utilized to program announcements for use in conjunction with such features as Uniform Call Distribution (UCD), Automatic Call Distribution (ACD), Enhanced UCD and Enhanced ACD. The rate is based on each "one-second" of announcement time and the Company reserves the right to limit the length of the announcement based upon available capacity. The subscriber is responsible for providing the desired announcement phraseology; however, the subscriber shall exclude from the message or announcement any matter the dissemination of which is prohibited by law, including, but not limited to, any communication which is prohibited by Section 365.161, Florida Statutes.

	<u>NRC</u>	Monthly <u>Rate</u>
Per Announcement Second	---	\$ 6.04

Note 1: Charges for a dedicated facility, as noted in Section A20, shall also apply.

j. Thirty Port Conference - Department of Transportation

This feature is provided for the use of the Department of Transportation and can accommodate up to thirty conferees. The feature is activated when the first caller dials a designated directory number at a specified time, establishes a connection, and is then joined by other callers from remote locations.

	<u>NRC</u>	<u>Monthly Rate</u>
Feature Rate	---	\$960.00

k. Call Controller¹

Call Controller is a fully featured, multi-level automated attendant system. The caller utilizes Call Controller by listening to voice menus and entering telephone keypad responses. The Call Controller System has the ability to interface with telephone instruments, Voice Mail, and Voice Bulletin Boards.

Note 1: All non-recurring charges are in addition to the applicable service ordering charges contained in Section A4 of this Tariff. If additional cells are installed coincident with initial installation, the \$50 NRC does not apply. When multiple additional cells are installed on the same order, on the same due date, at the same location and on the same automated attendant, only one NRC of \$50 is applicable.

F. SYSTEM FEATURES

1. Type System

Service shall be provided by a Northern Telecom DMS-100 Digital Centrex System and shall have the capability to provide the features as listed below. The features listed in A22.F.3. following are included in the basic assess line or trunk rate.

The software feature package identifiers listed in A22.F.3. are in accordance with Northern Telecom feature descriptions, through BCS-32 Supplement, Issue 4, and are included as the basic features during the length of the Service Agreement. The Company will continue to update the basic feature packages through the Northern Telecom BCS software upgrade process (enhancements to existing features). New or future software features required by the State will be added in accordance with the Service Agreement between the State and the Company.

2. The system shall conform to service standards as defined by the Florida Public Service Commission rules and regulations.

3. Features

NTX100AA MDC Basic¹

G. TRUNK EQUIVALENCY FOR SUBSCRIBER LINE CHARGE (SLC)

1. General

In compliance with Section 4 of the Interstate Access Tariff for Digital Centrex Subscriber Line Charges (Central Telephone), but to achieve rates based on a trunk equivalency basis, the Customer's SLC will be adjusted to reflect the rates as shown in the Trunk Equivalency Table. The SLC is in addition to the monthly rate for the access line. In cases where the number of virtual trunks provided exceeds the equivalent number of trunks shown in the table for a customer's corresponding line quantity, the customer will be billed one SLC for each virtual trunk provided.

2. Trunk Equivalency Table for Subscriber Line Charge

Director

Section A24
Second Revised Sheet 1
Cancelling First Revised Sheet 1
Effective: July 31, 1997

LOCAL TELEPHONE SERVICE FOR FLORIDA STATE UNIVERSITY
(CENTRAL TELEPHONE)

A. GENERAL PROVISIONS

1. General

This section of the tariff covers an Agreement (as amended, if necessary, to provide 311 Service) between Embarq Florida, Inc. (the Company) and Florida State University or its successor agencies (the Customer or the University) specifying the arrangement under which local telephone service is furnished to Florida State University.

2. Service

Service furnished the Customer under this tariff shall be for the exclusive use of the University, its agencies, their respective officials, employees and others as may be authorized by law (including 311 Service). Any service furnished to other tenants or occupants of the premises of the Customer will be furnished under separate Agreements between the Company and said tenants or occupants.

3. Right of Ingress and Egress

The Company, its duly authorized agents and employees, shall have the right of ingress and egress upon University property as may be required by the Company for the furnishing of services as required by this section, and all right of way on University property as may be required by the Company for the furnishing of services and equipment as required by this section of the tariff. All right of way on University property for distribution of communications facilities required by this tariff shall be furnished free of cost to the Company.

Effective: July 31, 1997

LOCAL TELEPHONE SERVICE FOR FLORIDA STATE UNIVERSITY
(CENTRAL TELEPHONE)

A. GENERAL PROVISIONS (Cont'd)

4. Conduit and Terminal Boxes

All conduit, duct, molding, and terminal boxes necessary on the Customer's premises shall be provided, installed, and maintained at the expense of the Customer. The premises property line is considered the point of connection for outside duct or conduit.

5. Training

The Company shall provide additional training for new system features. The customer, however, shall be solely responsible for all training associated with any aspect of implementation or operation of 311 Service. The Company shall have no responsibility whatsoever for the training of the customer or the end users of customer provided 311 Service.

6. Definitions

"Exchange", "exchange area", "premises" or "Customer provided communications systems", "service charges", "initial non recurring charges (I.N.C.s)", and other terms shall have the same meaning as used by the Company in its other tariff sections.

B. DURATION AND TERMINATION

1. Duration

This tariff shall be in full force and effect for a period of six years commencing July 1, 1994, or from the date of approval by the Florida Public Service Commission. Upon completion of this term, this tariff shall remain in effect on a month-to-month basis until the Memorandum of Understanding is cancelled in writing by either party. During the term of Agreement the tariff shall not be changed unless by mutual agreement of the parties or as a result of a Florida Public Service Commission action taken after the commencement date of this Service Agreement.

B. DURATION AND TERMINATION (Cont'd)

2. Service Availability

The Company agrees to provide the basic service and enhanced services as listed in paragraph A24.F.1 of this tariff as they become available from the manufacturer.

3. Termination

The Customer may terminate service covered by this tariff before installation of the services is completed, by payment to the Company of all costs related to the service which have been incurred by the Company at the time of the termination.

C. SERVICE AND CHARGES

1. Service Area

The Company agrees to connect the system with the Company's central offices in Tallahassee, Florida by means of central office facilities and to furnish service in the Tallahassee exchange area.

2. Additional Services

Additional equipment and services ordered after the effective date of the service agreement shall be furnished at rates and charges to be determined at the time the additional services and equipment are ordered.

3. System Features

Service furnished to the Customer by the Company shall consist of a system with options and features as those defined in paragraph A24.F.1 of this tariff.

C. SERVICES AND CHARGES (Cont'd)

4. Legislative Appropriation

The University's performance and obligation to pay under this contract is contingent upon an annual appropriation by the Legislature.

5. 311 Service

- a. The Company shall furnish the capability of all 644 and 853 telephone numbers served under this section and located in the 311 Service Area as defined in A24 H.3. following to dial 311, and through appropriate translations, to reach the designated answering point within the Florida State University Police Station.
- b. The service shall be provided in accordance with FCC Order Number 97-51, issued February 19, 1997. Responsibility for compliance with the requirements of Order 97-51 shall be solely the customers. Continuing availability of the service for the customer's use shall be subject to Florida Public Service Commission determination, in the event a conflict arises with another jurisdiction entitled to use of the 311 code under Order 97-51.
- c. The Company has no responsibility to provide 311 Service for calls originating from a CMRS provider (as defined in 47 CFR 20.3).
- d. The Company's responsibility to provide 311 Service through pay telephone calls placed within the 311 Service areas shall be limited to providing the appropriate Centrex translations for lines serving such payphones.

5. 311 Service (Cont'd)

- e. The Company will have no responsibility for the delivery of Automatic Number Identification (ANI), Automatic Location Identification (ALI), or Calling Party Number (CPN) as part of the provision of 311 Service. The Company will have no responsibility for any regulatory compliance associated with the delivery or blocking of CPN.
- f. The service is furnished to municipalities and other governmental agencies only for the purpose of voice reporting events by the public in accordance with FCC Order 97-51.
- g. This service is offered solely as an aid in handling non-emergency assistance calls in accordance with FCC Order Number 97-51 and does not create any relationship or obligation, direct or indirect, to any person other than the customer contracting for 311 Service. In the event of any interruption of the service, the Company shall not be liable to any person, corporation or other entity for any loss or damage in an amount greater than an amount equal to the pro rata allowance of the tariff rate for the service or facilities provided to the customer for the time such interruption continues, after notice to the Company. No allowance shall be made if the interruption is due to the negligence or willful act of the customer of the service.

5. 311 Service (Cont'd)

- h. The provision of 311 Service does not contemplate the constant monitoring or inspection of facilities to discover errors, defects, and malfunctions in the service, nor does the Company undertake such responsibility. The customer shall make such operational tests as, in the judgment of the customer, are required to determine whether the system is functioning properly for its use. The customer shall be responsible for determining whether facilities are adequate to handle the volume of calls received and for the ordering of any additional facilities or services under this tariff or elsewhere.
- i. The Company's entire liability to any person for interruption or failure of 311 Service shall be limited to the terms set forth in this section and other sections of this Tariff.
- j. Where a 311 call is placed by the calling party via interconnection with a carrier other than the Company, the Company cannot guarantee the completion of said 311 call, the quality of the call or any features that may otherwise be provided with 311 Service.

D. MISCELLANEOUS PROVISIONS

1. Maintenance and Repair

All ordinary expense of maintenance and repairs of the system, unless otherwise specified in this tariff is borne by the Company. In case of damage, loss, theft, or destruction of any of the Company's property due to the negligence or willful act of the subscriber, and not due to ordinary wear and tear or causes beyond the control of the subscriber, the subscriber shall be required to pay the expense incurred by the Company in connection with the replacement of the property damaged, lost, stolen, or destroyed, or the expense incurred in restoring it to its original condition, subject to the limitations of Section 768.28, Florida Statutes (1985).

2. Limitations of Service

Service shall be provided on conditions agreed to by the Customer and the Company governing the manner and type of use by the Customer. The Customer is limited by statute, regulation and tariffs from using service or equipment illegally or to the detriment of other persons, the telephone network or the equipment itself.

D. MISCELLANEOUS PROVISIONS (Cont'd)

3. Indemnification

The Company shall not be responsible to the Customer for any and all claims of third parties which arise from the provision, interruption, or use of service equipment or listings.

4. Transfer of Rights

The Customer shall not assign, transfer, pledge or hypothecate its rights hereunder without prior written consent of the Company.

5. Verbal Representation

The Customer agrees that no verbal representation of any salesman, agent, officer or employee of the Company shall operate to vary the written terms hereof.

6. Tariff References

References made to other specific tariff sections and sheets refer to those in effect on the date the Agreement was signed for this section.

Reference locations may be subsequently changed due to format or content changes approved by the Florida Public Service Commission.

E. RATES AND CHARGES

1.	Access Lines	<u>Monthly Rate</u>
a.	Access line, each	\$ 12.44
b.	LEN line, each (Line Equipment Number)	12.44
c.	Access trunk, each Basic trunk only, does not include Digital Centrex (Central Telephone) features. Does not include DID adder for numbers or terminations. DID numbers and terminations are shown in Section A11.2.2.d. (1207-ACCTRKFSU)	37.32

Note: The University will subscribe to a minimum of 7,200 access lines.

- d. Enhanced features will be provided on a per line basis at a rate to be determined when the University orders the feature.

Note: Basic line/trunk rate includes SMDI features/-functions, SMDI interface port, utilization of Centrex software numbers (telephone numbers in SL-100 programming which are not connected to a LEN or cable pair) and touch call capability. Basic line and trunk rates do not include the subscriber line charge.

E. RATES AND CHARGES (Cont'd)

2. Mileage Charges

- a. Areas other than the main campus as defined in Section A24.H.1 of this tariff that are leased, rented, or purchased in the future and are not contiguous, but are served out of the same central office as the main campus, will be provided Centrex access line service, with no minimum number of Centrex access service lines required. An additional monthly charge of \$ 9.15, excluding applicable taxes and fees, will be added to the monthly Centrex access line rate for these locations. A site which requires a minimum of 75 lines will also be considered a part of the main campus, whether contiguous or not. The additional monthly charge of \$9.15 is not applicable to such locations. The Company will also provide Centrex Service, with no additional rate or mileage charges to Innovation Park (the farm).
- b. Foreign exchange mileage charges will apply for main stations located outside the Leon County Service Area. Foreign exchange mileage rates as shown in the General Customer Services Tariff Section A9, Sheet 2 shall apply. Foreign exchange mileage rates may be revised by tariff changes approved by the Florida Public Service Commission. The Company will also provide Centrex service, with no additional rate or mileage charges to those sites at Innovation Park (the farm) for users which are Florida State University's employees or agents.

E. RATES AND CHARGES (Cont'd)

3. Installation Charges

Regular installation charges as shown in Section A4 of this tariff, shall apply for the installation or relocation of access lines. Installation charges may be revised by tariff changes approved by the Florida Public Service Commission. Installation charges will not apply for the addition of central office equipment required to increase the number of access lines. The Company will bill one applicable service order charge (primary or secondary) per Communication Service Authorization (CSA)/Florida State University budget number. The budget number identifies the department receiving service. In addition, only one (1) premises visit charge will apply per trip to the campus area as defined in Section A24.H.1 of this tariff.

4. 311 Service

a. The provision and charges for 311 Service under this section are based on the unique circumstances of the Digital Centrex Service provided under this section.

b. Nonrecurring Charge \$95.00

F. SYSTEM FEATURES

1. Type System

Services shall be provided by a Northern Telecom digital multiplex system with applicable remote line modules configured to operate as an integrated system. Additional remote line modules may be provided as required at locations mutually agreeable to the University and the Company. The system will have the capability to provide the features as listed below. Features listed but not currently available will be provided as the features are made available by the manufacturer.

F. SYSTEM FEATURES (Cont'd)

4. Rates

- a. Input/Output (I/O) Port Card - Included in A24.E.1.b rate

This NT1X67 serial port card supports the operation of data as follows:

- One (1) Terminal at 4800 Baud
- Two (2) Terminals at 2400 Baud
- Four (4) Terminals at 1200 Baud

This rate covers the cost of the card only installed in an existing shelf. The addition of a shelf will be assessed a time and materials NRC per occurrence.

- b. Modem Pooling¹ - Included in A24.E.1.b rate

This feature is comprised of a pool of modems where the hardware is located in the central office. Modem pooling enables a datapath Customer to communicate with the analog world via two types of pooling: inbound and outbound. Inbound Modem Pooling (IMP) is available when a data call from an analog modem or trunk terminates to a data unit. Outbound Modem Pooling (OMP) is available when a data unit subscriber calls an analog modem or when an analog trunk is present in the call path. This feature eliminates the requirement for a modem to be located at the data user's premises.

Note 1: Software feature costs were included in the initial costing of the SL-100. This rate covers the hardware costs required to establish the modem pool circuits. Digital Access Line rates and normal service order charges are in addition to this monthly rate.

G. TRUNK EQUIVALENCY FOR SUBSCRIBER LINE CHARGE (SLC)

1. General

In compliance with Section 4 of Interstate Access Tariff for Digital Centrex Subscriber Line Charges (Central Telephone) to achieve rates based on a trunk equivalency basis, the Customer's SLC will be adjusted to reflect the rates as shown in the trunk equivalency table. The SLC is in addition to the monthly rate for the access line. In cases where the number of virtual trunks provided exceeds the equivalent number of trunks shown in the table for a customer's corresponding line quantity, the Customer will be billed one SLC for each virtual trunk provided.

2. Trunk Equivalency Table for Subscriber Line Charge

H. SERVICE AREA

1. General

The main campus shall be defined as all lands and space owned, leased or rented by Florida State University within Leon County as defined by the service area map in Section A24.H.3 of this tariff. Any lands purchased, leased or rented in the future which are contiguous to the main campus, or which are not contiguous but which require a minimum of 75 lines will also be considered a part of the main campus in Leon County. Mileage and adder charges will not apply to the main campus.

* For rates, see End User Common Line Charges in Section 4 of the Interstate Access Tariff.

INTERCONNECTION OF LOCAL EXCHANGE SERVICES TO SHARED TENANT SERVICES

A. GENERAL

1. Shared Tenant Service (STS) is a class of resold local exchange service furnished through a common switching or billing arrangement to tenants by a provider other than an existing local exchange telephone company. Such sharing or resale is permitted where facilities permit and within the confines of specifically identified continuous property areas under the control of a single owner or management unit. Areas designated for shared tenant service may be intersected or transversed by public thoroughfares provided the adjacent property segments created by such intersection would be continuous in the absence of the thoroughfare. The designated resale service area must be wholly within the confines of existing wire centers and/or exchange boundaries.
2. The reseller, or STS provider, is a person, firm, partnership, or corporation which has requested and received proper Shared Tenant Service certification from the Florida Public Service Commission. All other arrangements for resale or sharing of local exchange service are not permitted except as specified in G. And H. of this section of the tariff.
3. In an STS arrangement, the Company's subscriber of record/customer of record is the STS provider who orders service and is responsible for paying the telephone bill. The STS tenant, or end user, is a "client" of the STS provider. Service arrangements for the STS client must be made through the STS provider except as defined in D.1. following.

INTERCONNECTION OF LOCAL EXCHANGE SERVICES TO SHARED TENANT SERVICES

A. GENERAL (Cont'd)

4. Requests to provide connection to the local exchange network for the purpose of reselling local service, i.e., establishing an STS system, must be provided to the Company in writing.
 - a. Such written requests must contain at a minimum, but are not limited to, the following information:
 - 1) Name and address of STS provider
 - 2) Billing responsibility if different from 1)
 - 3) Florida Public Service Commission certificate number
 - 4) STS technical advisor, if applicable and if different from 1)
 - 5) New building or retrofit
 - 6) A forecast as to the anticipated local exchange access requirements for 60 months following initiation of the STS system.
 - 7) Number of customers, suites/offices in building(s)
 - 8) Name of the agent or representative responsible for placing orders, if different from 1).

INTERCONNECTION OF LOCAL EXCHANGE SERVICES TO SHARED TENANT SERVICES

A. GENERAL (Cont'd)

4. Cont'd.

- b. A representative or agent for purposes of this tariff is one who is authorized to act on behalf of another, usually under legal contract. Changes to the STS system or directory listings will be accepted by the Company only from this authority.
5. All STS providers of local service through key systems must be certificated by the FPSC pursuant to Section 364.339 of the Florida Statutes.
- a. Key systems of seven (7) lines or more are required to pay the current rates and charges in effect for STS interconnection. These key systems are subject to the same terms and conditions, specified in this section of the tariff, as STS providers which utilize PBX equipment. They are also required to file tariffs with the Commission reflecting the local rates charged to their clients.
 - b. Key systems of six (6) lines or less are not subject to the STS rates and charges and are not required to file tariffs reflecting the local rates they charge their tenants. However, where directly applicable, they are subject to the same terms and conditions specified in this section of the tariff.

B. DEFINITIONS

The following definitions are applicable to this section of the tariff:

AFFILIATED ENTITY - one that holds in excess of 50% of the stock of the entity which claims to be affiliated.

HYBRID KEY SYSTEM - a sophisticated multi-function switching arrangement using either key button telephones or single line non-key instruments. May be programmed at the user's option to function either as a key system or as a PBX system. FCC Registration number contains a suffix of the letters MFE.

INTERCOMMUNICATION - an unauthorized arrangement that allows telephone communication between and among unaffiliated clients of an STS system without accessing a central office of the Company.

KEY SYSTEM - an arrangement consisting of telephones, usually key button sets, and common equipment which permits users to manually select a specific exchange line for incoming and outgoing calls. Provides a limited number of service features such as pick-up, hold, intercommunications, signaling, etc.

PBX - an arrangement of customer premises located switching equipment and associated telephones which permits access to a common group of exchange lines via either automatic selection of the first available trunk or manual, i.e., attendant, selection from all available trunks. Usually provides an extensive selection of sophisticated features for station users.

B. DEFINITIONS (Cont'd)

REPRESENTATIVE/AGENT - one authorized to act on behalf of another, usually under legal contract.

SERVICE LOCATION - a single building or multiple commercial or residential buildings located within the confines of specifically identified continuous property areas under the control of a single owner or management unit.

SHARED TENANT SERVICE (STS) - a class of resold local exchange service furnished through a common switching or billing arrangement by a provider other than the local exchange telephone company.

SHARED TENANT SERVICE (STS) CLIENT - the STS tenant, or end user, who is provided telephone service through a certificated STS arrangement.

SHARED TENANT SERVICE (STS) PROVIDER - a person, firm, partnership or corporation which has received proper certification from the Florida Public Service Commission.

TENANT - any person entitled to occupy a premises under a rental or lease agreement.

TRANSIENT - one temporarily occupying the premises, with occupancy not to exceed nine months.

C. LIMITATIONS

1. Shared Tenant Service is limited to service of commercial or residential tenants in a single building or multiple commercial or residential buildings located within the confines of specifically identified continuous property areas under the control of a single owner or management unit.
2. STS providers may arrange for sharing or "pooling" of STS trunks for use by their clients.
3. Suspension of service as provided in Section A2 is not permitted in connection with Shared Tenant Service.

D. REGULATIONS

1. Shared Tenant Service providers are required to guarantee access for the Company to any STS client requesting direct service from the Company.
 - a. The Company must be able to gain access to all facilities up to the demarcation point of the building and/or the client's premises. The Company will retain responsibility and maintenance of the network up to that point.
 - b. The Company may construct facilities to directly service the STS client; or, in lieu of Company-owned facilities, the Company may choose to utilize privately owned distribution facilities, including purchase or lease of such facilities from the STS provider.

SECTION A26
Second Revised Sheet 7
Cancelling First Revised Sheet 7
Effective: July 17, 1998

INTERCONNECTION OF LOCAL EXCHANGE SERVICES TO SHARED TENANT SERVICES

D. REGULATIONS (Cont'd)

1. Cont'd.
 - c. Should the Company choose to purchase or lease facilities from the STS provider, the Company will provide reasonable compensation not to exceed what it would have cost the Company to construct its own facilities.
 - d. In no case will the Company be a party to controversies between an STS provider and an STS client desiring direct service from the Company.
2. STS providers must permit client access to the Company operators "zero" (0) for emergencies and for line verification purposes; as well as to 911 where available.
3. Unrestricted access must be provided to all locally available interexchange carriers via Toll Free Codes (TFC), 101XXXX, or 950 and to the intraexchange toll service handled by the Company.
4. An STS provider may not provide shared Wide Area Telephone Service (WATS) unless granted additional authority to do so by the Florida Public Service Commission.
5. Private bypass facilities, i.e., microwave towers, may not be constructed for interconnecting STS locations or systems. Conditions and limitations restricting the resale or sharing of Foreign Exchange Service apply.

SECTION A26
First Revised Sheet 8
Cancelling Original Sheet 8
Effective: January 1, 1997

INTERCONNECTION OF LOCAL EXCHANGE SERVICES TO SHARED TENANT SERVICES

D. REGULATIONS (Cont'd)

6. Customer premises equipment associated with STS and the provisioning thereof is the responsibility of the STS provider.
 - a. All repairs, rearrangements, moves and changes to the STS system beyond the Company's demarcation point or network interface will be the responsibility of the STS provider except as provided in D.1.
 - b. The STS provider will be responsible for payment of a Trouble Location Charge for visits by the Company where a service difficulty or trouble report results from customer-provided equipment or facilities regardless of whether the trouble was reported to Company Repair by the STS provider or an STS client.

E. CLIENT INFORMATION

1. The rates and charges listed herein are those charged the STS provider for resale of local exchange service. The Company will not retain nor provide to any caller the rates charged to the STS client by the STS provider. It is the STS provider's responsibility to disclose such information to the client(s).

E. CLIENT INFORMATION (Cont'd)

2. Each STS provider is required to inform STS clients of its current rates and charges for resold local exchange service and its quality of service standards. The STS provider must inform each client that the Florida Public Service Commission will not set rates or regulate the service quality standards of the providers STS system.
3. The STS provider is responsible for establishing repair reporting procedures to be used by the STS clients. The Trouble Location Charge will be applicable if an STS client reports trouble to Company Repair and a subsequent premises visit by a Company technician locates the trouble in the STS equipment or facilities.
4. STS arrangements are provided one free directory listing per STS system. Additional directory listings may be furnished at rates and regulations as specified in Section A6 of this tariff.

E. CLIENT INFORMATION (Cont'd)

5. Additional directory listings for STS clients may be furnished at rates and regulations as specified in Section A6. The STS provider is responsible for determining the client's desired listing arrangement and for conveying that information to the Company in a timely manner.
 - a. The client's listing is provided under the rules and regulations specified in Section A6 of this tariff.
 - b. The Company will not be a party to any controversies which may arise between an STS provider and client(s) due to misspellings, omissions, delays or misunderstandings about the desired listing.

F. RATES AND CHARGES

1. Rates and Charges for PBX Systems or Key Systems of Seven (7) Lines or More

The following rates and charges are applicable only to certificated Shared Tenant Service systems. Rates for all other sharing arrangements, as defined in G. and H. are as specified in the appropriate section of this tariff.

	Installation Charge	Monthly Rate
a. Service establishment Charge, per service location	\$300.00	--

INTERCONNECTION OF LOCAL EXCHANGE SERVICES TO SHARED TENANT SERVICES

G. PROVISION OF SHARED TENANT SERVICE TO TRANSIENT END USERS

1. For purposes of this tariff, a transient end-user is considered to be one temporarily occupying the premises, with occupancy not to exceed nine months.
2. By virtue of the transient nature of the end-user, certain other sharing arrangements are considered neither duplicative nor competitive with the local exchange service provided by the Company. Therefore, existing rates and service conditions as specified in other sections of this tariff will continue to apply to the following sharing arrangements.
 - a. Airports - sharing is permitted within the airport complex for the safe and efficient transportation of passengers and freight through the airport campus.
 - 1) Sharing may not be extended to other facilities such as hotels, shopping malls and industrial parks unless the airport becomes a certificated STS provider.
 - 2) As an alternative, trunks serving these other entities can be partitioned from the trunks serving the airport campus.

- b. Hospitals - sharing is permitted within a hospital for patient rooms and administrative offices due to the critical need for rapid communication of the hospital staff.
 - 1) Sharing may not be extended to physicians in private practice offices unless the hospital becomes a certificated STS provider.
 - 2) As an alternative, trunks serving physicians individual private practice offices can be partitioned from the trunks serving the hospital administrative offices, patient rooms and other private practice offices.
- c. Nursing Homes, Adult Congregate Living Facilities, Continuing Care Facilities, and Retirement Homes - sharing is permitted in facilities which are intended to serve and/or care for the elderly population. Such sharing arrangements are permitted only when at least 75% of the occupants of the homes, communities or facilities are over age 62, or totally or permanently disabled, and the home community or facility has one or more of the following licensed or certificated components:

A. SOLUTIONS - RESIDENCE

1. General

- a. Solutions is an optional residence service enrollment plan. The Plan permits a customer to receive the following features and services for a flat monthly rate, for each Solutions Package residence line provided. Solutions includes two or more of the following features and services:
 - 1) Flat Rate Local Exchange Service;
 - 2) Either a 60 minute block of time for Message Telecommunications Service (Local Toll), with Consumer Sense Local Toll rates applicable for each additional minute; or the option of subscribing to Consumer Sense Local Toll Service with per minute of use rates applicable for all local toll minutes as specified in Section A18, D.3. of this tariff, and
 - 3) A Custom Calling Feature Package, an individual feature or a group of Custom Calling/ExpressTouch Features. Custom Calling Features and Packages and ExpressTouch features are described in Section A13 of this tariff.

2. Regulations

- a. Solutions customers may terminate their enrollment in this Plan at any time upon notice to the Company.
- b. Unless terminated by the Solutions customer or the Company, a customer will remain enrolled in the Plan, as amended from time-to-time, with any applicable changes in rate, for as long as the Plan continues to be offered by the Company.
- c. The Plan is not available with Residential ISDN-BRI Service lines or to customers who are or become toll restricted.
- d. No more than four (4) residence lines can be enrolled with the Solution option for each customer Billed Telephone Number account.
- e. Service Charges, as described in Section A4 of this tariff, apply to requests for new and additional Solutions lines, and moves of existing lines. Service Charges will not apply when Solutions replaces existing Local Exchange Service or if the customer requests a change from Solutions back to Local Exchange Service.
- f. Solutions customers are not eligible for promotional offerings associated with the Custom Calling Services included in the Plan, unless specifically provided for in a promotional offering.
- g. The Plan may not be combined with any other Residence optional toll calling plan service.

h. Residence customers enrolled in the Plan, who subsequently become subject to Company initiated toll restriction will have all existing Solutions lines converted to the applicable tariff rates. The Service Charges will not apply for those existing lines converted, in-place, due to termination procedures. In addition, any optional services not affected by the termination procedures will convert to their applicable tariff rates. Such customers will not be permitted to re-enroll in the Plan until such time as all associated unpaid balances are satisfactorily paid in full.

j. Customer Referral Program

- 1) Existing residential customers subscribed to one of the following combinations of services who submit a referral via the Company's Internet website will receive a \$25 bill credit if the referral results in the activation of either of the qualifying service combinations by the referred customer within sixty days of the referral:
 - a) Core Solution Package with Embarq Communications, Inc. Solutions Unlimited Long Distance,
 - b) Core Solution Plus Package with Embarq Communications, Inc. Solutions Unlimited Long Distance,
 - c) Personal II Solution Package with Embarq Communications, Inc. Solutions Unlimited Long Distance,
 - d) Home II Solution Package with one required Premium Enhanced Service (LineGuard/Data LineGuard, CPE Warranty Plus or VoiceMail) and Embarq Communications, Inc. Solutions Unlimited Long Distance.
- 2) The referring customer will receive the bill credit within sixty days of the referred customer subscribing to the same services. Multiple credits may be received by the referring customer, with one credit rendered per bill cycle and unused credits rolling over to future months.

B. SOLUTIONS - BUSINESS

1. General

- a. Solutions is an optional business service enrollment plan. The Plan permits a customer to receive features and services for a flat monthly rate, for each Solutions Package business line provided. Solutions includes two or more of the following features and services:
 - 1) Flat Rate Basic Local Exchange Service;
 - 2) Either a 60 minute block of time for Message Telecommunications Service (Local Toll), with Business Sense Local Toll rates applicable for each additional minute; or the option of subscribing to Business Sense Local Toll Service with per minute of use rates applicable for all local toll minutes as specified in Section A18, D.4. of this tariff, and
 - 3) A Custom Calling Feature Package or an individual custom calling feature. Custom Calling Features and Packages are described in Section A13 of this tariff.

2. Regulations

- a. Solutions customers may terminate their enrollment in the Plan at any time upon notice to the Company.
- b. Unless terminated by the Solutions customer or the Company, a customer will remain enrolled in the Plan, as amended from time-to-time, with any applicable changes in rate, for as long as the Plan continues to be offered by the Company.
- c. The Plan is not available with Business ISDN-BRI Service lines, in conjunction with Pay Telephone Service, to customers who are or become toll restricted or to customers with five (5) or more business lines per location. Rotary Hunt Service, as defined in Section A3, is not available in conjunction with the Plan unless Rotary Line Service is included in a specific Solutions Package. The Plan cannot terminate to a Key System, PBX or any other line trunking device. There can be only one business line per Solutions account and no more than three (3) Solutions accounts with the unlimited local calling option per location.
- d. No more than four (4) business lines can be enrolled with the Solutions option for each customer location, except for Sure Solution II, Priority Solution and Rotary Classic Solution with the unlimited local calling option, which may have no more than three (3) lines. Customers with the unlimited local calling option and who also have multiple locations must have each location billed on a separate account.

Unless terminated by the PRI Bundle customer or the Company, a customer will remain enrolled in the PRI Bundle, as amended from time to time, with any applicable changes in rate, for as long as the PRI Bundle continues to be offered by the Company. If any features or services in the bundle are discontinued by the customer, the remaining features and services will be charged the normal tariff rate or charge.
- j. Customers enrolled in the bundle, who subsequently become subject to Company initiated toll restriction will have all existing PRI Bundle lines converted to the applicable tariff rates. Service Charges will not apply for those existing lines converted, in-place, due to termination procedures. In addition, any optional services not affected by the termination procedures will convert to their applicable tariff rates. Such customers will not be permitted to re-enroll in this bundle until such time as all associated unpaid balances are satisfactorily paid in full.

3. Rates and Charges

1) Term Commitment	Monthly Rate	Nonrecurring Charge
2 years	\$680.70	\$ 0.00
3 years	602.70	0.00
5 years	544.70	0.00

.1 Customer Rewards Program Market Trial

.a General

The Company will conduct a Customer Rewards Program market trial from November 28, 2005 through December 31, 2005. During the trial, residence customers who are already subscribed to any Solutions Residence Package (Bundle) plus any Embarq Communications, Inc. long distance plan and one or more of the qualifying services listed below will automatically be entered into the Customer Rewards Program. Customers who subscribe to these services during the trial period will also be automatically entered.

Qualifying services include: The Company's High-Speed Internet, DISH Network Satellite TV, PCS, CPE Warranty, LineGuard, Voicemail and Voicemail Plus.

.b Terms and Conditions

Customers who have continuously subscribed to all of the required services for six months after their entry into the Customer Rewards Program will receive rewards points as follows, redeemable towards the customers' choice of a gift card or merchandise:

- 1) Bundle plus 1 qualifying service = 25 rewards points;
- 2) Bundle plus 2 qualifying services = 40 rewards points;
- 3) Bundle plus 3 qualifying services = 60 rewards points.

Customers may earn up to 15 additional rewards points during their six-month retention period, through one or more of the following activities which are each worth five bonus points.

- 1) request to receive monthly invoices via e-mail
- 2) upgrade a Solutions package or add a qualifying service
- 3) submit an email address through the company's website opting to receive more information about Company services.

Cancelling Sixth Revised Sheet 1
Effective: August 12, 2005

DATA TRANSPORT SERVICE

A. 2GMAN - TALLAHASSEE

1. Description

- a. 2GMAN - Tallahassee is a high-speed data service, which uses a shared fiber network to allow for the interconnection of Local Area Networks (LAN) across selected metropolitan areas. 2GMAN - Tallahassee delivers 1.544 Mbps, 10 Mbps, or 100 Mbps access from the customer's LAN to the shared 2GMAN - Tallahassee network. 2GMAN - Tallahassee protects data privacy by using specialized screening software, which permits subscribers to access only their data. 2GMAN - Tallahassee is offered for local and intraLATA use where Company facilities exist. 2GMAN - Tallahassee may be offered for intrastate interLATA use where Company facilities exist. This service is only available in the Company exchanges of Clermont, Crestview, Eustis, Fort Walton Beach, Leesburg, Ocala, Shalimar, Tallahassee, and Tavares.
- b. Utilizing the screening software, 2GMAN - Tallahassee inherently provides efficient handling of Internet Protocol (IP) traffic between subscriber locations by using network routers to direct traffic to its intended location within the subscriber's IP Virtual Private Network (VPN). Subscribers who do not utilize IP as their exclusive network protocol may subscribe to the optional Virtual LAN bridging feature. Subscribers who utilize Internetwork Packet Exchange (IPX) Protocol and desire more efficient handling of IPX traffic may subscribe to the optional IPX routing feature. IPX routing is not covered by any VPN policies. The IPX Protocol is provided only to the State of Florida connections.

2. Definitions

Connection – The local loop from the Company serving central office to the customer premises.

IP-VPN – Internet Protocol is a secure connection between one or more multiple end points utilizing Transmission Control Protocol/Internet Protocol (TCP/IP) across a shared network infrastructure. The 2GMAN - Tallahassee inherently provides participation in an IP-VPN across two or more pre-determined subscriber locations. IP-VPN traffic is directed to its intended location by intelligent routing equipment in the 2GMAN - Tallahassee at Layer 3 and above of the Open System Interconnection (OSI) model. Open System Interconnection is a formal identification of all data communications network functions established by the International Standard Organization (ISO).

2GMAN – Tallahassee is a network that uses market-leading virtual private networking technologies to deliver Internet Protocol (IP) in the metropolitan areas of Tallahassee, Clermont, Crestview, Eustis, Fort Walton Beach, Leesburg, Ocala, Shalimar, Tallahassee, and Tavares, Florida.

DATA TRANSPORT SERVICE

A. 2GMAN - TALLAHASSEESM (Cont'd)

2. Definitions (Cont'd)

Local Access and Transport Area (LATA) - Denotes a geographic area established for the provision and administration of communications service. It encompasses one or more designated exchanges that are grouped to serve common social, economic, and other purposes.

Local Area Network (LAN) – A network permitting the interconnection and intercommunication of a group of computers, primarily for the sharing of resources such as data storage devices and printers.

Virtual LAN (VLAN) Bridging – A grouping of computers into a single broadcast domain. A VLAN may exist across multiple physical LAN segments, including multiple locations. The MPNS VLAN Bridging feature provides broadcasting of traffic within a subscriber's predefined group of locations at Layer 2 of the Open Systems Interconnection (OSI) model.

802.3 –. Colloquially known as Ethernet, 802.3 runs over coax, copper, or fiber at 10 megabits per second. It is a part of the body of LAN standards developed by the Institute of Electrical and Electronics Engineers, Inc. (IEEE).

802.3u – Also a LAN standard out of IEEE, known as Fast Ethernet, 802.3u typically runs over copper or fiber at 100 megabits per second.

802.5 – Also a LAN standard out of IEEE, known as Token Ring, 802.5 operates at 4 or 16 megabits per second.

3. General Regulations

- a. The network demarcation point is an 802.3 (Ethernet), 802.3u (Fast Ethernet) or 802.5 (Token Ring) LAN interface on the 2GMAN – Tallahassee equipment at the subscriber premises. 2GMAN – Tallahassee network access for 802.3 and 802.5 interfaces is provided at T1 (1.544 Mbps) or 10 Mbps, while 802.3u network access is provided at 100 Mbps. For 10 Mbps access customers, 2GMAN – Tallahassee provides 802.5 to 802.3 conversion options at the customer's premises for subscribers requiring 802.5 interface to their LAN. IP customers can choose a mix of 802.3, 802.3u, and 802.5. VLAN subscribers must choose between 802.3/802.3u or 802.5 LAN standards.
- b. 2GMAN – Tallahassee is available to customers whose serving central office is equipped with 2GMAN – Tallahassee equipment and is located within 28km or 15 miles from the serving central office.
- c. 2GMAN – Tallahassee is only available through a Term Discount Plan for a fixed period of up to 84 months. The minimum service term for 2GMAN – Tallahassee is 12 months.
- d. Suspension of service at the customer's request, as defined in Section A2 of this tariff is not allowed for 2GMAN – Tallahassee.

DATA TRANSPORT SERVICE

A. 2GMAN - TALLAHASSEE (Cont'd)

3. General Regulations (Cont'd)

- e. The customer is responsible for providing cabling necessary to hookup to the 2GMAN – Tallahassee equipment and is responsible for placing all facilities and cabling required to get the 2GMAN – Tallahassee demarcation within the building.
- f. The customer will provide the necessary power to the Company with two (2) duplex isolated ground 20 amp. 120v. AC outlets. The outlets are to be within five (5) feet of the equipment. All electrical work must meet the National Electrical Code (NEC).
- g. The customer will provide a 19-inch equipment rack to house the Company provided Ethernet device(s).
- h. Conduit Space
 - (1) Exterior – The customer is responsible to ensure adequate conduit space is available to place fiber from the closest right-of-way into the main telephone room within a building.
 - (2) Interior – If the company provided equipment is to be located in space other than the telephone room, the customer is responsible to provide a two (2) inch interior conduit suitable to run fiber jumpers to the equipment.
- i. Access to Premises – The customer will provide the Company's maintenance personnel or contractors with access to the equipment for regular maintenance and service.
- j. Special Construction Charges, as defined in Section A5 of this tariff, may apply when technical limitations and/or the lack of facilities exist, or if it is necessary to construct facilities to satisfy service requests.

A. 2GMAN - TALLAHASSEE (Cont'd)

3. General Regulations (Cont'd)

k. Environment

- (1) Air – The customer is responsible to provide adequate cooling to maintain the equipment operating environment parameters as follows:

Temperature: 55-85 degrees Fahrenheit

Humidity: 70% or less.

- (2) Space – The customer is responsible to provide a clean environment free from flooding for the Company provided equipment.

- l. The sustained throughput for routed 2GMAN - Tallahassee connections may be limited by the standard CPE provided under the offering. Upgraded CPE is available to meet customer needs as required for an additional charge.

- m. The Primary Service Ordering Charge, as described in Section A4 of the General Exchange Tariff, does not apply to installs for 2GMAN-Tallahassee.

4. Obligations of the Company

- a. The responsibility of the Company is limited to furnishing network equipment suitable for 2GMAN – Tallahassee and to the maintenance and operation of such equipment in a manner proper for such service. Subject to this responsibility, the Company is not responsible for the through transmission of signals generated by the CPE or systems, or for the quality of, or defects in, such transmission or the reception of signals by such equipment or systems.
- b. The Company is not responsible for installation, operation or maintenance of any terminal equipment, data unit or communications system provided by a customer or user. The Company is not responsible for adapting 2GMAN – Tallahassee service to the technological requirements of any specific customer equipment.
- c. The Company is not responsible to the customer or user if changes in any of the equipment, operations or procedures of the Company used in the provision of 2GMAN – Tallahassee render any facilities provided by the customer or user obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance, provided the Company has met any applicable information disclosure requirements otherwise required by law.
- d. In order to maintain the quality of 2GMAN – Tallahassee service, the Company reserves the right to perform preventative maintenance and software updates to the network.

Effective: January 6, 2004

DATA TRANSPORT SERVICE

A. 2GMAN - TALLAHASSEE (Cont'd)

5. Obligations of the Customer

- a. Where 2GMAN – Tallahassee is available for use in connection with communication systems or equipment provided by a customer or user, the operating characteristics of such systems or equipment shall be such as not to interfere with any services offered by the Company. Such use is subject to the further provisions that the equipment provided by the customer or user does not endanger the safety of Company employees or the public; does not damage, harm, require change in or alteration of the equipment or other services of the Company; does not interfere with the proper operation of the Company's equipment; or does not otherwise injure the public in its use of Company services. Upon notice from the Company that the equipment provided by the customer or user is causing, or is likely to cause, such hazard or interference, the customer shall take the necessary steps to remove or prevent such hazard or interference.
- b. The customer, upon request, shall furnish such CPE information as may be required to permit the Company to design and maintain the 2GMAN – Tallahassee it offers and to assure regulations contained herein.

6. Term Discount Plan (TDP)

- a. The Term Discount Plan (TDP) provides the customer with flexible pricing options for the 2GMAN – Tallahassee Base Service. The customer agrees to a minimum service commitment period when the TDP is established. The customer must order a TDP in writing to the Company: A TDP may be ordered in increments of one month, based upon the following plan options:

Plan A: 12 to 35 months
Plan B: 36 to 59 months
Plan C: 60 to 84 months

- b. The customer must specify the length of the initial service period at the time the service is ordered. If a customer upgrades from one TDP to a longer term TDP, no administrative charges are applied.
- c. If a TDP customer under a Term Discount Plan (TDP) disconnects any portion of the 2GMAN – Tallahassee Base Service prior to the expiration of the TDP, then a Termination Liability Charge will apply to those elements that are disconnected. The Termination Liability Charge will be a one-time charge equal to the sum of 50% of the payments for the rest of the TDP. If Charges Applicable Under Special Conditions charges were applied to the service being terminated, any termination charges associated with the Charges Applicable Under Special Conditions will also apply.

DATA TRANSPORT SERVICE

A. 2GMAN - TALLAHASSEE (Cont'd)

6. Term Discount Plan (TDP) (Cont'd)

- d. Rate increases or decreases will automatically be applied to the remaining term plan rates for the remaining term of the TDP. If Company initiated rate increases to any rate element or combination of rate elements causes the charges for the entire 2GMAN – Tallahassee under the TDP to increase by 10% or more annually, then the customer may cancel the TDP without incurring termination liability charges provided the customer notifies the Company within 30 days after the effective date of the rate increase.
- e. TDP commitment periods can be extended by the customer at any time during the term of the plan, up to a maximum of 84 months. The number of months accrued in the current plan will be applied toward the new plan selected.
- f. Termination Liability Charges will not apply when a service or rate element under a TDP is disconnected prior to the expiration of a selected service period as a result of a change in tariff jurisdiction and/or a customer requested upgrade to a next generation service offering, under the following conditions:
 - (1) The service period of the new TDP for the new service offering is a period equal to or exceeding the remaining service period of the disconnected TDP, and
 - (2) The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between the installation of the new service and the disconnection of the old service, and
 - (3) The service orders to install the new service and disconnect the old service are for the same customer at the same location.

SECTION A28
Fourth Revised Sheet 7
Cancelling Third Revised Sheet 7
Effective: January 6, 2004

DATA TRANSPORT SERVICE

A. 2GMAN - TALLAHASSEE (Cont'd)

7. Service Components

- a. Service Establishment Charge – A Service Establishment Charge applies to the initial location a subscriber establishes on 2GMAN – Tallahassee and is designed to reflect the costs of establishing a VLAN or IP-VPN profile and the 2GMAN – Tallahassee network. Subsequent locations that participate in an existing IP-VPN or VLAN do not incur the Service Establishment Charge. An IPX Establishment Charge applies to the initial location a subscriber establishes on 2GMAN – Tallahassee that utilizes IPX routing. Subsequent locations that participate in the existing IPX routing group do not incur the Service Establishment Charge. Nonrecurring charges apply for each service that terminates at the customer's premises except for Plan C.
- b. 2GMAN – Tallahassee Base Service – The 2GMAN – Tallahassee Base Service rates include the elements of demarcation, port electronics at the subscriber's premises, the local channel connection to the Company's 2GMAN – Tallahassee switching system function, and participation in a single IP-VPN. Charges are dependent upon the number of ports per building and the total number of ports per customer.
- c. VLAN Bridging - The VLAN bridging feature is exclusively for IP-VPN. A customer may either have a connection in an IP-VPN or in a VLAN, but not both. IPX, for the State of Florida only, can be added to the base IP-VPN service, but is not available with VLAN bridging. However, VLAN bridging itself will carry any traffic such as IP or IPX; it will not be routable.
- d. IPX Routing – The IPX routing feature may be used as an additional item to the basic service. IPX Establishment Charge applies to the initial location a subscriber establishes on the 2GMAN – Tallahassee that utilizes IPX routing. Subsequent locations that participate in an existing IPX routing group do not incur the Service Establishment Charge. The IPX Protocol is provided only to the State of Florida connections
- e. 802.3 to 802.5 services - 2GMAN – Tallahassee network access for 802.3 and 802.5 interfaces is provided at T1 (1.544 Mbps) or 10 Mbps, while 802.3u network access is provided at 100 Mbps. For 10 Mbps access customers, 2GMAN – Tallahassee provides 802.5 to 802.3 conversion options at the customer's premises for subscribers requiring 802.5 interface to their LAN. IP customers can choose a mix of 802.3, 802.3u, and 802.5. VLAN subscribers must choose between 802.3/802.3u or 802.5 LAN standards. 802.5 VLANs will be serviced by DLSw+, which provides for SNA and Netbios protocols exclusively.

SECTION A28
Fourth Revised Sheet 8
Cancelling Third Revised Sheet 8
Effective: January 6, 2004

DATA TRANSPORT SERVICE

A. 2GMAN - TALLAHASSEE (Cont'd)

8. Optional Features

- a. Gateway Service – Allows 2GMAN – Tallahassee customer to interconnect to another internet network location. The service is available wherever the Company has established a network interface with another private or public location. Gateway Service is only available where such network connectivity exists or where suitable connectivity arrangements can be made that are acceptable to the Company. A customer utilizing Gateway Service will lose private VPN capability: their routes will by definition need to be globally available for internet access.
- b. 2nd Port for 10 Mb Connection permits the customer to utilize the second port on their CPE to access the single 10 Mb Ethernet connection they have purchased.
- c. 2nd Port for 100 Mb Connection permits the customer to utilize the second port on their CPE to access the single 100 Mb Ethernet connection they have purchased.
- d. 3rd Port for 100 Mb Connection permits the customer to utilize the third port on their CPE to access the single 100 Mb Ethernet connection they have purchased.
- e. Quality of Service (QoS) is an IP feature allowing the Company to mark packets according to their traffic type (usually broken down between voice/video and data), and then give priority across the backbone to the higher precedence packets. This ensures that delay-sensitive traffic such as voice and video will get delivered quickly and delay-insensitive traffic such as data will still get through, but can afford more time.
- f. IP Security (IPSec) is an IP feature that allows the Company to build secure encrypted tunnels between two points. The tunnels require trusted keys at both ends to complete setup. This feature will allow state agencies to meet federal mandates for end-to-end encryption of sensitive data such as criminal, health, and financial records traversing their WAN.
- g. Multicast – This feature will allow a customer to stream video conferences or events across the backbone in a one-to-many fashion, giving significant savings in bandwidth. Rather than create a separate instance for each viewer, one stream is pushed out to all viewers.

GENERAL EXCHANGE TARIFF

Embarq Florida, Inc.

By: F.B. Poag
Director

SECTION A28
Fourth Revised Sheet 9
Cancelling Third Revised Sheet 9
Effective: January 6, 2004

DATA TRANSPORT SERVICE

A. 2GMAN - TALLAHASSEE (Cont'd)

8. Optional Features

- h. Network Address Translation (NAT) allows the Company to take private IP addresses (those not officially assigned by an Internet authority) and translate them into official IP addresses (usually assigned by the Company or the state). This allows significant IP address savings – a customer can privately use a large IP block but only have a small block of official IP addresses. This is primarily used for two situations: if the customer has a need for many hosts to connect to the network that will initiate requests only, and for additional security.
- i. Enhanced Filtering – This service will allow customers to design basic access lists, which the Company will then apply to their interfaces. The access lists can prevent certain traffic types from entering or leaving the customer network, or they may prevent certain IP addresses from doing the same. While not considered a true firewall, this feature will allow the customer more security than a wide-open pipe. The Company requires the customers to craft the access list themselves so there is no question of what access is required.
- j. Firewall – This is a Cisco operating system enhancement that gives true firewall features to the router, such as stateful packet inspection. This is the next step after the Enhanced Filtering service above and requirements for customer-crafted security configurations are identical. This feature allows customers to meet official security requirements that may not consider the Enhanced Filtering service to be sufficient.
- k. Dynamic Host Configuration Protocol (DHCP) allows centralized management of IP addressing and better control over limited address space. DHCP requires a client PC to simply set all IP configuration parameters to automatic, and a DHCP server will then supply the client with all pertinent information - IP address, subnet mask, default gateway, and many other possible settings.

If changes to the IP schema are necessary, all that must be updated are the records on the DHCP server. Customers can then reboot or refresh their DHCP information and the new changes will be distributed. DHCP also removes the need for personnel to know how to change their information when bringing a new PC online and/or traveling with a laptop to different network locations.

DATA TRANSPORT SERVICE

B. ETHERNET SERVICES

1. General

- a. Ethernet Services is a high-speed data service, which uses a shared fiber network to allow for the interconnection of Local Area Networks (LAN) across selected metropolitan areas. Ethernet Services delivers 5 Mbps, 10 Mbps, 100 Mbps, 500 Mbps, and 1 Gigabit (1000 Mbps) access from the customer's LAN to the shared Ethernet Services network. Ethernet Services protects data privacy by using specialized screening software, which permits subscribers to access only their data. Ethernet Services is offered for local and intraLATA use where Company facilities exist. Ethernet Services may be offered for interLATA use where Company facilities exist.
- b. Ethernet Services is only available through a Term Discount Plan for a fixed period of up to 84 months. The minimum service term for Ethernet Services is 12 months.
- c. Suspension of service at the customer's request, as defined in Section A2 of this tariff is not allowed for Ethernet Services.
- d. Charges Applicable Under Special Conditions, as defined in Section A5 of this tariff, may apply when technical limitations and/or the lack of facilities exist, or if it is necessary to construct facilities to satisfy service requests.

2. Regulations

a. Description of Service

- (1) Ethernet Services is available to customers whose serving central office is equipped with Ethernet Services equipment and is located within 28km or 15 miles from the serving central office.
- (2) The network demarcation point is an 802.3 (Ethernet), 802.3u (Fast Ethernet) or 802.3z (Gigabit Ethernet) LAN interface on the Ethernet Services equipment at the subscriber premises. Ethernet Services network access for 802.3 interface is provided at 10 Mbps, while 802.3u network access is provided at 100 Mbps and 802.3z network access is provided at 1 Gigabit (1000 Mbps). VLAN subscribers must choose between 802.3, 802.3u or 802.3z LAN standards.

DATA TRANSPORT SERVICE

B. ETHERNET SERVICES (Cont'd)

2. Regulations (Cont'd)

b. Definitions

- (1) Local Channel Connection – The local loop from the Company's serving central office to the customer premises.
- (2) Local Access and Transport Area (LATA) - Denotes a geographic area established for the provision and administration of communications service. It encompasses one or more designated exchanges that are grouped to serve common social, economic, and other purposes.
- (3) Local Area Network (LAN) – A network permitting the interconnection and intercommunication of a group of computers, primarily for the sharing of resources such as data storage devices and printers.
- (4) 802.3 – Colloquially known as Ethernet, 802.3 runs over fiber at 10 megabits per second. It is a part of the body of LAN standards developed by the Institute of Electrical and Electronics Engineers, Inc. (IEEE).
- (5) 802.3u – A LAN standard out of IEEE, known as Fast Ethernet, 802.3u typically runs over fiber at 100 megabits per second.
- (6) 802.3z – A LAN standard out of IEEE, known as Gigabit Ethernet, 802.3z typically runs over fiber at 1000 megabits per second (1Gigabit).
- (7) Managed Service - Managed Service includes Ethernet Services Basic Transport, Provider Edge Equipment, and Managed Network Service. Basic Transport includes the demarcation, the port electronics at the subscriber's premises, the local channel connection to the Company's Ethernet Services switching system function, and participation in a single Virtual Private Network. Provider Edge Equipment allows for the convergence of multiple service options over one common facility for network aggregation. Managed Network Service provides 24x7 network monitoring and troubleshooting of network facilities.
- (8) VLAN - A VLAN is an identifier assigned to each customer group. VLAN ID's allow multiple customers to share a common infrastructure while maintaining separate LAN domains.

2. Regulations (Cont'd)

c. Connections

- (1) Customer-Provided Terminal Equipment, Customer-Provided Derivation Equipment and Customer-Provided Communications Systems may be connected to Ethernet Services when such connection is made in accordance with the provisions specified in (2), (3) and (4) following.
- (2) Responsibility of the Company
 - (a) The responsibility of the Company shall be limited to the furnishing and maintenance of Ethernet Services to a network interface on the customer's premises where provision is made for the connection of local service.
 - (b) The Company shall not be responsible for installation, operation or maintenance of any terminal equipment or communications systems provided by the customer. Ethernet Services is not represented as adapted for the use of such equipment or system. Where such equipment or system is connected to Company facilities, the responsibility of the Company shall be limited to the furnishing of facilities suitable for Ethernet Services and to the maintenance and operation in a manner proper for such digital service. The Company shall not be responsible for:
 - The through transmission of signals generated by such equipment or system, or for the quality of, or defects in, such transmission, or
 - The reception of signals by such equipment or systems, or
 - Damage to terminal equipment or communications systems provided by a customer or authorized user due to testing.
 - (c) The Company shall not be responsible to the customer if changes in any of the facilities, operations or procedures of the Company utilized in the provision of Ethernet Services render any facilities or equipment provided by a customer obsolete, or require modification or alteration of such equipment or system or otherwise affects its use or performance.

(2) Responsibility of the Company (Cont'd)

(d) The Company is responsible for maintaining and repairing the facilities it furnishes. The customer may not rearrange, disconnect, remove or attempt to repair any equipment installed by the Company without prior written consent of the Company.

(e) In order to maintain the quality of Ethernet Services, the Company reserves the right to perform preventative maintenance and software updates to the network. The Company has classified maintenance as follows:

(i) Scheduled Maintenance

Scheduled maintenance is performed for functions such as hardware and software upgrades and network optimization. The Company will perform these tasks in a maintenance window that is anticipated to minimize disruption of customer service and activity. The Company will provide advance notice of all scheduled maintenance.

(ii) Demand Maintenance

Demand maintenance may occur as a result of unexpected events and is performed when Ethernet Services network elements are in jeopardy. The Company will perform this type of maintenance at its discretion. Due to the nature of demand maintenance, prior notification may not be possible; however, the customer will be informed when the maintenance has been completed.

(3) Responsibility of the Customer

- (a) The customer is responsible for installing and testing the customer premises equipment or facilities to insure that when they are connected to Ethernet Services such equipment or facilities are operating properly.
- (b) The operating characteristics of the customer premises equipment or facilities shall be such as to not interfere with any of the services offered by the Company. Such use is subject to the further provisions that the equipment provided by a customer does not: endanger the safety of Company employees or the public; damage, require change in or alteration of the equipment or other facilities of the Company; interfere with the proper functioning of such equipment or facilities; impair the operation of the Company's facilities or otherwise injure the public in its use of the Company's services. Upon notice that the equipment provided by a customer is causing or is likely to cause such hazard or interference, the customer shall take such steps as shall be necessary to remove or prevent such hazard or interference.
- (c) The customer's responsibility shall include cooperative testing with the Company as may be necessary. Where regeneration and/or equalization adjustments or changes may be required to compensate for rearrangements and/or changes in outside plant facilities, the customer will be responsible for all expenses incurred in changes to his customer premises equipment.
- (d) The customer must provide the necessary power to the Company with two (2) duplex isolated ground 20 amp. 120v. AC outlets. The outlets must be within five (5) feet of the equipment. All electrical work must meet the National Electrical Code (NEC).
- (e) The customer will provide a 19-inch rack to house the Company provided Managed Service Ethernet device(s).

(3) Responsibility of the Customer (Cont'd)

(f) Conduit Space

- (i) Exterior – The customer is responsible to ensure adequate conduit space is available to place fiber from the closest right-of-way into the main telephone room within a building.
- (ii) Interior – If the Company provided equipment is to be located in space other than the telephone room, the customer is responsible to provide a two (2) inch interior conduit suitable to run fiber jumpers to the equipment.

(g) Environment

- (i) Air – The customer is responsible to provide adequate cooling to maintain the equipment operating environment parameters as follows:

Temperature: 55-85 degrees Fahrenheit
Humidity: 70% or less.

- (ii) Space – The customer is responsible to provide a clean environment free from flooding for the Company provided equipment.

(4) Connection of Customer-Provided Terminal Equipment, Customer-Provided Derivation Equipment and Customer-Provided Communications Systems

(a) The following provisions will apply:

- (i) Customer-Provided Terminal Equipment and/or Customer-Provided Communications Systems may be connected at the premises of the customer to Ethernet Services.

(4) Connection of Customer-Provided (Cont'd)

(a) The following provisions will apply: (Cont'd)

(ii) The customers, by use of their own derivation equipment, may create digital bit streams from Ethernet Services and such equipment may be connected for transmission of such bit streams when connected through a customer-provided CSU.

(iii) The undertaking of the Company is to furnish Ethernet Services as ordered and specified by the customer except as specified in (d) following.

(b) Connections to Other Services Furnished by the Company to the Same Customer

Ethernet Services furnished by the Company may be connected by the customer to another service or to other services furnished by the Company as specified in (2) preceding. Connected services are subject to all rules and regulations governing the provisioning of those services.

(c) Connections to Other Services Furnished by the Company to Different Customers

The customer may connect at the premises of the customer, to another Ethernet Services or other services furnished by the Company to different customers as specified in (2) preceding. Connected services are subject to all rules and regulations governing provisioning of those services.

(d) Connection of Channel Service Units

A Channel Service Unit (CSU) or appropriate termination equipment must be provided by the customer to connect a Company-provided digital facility. This equipment must comply with the technical requirements outlined in Part 68 of the FCC Rules and Regulations.

B. ETHERNET SERVICES (Cont'd)

3. Term Discount Plan (TDP)

- a. The minimum service period is 12 months. A Term Discount Plan (TDP) provides the customer with flexible pricing options for the Ethernet Services. The customer agrees to a minimum service commitment period when the TDP is established. The customer must order a TDP in writing to the Company: A TDP may be ordered in increments of one month, based upon the following plan options:

Plan A: 12 to 35 months
Plan B: 36 to 59 months
Plan C: 60 to 84 months

- b. The customer must specify the length of the initial service period at the time the service is ordered. At the end of the term plan the customer may subscribe to a new term plan at the prevailing rates set forth in Section A28.B.6. following. If the customer does not specify renewal terms in writing 90 days prior to the expiration of the 36 to 59 months or the 60 to 84 months service period, the commitment period and Ethernet Services rates for the 12 to 35 months term will automatically be applied. If the customer does not specify renewal terms in writing prior to the expiration of the 12 to 35 months service period, the commitment period and the Ethernet Services rates in effect at the time of expiration will automatically renew. The customer can terminate Ethernet Services at the end of the minimum commitment period with no penalty or obligation to continue the service.
- c. If a TDP customer under a Term Discount Plan (TDP) disconnects any portion of the Ethernet Services prior to the expiration of the TDP, then a Termination Liability Charge will apply to those elements that are disconnected. The Termination Liability Charge will be a one-time charge equal to the sum of 50% of the payments for the rest of the TDP. If Charges Applicable Under Special Conditions charges were applied to the service being terminated, any termination charges associated with the Charges Applicable Under Special Conditions will also apply.

DATA TRANSPORT SERVICE

B. ETHERNET SERVICES (Cont'd)

3. Term Discount Plan (TDP) (Cont'd)

- d. Rate increases or decreases will automatically be applied to the remaining term plan rates for the remaining term of the TDP. If Company initiated rate increases to any rate element or combination of rate elements causes the charges for the entire Ethernet Services under the TDP to increase by 10% or more annually, then the customer may cancel the TDP without incurring termination liability charges provided the customer notifies the Company within 30 days after the effective date of the rate increase.
- e. TDP commitment periods can be extended by the customer at any time during the term of the plan, up to a maximum of 84 months. The number of months accrued in the current plan will be applied toward the new plan selected.
- f. Termination Liability Charges will not apply when a service or rate element under a TDP is disconnected prior to the expiration of a selected service period as a result of a change in tariff jurisdiction and/or a customer requested upgrade to a next generation service offering, under the following conditions:
 - (1) The service period of the new TDP for the new service offering is a period equal to or exceeding the remaining service period of the disconnected TDP, and
 - (2) The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between the installation of the new service and the disconnection of the old service, and
 - (3) The service orders to install the new service and disconnect the old service are for the same customer at the same location.
- g. The Company will determine whether the replacement service qualifies as a next generation service offering.
- h. Nonrecurring charges and Service Ordering Charges for the new service will apply according to the requirements of the new service.

4. Service Components

- a. Ethernet Services Basic Transport includes the elements of demarcation, port electronics at the subscriber's premises, the local channel connection to the Company's Ethernet Services switching system function, and participation in a single Virtual Private Network. Charges are dependent upon the number of ports per building and the total number of ports per customer.
- b. Managed Service - The components for Managed Service include the following:
 - Ethernet Services Basic Transport at speeds of 5 Mbps, 10 Mbps, 100 Mbps, 500 Mbps, and 1000 Mbps (1 Gigabit)
 - Provider Edge Equipment (Ethernet switch) to be installed at customer's premises
 - Managed Network Services to include 24x7 monitoring and troubleshooting of the network facility

5. Optional Features

- a. Inter-working with Frame Relay Service or ATM Service - This feature allows the customer with a Frame Relay or Asynchronous Transfer Mode local channel to connect with the Ethernet Services network at the Company's central office.

DIGITAL NETWORK SERVICES

B. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI) II

1. General

- a. Integrated Services Digital Network (ISDN) - Primary Rate Interface (PRI) Service is a local exchange offering supported by the ISDN architecture.
- b. ISDN-PRI Service provides a method of access to the telephone network called Primary Rate Access. Primary Rate Access is an ISDN based, DS1 access link to the telecommunications network and provides integration of multiple voice and data transmission channels on the same line. The service provides connectivity between an ISDN-PBX or other ISDN-compatible CPE and a serving central office. The basic channel structure for Primary Rate Access is twenty-three 64 Kbps B-Channels and one 64 Kbps D-Channel. After purchasing the original 23 B-Channel plus one D-Channel configuration, the customer may purchase another Primary Rate Access Line and another Primary Rate Interface as well as additional B-Channels in increments of 12.

These channels may be used to connect the customer's CPE to the Public Network (i.e., outward, inward, and two-way trunks, and WATS/ 800/866/877/888 Service access lines).

- c. ISDN-PRI Service provides network communication paths providing the end user with access to a variety of network services and features including data, voice and video which conforms to internationally developed, published, and recognized standards generated by the International Telecommunications Union (ITU).
- d. Unless specified, the regulations for ISDN-PRI Service apply in addition to the General Regulations set forth in this tariff.
- e. ISDN-PRI Service and its optional features and functions are provided within a LATA from central offices where appropriate ISDN facilities are available as determined by the Company. Service inquiries will be necessary to determine availability. Charges Applicable Under Special Conditions may apply as specified in Section A5 of this tariff.

2. Regulations

- a. The customer is responsible for providing Customer Premises Equipment (CPE) that is compatible with ISDN-PRI Service.
- b. The Company shall not be responsible if changes in any of the equipment, operations or procedures of the Company utilized in the provisioning of ISDN-PRI Service render any facilities provided by the customer obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance.

GENERAL EXCHANGE TARIFF

Director

SECTION A29
Second Revised Sheet 24.2
Cancelling First Revised Sheet 24.2
Effective: January 28, 2002

DIGITAL NETWORK SERVICES

B. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI) II
(Cont'd)

2. Regulations (Cont'd)

- c. Digital transmission rates at speeds less than those indicated may be accomplished as a function of the particular CPE furnished by the user.
- d. Suspension of service at the customer's request, as defined in Section A2 of this tariff, does not apply to ISDN-PRI Service.
- e. Service Charges specified in Section 4 of this tariff apply to any charges not specified in this section.
- f. The minimum service period for ISDN-PRI Service is six months.
- g. Telephone numbers transmitted via the Optional or Standard Incoming Call Identification feature are intended solely for the use of the ISDN-PRI Service subscriber. Resale of this call identification information is prohibited by this tariff.
- h. Non-Facility Associated Signaling (NFAS) provides the capability to serve multiple DS1's via a single D-Channel. This feature can be ordered where switch capabilities exist as determined by the Company. When NFAS is selected, the customer will order one ISDN-PRI Service arrangement with 23 B-Channels and 1 D-Channel. Additional ISDN-PRI Services arrangements can be ordered with 24 B-Channels as specified in Section A29 B.7. The D-Channel activated on the initial arrangement serves the additional ISDN-PRI arrangements.

After the first 23B + D PRI is purchased, a customer can purchase additional B-Channels in increments of 12. Additional Primary Rate Access Lines may be ordered in a 24B configuration. The Company recommends that the quantity of Primary Rate Access Lines supported by one (1) D-Channel not exceed four (4).

- i. This service is available only from central offices which have the necessary facilities to provide ISDN-PRI on the standard network platform. In the event a customer is served by a non-ISDN capable central office, the Company may provide ISDN-PRI Service from an alternative serving central office, as designated by the Company. The subscriber may be required to accept a foreign NXX. When a foreign NXX is required, all charges applicable to foreign exchange and/or foreign central office services, as specified in Section A9 of this tariff will apply in addition to the rates and charges included in this section. The local calling area may not be the same as the local calling area of the exchange in which the customer is located.

GENERAL EXCHANGE TARIFF

Embarq Florida, Inc.

By: F. B. Poag
Director

SECTION A29
First Revised Sheet 24.3
Cancelling Original Sheet 24.3
Effective: November 17, 2001

DIGITAL NETWORK SERVICES

B. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI) II
(Cont'd)

2. Regulations (Cont'd)

i. (Cont'd)

When ISDN functionality becomes available from the central office that normally serves this subscriber, ISDN-PRI Service will be provided from that office and the subscriber may be required to accept a different NXX. If the subscriber chooses to continue ISDN-PRI Service from the alternative serving central office, all charges applicable to foreign exchange services, as specified in Section A9 of this tariff will apply in addition to the rates and charges included in this section.

Similarly, if a subscriber requests ISDN-PRI Service from an alternative serving central office other than that designated by the Company, all charges applicable to foreign exchange services, as specified in Section A9 of this tariff, will apply in addition to the rates and charges included in this section.

Emergency 911 calls placed over ISDN-PRI Primary Rate Access Lines provisioned via a foreign central office serving this arrangement will be identified as the alternative serving central office NXX and not the non-ISDN capable central office NXX. The Company shall not be liable for any loss or damages arising from emergency calls placed from ISDN-PRI Primary Rate Access Lines provisioned via an alternative serving central office.

j. This service is available only where the customer's service location is within the provisioning limitations as determined prior to installation of the service. Should the customer's service location exceed said limitations, service will be provided where the Company has electronically compatible facilities available, or where existing facilities can be made compatible.

k. Rotary hunt functionality, at no additional charge, is available with ISDN-PRI Service. This functionality increases the likelihood of an incoming call being completed over an ISDN-PRI B-channel. The functionality is exclusively within the B-channels of a single ISDN-PRI service arrangement or between multiple ISDN-PRI service arrangements and is not allowed between ISDN-PRI service arrangements and other services, including but not limited to, Business Individual Line Service. The total number of ISDN-PRI interfaces in a single, standard hunting configuration may not exceed 50.

SECTION A29
Second Revised Sheet 24.4
Cancelling First Revised Sheet 24.4
Effective: September 20, 2003

DIGITAL NETWORK SERVICES

B. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI) II
(Cont'd)

2. Regulations (Cont'd)

- I. ISDN-PRI Service is not offered in conjunction with Local Measured Service.
- m. In order to maintain the quality of ISDN-PRI Service, the Company reserves the right to perform preventative maintenance and software updates to the network. The Company has classified this maintenance as indicated below:

Scheduled Maintenance

Scheduled maintenance is used to perform such functions as hardware and software upgrades and network optimization. The Company will perform these tasks in a maintenance window that is anticipated to minimize disruption of customer service and activity. The Company will provide advance notice of all scheduled maintenance.

Demand Maintenance

Demand Maintenance may occur as a result of unexpected events and is used when ISDN-PRI network elements are in jeopardy. The Company will perform this type of maintenance at its discretion. Due to the nature of demand maintenance prior notification may not be possible, however, the customer will be informed when the maintenance has been completed.

- n. One Directory Listing will be provided per D-Channel. Additional Directory Listings are available as specified in Section A6 of this tariff.

3. Definitions

- a. B-Channel - A bi-directional synchronous channel capable of supporting 64 Kbps of digital transmission.
- b. D-Channel - A 64 Kbps digital signaling only channel for call establishment when used with Primary Rate Access.
- c. Primary Rate Access Line – The facility between the serving central office and the customer's premises. Provides transport for up to twenty-four (24) 64 Kbps.
- d. Primary Rate Interface – The central office switching elements that are dedicated to a customer's ISDN-PRI service.
- e. Primary Rate Channels – B-Channels or D-Channels, as defined above.
- f. Rotary Hunt Functionality - A service arrangement which allows calls made to a busy number to be completed to another idle line in that rotary number group.

DIGITAL NETWORK SERVICES

B. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI) II
(Cont'd)

4. Features

a. Standard Features

Dynamic Allocation of Bandwidth

Allows the voice and data services to share B-Channels and arrange them as a single trunk group. This allows incoming and outgoing voice and data calls to utilize B-Channels on a call by call basis. Without this capability, each service will have a dedicated B-Channel.

Incoming Call Identification (Caller ID)

When provided by the originating carrier's facilities, incoming call identification transmits the telephone number of the calling party to the subscriber via the D-Channel subject to availability. Incoming call identification is provided via the D-Channel associated with the incoming calls on a B-Channel to a PBX.

Clear Channel Capability

The B-Channels on ISDN-PRI are clear, since all signaling and control functions are handled by the D-Channel. This allows all 64 Kbps on each B-Channel to be used for customer information.

Digital Voice Transmission

All voice calls are transmitted using digital signaling.

Direct Inward Dialing (DID) Signaling

Permits incoming dialed calls from the exchange network to reach a specific number served by customer premises equipment (CPE) without the assistance of an attendant. The central office will outpulse digits to the CPE that can further process the calls as desired. The rates and charges for DID telephone numbers are in addition to the ISDN charges and are provided in Section A16 of this tariff.

PBX Station ID Capability

Allows the station user's number (calling party) to be transmitted over the ISDN-PRI D-Channel from Direct Inward Dialing equipped CPE PBXs that use ISDN-PRI. This number is provided by the originating station and must have an associated Direct Inward Dialing telephone number working in the central office.

Second Revised Sheet 24.6
Cancelling First Revised Sheet 24.6
Effective: January 28, 2002

DIGITAL NETWORK SERVICES

B. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI) II
(Cont'd)

4. Features (Cont'd)

b. Optional Features

D-Channel Backup

Provides backup for the D-Channel for a customer with multiple PRI lines by automatically switching signaling capability over to another D-Channel if service to the primary D-Channel is interrupted.

Network Ring Again

Enables the customer to complete calls to a busy station without continually redialing. Certain equipment restrictions may apply.

Call-by-Call/Integrated Service Access Feature Capability

Allows the customer to dynamically allocate the use of channels for ISDN-PRI Service. The customer may also choose voice or data transmission on a per call basis. In addition, the customer may also choose to subscribe to more services than channels. The Customer Premises Equipment signals the local central office as to which type of service (inward/outward trunk, WATS Lines, 800/866/877/888 Service) to access for each call.

Incoming Call Identification (Caller ID Name and Number)

Provides the customer with the telephone number and name of the calling party. Incoming call identification is provided via the D-Channel associated with incoming calls on a B-Channel to a PBX. The Customer's equipment must be compatible with this service. Calling Number Delivery Blocking is available as stipulated in Section 13 of this tariff.

DIGITAL NETWORK SERVICES

B. INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI) II (Cont'd)

4. Features (Cont'd)

b. Optional Features (Cont'd)

2 B-Channel Transfer

If a call terminates at a given location, but is then forwarded to another location, two trunks between the Central Office and the original device are typically employed for the duration of the forwarded call. 2 B-Channel Transfer allows the central office switch to establish the call directly to the final destination and release the trunks going in and out of the forwarding device. This saves the customer PRI facilities and provides for more efficient use of the network. A common use of 2 B-Channel Transfer is illustrated below.

Cancelling First Revised Page 24.6.2
Effective: May 20, 2003

DIGITAL NETWORK SERVICES

B. INTEGRATED SERVICES DIGITAL NETWORK - PRIMARY RATE INTERFACE (ISDN-PRI) II (Cont'd)

4. Features (Cont'd)

b. Optional Features (Cont'd)

Circular Hunt

Circular Hunt provides the most efficient hunting sequence available, plus allows for much larger trunk groups than the standard ISDN-PRI packages. With circular hunt, an incoming call is completed to the next available trunk (bearer) in sequence starting from the last trunk selected. This can occur across multiple PRI facilities. The feature can support up to 220 Primary Rate Interfaces in a single hunting configuration. The standard limit is 50.

National ISDN-2 Protocol

National ISDN-2 Protocol is a communication protocol that governs interactions between the customer's equipment and the telephone network. This protocol is more advanced than the standard ISDN-PRI protocol. Most CPE is capable of using the ISDN-2 Protocol.

E911 Call Screening

E911 Call Screening provides for the transmission of PBX or Key System station information via the ISDN-PRI facility to local emergency services authorities. This provides for the possible identification of the specific location on a customer's premises where a 911 call originated. This option is available only in communities where local emergency authorities support the service in conjunction with the Company's Private Switch Automatic Location Identification (PSALI) Service, associated with E911 Service. This service is only available in conjunction with National ISDN-2 Protocol.

Optional Calling Plan

An Optional Calling Plan is available in certain exchanges. The plan is described in Section A3 of this tariff.

Effective: August 7, 2002

DIGITAL NETWORK SERVICES

B. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI) II
(Cont'd)

5. Service Components

a. The components for ISDN-PRI Service will be as follows:

- Primary Rate Access Line
- Primary Rate Interface
- Primary Rate Channels

1. Primary Rate Access Line - Will provide a four-wire access loop from the customer premises to the serving central office. The transmission via this loop supports Clear Channel Capability.

2. Primary Rate Interface - Provides the multiplexing to support up to twenty-three (23) B-Channels at 64 Kbps and one (1) D-Channel for signaling also at 64 Kbps. When NFAS is ordered, the Primary Rate Interface can provide up to twenty-four B-Channels at 64 Kbps.

3. Primary Rate Channels - Will provide unlimited usage of channels that will allow either voice or data transmission up to 64 Kbps.

a. Voice calls may be completed to both ISDN and non-ISDN lines.

b. Data Transmission on the B-Channels will be at 64 Kbps within the switch and between ISDN-PRI compatible central offices. ISDN-PRI interconnection to non-ISDN-PRI equipped central offices may be potentially subjected to analog transmission or sub-rated to 56 Kbps.

c. The customer may choose to subscribe to additional non exchange based services. Initial choices for these services will be WATS and 800/888 Service. The subscription to these services is in addition to the charges for ISDN-PRI Service.

b. With the first ISDN-PRI Primary Rate Access Line the customer is required to purchase 23 B-Channels and an initial D-Channel.

After the initial 23B + D configuration, the customer may choose channels in increments of 12 up to twenty-three B + D or twenty-four B with NFAS, per ISDN-PRI Primary Rate Access Line (facility) to be active with a corresponding number of services (i.e., inward/outward trunks, WATS Lines, 800/866/877/888 Service) selected. The customer may also choose to subscribe to more services than channels. The Customer Premises Equipment signals the local central office as to which type of service (inward/outward trunk, WATS Lines, 800/866/877/888 Service) to access for each call.

(Cont'd)

6. Application of Rates

- a. ISDN-PRI Primary Rate Access Lines furnished between a serving central office and the customer-designated premises will be charged at rates per each Primary Rate Access Line.
- b. Nonrecurring charges will not be applicable for the Primary Rate Access Line or interoffice channel facilities when upgrading an existing United TransLink to an ISDN-PRI Service.
- c. ISDN-PRI Primary Rate Access Line rates, including interoffice channels if applicable, apply in addition to Primary Rate Interface and Primary Rate Channel charges.
- d. If the customer chooses to purchase additional channels after purchasing the original 23B + D configuration, the customer must purchase another Primary Rate Access Line and another Primary Rate Interface as well as the additional channels. Additional channels can be purchased in increments of 12.
- e. Rates and charges for optional features and functions are applied to each Primary Rate Interface for which the option is ordered.

7. Rates and Charges

a. ISDN-PRI Primary Rate Access Line

Primary Rate Access Line is furnished between a serving central office and the customer's designated premises. Primary Rate Access Line charges apply per point of termination.

1. Primary Rate Access Line (Intraexchange)

	Monthly Rate	Nonrecurring Charge First	Nonrecurring Charge Add'l*
1.544 Mbps			
Month to month**	\$248.00	\$300.00	\$110.00
12-23 months	202.00	200.00	110.00
24-35 months	194.00	110.00	0.00
36-59 months	180.00	0.00	0.00
60-84 months	152.00	0.00	0.00

* Additional facilities must be installed at the same customer designated premises on the same trip and placed on the same service order.

**Minimum Service Period for ISDN-PRI is six months.

2. Primary Rate Access Line (Interexchange)

The rates, charges and regulations applicable to TransLink[®] Service, as defined in Section A21 of this tariff, also apply for interexchange Primary Rate Access Lines.

b. Primary Rate Interface

	Monthly Rate	Nonrecurring Charge
1. Primary Rate Interface One-Way Per ISDN-PRI Primary Rate Access Line (Data only or Voice and Data)		
Month to month	\$138.70	\$230.00
12-23 months	123.70	130.00
24-35 months	90.70	20.00

		<u>Monthly Nonrecurring</u>	
		<u>Rate</u>	<u>Charge</u>
e.	Optional Feature Packages		
1.	Premium Package* Includes National ISDN-2 Protocol**, E911 Call Screening**, Incoming Call Identification (Caller ID Name and Number), Call-by-Call/Integrated Service Access Feature Capability, and 2 B-Channel Transfer** Per Primary Rate Interface	\$195.00	\$285.00

f. Move Charge

A Move Charge, per ISDN-PRI Primary Rate Access Line, applies for each Primary Rate Access Line moved to a new location in the same building. This Move Charge is equal to the sum of the Primary Rate Access Line nonrecurring charge, Service Change Charge - Inside Moves and Premises Visit Charge specified in Section A29 B.7.g.4.b.

g. Service Connection Charges

1. Service Establishment Charges are applicable for each ISDN-PRI Primary Rate Access Line ordered, for receiving and recording information and/or taking action in connection with a customer's request, and processing the necessary data. These charges include engineering design, common centralized testing and coordination. The nonrecurring charges associated with service establishment are found in Section A29 B.7.a, b, c.
2. Service Change Charges are applicable for receiving and recording information and/or taking action in connection with a customer's termination change at the same premises or transfer of service responsibility request, for processing the necessary data on an existing Primary Rate Access Line. A Service Change Charge is applicable for each Primary Rate Access Line associated with the customer request (in lieu of a Service Establishment Charge).
3. Premises Visit Charges are applicable per Primary Rate Access Line, for the termination of a channel at a customer's premises or for termination change at the same premises. Only one Premises Visit Charge applies when more than one channel service of the same type is terminated or moved at the same premises at the same time.

* Only available for customers subscribing to ISDN Primary Rate Interface Two-Way under a Term Discount Plan.

** Certain equipment restrictions apply.

g. Service Connection Charges (Cont'd)

4. Charges

	<u>Nonrecurring Charges</u>
a. Service Change Charge per Primary Rate Access Line	
1. For termination change at the same premises, physical, per Primary Rate Interface	\$165.00
2. For termination change at the same premises, Programming, per Primary Rate Interface	35.00
b. Premises Visit Charge per Primary Rate Access Line or for an Inside move	125.00

h. Termination Liability Charges

1. If a customer under a Term Discount Plan (TPD) disconnects all or a portion of the ISDN-PRI Service prior to the expiration of the TPD, then a Termination Liability Charge will apply to those services that are disconnected. The Termination Liability Charge will be a one-time charge equal to the sum of 50% of the payments remaining for the rest of the TDP. If Charges Applicable Under Special Conditions were applied to the service being terminated, any termination charges associated with Charges Applicable Under Special Conditions will also apply.
2. Rate increases or decreases will automatically be applied to the monthly term plan rates for the remaining term of the TDP. If Company initiated rate increases to any rate element or combination of rate elements causes the charges for the entire ISDN-PRI service under the TDP to increase by 10% or more annually, then the customer may cancel the TDP without incurring termination liability charges provided that the customer notifies the Company within 30 days after the effective date of the rate increase.

(Cont'd)

7. Rates and Charges (Cont'd)

h. Termination Liability Charges (Cont'd)

3. The customer can extend TDP commitment periods at any time during the term of the plan, up to a maximum of 84 months. The number of months accrued in the current plan will apply toward the new plan selected.
4. At the end of the TDP service commitment period, the customer may subscribe to a new TDP at the prevailing rates. If the customer does not select a new TDP, the prevailing rates applicable for the expired TDP will continue in effect for as long as the customer chooses to continue subscribing to the ISDN-PRI services installed under the expired TDP. Additional ISDN-PRI services installed after the TDP expiration date will not be eligible for the TDP rates and will be charged at the prevailing month to month rates unless the customer selects a TDP for those services.
5. Termination Liability Charges will not apply when a service or rate element under a (TDP) arrangement is disconnected prior to the expiration of a selected service period as a result of a change in tariff jurisdiction and/or a customer requested upgrade to a next generation service offering under the following conditions:

The service period of the new TDP for the new service offering is a period equal to or exceeding the remaining service period of the disconnected TDP, and

The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between the installation of the new service the disconnection of the existing service, and

The service orders to install the new service and disconnect the old service are for the same customer at the same location.

The Telephone Company will determine whether replacement service qualifies as a next generation service offering.

Nonrecurring charges and Service Charges for the new service will apply according to the requirements of the new service.

DIGITAL NETWORK SERVICES

C. INTEGRATED SERVICES DIGITAL NETWORK-BASIC RATE INTERFACE (ISDN-BRI)

1. General

- a. Integrated Services Digital Network - Basic Rate Interface (ISDN-BRI) is a local exchange telecommunications service that provides integrated voice and data communications capability. ISDN-BRI service supports the simultaneous transmission of voice and data over a single exchange access line.

ISDN-BRI provides a customer two B-channels with transmission speeds up to 64 Kbps each and one 16 Kbps D-channel. The service provides communication paths providing end user access to a variety of network services and features including data, voice and video, which conforms to internationally developed, published and recognized standards generated by the International Telecommunications Union.

b. Service Capabilities

- 1) ISDN-BRI consists of three distinct channels delivered to the customer's premises: two B (bearer) channels and one D (delta) channel. This is also known as 2B+D. ISDN-BRI is not available in other channel configurations of 1B+D or 0B+D.
- 2) The B-channel carries voice and/or data communications at speeds up to 64 Kbps, from the customer's premises, over the loop facility, to the central office. Packet data services are not available over the B-channel.
- 3) The D-channel carries administrative signaling at 16 Kbps for call-control for either a voice or data B-channel call on the ISDN-BRI line. The D-channel does not have voice capability. Packet data services are not available on the D-channel.
- 4) Customers subscribing to ISDN-BRI must comply with ISDN Basic Rate Network Interface specifications as specified by the Company. The ISDN Basic Rate Interface is comprised of a limited set of standard user-network interfaces. The BRI customer premises equipment (CPE) located at the customer premises must be compatible with the network interface. This interface is defined as follows:

C. INTEGRATED SERVICES DIGITAL NETWORK-BASIC RATE INTERFACE (ISDN-BRI) (Cont'd)

1. General (Cont'd)

b. Service Capabilities (Cont'd)

4) (Cont'd)

A two-wire interface is the physical interface between a central office switch equipped with ISDN and the customer premises equipment which is necessary for terminating a telephone circuit or facility at the customer premises.

c. Standard Features

- 1) Closed User Group - allows the user to establish subnetworks within which the members of the Closed User Group can communicate. Each data terminal in a Closed User Group can be arranged in one of the follow modes:
 - a) Outgoing Access - The data terminal originates outgoing calls only. These calls may terminate within or out of the Closed User Group.
 - b) Incoming Access - The data terminal receives incoming calls only. These calls may terminate within or out of the Closed User Group.
 - c) Incoming Calls Barred - The data terminal originates outgoing calls only to the data terminals in the Closed User Group with which it is associated.
 - d) Outgoing Calls Barred - The data terminal receives incoming calls only from the data terminals in the Closed User Group with which it is associated.
 - e) Unrestricted Access - The data terminal receives and originates both incoming and outgoing calls.

c. Standard Features (Cont'd)

- 2) Configuration Group - Associates a button or buttons of an ISDN-CPE station to a feature or group of features. Each different telephone set button arrangement requires that a different Configuration Group be assigned.

d. Service Capability Packages*

- 1) Customers shall subscribe to one of the following Service Capability Packages specifying the assignment of each B-channel. Through the North American ISDN Users' Forum, a set of ISDN Service Capability Packages have been defined and given a letter designation. Each of the Service Capability Packages describes a specific interface configuration as well as the features and capabilities of that interface. Detailed technical specifications are defined for each of the Service Capability Packages. These packages have been established to help simplify the ordering, provisioning, and installation of ISDN.

- a) Standard ISDN-BRI (equivalent to Package S without features)
1-B Alternate voice/data
1-B Alternate voice/data

Key Telephone Systems

ISDN may be purchased for a key system from this tariff in the place of a key trunk (for ISDN-capable key systems). If terminating an ISDN-BRI line into key system, the customer shall order one of the following Service Capability Packages:

- * ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

1) (Cont'd)

- j) Multi-line Hunt Group - This feature is limited to hunting within ISDN-BRI lines and on an individual customer location basis. Directory numbers within the multi-line hunt group may not have multiple call appearances.
- k) Feature Package 1 - This package includes:
 - Calling Number ID/Calling Name ID
 - Call Forwarding
 - Flexible Calling
 - Automatic Callback
 - Additional Call Offering
- l) Loop Extension - ISDN-BRI is available only where the customer's service location is within the provisioning limitations as determined prior to installation of the service. This limitation is a cable plant distance of approximately 18,000 feet. The actual distance is dependent on decibel (db) loss and not just physical loop length. Should the customer's service location exceed said limitations, service will be provided where the Company has compatible facilities available, or where existing facilities can be made compatible by the addition of special equipment. This service, which carries an additional charge, is called Loop Extension and will extend the ISDN-capability to approximately 36,000 feet.

2. Regulations

- a. This service is offered only where facilities and appropriate technology exist.

* ISDN terminal equipment is the responsibility of the customer and must support the configuration, optional services, and features chosen by the customer.

DIGITAL NETWORK SERVICES

C. INTEGRATED SERVICES DIGITAL NETWORK-BASIC RATE INTERFACE (ISDN-BRI) (Cont'd)

2. Regulations (Cont'd)

- b. Local voice and data calls will be billed on a flat-rate basis, as shown in Section A29.C.3 of this tariff. Toll charges shall apply when data or voice calls are made outside of the customer's designated local calling area. When two simultaneous B-channels are combined for a maximum data speed of 128 Kbps, the toll call will be billed as if two calls were dialed by the originating customer.
- c. In exchanges where IntraLATA presubscription has been implemented, only one InterLATA and one IntraLATA Carrier may be selected for all B-channels associated with the same ISDN-BRI Service. Access via 101XXXX to other Interexchange Carriers is available.
- d. A minimum service period of three months is required.
- e. The Company shall terminate ISDN-BRI Services at the Company Network Interface Device (NID) located at the customer's premises.
- f. Two Primary Directory Numbers will be included with an ISDN-BRI Service, one for each B-Channel. If Additional Directory Numbers are required on either channel, an additional charge, as specified in Section A29.C.4 of this tariff, will apply for each additional number.
- g. ISDN-compatible customer premises terminal equipment is required for proper operation. It is the customer's responsibility to provide necessary power and obtain such equipment.
- h. The provisions for temporary suspension of service, as defined in Section A2 of this tariff, do not apply to ISDN-BRI service.

DIGITAL NETWORK SERVICES

C. INTEGRATED SERVICES DIGITAL NETWORK-BASIC RATE INTERFACE (ISDN-BRI) (Cont'd)

2. Regulations (Cont'd)

- i. This service is available only from central offices, which have the necessary facilities to provide ISDN-BRI on the standard network platform. In the event a customer is provided service from a non-ISDN compatible central office, the Company will provide ISDN-BRI Service from an alternative serving central office. This provision is accomplished by utilizing a 'hubbing' architecture and the subscriber may be required to accept a unique NXX.

When service is provided from an alternative Central Office, the appropriate Foreign Central Office or Foreign Exchange Service charges for usage and mileage as specified in Section A9, will apply in addition to the rates and charges shown in this section.

Emergency 911 calls, both enhanced and basic, placed over ISDN-BRI lines provisioned via this arrangement will be identified as the alternative serving central office NXX and not the non-ISDN compatible central office NXX. The Company shall not be liable for any loss or damages arising from the emergency calls placed from ISDN-BRI lines provisioned via an alternative serving central office.

- j. One directory listing will be provided with ISDN-BRI. Additional listings are available as specified in the Company's General Exchange Tariff.
- k. ISDN-BRI Service will be assessed the appropriate inter-state charges (e.g. End User Common Line and Presubscribed Interexchange Carrier Charge), as defined in the Company's Interstate Access Tariff.
- l. ISDN-BRI does not provide for the transmission of packet data on either the D-channel or one of the B-channels.

Cancelling Original Sheet 32.1
Effective: January 22, 1999

DIGITAL NETWORK SERVICES

C. INTEGRATED SERVICES DIGITAL NETWORK-BASIC RATE INTERFACE (ISDN-BRI) (Cont'd)

2. Regulations (Cont'd)

- m. ISDN-compatible terminal equipment is a requirement for operation and is the customer's responsibility. ISDN customer-premise equipment is dependent upon commercial power and not power from the Company central office. For their safety and well-being, all ISDN customers are encouraged to maintain a non-ISDN access line on the premises for emergency calls in the event of a loss of commercial electrical power. In the event a subscriber elects to disconnect or not maintain a non-ISDN access line, the customer assumes full responsibility for telephone service in the event of an emergency.
- n. ISDN-BRI Service is available for residence and business service.
- o. ISDN-BRI lines may be purchased out of this tariff to be associated with Centrex Service, as defined in Sections A11, A12 and A23 of this tariff. Terms and conditions for Centrex Service will apply to these ISDN-BRI lines except as otherwise stated in this section. Optional features compatible with ISDN-BRI may be purchased from the Centrex Optional Features Section of the tariff as well as features unique to ISDN lines from the Optional Features in this section.

ISDN-BRI lines associated with Centrex Service may be purchased only for those features from the Centrex section of the tariff. ISDN-BRI can be provisioned in the same Centrex customer group if, and only if, the customer group is resident in an ISDN equipped host or remote office. All other Centrex customers can subscribe to ISDN-BRI; however, the service will be provisioned as a stand-alone service and will not be included in the customer group.
- p. ISDN-BRI Service may be terminated in key telephone systems in lieu of a key trunk. However, the key telephone system must be ISDN compatible.
- q. ISDN-BRI Service for customers subscribing to Rotary Hunt Service, as defined in Section A3 of this tariff will be provisioned outside the existing hunt group.

Cancelling Third Revised Sheet 33
Effective: August 7, 2002

DIGITAL NETWORK SERVICES

C. INTEGRATED SERVICES DIGITAL NETWORK-BASIC RATE INTERFACE (ISDN-BRI) (Cont'd)

2. Regulations (Cont'd)

r. Verification and Emergency Interrupt service is not available for ISDN-BRI Service.

3. Application of Rates

- a. ISDN-BRI Service is offered on an unlimited use basis. All applicable state and federal charges will apply. Extended Area Service (EAS) charges, if applicable as defined in the General Exchange Tariff apply per ISDN-BRI B-channel. Toll charges apply when data or voice calls are completed outside the customer's designated local calling area or EAS territory.
- b. The monthly rates for Service Capability Packages are applied on a per package basis.
- c. The ISDN-BRI monthly rates are in addition to the applicable R-1 (Residential One Party), B-1 (Business One Party) or Centrex access line rate. These rates vary by service area and can be found in Sections A3, A11, A12 and A13.
- d. The Non-Recurring Charge for ISDN Service Capability Package will be discounted 50% when a customer commits to a 12-month service period or 100% when a customer commits to a 24-month service period. If termination of service prior to the end of the commitment occurs, the customer is responsible for payment of the discounted amount of the Non-Recurring Charge, which represents the charges initially waived.

However, this termination requirement will not apply when the customer converts to a Next Generation Service Offering of a separately tariffed service, provided that:

- 1) The service period for the new service offering is a minimum period equal to or exceeding the remaining service period of the disconnected arrangement, whichever is greater; and
- 2) The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between installation of the new service and disconnection of the existing service; and
- 3) The service orders are for the same customer at the same location.

Integrated Services Digital Network-Basic Rate Interface (ISDN-BRI) to: Integrated Services Digital Network-Primary Rate Interface (ISDN-PRI), Frame Relay Service (FRS) or Asynchronous Transfer Mode (ATM) are a few examples of a Next Generation Service Offering.

DIGITAL NETWORK SERVICES

D. ATM SERVICE

1. Description

- a. Asynchronous Transfer Mode (ATM) is a connection-oriented fast packet local, intraLATA, and intrastate interLATA network service that permits the transmission of high speed data, voice, and video traffic utilizing cell switching technology. ATM cells are fixed length cells that provide symmetrical duplex transmissions. Utilizing statistical multiplexing, ATM Service enables customers to allocate circuit bandwidth to applications as needed on virtual paths or channels. ATM Service allows multiple data applications to be transmitted within multiple paths or channels utilizing common fiber optic or copper facilities. ATM Service is primarily designed for businesses with several multi-site locations requiring the transport of data, voice, or video traffic between the sites. ATM Service allows for the interconnection of Customer Premises Equipment (CPE) that is ATM compatible.
- b. Permanent Virtual Circuits (PVCs) are logical channels between the customer's premises and ports on an ATM switch or between ATM switches. PVCs are duplex channels that are established via the service order process. Separate PVCs must be established to each customer location at which the customer desires ATM Service. PVC channels are virtual channels that are established in software tables and do not tie up facilities when not in use. Multiple PVCs can be defined over a single ATM User Network Interface (UNI), thereby providing a single access line with the capability to transmit data, voice, and video to multiple destinations simultaneously. A PVC can be set up as either a Virtual Path (VP) or a Virtual Channel (VC) type connection. A VP may contain multiple VCs referred to as tunneling. Tunneling allows customers to establish VCs or end to end connections between their CPE via VPs.

DIGITAL NETWORK SERVICES

D. ATM SERVICE (Cont'd)

1 Description (Cont'd)

- c. ATM Service requires the use of CPE that functions as a multiplexer, aggregator, concentrator, or router. This CPE must be purchased separately from the ATM Service and must conform to the Consultative Committee for International Telecommunication Union (ITU) Standards, ATM Forum Standards, and Company ATM CPE standards. Only Company standardized equipment may be connected to the ATM network. The CPE functions to accumulate customer data and transfers it into an ATM format suitable for transmission over the ATM Network.
- d. In the operation of ATM, the CPE captures arriving data into fixed length ATM 53-byte cells. These cells contain a 48-byte cell user information segment, and a five byte header containing a Virtual Path Identifier (VPI) and a Virtual Channel Identifier (VCI), identifying which PVC in the network should be used to forward the cell to the proper destination. The CPE sends the cells into the ATM Network over a dedicated access facility called an ATM Access Line that includes a UNI, which is a port on the ATM switch. The ATM switch, usually located in the Company central office, reads identifying header information and routes the cell to the proper destination based on a pre-established PVC, over a VP and/or VC.
- e. ATM Service is capable of handling the requirements of bursty data sources because of the ability of the service to allocate additional bandwidth when not in use by other sources. ATM Service can also transmit delay sensitive traffic such as voice and video, on the same physical circuit, but with a different Quality of Service (QoS) category on separate PVCs, within the same physical circuit.

SECTION A29
First Revised Sheet 38
Cancelling Original Sheet 38
Effective: April 2, 1999

DIGITAL NETWORK SERVICES

D. ATM SERVICE (Cont'd)

1. Description (Cont'd)

- f. ATM Service is provided to the customer in the form of an ATM Access Line (a physical line that may be fiber or copper) from the Customer Designated Location (CDL), an ATM UNI port on the ATM switch, and the ATM network bandwidth via a PVC or multiple PVCs. The ATM UNI port access options available are: DS1, 2xDS1, 4xDS1, 6xDS1, 8xDS1, DS3, and OC3. Information Rate (IR) or through-put, for PVCs is available in bands ranging from 56 Kbps/64 Kbps up to 155 Mbps.
- g. The actual through-put or IR for aggregated PVC bandwidths cannot exceed the port speed, or the port line transfer rate. The customer must specify a category of service for each PVC to be connected to the ATM network. The QoS category defines the performance parameters for each connection to meet specific networking requirements. QoS provides three categories of service:
 - (1) Constant Bit Rate (CBR) for delay or timing sensitive traffic such as voice or interactive video, provides a constant data rate and consistent delay parameters throughout the ATM network. CBR PVCs are given the highest priority in the ATM network, and are provisioned to provide the minimum Cell Delay Variation (CDV) or "jitter". The Peak Cell Rate (PCR), which is the highest transmission rate the logical connection will allow, must be specified by the customer.

DIGITAL NETWORK SERVICES

D. ATM SERVICE (Cont'd)

1. Description (Cont'd)

g. (Cont'd)

(2) Variable Bit Rate (VBR) a non-real time service designed for bursty data applications that provides a pre-assigned variable bit rate. VBR is ordered with two traffic parameters: (1) PCR, which defines the maximum rate of transmission, and (2) Sustainable Cell Rate (SCR), which provides an average through-put information rate expected on the connection. Customers must specify the SCR for ATM Service. Oversubscription is allowed with VBR.

(3) Unspecified Bit Rate (UBR) takes advantage of excess network bandwidth and is best suited for communication applications where timing of delivered data is not critical. UBR is well suited to Internet protocol LAN traffic, which has inherent reliability, and can tolerate occasional cell discarding. PCR and SCR values are not used with UBR. An advantage of UBR is that ATM cells can be transmitted up to the port line rate, if available, rather than being limited to a predefined maximum PCR, as with VBR and CBR. However, through-put is not guaranteed.

h. Since multiple PVCs may be defined on one physical port, it is possible for the cumulative data IRs of multiple PVCs to exceed the physical bandwidth of the port. This is referred to as oversubscription, and when this occurs there will be no guarantee that the IR defined for the port and PVC will be available at any point in time.

i. IRs are traffic management parameters that allow the customer to fine tune implementation of ATM Service. The IRs of PVCs can be customer specified and can be ordered in increments of bandwidth. IRs can be used on CBR and VBR PVCs only. IRs for UBR are by definition not used, and IRs can be up to the line rate or the UNI port transfer rate. UBR uses available network bandwidth and is a "best effort" service, therefore there are no guarantees with the delivery of UBR traffic. IRs are assigned to each PVC symmetrically (two-way).

DIGITAL NETWORK SERVICES

D. ATM SERVICE (Cont'd)

1. Description (Cont'd)

- j. For CBR PVCs, the customer may specify IRs in terms of PCR. The maximum PCR for a CBR PVC is limited to 99% of the port transfer rate. When CBR traffic is mixed with VBR and UBR on the same port, the sum of all the PCRs associated with the CBR PVCs must not exceed 50% of the maximum IR of the ATM port. The PCR should never exceed the PCR available at the lowest port access between the local and remote locations. For VBR PVCs, the value of the SCR for ATM traffic may be defined between 20%-70% of the PCR. The user can burst above the PCR for short periods only. The limit for VBR transmission at the PCR is 250 cells. This limit is called the Maximum Burst Size (MBS). If the MBS is exceeded, a period of lower activity must follow to meet the SCR. UBR traffic IRs are not specified and use only available network bandwidth and may burst up to the line rate.

2. Definitions

- a. ATM Access Line - Provides access to the ATM Network. An ATM Access Line includes both the physical dedicated local loop and a UNI port on the ATM switch.
- b. ATM Class of Service - Refers to service categories defined by the ATM Forum which define the traffic parameters for each VC. These categories, CBR, VBR, and UBR and their related parameters, partially define the traffic between the Company and the customer for each VC.
- c. ATM Network Link (ATM-NL) - Describes the link between two networks or two switches. The ATM-NL ensures that switches from different manufacturers or two different companies can communicate with each other.
- d. ATM Port - A port on the ATM network that is used to interconnect other Company provided private line services such as DigiLink, TransLink or a digital cross connect system port to ATM. The ATM Port is the physical entry point for PVCs. Ports are physically located on ATM switches and are generally named for their maximum capacity IR, such as DS1, DS3 and OC3.

DIGITAL NETWORK SERVICES

D. ATM SERVICE (Cont'd)

2. Definitions (Cont'd)

- e. ATM Service Network Serving Area - An area encompassing certain serving area points. Serving area points are those Company central offices designated for the ATM network.
- f. Cell - A unit of transmission in ATM that is a fixed size frame consisting of a 5 byte header and a 48 byte information payload.
- g. Customer Designated Location (CDL) - The geographic location designated by the customer where the customer's CPE is first considered to enter the Company's network.
- h. Direct Fiber - A type of DS3 or OC3 facility provisioned using an optical fiber interface with no alternate route.
- i. Early Packet Discard (EPD) - The procedure for discarding cells related to a frame or packet to minimize the impact of congestion in the ATM network. This discarding technique with Partial Packet Discard (PPD) minimizes the amount of packets that must be retransmitted during congestion. EPD is for UBR traffic only.
- j. Frame Relay Service (FRS) - A fast packet network that provides the customer high-speed access and through-put to different customer addresses. Utilizing statistical multiplexing, the frame relay network enables the customer to allocate bandwidth to applications as needed, rather than dedicating fixed channels to specific applications.
- k. Gateway Service - Allows the Company ATM customers to interconnect to another ATM or Frame Relay Network. The service is available wherever the Company has established a network interface with another private or public ATM or Frame Relay network. Gateway Service is only available where such network connectivity exists or where suitable connectivity arrangements can be made that are acceptable to the Company.

DIGITAL NETWORK SERVICES

D. ATM SERVICE (Cont'd) (N)

2. Definitions (Cont'd)

- i. Information Rate (IR) - Defines the amount of data through-put on any designated PVC that the Company will support under normal operating conditions. IR is administered per PVC, on a VP or VC basis. Any data burst beyond the IR may be labeled Discard Eligible (DE) if the data transfer rate exceeds the port transfer rate or the PCR of the PVC being used. If the ATM network develops congestion, the Early Packet Discard (EPD) and Partial Packet Discard (PPD) cell buffering techniques will be implemented in Company ATM switches for UBR traffic only. At service subscription, the customer must specify the PCR associated with each PVC. The retransmission of discarded cells is administered by the customer's CPE.
- m. Local Access and Transport Area (LATA) - Denotes a geographic area established for the provision and administration of communications service. It encompasses one or more designated exchanges that are grouped to serve common social, economic, and other purposes.
- n. Local Area Network (LAN) - A local network permitting the interconnection and intercommunication of a group of computers, primarily for the sharing of resources such as data storage devices and printers.
- o. Logical Channel - A communications channel that allows two-way, simultaneous transmission of sequenced data packets through the network. No circuit capacity is preassigned to a logical channel. Capacity is made available as the data is transmitted. Each PVC is considered one logical channel or one virtual channel.

GENERAL EXCHANGE TARIFF

By: F. B. Poag
Director

SECTION A29
First Revised Sheet 43
Cancelling Original Sheet 43
Effective: April 2, 1999

DIGITAL NETWORK SERVICES

D. ATM SERVICE (Cont'd)

2. Definitions (Cont'd)

- p. Maximum Burst Size (MBS) - Denotes the maximum number of consecutive cells that may be transmitted to the Company ATM network in a single burst at a rate that exceeds the SCR, but does not exceed the PCR, assigned to the VBR connection. MBS is a traffic parameter considered only for VBR traffic. Cells exceeding the MBS will be declared as non-conforming and will be discarded.
- q. Permanent Virtual Circuit (PVC) - Provides software-defined electronic paths between two ports within the ATM or Frame Relay Network. Each UNI requires the purchase of at least one PVC. A UNI or UNI Port connection can be associated with multiple PVCs. Since all PVCs need not be in use at the same time, it is possible for the total IR of all PVCs associated with one port to exceed the bandwidth of the port. It is not possible, however, for the simultaneous aggregation of the PVCs through-put to exceed the bandwidth of the port. Such a relationship is referred to as oversubscription or overbooking. When oversubscription occurs, there is no guarantee that the bandwidth defined for that PVC will be available at any point in time.
- r. Protocol - A specific set of rules, procedures or conventions relating to format and timing of data transmission. It is a standard procedure that multiple data devices must accept and use to be able to communicate with each other. Protocols break a file into parts called blocks or packets. When blocks or packets are sent, the receiving computer checks the arriving packet and sends an acknowledgment back to the sending computer.
- s. Route Diversity - A separate and diverse physical route from the customer premises to the Company Serving Central Office. This includes a separate fiber optic pair assignment in two different and distinct fiber optic cables.
- t. Serving Central Office (SCO) - The Company central office from which the customer normally receives dial tone.

DIGITAL NETWORK SERVICES

D. ATM SERVICE (Cont'd)

2. Definitions (Cont'd)

- u. Statistical Multiplexing – A multiplexing technique in which timeslots are dynamically allocated on the basis of need rather than being predetermined. The data is typically transmitted on a first come, first served basis.
- v. Synchronous Optical Network (SONET) - A standards based fiber optic communications network that transports both asynchronous and synchronous digital signals using the Synchronous Transport Signal (STS) format. This includes a DS3 or OC3 facility provisioned as a survivable service with an alternate route.
- w. UNI Port– A port on the Company ATM switch that is used to connect to the access line. The UNI port is the physical entry point for access to PVCs. The UNI port is on the line side or customer side of the ATM switch. UNI ports include the electronic equipment used in connecting these service elements to the ATM Network and enable customers to allocate bandwidth to applications as needed.
- x. User to Network Interface (UNI) – A standard interface used to connect the end user to the Company ATM switch. It receives data cells from the customer's LAN or other CPE devices and verifies that the data is valid before relaying the ATM cells to the destination point.

3. General Regulations

- a. ATM Service is provided to the customer in the form of an ATM Access Line or a combination of digital, private line transport facilities, including an ATM access port, otherwise known as a UNI, and a PVC at a specified IR. The ATM Access Line includes the UNI port. A PVC must be ordered for transmission between any two locations.
- b. ATM is provided subject to the availability of appropriate facilities.
- c. The minimum service period for ATM Service is six months. ATM Service may be ordered for an initial six month term or through a Term Discount Plan for fixed periods of up to 84 months.
- d. When the customer orders additional PVCs, nonrecurring charges will apply. In addition, nonrecurring charges will apply to all changes made to a customer's ATM configuration at the customer's request.
- e. The ATM access services not covered by this tariff will be ordered from the applicable Telephone Company General Exchange Private Line Tariff.
- f. Special Construction Charges, as defined in Section A5 of this tariff, may apply when technical limitations and/or the lack of facilities exist, or if it is necessary to construct facilities to satisfy service requests.
- g. Whenever facilities are provided jointly by the Company and one or more other telephone companies, the regulations, rates and charges of such other telephone companies apply for the equipment and facilities furnished by them for use in connection with the inter-exchange ATM Service provided by the Company.
- h. Where private line, Frame Relay Service, or ATM Service is required to interconnect to the Company's ATM Service for a customer, such service will be furnished only if satisfactory arrangements can be made with the other company.

3. General Regulations (Cont'd)

- i. Suspension of service at the customer's request, as defined in Section A2 of this tariff, is not allowed for ATM Service.
- j. The customer is responsible for payment of a Trouble Location Charge, as set forth in Section 4A of this tariff, for visits by the Company to the customer premises when a service difficulty resulting in a trouble report is caused by the use of equipment or facilities provided by the customer.

4. Obligations of the Company

- a. The responsibility of the Company is limited to furnishing network equipment suitable for ATM Service and to the maintenance and operation of such equipment in a manner proper for such service. Subject to this responsibility, the Company is not responsible for the through transmission of signals generated by the CPE or systems, or for the quality of, or defects in, such transmission or the reception of signals by such equipment or systems.
- b. The Company is not responsible for installation, operation or maintenance of any terminal equipment, data unit or communications system provided by a customer or user. The Company is not responsible for adapting ATM Service to the technological requirements of any specific customer equipment.
- c. The Company is not responsible to the customer or user if changes in any of the equipment, operations or procedures of the Company used in the provision of ATM Service render any facilities provided by the customer or user obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance, provided the Company has met any applicable information disclosure requirements otherwise required by law.
- d. In order to maintain the quality of ATM Service, the Company reserves the right to perform preventative maintenance and software updates to the network. The Company has classified this maintenance as indicated below:

D. ATM SERVICE (Cont'd)

4. Obligations of the Company (Cont'd)

d. (Cont'd)

Scheduled Maintenance

Scheduled maintenance is used to perform such functions as hardware and software upgrades and network optimization. The Company will perform these tasks in a maintenance window that is defined as occurring between midnight and 6 a.m., local time, seven days per week. The Company will provide advance notice of all scheduled maintenance.

Demand Maintenance

Demand maintenance may occur as a result of unexpected events and is performed when ATM Service network elements are in jeopardy. The Company will perform this type of maintenance at its discretion. Due to the nature of demand maintenance prior notification may not be possible; however, the customer will be informed when the maintenance has been completed.

5. Obligations of the Customer

- a. The customer's ATM compatible terminal equipment is responsible for retransmitting cells or packets that are discarded due to errors or network congestion.
- b. Where ATM Service is available for use in connection with communications systems or equipment provided by a customer or user, the operating characteristics of such systems or equipment shall be such as not to interfere with any services offered by the Company. Such use is subject to the further provisions that the equipment provided by the customer or user does not endanger the safety of Company employees or the public; does not damage, harm, require change in or alteration of the equipment or other services of the Company; does not interfere with the proper operation of the Company's equipment; or does not otherwise injure the public in its use of Company services. Upon notice from the Company that the equipment provided by the customer or user is causing, or is likely to cause, such hazard or interference, the customer shall take the necessary steps to remove or prevent such hazard or interference.

DIGITAL NETWORK SERVICES

D. ATM SERVICE (Cont'd)

5. Obligations of the Customer (Cont'd)

- c. The customer, upon request, shall furnish such CPE information as may be required to permit the Company to design and maintain the ATM Service it offers and to assure that the service arrangement is in compliance with the regulations contained herein.
- d. Upon service subscription, the customer should specify the IR and Class of Service for each PVC ordered. IR is the maximum information rate at which the customer's traffic will be admitted to the ATM network without being designated eligible for discard. A default of fifty (50) percent of the smallest port size will be assigned as the IR should the information not be provided. No individual PVC IR shall exceed (99) percent of the UNI port access rate. The sum of all PVCs IRs on a single ATM port must not exceed two hundred (200) percent of the port line rate.

6. Term Discount Plan (TDP)

- a. Term Discount Plan (TDP) provides the customer with discounted tariff rates for the ATM Access Line and the ATM-Network Link. The customer agrees to a minimum service commitment period for ATM Access Line and/or Private Network Link when the TDP is established. Customers may disconnect or move PVCs and not be subject to termination liability charges. The customer must order a TDP in writing to the Company. A TDP may be ordered in increments of one month, based on the following plan options:

Plan A:	12 - 23 months
Plan B:	24 - 35 months
Plan C:	36 - 59 months
Plan D:	60 - 84 months

- b. The customer must specify the length of the initial service period at the time the service is ordered. When a customer converts to a TDP, no administrative charges are applied toward facilities in service at that time. If a customer moves from a month-to-month plan to a TDP, or upgrades from one TDP to another, no administrative charges are applied.

6. Term Discount Plan (TDP) (Cont'd)

- c. If a TDP customer under a Term Discount Plan (TDP) disconnects any portion of the ATM Access Line and/or ATM-Network Link TDP service prior to the expiration of the TDP, then a Termination Liability Charge will apply to those elements that are disconnected. The Termination Liability Charge will be a one-time charge equal to the sum of 50% of the payments for the rest of the TDP. If Charges Applicable Under Special Conditions charges were applied to the service being terminated, any termination charges associated with the Charges Applicable Under Special Conditions will also apply.
- d. Rate increases or decreases will automatically be applied to the monthly term plan rates for the remaining term of the TDP. If Company initiated rate increases to any rate element or combination of rate elements causes the charges for the entire ATM service under the TDP to increase by 10% or more annually, then the customer may cancel the TDP without incurring termination liability charges provided that the customer notifies the Company within 30 days after the effective date of the rate increase.
- e. TDP commitment periods can be extended by the customer at any time during the term of the plan, up to a maximum of 84 months. The number of months accrued in the current plan will be applied toward the new plan selected.
- f. At the end of the TDP service commitment period, the customer may subscribe to a new TDP at the prevailing rates set forth in Section 8.a-g following. If the customer does not select a new TDP, the rates will convert to the prevailing month-to-month rates.

6. Term Discount Plan (TDP) (Cont'd)

- g. Termination Liability Charges will not apply when a service or rate element under a Term Discount Plan (TDP) arrangement is disconnected prior to the expiration of a selected service period as a result of a change in tariff jurisdiction and/or a customer requested upgrade to a next generation service offering under the following conditions:

The service period of the new TDP arrangement for the new service offering is a period equal to or exceeding the remaining service period of the disconnected arrangement TDP, and

The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between the installation of the new service and disconnection of the existing service, and

The service orders to install the new service and disconnect the older service are for the same customer at the same location.

The Telephone Company will determine whether replacement service qualifies as a next generation service offering.

Nonrecurring charges and Service Charges for the new service will apply according to the requirements of the new service.

D. ATM SERVICE (Cont'd)

7. Service Components

- a. Administrative Charge – Applies to changes in a customer's network associated with PVCs. Although multiple changes can be caused by such actions, only one administrative charge applies per customer request. This administrative charge applies in addition to applicable Service Charges as specified in Section A4 of this tariff.
- b. ATM Access Line (ATM-AL) - A nonrecurring charge and monthly rate based on the connection line speed of the local loop access line. The access line is from the CDL to the serving central office and includes the UNI port on the ATM switch. Where the CDL is located in another telephone company's service area, the ATM Access Line charges provide for transport to the meet-point boundary with the other local telephone company. Charges for service from the meet-point boundary to the CDL will be the responsibility of the customer based on the rates and charges of each jointly provisioning telephone company. Special Construction Charges may apply, if facilities do not already exist. Route Diversity of the loop portion of ATM Access Line also may require a Special Construction Charges.
- c. ATM Network Link (ATM-NL) - A nonrecurring charge and monthly rate based on the DS1 or DS3 port at the Company's ATM and transport from the ATM to the interconnecting ATM. Where the service is jointly provisioned with another telephone company, the appropriate charges will be based on the distance from the ATM to the meet-point boundary with the other telephone company. Charges for service from the meet-point boundary to the other company's ATM switch will be the responsibility of the customer based on the rates and charges of each jointly provisioning telephone company. In addition to a DS1 or DS3 ATM Network Link, a minimum of one Gateway Service for bandwidth will apply.
- d. ATM Port - A nonrecurring charge and monthly rate based on the speed of the port connection applies per port connection to the network supporting ATM. The port rate element can be used in lieu of the ATM Access Line element if the customer has an alternative Company-approved means of access to the ATM Network (such as DigiLink and TransLink).

Cancelling Original Sheet 52
Effective: April 2, 1999

DIGITAL NETWORK SERVICES

D. ATM SERVICE (Cont'd)

7. Service Components (Cont'd)

- e. Gateway Service - This service allows the Company's ATM customers to interconnect to another ATM or FRS Network. The service is available wherever the Company has established a network interface with another private or public ATM or Frame Relay network. The charge for this service covers the facility from the Company ATM port to the interconnecting ATM or Frame Relay point of another company. The charge includes the software defined PVC to the other company's network to the UNI port, but does not include the UNI port provided by the other company. Gateway Service is purchased in increments of IR. The customer accomplishes this by ordering PVCs and Gateway Service connections to the other company's ATM or Frame Relay Network.
- f. IR and PVC - A monthly rate applies for each PVC based on the IR requested by the customer. If no IR is indicated, the IR will be set at the default of 50% of the associated ATM UNI Port. A nonrecurring charge applies for the establishment of each PVC and for each subsequent order of PVC(s). A separate rate is established for PVCs that are intraLATA and for PVCs that are interLATA.

Customers may select from three different Categories of Service or Classes of Service for PVCs to ensure greater reliability for mission-critical applications in the event of network congestion:

Lowest Priority – Unspecified Bit Rate (UBR)
Higher Priority – Variable Bit Rate (VBR)
Highest Priority – Constant Bit Rate (CBR)

This flexibility helps to ensure maximum performance and satisfaction for individual customer data applications.

D. ATM SERVICE (Cont'd)

8. Rates and Charges (Cont'd)

f. Administrative Charge

An administrative charge will be applied, in addition to applicable service connection charges as specified in Section A4 of this tariff, when a customer initiated change is made to the parameters associated with Permanent Virtual Circuits (PVC) or other service parameters that do not involve the reconfiguration of an ATM Access Line or an ATM Port. Such changes are defined as those requiring no changes in physical facilities, and can be facilitated by the Company without dispatching Company personnel to the customer's physical location. When changes to an ATM Access Line or an ATM Port are involved, a disconnect order and a subsequent connect order will be required and the appropriate NRC as specified in this section of the tariff will apply. The administrative charge applies to changes in a customer's network associated with PVCs. Only one administrative charge applies per customer request.

Administrative Charge (Nonrecurring)	\$75.00

Effective: April 15, 2001

DIGITAL NETWORK SERVICES

E. ENHANCED FRAME RELAY SERVICE

1. Description

- a. Enhanced Frame Relay Service (EFRS) is a fast packet network that permits the transmission of data at speeds of 56/64 Kbps, 128 Kbps, 256 Kbps, 384 Kbps, 512 Kbps, 1.544 MBPS, or 44.210 MBPS using Permanent Virtual Circuits (PVCs). Utilizing statistical multiplexing, the FRS network enables the customer to allocate circuit bandwidth to applications as needed, rather than assigning fixed channels to specific applications.
- b. Permanent Virtual Circuits (PVCs) are logical channels that connect ports on a frame relay switch or between frame relay switches. PVCs are end-to-end, bi-directional channels that are established and non-established via the service order process. Separate PVCs must be established to each location to which the customer desires to transmit data. PVC channels are virtual channels that are established in software tables and do not tie up facilities when not in use. With EFRS, customers may select from three different classes of PVCs to ensure greater reliability for mission-critical applications in the event of network congestion. Multiple PVCs can be defined over a single Enhanced Frame Relay Access Line (EFRAL), thereby providing a single access line the capability to transmit data to multiple destinations.
- c. EFRS requires the use of customer terminal equipment that functions as a multiplexer, bridger or router. This terminal equipment must be purchased separately from the EFRS and must conform to Consultative Committee for International Telecommunication Union (ITU) and American National Standards Institute (ANSI) standards set forth in ITU: Q.933 Annex A, ANSI: T1.617 Annex D. The terminal equipment accumulates customer data and transfers it into a frame relay format suitable for transmission over the EFRS network.
- d. In the operation of EFRS, Customer Premises Equipment (CPE), such as frame relay assemblers and disassemblers, encapsulate arriving data into variable length frames. The information contained in these frames is data link connection identifier (DLCI) addresses, which identifies the PVC in the network that should be used to forward the frame to its proper destination. The CPE then sends the frame into the EFRS network over a dedicated access facility called a User Network Interface (UNI). The frame relay switch reads identifying information and routes the frame to the proper destination based on pre-established PVC.

DIGITAL NETWORK SERVICES

E. ENHANCED FRAME RELAY SERVICE (Cont'd)

1. Description (Cont'd)

- e. Variable frame length capability is useful in communications between asynchronous Local Area Networks (LAN) and for transport of synchronous data traffic. EFRS is capable of handling the requirements of bursty data sources because of the ability of the service to allocate additional bandwidth when not in use by other sources.
- f. EFRS is provided to the customer in the form of an EFRAL, Frame Relay User Network Interface Port and the PVC.
- g. The actual throughput of aggregated PVC bandwidths in use at the same time on the same port cannot exceed the port speed.
- h. Since multiple PVCs may be defined on one physical port, it is possible for the cumulative Committed Information Rates (CIRs) to exceed the physical bandwidth of that port. This is referred to as oversubscription and when this occurs, there can be no guarantee that the CIR defined for that port and PVC will be available at any point in time.
- i. The CIR and the Excess Burst Size (B_e) are traffic management parameters that allow the customer to fine tune implementation of EFRS in conjunction with the classes of PVCs offered.
- j. 64 Kbps Clear Channel Capability (CCC) will be provided upon request and where deemed applicable by the Company. Charges Applicable Under Special Conditions may apply.

2. Definitions

- a. 64 Kbps Clear Channel Capability (CCC) - A channel connection that provides an end-to-end digital connection between the customer's premises and the customer's Central Office in which all 64 Kbps of bandwidth are available for the customer's use.
- b. Committed Information Rate (CIR) - Defines the amount of data throughput on any designated PVC that the Company will support under normal operating conditions. CIR is administered per PVC. Any data burst beyond the CIR may be labeled Discard Eligible (DE) if the data transfer rate exceeds the CIR of the PVC being used. If the EFRS network develops congestion, the frames marked DE may be discarded. Upon service subscription, the customer must specify the PVC class and CIR for each PVC. The retransmission of discarded frames is administered by the customer's CPE.
- c. Customer Designated Location (CDL) - The geographic location designated by the customer where the customer's CPE is first considered to enter the Company's network.

DIGITAL NETWORK SERVICES

E. ENHANCED FRAME RELAY SERVICE (Cont'd)

2. Definitions (Cont'd)

- d. Data Link Connection Identifier (DLCI) – The address information contained in the frame relay header that conveys to the network how an individual frame should be routed. The DLCI essentially defines the customer end point to which a particular frame should be sent.
- e. Enhanced Frame Relay Access Line (EFRAL) – A UNI that provides access to the EFRS network. An EFRAL includes the provision of an enhanced frame relay access port and the physical facility from the customer designated location to the Company Serving Central Office.
- f. Enhanced Frame Relay Access Port (EFRAP) – A port on the EFRS network that is used to interconnect other Company provided private line services such as a digital cross connect system port to the EFRS network. The EFRAP is the physical entry point for PVCs. Ports include the electronic equipment used in connecting these service elements to the EFRS network and enable customers to allocate bandwidth to applications as needed.
- g. Enhanced Frame Relay Service (EFRS) – A fast packet network that provides the customer high-speed access and throughput to different customer addresses. Utilizing statistical multiplexing, the EFRS network enables the customer to allocate bandwidth to applications as needed, rather than dedicating fixed channels to specific applications. Customers may select from three different classes of PVCs to ensure greater reliability for mission-critical applications in the event of network congestion.
- h. Enhanced Frame Relay Service Network Serving Area – Area encompassing certain serving area points. Serving area points are those Company serving central offices designated for the EFRS Network Serving Area.
- i. Excess Burst Size (B_e) - Denotes the data above CIR at which customer data will be admitted to the EFRS network. All Excess Burst data admitted to the network that exceeds the CIR will be designated discard eligible.
- j. Frame - A sequence of contiguous bits delimited by beginning and ending flag sequences.
- k. Gateway Service – Allows the Company EFRS customers to interconnect to other frame relay networks. The service is available wherever the Company has established a network interface with another private or public frame relay network. Gateway Service is only available where such network connectivity exists or where suitable connectivity arrangements can be made that are acceptable to the Company.

DIGITAL NETWORK SERVICES

E. ENHANCED FRAME RELAY SERVICE (Cont'd)

2. Definitions (Cont'd)

- l. Local Access and Transport Area (LATA) - Denotes a geographic area established for the provision and administration of communications service. It encompasses one or more designated exchanges that are grouped to serve common social, economic, and other purposes.
- m. Local Area Network (LAN) - A network permitting the interconnection and intercommunication of a group of computers, primarily for the sharing of resources such as data storage devices and printers.
- n. Logical Channel - A communications channel that allows two-way, simultaneous transmission of sequenced data packets through the network. No circuit capacity is preassigned to a logical channel. Capacity is made available as the data is transmitted. Each PVC is considered one logical channel or one virtual channel.
- o. Maximum Burst Rate (MBR) - Denotes the maximum information rate at which customer traffic will be admitted to the EFRS network. Traffic rates in excess of MBR will be automatically discarded on ingress to the network. MBR is equal to the sum of the Committed Information Rate (CIR) and Excess Burst Size (B_e).
- p. Network to Network Interface (NNI) - Specifies how a frame relay switch sends and receives data from a frame relay interexchange carrier's or other customer's network.
- q. Permanent Virtual Circuit (PVC) - Provides a software-defined electronic path between the two ports within the EFRS network. A UNI or NNI port connection can be associated with multiple PVCs. Since all PVCs need not be in use at the same time, it is possible for the total CIR of all PVCs associated with one port to exceed the bandwidth of the port. It is not possible, however for the simultaneous aggregation of the PVCs throughput to exceed the bandwidth of the port. Such a relationship is referred to as oversubscription or overbooking. When oversubscription occurs, there is no guarantee that the bandwidth defined for that PVC will be available at any point in time. PVCs classified as Frame for Voice receive the highest priority routing with PVCs classified as Frame for SNA next in priority. Frame for LAN PVCs receive standard frame relay switching priority.
- r. Private Network Link (PNL) - The facilities, normally DS1 service used from a customer's frame relay switch location to the Company's Enhanced Frame Relay Service Network.

DIGITAL NETWORK SERVICES

E. ENHANCED FRAME RELAY SERVICE (Cont'd)

2. Definitions (Cont'd)

- s. Protocol - A specific set of rules, procedures or conventions relating to format and timing of data transmission between two devices. It is a standard procedure that two data devices must accept and use in order to understand each other. Protocols break a file into parts called blocks or packets. When packets are sent, the receiving computer checks the arriving packets and sends an acknowledgment back to the sending computer.
- t. Servicing Area Points - Geographical locations designated by the Company where EFRS network ports are located and where the EFRS network is accessed.
- u. Serving Central Office (SCO) - The Company central office from which the customer normally receives dial tone.
- v. Systems Network Architecture (SNA) - IBM's data communications scheme.
- w. Statistical Multiplexing - A multiplexing technique in which timeslots are dynamically allocated on the basis of need rather than being predetermined. The data is typically transmitted on a first come, first served basis.
- x. User to Network Interface (UNI) - A standard interface used to connect the end-user to the Company EFRS network. The UNI receives the data frame from the customer's LAN or other CPE devices and verifies that the DLCI is valid before relaying the frame to the destination point.
- y. Utilization Reports - Reports that the customer can order that display circuit utilization for Enhanced Frame Relay Access Ports (EFRAP) and Permanent Virtual Circuits (PVC).

Effective: August 4, 2004

DIGITAL NETWORK SERVICES

E. ENHANCED FRAME RELAY SERVICE (Cont'd)

3. General Regulations

- a. EFRS is available at Company Servicing Area Point locations. EFRS is offered for local and intraLATA use where Company facilities exist. EFRS is offered for intrastate interLATA use where Company facilities exist. The regulations and rates specified herein are in addition to the applicable regulations and rates specified in other tariffs and other sections of this tariff.
- b. EFRS is provided subject to the availability of facilities.
- c. EFRS is provided to the customer in the form of an EFRAL or a combination of digital, private line transport facilities, (i.e., DigiLink, TransLink or LightLink) and an EFRAP and a PVC at a specified CIR. The EFRAL, or a combination of DigiLink, TransLink and LightLink, and an EFRAP from the customer access components to the EFRS network.
- d. 18 Mbps, 24 Mbps and 44.210 Mbps services are available at tariff rates only in exchanges that have an EFRS switch. 18 Mbps, 24 Mbps and 44.210 Mbps services are available at Individual Case Basis (ICB) rates in exchanges that do not have an EFRS switch. The EFRAP Only offerings are provided for digital special access line connections to the network supporting EFRS. Digital special access facilities are available from the Private Line section of this tariff, the Intrastate Access Service Tariff, or the Interstate Access Tariff.
- e. The minimum service period for EFRS is three months. EFRS may be ordered on a month to month basis or through a Term Discount Plan for fixed periods of 12 to 84 months.
- f. The provision of suspension of service at the customer's request, as defined in Section A2 of this tariff, is not allowed for Enhanced Frame Relay Service.
- g. The customer is responsible for payment of a Trouble Isolation Charge, as defined in Section A2 of this tariff, for visits by the Company to the customer premises when a service difficulty resulting in a trouble report is caused by the use of equipment or facilities provided by the customer.
- h. When the customer orders additional PVCs, nonrecurring charges apply. In addition, nonrecurring charges will apply to all changes made to a customer's EFRS configuration at the customer's request, such as changes to add, delete, or rearrange the customer's configuration, and changes to PVC classes and CIRs. One PVC nonrecurring charge applies for each PVC changed.

First Revised Sheet 68
Cancelling Original Sheet 68
Effective: April 15, 2001

DIGITAL NETWORK SERVICES

E. ENHANCED FRAME RELAY SERVICE (Cont'd)

3. General Regulations (Cont'd)

- i. A customer subscribing to an EFRAL or EFRAP and a PVC will be referred to as the Controller of the EFRAL or EFRAP. A customer may request data transmission capability to a different customer's location. Both customers must subscribe to enhanced frame relay service. The customer requesting PVC connectivity to another customer's location as such must have written permission from the Controller of the EFRAL or EFRAP for this data transmission capability.

The EFRAL or EFRAP and PVC may be ordered and billed independently and can have different customers as Controllers. A request by one customer to discontinue a PVC does not result in the disconnection of the EFRAL and/or EFRAP. Only the Controller of an EFRAL or EFRAP may authorize the disconnection of that EFRAL or EFRAP.

- j. Whenever facilities are provided jointly by the Company and one or more other telephone companies, the regulations, rates and charges of such other telephone companies apply for the equipment and facilities furnished by them for use in connection with the interexchange EFRS provided by the Company.
- k. Where it is necessary to use interexchange or local channel facilities of another telephone company in order to furnish a private line service to interconnect to the Company's EFRS, such service will be furnished only if satisfactory arrangements can be made with the other company.
- l. Due to technical limitations, the distance between the SCO and the customer designated location (CDL) is limited to approximately 12,000 feet for 1.544 mbps access or 18,000 feet for 56 kbps access. A Company engineer may allow some deviation of this specification based on the gauge of wire used. For access lines that exceed this specification, the access line may be made operational by adding additional equipment. The Company will apply Charges Applicable Under Special Conditions, as defined in Section A5 of this tariff, for the additional time and material required.
- m. Charges Applicable Under Special Conditions, as defined in Section A5 of this tariff, may apply when technical limitations and/or the lack of facilities exist, or if it is necessary to construct facilities to satisfy service requests.

E. ENHANCED FRAME RELAY SERVICE (Cont'd)

4. Obligations of the Company

- a. The responsibility of the Company is limited to furnishing network equipment suitable for EFRS and to the maintenance and operation of such equipment in a manner proper for such service. Subject to this responsibility, the Company is not responsible for the through transmission of signals generated by the customer provided equipment or system, or for the quality of, or defects in, such transmission or the reception of signals by such equipment or systems.
- b. The Company is not responsible for installation, operation or maintenance of any terminal equipment, data unit or communications system provided by a customer or user. The Company is not responsible for adapting EFRS to the technological requirements of any specific customer equipment.
- c. The Company is not responsible to the customer or user if changes in any of the equipment, operations or procedures of the Company used in the provision of EFRS render any facilities provided by the customer or user obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance, provided the Company has met any applicable information disclosure requirements otherwise required by law.
- d. In order to maintain the quality of EFRS, the Telephone Company reserves the right to perform preventative maintenance and software updates to the network. The Telephone Company has classified this maintenance as follows:

(1) Scheduled Maintenance

Scheduled maintenance is used to perform such functions as hardware and software upgrades and network optimization. The Telephone Company will perform these tasks in a maintenance window that is defined as occurring between midnight and 6 a.m., local time, on Monday. The Telephone Company reserves the same time period for any other day(s) of the week to facilitate maintenance which cannot be completed during the Monday maintenance window. The Telephone Company will provide advance notice of all scheduled maintenance.

(2) Demand Maintenance

Demand maintenance may occur as a result of unexpected events and is performed when EFRS network elements are in jeopardy. The Telephone Company will perform this type of maintenance at its discretion. Due to the nature of demand maintenance prior notification may not be possible; however, the customer will be informed when the maintenance has been completed.

DIGITAL NETWORK SERVICES

E. ENHANCED FRAME RELAY SERVICE (Cont'd)

5. Obligations of the Customer

- a. The customer's frame relay compatible terminal equipment is responsible for re-transmitting frames that are discarded due to errors or network congestion.
- b. Where EFRS is available for use in connection with communications systems or equipment provided by a customer or user, the operating characteristics of such systems or equipment shall be such as not to interfere with any services offered by the Company. Such use is subject to the further provisions that the equipment provided by the customer or user does not endanger the safety of Company employees or the public; does not damage, harm, require change in or alteration of the equipment or other services of the Company; does not interfere with the proper operation of the Company's equipment or does not otherwise injure the public in its use of Company services. Upon notice from the Company that the equipment provided by the customer or user is causing, or is likely to cause, such hazard or interference, the customer shall take the necessary steps to remove or prevent such hazard or interference.
- c. The customer, upon request, shall furnish such CPE information as may be required to permit the Company to design and maintain the EFRS it offers and to assure that the service arrangement is in compliance with the regulations contained herein.
- d. Upon service subscription, the customer must specify the CIR class and B_e of each PVC ordered. CIR is the maximum information rate at which the customer's traffic will be admitted to the EFRS network without being designated eligible for discard. A default of fifty (50) percent of the smallest port size will be assigned as the CIR should the information not be provided. No individual PVC CIR shall exceed (95) percent of the EFRAP access rate. The sum of all CIR on a single EFRAP must not exceed two hundred (200) percent of the EFRAP access rate.

6. Term Discount Plan (TDP)

- a. Term Discount Plans (TDPs) are available for EFRALs, EFRAPs and EPNLs. TDPs provide the customer with discounted rates for the services listed. The customer agrees to a minimum service commitment period for EFRS when the TDP is established. Customers may disconnect or move PVCs and not be subject to termination liability charges. The customer must order a TDP in writing to the Company. A TDP may be ordered in one month increments, based on the following plan options:

Plan A:	12 - 23 months
Plan B:	24 - 35 months
Plan C:	36 - 59 months
Plan D:	60 - 84 months

Third Revised Sheet 71
Cancelling Second Revised Sheet 71
Effective: May 1, 2003

DIGITAL NETWORK SERVICES

E. ENHANCED FRAME RELAY SERVICE (Cont'd)

6. Term Discount Plan (TDP) (Cont'd)

- b. The customer must specify the length of the initial service period at the time the service is ordered. When a customer converts to a TDP, no administrative charges are applied toward facilities in-service at that time. If a customer moves from a month to month plan to a TDP, or upgrades from one TDP to another, no administrative charges are applied.
- c. If a TDP customer under a Term Discount Plan (TDP) disconnects any portion of the Enhanced Frame Relay Service TDP service prior to the expiration of the TDP, then a Termination Liability Charge will apply to those elements that are disconnected. The Termination Liability Charge will be a one-time charge equal to the sum of 50% of the payments for the rest of the TDP. If Charges Applicable Under Special Conditions were applied to the service being terminated, any termination charges associated with the Charges Applicable Under Special Conditions will also apply.
- d. Rate increases or decreases as approved by the Florida Public Service Commission will automatically be applied to the monthly term plan rates for the remaining term of the TDP. If Company initiated rate increases to any rate element or combination of rate elements causes the charges for the entire EFRS under the TDP to increase by 10% or more annually, then the customer may cancel the TDP without incurring termination liability charges provided that the customer notifies the Company within 30 days after the effective date of the rate increase.
- e. TDP commitment periods can be extended by the customer at any time during the term of the plan, up to a maximum of 84 months. The number of months accrued in the current plan will apply toward the new plan selected.
- f. At the end of the TDP service commitment period, the customer may subscribe to a new TDP at the prevailing rates set forth in Section 8. a.-g. following. If the customer does not select a new TDP, the rates will convert to the prevailing month to month rates.

DIGITAL NETWORK SERVICES

E. ENHANCED FRAME RELAY SERVICE (Cont'd)

6. Term Discount Plan (TDP) (Cont'd)

- g. Termination Liability Charges will not apply when a service or rate element under a Term Discount Plan (TDP) arrangement is disconnected prior to the expiration of a selected service period as a result of a change in tariff jurisdiction and/or a customer requested upgrade to a next generation service offering under the following conditions:

The service period of the new TDP arrangement for the new service offering is a period equal to or exceeding the remaining service period of the disconnected TDP, whichever is greater, and

The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between the installation of the new service the disconnection of the existing service, and

The service orders to install the new service and disconnect the old service are for the same customer at the same location.

The Telephone Company will determine whether replacement service qualifies as a next generation service offering.

Nonrecurring charges and Service Charges for the new service will apply according to the requirements of the new service.

7. Service Components

- a. Administrative Charge – Applies to changes in a customer's network configuration such as additions or changes of PVCs. Although multiple changes can be caused by such actions, only one administrative charge applies.

This administrative charge applies in addition to the applicable charges associated with Service Charges, as specified in Section A4 of this tariff.

SECTION A29
First Revised Sheet 73
Cancelling Original Sheet 73
Effective: April 15, 2001

DIGITAL NETWORK SERVICES

E. ENHANCED FRAME RELAY SERVICE (Cont'd)

7. Service Components (Cont'd)

- b. CIR and PVC - A monthly rate applies for each PVC based on the CIR requested by the customer. If no CIR is indicated, the CIR will be set at the default of 50% of the associated EFRAP. A nonrecurring charge applies for the establishment of each PVC and for each subsequent order of PVC(s). Rates for intraLATA PVCs are specified in Section 29.2.8 C. Rates for interLATA PVCs are specified in the Intrastate/InterLATA Private Line Service Tariff.

Customers may select from three different classes of PVCs to ensure greater reliability for mission-critical applications in the event of network congestion:

Service Class	Type	PVC Priority
Frame for LAN	Standard	Normal
Frame for SNA	Premium	Higher
Frame for Voice	Premium	Highest

This flexibility helps to ensure maximum performance and satisfaction for individual customer data applications.

- c. Enhanced Frame Relay Access Line (EFRAL) - A nonrecurring charge and monthly rate applies based on the speed of the port connection for each physical connection. The EFRAL includes the provision of a port.
- d. Enhanced Frame Relay Access Port (EFRAP) - A nonrecurring charge and monthly rate based on the speed of the port connection applies per port connection to the network supporting EFRS. The port rate element can be used in lieu of the EFRAL element if the customer has an alternative Company-approved means of access to the EFRS network.
- e. Enhanced Frame to Asynchronous Transfer Mode (ATM) Inter-Networking Links - The Company may establish facilities between EFRS switching equipment and ATM Service switching equipment and may allow customers to share bandwidth on these facilities. Where these shared facilities are available to customers; the Enhanced Frame to ATM Inter-Networking Link option exists. In addition to the EFRS Customer Connection, the customer may subscribe to an Enhanced Frame to ATM Inter-Networking Link. Links that extend between EFRS and ATM switches must have an associated CIR. At least one PVC is required between both customer premises through the Enhanced Frame to ATM Inter-Networking Link. All CIRs on this PVC must have the same value. Enhanced Frame to ATM Inter-Networking Links are only available where such facilities exist.

DIGITAL NETWORK SERVICES

E. ENHANCED FRAME RELAY SERVICE (Cont'd)

7. Service Components (Cont'd)

- f. Gateway Service - This service allows the Company EFRS customers to interconnect to another enhanced frame relay network. The service is available wherever the Company has established a network interface with another private or public enhanced frame relay network. The charge for this service covers the EFRAP and interconnecting facilities from the Company to the interconnection point with the other provider. The charge includes the software defined PVC to the other company's network to the UNI port, but does not include the UNI port provided by the other company. The Gateway charge is purchased in increments of CIR. The following diagram shows a typical customer network with three data devices interconnected to the Company EFRS (sites D, E & F). The customer needs to interconnect the data devices to a fourth site (C) served by another company. The customer accomplishes this by ordering three PVCs and three Gateway service connections to the other company's frame relay network. This example assumes that enhanced frame relay access from site C is already established as illustrated.

- g. Private Network Link (PNL) - A charge for a DS1 facility from a customer's frame relay switch location to the Company's EFRS Network. In addition to the access facility, a 1.544 EFRAP must be purchased.
- h. Utilization Reports - Reports that the customer can order that display certain circuit utilization statistics for Permanent Virtual Circuits (PVC) and Enhanced Frame Relay Access Ports (EFRAP). The PVC report summarizes inbound and outbound packet discards and displays utilization as a percentage of CIR. The EFRAP report summarizes inbound and outbound packet discards and displays utilization as a percent of port speed. Reports are ordered on a per port basis. Service is not available to NNI locations. A monthly play and Term Discount Plans are available for fixed periods of 12 to 84 months. Reports are available only where Company facilities permit.

DERIVED CHANNEL SERVICES

A. INDIVIDUAL VOICE CHANNELS FOR CUSTOM ACCESS SOLUTIONS

1. Description

- a. Individual Voice Channels for Custom Access Solutions is an intraexchange digital service designed to provide for the integration of multiple voice channels over Custom Access Solutions as found in the Interstate Access Tariff.
- b. Individual Voice Channels are segregated from the data channels using a Digital Access and Cross-connect System (DACS) located in the Telephone Company's central office. The DACS will route the voice traffic to the serving wire center switching equipment. Individual Voice Channels may be provisioned with ISDN-PRI functionality upon request.
- c. Customers subscribing to Individual Voice Channels for Custom Access Solutions are limited to a maximum of 20 Individual Voice Channels per 1.544 Mbps facility. Each channel is dedicated to the provisioning of Individual Voice Channels for Custom Access Solutions. Channels not activated will not be used for purposes other than providing Individual Voice Channels for Custom Access Solutions.
- d. Customers subscribing to Individual Voice Channels for Custom Access Solutions must also order data channels at the same time from the Interstate Access Tariff.

Individual Voice Channels ¹	Frame Relay Service			
	256 Kbps (4 Channels)	384 Kbps (6 Channels)	512 Kbps (8 Channels)	768 Kbps (12 Channels)
6	10	12	14	18
8	12	14	16	20
10	14	16	18	22
12	16	18	20	24
14	18	20	22	N/A
16	20	22	24	N/A
18	22	24	N/A	N/A
20	24	N/A	N/A	N/A

Shaded area reflects total channels utilized for each combination.

¹ A minimum of 12 Individual Voice Channels is required when provisioned with ISDN-PRI functionality and each configuration requires one D-channel. For example, when a customer subscribes to 12 Individual Voice Channels with ISDN-PRI functionality, the customer is provided with 11 B-channels and one D-channel.

DERIVED CHANNEL SERVICES

A. INDIVIDUAL VOICE CHANNELS FOR CUSTOM ACCESS SOLUTIONS (Cont'd)

1. Description (Cont'd)

e. Individual Voice Channels may be equipped with the following features, where available:

1) Incoming Call Identification (Caller ID) – Caller ID provides the customer with the telephone number of the calling party and is intended solely for the use of the Individual Voice Channels for Custom Access Solutions subscriber.

f. Individual Voice Channels with ISDN-PRI functionality provides functionality equivalent to ISDN-PRI II Service as described in Section A29 of this tariff. All standard features included with ISDN-PRI II Service are standard for Individual Voice Channels with ISDN-PRI functionality. In addition, optional features available with ISDN-PRI II Service are available with Individual Voice Channels with ISDN-PRI functionality, with the exception of D-Channel Backup and Circular Hunt. Optional features are provided at the rates and charges specified in Section A29 of this tariff on a per 1.544 Mbps facility basis.

2. Definitions

a. Digital Access and Cross-connect System (DACCS) – A digital switching device for routing and switching T-1 lines, and DS0 portions of lines, among multiple T-1 ports. The DACCS performs all the functions of a normal “switch” except connections are typically setup in advance of the call, not together with the call.

b. Custom Access Solutions – Provides for the integration of multiple voice and data channels over the same 1.544 Mbps facility, as referenced in the Interstate Access Tariff.

3. General Regulations

a. The regulations and rates specified herein for Individual Voice Channels for Custom Access Solutions are in addition to the applicable regulations and rates in other tariffs and other sections of this tariff. Unless specified, the regulations for Individual Voice Channels for Custom Access Solutions apply in addition to the General Regulations set forth in Section A2 of this tariff.

DERIVED CHANNEL SERVICES

A. INDIVIDUAL VOICE CHANNELS FOR CUSTOM ACCESS SOLUTIONS (Cont'd)

3. General Regulations (Cont'd)

- b. Individual Voice Channels for Custom Access Solutions are provided subject to the availability of appropriate facilities as determined by the Company. Service inquiries will be necessary to determine availability.
- c. Customer Premises Equipment (CPE) that is compatible with Individual Voice Channels for Custom Access Solutions is the customer's responsibility to provision.
- d. The Company shall not be responsible if changes in any of the equipment, operations or procedures of the Company utilized in the provisioning of Individual Voice Channels for Custom Access Solutions render any facilities provided by the customer obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance.
- e. Individual Voice Channels for Custom Access Solutions is only available where facilities permit.
- f. Customers may disconnect Individual Voice Channels for Customer Access Solutions, without penalty, should the total of the monthly recurring rates associated with Individual Voice Channels for Custom Access Solutions increase by 10% or more at any one time.
- g. Custom Calling Features and ExpressTouch Services, as found in Section A13, are available as specified in this tariff at the applicable tariffed recurring rates.
- h. An Optional Calling Plan is available in certain exchanges. The plan is described in Section A3 of this tariff.
- i. One Directory Listing will be provided per 1.544 Mbps facility. Additional Directory Listings are available as specified in Section A6 of this tariff.

4. Service Components

- a. Individual Voice Channels - A monthly rate is applicable for each voice channel for Custom Access Solutions. Custom Access Solutions is found in Local Telephone Companies' FCC Tariff No. 3, Section 8.7. Individual Voice Channels can be purchased in increments of 6, 8, 10, 12, 14, 16, 18 or 20 voice channels. Individual Voice Channels with ISDN-PRI functionality can be purchased in increments of 12, 14, 16, 18 or 20 voice channels.
- b. All other service components apply as found in the Interstate Access Tariff.

5. Application of Rates

- a. The monthly rate per Individual Voice Channel includes all mandatory and applicable Extended Area Service (EAS) and Extended Calling Scope (ECS) recurring charges. ECS usage charges are applicable as specified in Section 3 of this tariff. Individual Voice Channels receive the same local calling area as any other form of basic local exchange service.
- b. Optional toll and extended local calling plans are available as specified in this tariff at the applicable tariffed recurring rates and usage charges.
- c. All federal and state surcharges apply per Individual Voice Channel, including, but not limited to, 9-1-1 surcharges and Telecommunications Relay Service (TRS) surcharges.
- d. Federal monthly end user charges apply, as described in the Interstate Access Tariff (e.g., End User Common Line (EUCL), Presubscribed Interexchange Carrier Charge (PICC), Line Port Charge (LPC), Local Number Portability (LNP), Federal Universal Service Fund (USF)).

6. Rates and Charges

DERIVED CHANNEL SERVICES

B. DIGITAL TRUNKING SERVICE

1. General

- a. Digital Trunking Service (DTS) is a digital intraexchange service furnished for use with PBX systems and appropriately equipped Key Systems.
- b. DTS will be available on a digital basis at the network interface on a customer's premises. The customer is required to provide the appropriate multiplexing equipment or interface needed to accommodate the Customer Premises Equipment (CPE).
- c. DTS provides twenty-four (24) digital channels within a single, channelized DS1/1.544 Mbps circuit available for voice-grade communications, where facilities are available.
- d. To ensure satisfactory operation, the CPE provided by the customer must be compatible with the DTS channel facility provided by the Company.
- e. The regulations for DTS specified herein apply in addition to the regulations set forth in other sections of this tariff.
- f. The rates specified for DTS in A30.B.7. following contemplate the provision of a digital quality facility utilizing existing interoffice carrier equipment and/or exchange cable facilities compatible with this service. If equipment, new facilities or changes to existing facilities are required for the provision of this service, then charges as specified in Section A5, Charges Applicable Under Special Conditions, will apply in addition to the rates for DTS..
- g. Suspension of service at the customer's request, as defined in Section A2 of this tariff, is not allowed.

2. Regulations

a. Description of Service

- 1) DTS provides central office channels in any combination totaling twenty-four (24). This could include outward only, inward only, Direct Inward Dialing (DID), or Two-Way central office channels. DID channels are inbound only.

DERIVED CHANNEL SERVICES

B. DIGITAL TRUNKING SERVICE (Cont'd)

2. Regulations (Cont'd)

a. Description of Service (Cont'd)

- 2) The individual channels carried via a group of DTS facilities may be arranged in separate trunk groups with different pilot numbers, up to a maximum of one trunk group per DTS facility. Customers may direct up to five (5) pilot numbers to the same DTS facility. Customers requiring more numbers must subscribe to Direct Inward Dialing service and be charged for numbers accordingly.
- 3) DID numbers are provided at the rates specified in Section A16 of this tariff. The only charge for DID numbers is the charge applicable to DID number blocks. No other charge in Section A16 apply for DID numbers. Pilot numbers cannot be used as a substitute for DID numbers.
- 4) DTS is not offered in conjunction with the following services:
 - a) Basic Exchange Service (e.g., R1, B1, Key, PBX)
 - b) Feature Groups A, B, C, or D
 - c) Private Line Access Services and facilities, unless otherwise stated in this section
 - d) Foreign Exchange Service on individual channels
- 5) A Two-Way channel may not be used to terminate DID Service associated with DTS.
- 6) One directory listing will be provided with DTS. Additional Directory Listings are available as specified in Section A6 of this tariff.
- 7) If a customer requests DTS from an alternative serving central office other than that designated by the Company, then all charges applicable to Foreign Exchange Service, as specified in Section A9 of this tariff, and interoffice mileage charges as specified in Section A21 for TransLink Service apply in addition to the rates and charges included in this section. Emergency 911 calls placed over DTS Channels provisioned via a foreign central office serving this arrangement will be identified as the alternative serving central office and not the central office normally serving the customer's location. The Company shall not be liable for any loss or damages arising from the emergency calls placed from DTS Channels provisioned via an alternative serving central office.

DERIVED CHANNEL SERVICES

B. DIGITAL TRUNKING SERVICE (Cont'd)

2. Regulations (Cont'd)

a. Description of Service (Cont'd)

- 8) When lines ordered as Outward WATS, Two-Way WATS, or 800 Service terminate on DTS, they will terminate as one of the twenty-four (24) available digital channels on a DTS facility. The rates and charges normally applicable to WATS and 800 Service will continue to apply when provided in conjunction with DTS.
- 9) A Channel Service Unit (CSU) or appropriate termination equipment provided by the customer is required at a customer's or authorized user's premises to perform such functions as:
 - a) proper termination of the service
 - b) amplification
 - c) signal shaping
 - d) remote loop-back
- 10) An Optional Calling Plan is available in certain exchanges. The plan is described in Section A3 of this tariff.

b. Definitions

- 1) Channel Service Unit (CSU) – The term "Channel Service Unit (CSU)" denotes equipment provided by the customer to terminate a digital facility on the customer's premises.
- 2) DS1 - This denotes a channel service expressed in terms of its digitally encoded data bit rate in accordance with the North American hierarchy of digital signal levels. It has a 1.544 Mbps transmission data rate, and provides for the two-way simultaneous transmission of isochronous times, Bipolar Return-to-Zero (BPRZ) bit stream format, except where intentional bipolar violations are introduced by Bipolar with 8 Zero Substitution (B8ZS) format. Unframed signal formats are not permitted or compatible with Company equipment. The required format and interface specifications are contained in Technical Reference Publications GR-54 and GR-342.
- 3) Nonrecurring Charge - A one-time charge for the initial installation, the installation of functions and features and service rearrangements.
- 4) Serving Wire Center - The local telephone central office assigned to subscribers in a predetermined geographic area.

2. Regulations (Cont'd)

c. Connections

- 1) Customer-Provided Terminal Equipment and Customer-Provided Communications Systems may be connected to DTS when such connection is made in accordance with the provisions specified in 2), 3) and 4) following.
- 2) Responsibility of the Company
 - a) The responsibility of the Company shall be limited to the furnishing and maintenance of DTS to a network interface on the customer's premises where provision is made for the connection of local service.
 - b) The Company shall not be responsible for installation, operation or maintenance of any terminal equipment or communications systems provided by the customer. DTS is not represented as adapted for the use of such equipment or system. Where such equipment or system is connected to Company facilities, the responsibility of the Company shall be limited to the furnishing of facilities suitable for DTS and to the maintenance and operation in a manner proper for such digital service. The Company shall not be responsible for:
 - (1) The through transmission of signals generated by such equipment or system, or for the quality of, or defects in, such transmission, or
 - (2) The reception of signals by such equipment or systems, or
 - (3) Damage to terminal equipment or communications systems provided by a customer or authorized user due to testing.
 - c) The Company shall not be responsible to the customer if changes in any of the facilities, operations or procedures of the Company utilized in the provision of DTS render any facilities or equipment provided by a customer obsolete, or require modification or alteration of such equipment or system or otherwise affects its use or performance.

B. DIGITAL TRUNKING SERVICE (Cont'd)

2. Regulations (Cont'd)

c. Connections (Cont'd)

2) Responsibility of the Company (Cont'd)

d) The Company is responsible for maintaining and repairing the facilities it furnishes. The customer may not rearrange, disconnect, remove or attempt to repair any equipment installed by the Company without prior written consent of the Company.

e) The DTS Access Line as described following is designed to meet or exceed a performance objective of 99% error-free seconds of transmission per 1000 seconds on a daily basis and 99.9% availability on an annual basis when measured through the digital termination equipment.

f) In order to maintain the quality of DTS, the Company reserves the right to perform preventative maintenance and software updates to the network. The Company has classified maintenance as follows:

(1) Scheduled Maintenance

Scheduled maintenance is performed for functions such as hardware and software upgrades and network optimization. The Company will perform these tasks in a maintenance window that is anticipated to minimize disruption of customer service and activity. The Company will provide advance notice of all scheduled maintenance.

(2) Demand Maintenance

Demand maintenance may occur as a result of unexpected events and is performed when DTS network elements are in jeopardy. The Company will perform this type of maintenance at its discretion. Due to the nature of demand maintenance, prior notification may not be possible; however, the customer will be informed when the maintenance has been completed.

3) Responsibility of the Customer

a) The customer is responsible for installing and testing his customer premises equipment or facilities to insure that when they are connected to DTS such equipment or facilities are operating properly.

3) Responsibility of the Customer (Cont'd)

b) The operating characteristics of the customer premises equipment or facilities shall be such as to not interfere with any of the services offered by the Company. Such use is subject to the further provisions that the equipment provided by a customer does not: endanger the safety of Company employees or the public; damage, require change in or alteration of the equipment or other facilities of the Company; interfere with the proper functioning of such equipment or facilities; impair the operation of the Company's facilities or otherwise injure the public in its use of the Company's services. Upon notice that the equipment provided by a customer is causing or is likely to cause such hazard or interference, the customer shall take such steps as shall be necessary to remove or prevent such hazard or interference.

c) The customer's responsibility shall include cooperative testing with the Company as may be necessary. Where regeneration and/or equalization adjustments or changes may be required to compensate for rearrangements and/or changes in outside plant facilities, the customer will be responsible for all expenses incurred in changes to his customer premises equipment.

4) Connection of Customer-Provided Terminal Equipment and Customer-Provided Communications Systems

a) The following provisions will apply:

(1) Customer-Provided Terminal Equipment and/or Customer-Provided Communications Systems may be connected at the premises of the customer to DTS.

(2) The undertaking of the Company is to furnish DTS as ordered and specified by the customer except as specified in d) following.

2. Regulations (Cont'd)

c. Connections (Cont'd)

4) Connection of Customer-Provided (Cont'd)

b) Connection of Channel Service Units

A Channel Service Unit (CSU) or appropriate termination equipment must be provided by the customer to connect a Company-provided digital facility. This equipment must comply with the technical requirements outlined in Part 68 of the FCC Rules and Regulations.

c) The customer shall be responsible for payment of a Trouble Location Charge, as set forth in Section A4 of this tariff, for visits by the Company to the customer's premises where the service difficulty or trouble report results from the use of equipment or facilities provided by the customer.

d) The customer may not rearrange, disconnect, remove or attempt to repair any equipment installed by the Company without the prior written consent of the Company.

e) For maintenance purposes, upon request of the Company, the customer will be responsible for notifying the Company of the type of digital terminating equipment used.

3. Term Discount Plan (TDP)

a. A Term Discount Plan (TDP) provides the customer with discounted rates for DTS. The minimum service period is twelve (12) months. DTS may be ordered under a TDP for fixed periods of 12 - 23 months, 24 - 35 months, 36 - 59 months, and 60 - 84 months. Month-to-month rates in this tariff may apply only after the expiration of a TDP. All rate elements within the same DTS facility must be ordered under the same commitment period and under the same service date. The customer must order the TDP in writing to the Company. A TDP may be ordered in one-month increments, (e.g. a 28-month commitment period or a 37-month commitment period).

b. The customer must specify the length of the initial service period at the time the service is ordered. When a customer converts to a TDP, Nonrecurring Charges do not apply toward facilities in-service at that time. If a customer converts from month-to-month rates to a TDP or upgrades from one TDP to another, Nonrecurring Charges and Service Charges do not apply.

c. At the end of the TDP the customer may subscribe to a new TDP at the prevailing rates set forth in A30.B.7. following. If the customer does not select a new TDP, the rates will convert to the prevailing month-to-month rates.

3. Term Discount Plan (TDP) (Cont'd)

- d. Rate increases or decreases will automatically be applied to the monthly term plan rates for the remaining term of the TDP. If Company initiated rate increases to any rate element or combination of rate elements causes the charges for the entire DTS under the TDP to increase by 10% or more annually, then the customer may cancel the TDP without incurring termination liability charges provided the customer notifies the Company within 30 days after the effective date of the rate increase.
- e. The customer can extend TDP commitment periods at any time during the term of the plan, up to a maximum of 84 months. The number of remaining months in the original term plan will become part of the total term in the new term plan.

4. Termination Liability Charges

- a. If a customer under a Term Discount Plan (TDP) disconnects all or a portion of DTS prior to the expiration of the TDP, then a Termination Liability Charge will apply to those services that are disconnected. The Termination Liability Charge will be a one-time charge equal to sum of 50% of the payments remaining for the rest of the TDP.
- b. Customers may move DTS Access Lines and not be subject to Termination Liability Charges providing the terms of the TDP are maintained. If charges as specified in A30.B.1.f. were applied to the service being terminated or moved, any termination or move charges associated with that construction apply, as well as any construction charges at the new location.
- c. Termination Liability Charges will not apply when a service or rate element under a TDP is disconnected prior to the expiration of a selected service period as a result of a change in tariff jurisdiction and/or a customer requested upgrade to a next generation service offering, under the following conditions:
 - 1) The service period of the new TDP for the new service offering is a period equal to or exceeding the remaining service period of the disconnected TDP, and
 - 2) The service orders to install the new service and disconnect the old service are related together, and there is no lapse in service between the installation of the new service and the disconnection of the old service, and
 - 3) The service orders to install the new service and disconnect the old service are for the same customer at the same location.
- d. The Company will determine whether the replacement service qualifies as a next generation service offering.
- e. Nonrecurring charges and Service Charges for the new service will apply according to the requirements of the new service.

B. DIGITAL TRUNKING SERVICE (Cont'd)

5. Rate Categories

There are three rate categories which apply to DTS:

- DTS Access Line
- DTS Interface
- DTS Channels

a. DTS Access Line

The DTS Access Line rate category provides for the communications path between a customer designated premises and the Serving Wire Center. Included as part of the DTS Access Line is a standard channel interface arrangement which defines the technical characteristics associated with the type of facilities to which the service is to be connected at the point of termination (POT) and the type of signaling capability if any. The signaling capability itself is provided as a part of this rate category. One DTS Access Line charge applies per DTS facility. The charge applicable to the DTS Access Line is set forth in A30.B.7.a. following.

b. DTS Interface

The DTS Interface rate category provides for the central office multiplexing to support twenty-four (24) channels at 56 Kbps with required signaling as necessary for trunking functionality. One DTS Interface charge applies per DS1 facility. The charges applicable to the DTS Interface are set forth in A30.B.7.b. following.

c. DTS Channels

The DTS Channels rate category provides unlimited usage of a network channel that will allow digital transmission up to 56 Kbps. Twenty-four (24) DTS Channels are required per DTS Interface. The charge applicable to DTS Channels is set forth in A30.B.7.c. following.

B. DIGITAL TRUNKING SERVICE (Cont'd)

6. Application of Rates

- a. DTS is furnished between the normal Serving Wire Center and the customer's premises. At a minimum, each DTS facility is comprised of one DTS Access Line, one DTS Interface, and twenty-four (24) DTS Channels.
- b. A LightLink Local Channel Termination may be employed as a substitute for the DTS Access Line, provided that the Local Channel Termination meets the required technical standards necessary to support DTS. In such cases, there will be no charge for the DTS Access Line.
- c. The DTS Interface is provided at the Serving Wire Center. One DTS Interface charge applies per DS1 facility.
- d. When DTS is extended from an alternative central office, all charges applicable to Foreign Exchange Service and TransLink Service interoffice mileage apply in addition to the rates and charges included in this section.
- e. Twenty-four (24) DTS Channels apply per DTS Interface.
- f. Extended Area Service (EAS) and Extended Calling Scope (ECS) charges apply as specified in Section A3 of this tariff per DTS Channel. Toll charges apply when voice calls are completed outside the customer's designated local calling area or EAS territory. DTS Channels receive the same local calling area as any other form of basic local exchange service.
- g. Optional toll and extended local calling plans are available and will apply on a per DTS Interface basis as specified in this tariff at the applicable tariffed recurring rates and usage charges. Applicable charges will be calculated per DTS Channel.
- h. The Federal Subscriber Line Charge and the Presubscribed Interexchange Carrier Charge (PICC) apply per DTS Channel, as well as other federal monthly end user charges as described in the Interstate Access Tariff, (e.g., Local Number Portability (LNP), and Federal Universal Service Fund (USF).
- i. All federal, state, and local surcharges apply per DTS Channel, including, but not limited to, 9-1-1 surcharges and Telecommunications Relay Service (TRS) surcharges.
- j. Rates and charges specified in other sections of this tariff for services such as Custom Calling Features, ExpressTouch Service, etc., as specified in Section A13 of this tariff, apply in addition to the monthly rates for DTS on a per channel basis.
- k. Rotary Hunt functionality at no additional charge is available with DTS. The functionality may be within the channels of a single DTS arrangement, between channels of multiple DTS arrangements, or between PBX trunks, Key System trunks, and channels within a DTS arrangement.

7. Rates and Charges (Cont'd)

e. Nonrecurring Charge

The Initial Nonrecurring Charge is applicable for the initial installation of a DTS Access Line, DTS Interface and DTS Channels to a given Serving Wire Center. The Additional Nonrecurring Charge is applicable for each additional DTS Access Line, DTS Interface and associated DTS Channels installed at the same location, the same time, under the same order, and with the same due date. The Rearrangement Nonrecurring Charge is applicable for any rearrangement of an existing DTS Access Line, DTS Interface, and DTS Channels.

f. Move Charges

A Move Charge applies for DTS Access Lines moved to a new location, even when moved on the same premises. The Move Charge is equal to the DTS Access Line Initial Nonrecurring Charge and applies in addition to the Primary Service Order Charge located in Section A4 of this tariff.

g. Service Charges

A Primary Service Order Charge as set forth in Section A4 of this tariff is applicable per customer request. Nonrecurring Charges specified in this tariff section are in lieu of all other Service Charges.

DERIVED CHANNEL SERVICES

C. ESP Link

1. General

- a. ESP Link is a digital intraexchange service is intended for Enhanced Service Providers (ESPs) for use with Customer Premises Equipment (CPE).
- b. ESP Link will be available on a digital basis at the network interface on a customer's premises. The customer is required to provide the appropriate multiplexing equipment or interface needed to accommodate the CPE provided by the customer.
- c. ESP Link provides twenty-four (24) digital channels within a single, channelized DS1/1.544 Mbps circuit available for voice-grade communications, where facilities are available.
- d. To ensure satisfactory operation, the CPE provided by the customer must be compatible with the ESP Link channel facility provided by the Company.
- e. The regulations for ESP Link specified herein apply in addition to the regulations set forth in other sections of this tariff.
- f. The rates specified for ESP Link in A30.C.7 following contemplate the provision of a digital quality facility utilizing existing interoffice carrier equipment and/or exchange cable facilities compatible with this service. If equipment, new facilities or changes to existing facilities are required for the provision of this service, then charges as specified in Section A5, Charges Applicable Under Special Conditions, apply in addition to the rates for ESP Link.
- g. Suspension of service at the customer's request, as defined in Section A2 of this tariff, is not allowed.

2. Regulations

a. Description of Service

- 1) ESP Link is furnished for the two-way transmission of digital signals at 1.544 Mbps between the serving wire center and the customer's premises located within the same exchange. Calls from the public switched network are terminated to the ESP Link facility, but the ESP Link facility is prohibited from originating calls. The Company will provide out pulses as seizures only and will not provide digits. ESP Link may not be terminated to a Serving Wire Center for the purposes of switched connection to the local exchange and/or long distance (local toll) network.

2. Regulations

a. Description of Service

- 2) One pilot number will be provided with each ESP Link Interface, if required. Each additional ESP Link Interface may have its own pilot number, or may receive overflow traffic from another ESP Link Interface.
- 3) ESP Link is not offered in conjunction with the following services:
 - a) Basic Exchange Service (e.g., R1, B1, Key, PBX)
 - b) Feature Groups A, B, C, or D
 - c) Private Line Access Services and facilities, unless otherwise stated in this section
 - d) Foreign Exchange Service on individual channels
- 4) DID Service is not allowed for use with ESP Link.
- 5) No directory listings will be provided with ESP Link.
- 6) If a customer requests ESP Link from an alternative serving central office other than that designated by the Company, then all charges applicable to Foreign Exchange Service, as specified in Section A9 of this tariff, and interoffice mileage charges as specified in Section A21 for TransLink Service will apply in addition to the rates and charges included in this section. ESP Link is an inbound service only, and cannot be used to place Emergency 911 calls.
- 7) A Channel Service Unit (CSU) or appropriate termination equipment provided by the customer is required at a customer's or authorized user's premises to perform such functions as:
 - a) proper termination of the service
 - b) amplification
 - c) signal shaping
 - d) remote loop-back

2. Regulations (Cont'd)

b. Definitions

- 1) Channel Service Unit (CSU) – The term "Channel Service Unit (CSU)" denotes equipment provided by the customer to terminate a digital facility on the customer's premises.
- 2) DS1 - This denotes a channel service expressed in terms of its digitally encoded data bit rate in accordance with the North American hierarchy of digital signal levels. It has a 1.544 Mbps transmission data rate, and provides for the two-way simultaneous transmission of isochronous times, Bipolar Return-to-Zero (BPRZ) bit stream format, except where intentional bipolar violations are introduced by Bipolar with 8 Zero Substitution (B8ZS) format. Unframed signal formats are not permitted or compatible with Company equipment. The required format and interface specifications are contained in Technical Reference Publications GR-54 and GR-342.
- 3) Nonrecurring Charge - A one-time charge for the initial installation, the installation of functions and features and service rearrangements.
- 4) Serving Wire Center - The local telephone central office assigned to subscribers in a predetermined geographic area.

2. Regulations (Cont'd)

c. Connections

- 1) Customer-Provided Terminal Equipment and Customer-Provided Communications Systems may be connected to ESP Link when such connection is made in accordance with the provisions specified in 2), 3) and 4) following.
- 2) Responsibility of the Company
 - a) The responsibility of the Company shall be limited to the furnishing and maintenance of ESP Link to a network interface on the customer's premises where provision is made for the connection of local service.
 - b) The Company shall not be responsible for installation, operation or maintenance of any terminal equipment or communications systems provided by the customer. ESP Link is not represented as adapted for the use of such equipment or system. Where such equipment or system is connected to Company facilities, the responsibility of the Company shall be limited to the furnishing of facilities suitable for ESP Link and to the maintenance and operation in a manner proper for such digital service. The Company shall not be responsible for:
 - (1) The through transmission of signals generated by such equipment or system, or for the quality of, or defects in, such transmission, or
 - (2) The reception of signals by such equipment or systems, or
 - (3) Damage to terminal equipment or communications systems provided by a customer or authorized user due to testing.
 - c) The Company shall not be responsible to the customer if changes in any of the facilities, operations or procedures of the Company utilized in the provision of ESP Link render any facilities or equipment provided by a customer obsolete, or require modification or alteration of such equipment or system or otherwise affects its use or performance.

2) Responsibility of the Company (Cont'd)

d) The Company is responsible for maintaining and repairing the facilities it furnishes. The customer may not rearrange, disconnect, remove or attempt to repair any equipment installed by the Company without prior written consent of the Company.

e) The ESP Link Access Line as described following is designed to meet or exceed a performance objective of 99% error-free seconds of transmission per 1000 seconds on a daily basis and 99.9% availability on an annual basis when measured through the digital termination equipment.

f) In order to maintain the quality of ESP Link, the Company reserves the right to perform preventative maintenance and software updates to the network. The Company has classified maintenance as follows:

(1) Scheduled Maintenance

Scheduled maintenance is performed for functions such as hardware and software upgrades and network optimization. The Company will perform these tasks in a maintenance window that is anticipated to minimize disruption of customer service and activity. The Company will provide advance notice of all scheduled maintenance.

(2) Demand Maintenance

Demand maintenance may occur as a result of unexpected events and is performed when ESP Link network elements are in jeopardy. The Company will perform this type of maintenance at its discretion. Due to the nature of demand maintenance, prior notification may not be possible; however, the customer will be informed when the maintenance has been completed.

3) Responsibility of the Customer

a) The customer is responsible for installing and testing his customer premises equipment or facilities to insure that when they are connected to ESP Link such equipment or facilities are operating properly.

DERIVED CHANNEL SERVICES

C. ESP Link (Cont'd)

6. Applications of Rates

- a. ESP Link is furnished between the normal Serving Wire Center and the customer's premises. At a minimum, each ESP Link facility is comprised of one ESP Link Access Line, one ESP Link Interface, and twenty-four (24) ESP Link Channels.
- b. A LightLink Local Channel Termination may be employed as a substitute for the ESP Link Access Line, provided that the Local Channel Termination meets the required technical standards necessary to support ESP Link. In such cases, there will be no charge for the ESP Link Access Line.
- c. The ESP Link Interface is provided at the Serving Wire Center. One ESP Link Interface charge applies per ESP Link facility.
- d. When ESP Link is extended from an alternative central office, all charges applicable to Foreign Exchange Service and TransLink Service interoffice mileage apply in addition to the rates and charges included in this section.
- e. Twenty-four (24) ESP Link Channels apply per ESP Link Interface.
- f. ESP Link Channels receive the same local calling area as any other form of basic local exchange service.
- g. The Federal Subscriber Line Charge and the Presubscribed Interexchange Carrier Charge (PICC) apply at a ratio of five (5) per ESP Link Interface, as well as other federal monthly end user charges as described in the Interstate Access Tariff, (e.g., Local Number Portability (LNP), and Federal Universal Service Fund (USF).
- h. All federal, state, and local surcharges apply per ESP Link Channel, including, but not limited to, 9-1-1 surcharges and Telecommunications Relay Service (TRS) surcharges.
- i. Services such as Custom Calling Features, ExpressTouch Service, etc., as specified in Section A13 of this tariff, are not available in conjunction with ESP Link.
- k. Rotary Hunt functionality is inherent to ESP Link Service.

C. ESP Link (Cont'd)

7. Rates and Charges (Cont'd)

d. Nonrecurring Charge

The Initial Nonrecurring Charge is applicable for the initial installation of a ESP Link Access Line, ESP Link Interface and ESP Link Channels to a given Serving Wire Center. The Additional Nonrecurring Charge is applicable for each additional ESP Link Access Line, ESP Link Interface and associated ESP Link Channels installed at the same location, the same time, under the same order, and with the same due date. The Rearrangement Nonrecurring Charge is applicable for any rearrangement of an existing ESP Link Access Line, ESP Link Interface, and ESP Link Channels.

e. Move Charges

A Move Charge applies for ESP Link Access Lines moved to a new location, even when moved on the same premises. The Move Charge is equal to the ESP Link Access Line Initial Nonrecurring Charge and applies in addition to the Primary Service Order Charge located in Section A4 of this tariff.

f. Service Charges

A Primary Service Order Charge as set forth in Section A4 of this tariff is applicable per customer request. Nonrecurring Charges specified in this tariff section are in lieu of all other Service Charges.

OBSOLETE SERVICE OFFERINGS
TELEPHONE ANSWERING SERVICE FACILITIES

A. GENERAL

1. The company will provide facilities for Telephone Answering Bureaus (hereafter referred to as Bureaus) for their use in furnishing telephone answering service to customers when they are unavailable to answer their calls personally.
2. Main station terminations are also provided in those cases where the customer contracts with a Bureau to answer all incoming calls.
3. Facilities will be furnished for answering incoming calls only.
4. Local exchange trunks listed in the name of the Bureau may be terminated in telephone answering equipment for the purpose of completing local or long distance calls to and from administrative telephones furnished with and on the same premises as the telephone answering equipment.
5. A Bureau may bridge calls from secretarial lines to the general exchange network over local exchange central office lines furnished the Bureau for its administrative use; however, these facilities furnished by the Company are not designed for such call bridging. A Bureau will bridge calls at its own risk and the company will not be liable for defects in transmission or other service difficulties arising out of or resulting from this type of connection.

This service will continue to be provided to existing customer(s) until such time as discontinued by the customer, the Company, or the Florida Public Service Commission, or the service can no longer be maintained by the Company

1. General

- a. Digital Centrex is a Centrex-type service provided through a digital central office. It provides the customer with features normally associated with key telephone systems or switchboards.
- b. The service is offered subject to the availability of facilities and provided the customer's serving central office is a digital central office equipped with the necessary software.
- c. The service does not include terminal equipment on the customer's premises. Provision of the telephone instruments or other equipment is the responsibility of the customer.
- d. Directory listings are furnished in accordance with the rates and regulations specified in Section A6 of this tariff.
- e. Service charges as specified in Section A4 of this tariff apply to the services offered in this section.
- f. The minimum service period for Digital Centrex is twelve (12) months unless the term of the agreement is modified in a Contract Service Arrangement or longer term contract.

B. DIGITAL CENTREX SERVICE (Cont'd)

1. General (Cont'd)

- g. Contract termination liability for the twelve month minimum service period is such that if a subscriber terminates their Centrex service prior to the expiration of the minimum 12 month service period, the subscriber shall immediately pay a termination liability in the amount of 100% of the monthly charges remaining in the 12 month period.
- h. At the expiration of the 12 month service period, the subscriber's service period will automatically renew for successive periods of 12 months each at the then current tariff rates, unless the subscriber provides written or verbal notice of termination at least thirty (30) days in advance of any scheduled renewal.
- i. Directory Assistance charges as specified in Section A3 of this tariff apply to the services offered in this section.

2. Service Features

- a. The features listed are station or attendant console related. The basic rate includes all features, but the number of features actually used depends upon the customer's operating procedures and the terminal equipment selected. The customer may utilize station features only or both station and attendant console features.

3. Rates and Charges

- a. Digital Centrex lines will be furnished on a per customer premises location basis at the following rates. The monthly rate depends upon the number of lines in service. The monthly rate does not include the Subscriber Line Charge (SLC). The SLC may be calculated using the trunk equivalency table shown following. If the trunk equivalency table is used to calculate the SLC, the number of simultaneous conversations allowed on the system will be the number shown in the equivalent number of trunks column. If the customer elects to use a greater number of trunks, the SLC applies to each additional trunk.

End User Common Line (EUCL) charges for multi-line business subscribers, as described in Section 4 of the Company's Tariff F.C.C. No. 1, will apply.

C. DIGITAL CENTREX SERVICE - OPTIONAL FEATURES

1. Northern Telecom Business Terminal

- a. This feature allows the customer to utilize the Northern Telecom DMS-100 Business Terminal (telephone). The telephone is equipped with an alpha numeric display and allows push-button access to the customer's choice of various station features.
- b. The rate is for each line equipped and does not include the Northern Telecom Business Terminal. The customer is responsible for providing the Business Terminal.
- c. The Business Terminal line card is not required if the customer does not use the Northern Telecom Business Terminal.
- d. Rates and Charges

Monthly Rate

Business Terminal line card, per line	\$1.50
---------------------------------------	--------

2. Automatic Call Distribution (ACD)

- a. This feature provides incoming call distribution to the next available line. When all lines are busy, the incoming call will be placed in queue, the caller will receive a message explaining that all lines/agents are busy; and when a line become idle, the call will be switched to the available idle line/agent. This feature are offered under the conditions specified in A.1.b. previous.

D. DIGITAL CENTREX NETWORK - SPECIAL ACCESS

1. General

- a. This service provides for the interconnection of Special Access and/or Private Line facilities to Digital Centrex for the purpose of interfacing with subscribers to Digital Centrex Service. This service is necessary to complete the communication path between users of Centrex-type service and users of Special Access and/or Private Line services.
- b. This service is furnished subject to the availability of facilities and features from digital central office equipment located in a central office building owned or leased by the Company.
- c. The rates in C.2. following are applicable to each Digital Centrex interconnection. The Special Access and/or Private Line facility is not included in the interconnection charge.

2. Rates and Charges

	<u>NRC</u>	<u>Monthly Rates</u>
a. Voice Grade to Digital Centrex, each channel	\$ 50.00	\$ 53.00

E. EXPRESSTOUCH CENTREX FEATURES

1. General

ExpressTouch Centrex features are central office call management features offered to Centrex customers in addition to the optional features offered previously in this section of the tariff.

2. Regulations

a. The following regulations apply to the features listed in 3. following:

- 1) ExpressTouch Centrex features are provided subject to the availability of facilities. Additionally, the features described will only operate on call originating and terminating within the Custom Local Area Signaling Services (CLASS) serving areas.
- 2) In no event shall the Company be held liable for any losses or damages arising from the unavailability or failure of its equipment or facilities, or for any act, omission or failure of performance by the Company or its employees or agents in connection with this service.

b. The following regulations apply to the Caller ID feature only, in addition to the regulations listed in a. preceding.

- 1) If an incoming call is from a caller utilizing a PBX trunk or a rotary line group, the telephone number displayed may be the main number of that PBX or rotary group rather than the directory number accessed by the caller.

(CENTRAL TELEPHONE EXCHANGES ONLY)

E. EXPRESSTOUCH CENTREX FEATURES (Cont'd)

2. Regulations (Cont'd)

- b. The following regulations apply to the Caller ID feature only, in addition to the regulations listed preceding.
 - 2) The Company will deliver all numbers, subject to the technical limitations defined in this tariff, including telephone numbers associated with Nonpublished Listing Service as described in Section A6 of this tariff.
 - 3) Telephone numbers transmitted via Caller ID are intended solely for the use of the Caller ID subscriber. Resale of this information is prohibited by the tariff.
 - 4) Calling numbers will not be displayed on operator-handled calls, access lines where Calling Number Delivery Blocking has been activated, or with calls originating outside of the CLASS serving area.

3. Features

- a. Repeat Dialing - When activated, Repeat Dialing automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed and the caller will be notified with a distinctive ring.
- b. Return Call - Return Call enables a customer to place a call to the telephone number associated with the most recent call received, whether or not the call was answered.
- c. Caller ID - this feature enables the customer to view on a display unit the directory number of an incoming telephone call. The display unit may be an ancillary device which is attached to the customer's telephone set or may be a special telephone set with the display unit built-in. The calling number will display between the first and second ring.
- d. Calling Number Delivery Blocking - This service is provided at no charge to the subscriber. The service will be provided as described in Section A13.

E. EXPRESSTOUCH CENTREX FEATURES (Cont'd)

3. Features (Cont'd)

e. Call Tracing

- 1) Call Tracing enables the customer to initiate an automatic trace of the last call received. A usage charge will be assessed on a per-occasion basis for each successful trace made. A trace is considered successful when the customer is informed by the voice response unit that the Call Tracing has been successfully completed. Certain types of calls, i.e., out of the area long distance, cannot be traced using this feature.
- 2) Upon activation by the customer, the call tracing information (calling and called number, the time the call was received, and the time the trace was activated) is recorded and stored until requested by an authorized law enforcement agency. The information collection process is instantaneous and the customer using the feature will be notified immediately if the trace was successful and will then be instructed to contact the local law enforcement agency if they wish to file a complaint. The customer is not provided the traced number.

MISCELLANEOUS SERVICE ARRANGEMENTS

A. SPECIAL IDENTITY NUMBER ARRANGEMENT (SINA) (United Telephone exchanges only)

This information formerly appeared in Section A13 and was made obsolete on June 26, 1990. No new customers may subscribe to this service. These services will continue to be provided to existing customers until such time as discontinued by the customer, the Company, or the Florida Public Service Commission or the service can no longer be maintained by the Company.

1. General

- a. A residence single party line subscriber who desires to have incoming calls identified by means of a different ring may arrange for such service, where available, by contracting for a separate telephone number.
- b. A different telephone number is bridged to the access line and may be listed in the alphabetical section of the telephone directory at the rate for an additional listing. Whenever this additional telephone number is dialed, the telephone bell will ring either one long ring or two short rings, whichever is opposite of the ring assigned to the main telephone number. Incoming calls can thereby be identified for adults versus teenagers or husband versus wife.
- c. Subscribers of SINA service shall be responsible for the provision of the proper ring frequency in their premises equipment.

B. ADVANTAGE SERVICE (United Telephone exchanges only)

This information formerly appeared in Section A13 and became obsolete on the July 19, 1995. No new customers may subscribe to these services. These services will continue to be provided to existing customers until such time as discontinued by the customer, the Company, or the Florida Public Service Commission or until the service can no longer be provided by the Company.

1. Application

a. Advantage Service is an offering which combines certain Custom Calling, ExpressTouch, and SignalRing Feature options into packages at rates which provide a monthly savings over the rates that would apply if the features were purchased individually.

b. The packaged features are those offered individually in Section A13 of this tariff. All descriptions, rules and regulations specified in those sections apply to these packages also.

E. CUSTOMER NAME AND ADDRESS (CNA)

1. General

- a. Customer Name and Address (CNA) is a directory assistance service which provides a subscriber with the name and/or address, based on a subscriber provided telephone number.
- b. Information regarding nonpublished and nonlisted telephone service will not be provided via Customer Name and Address service.
- c. The Telephone Company assumes no responsibility or liability for any errors in the information furnished. The caller shall indemnify the Telephone Company and hold it free and harmless of and from any and all claims, demands or damages that shall arise from the use of the service.
 - 1) This service is furnished solely for the telephone calling purposes of the caller.
 - 2) Additional provisions concerning limitations of liability and allowance for interruption of service are set forth in Section A2 of this Tariff.
- d. A maximum of two requests will be allowed per call.
- e. Charges will not apply to calls placed from pay telephone service, hotel/hospital message rate trunk lines, or to calls placed by customers who have been certified as visually or physically handicapped.
- f. Information provided by Customer Name and Address is limited to the Embarq Florida, Inc., directory assistance database.
- g. CNA will be furnished only where facilities permit.

2. Rates and Charges

- a. Customer Name and Address Rate, per Call (Maximum of two requests per call) \$.45

 - 1. Series 1100 Channels

In consideration of the decreasing supply of metallic facilities, the Company will convert a customer's service requiring such facilities to a Voice Grade Service and waive the nonrecurring charges associated with the change. This applies to a customer where metallic facilities are being displaced with non-metallic facilities, or a customer may elect to make this change at any time prior to a modernization program that would eliminate the availability of metallic facilities.

a. Types and Description

These channels are furnished for operation on a two point or multi point basis subject to the number of point limitations indicated for each type and are provided for use with customer-provided power and signaling equipment. It is expressly declared that metallic facilities are in continually decreasing supply and that the Company does not hold itself in a position to make such facilities available. In addition, if modernization programs dictate the replacement of existing metallic facilities with nonmetallic facilities such as fiber optics the Company will not be required to

continue this service over metallic facilities. The various types of services furnished within this Series are as follows:

- 1) Type 1204 (1009/1109) - a two-wire interface with two-wire facilities suitable for use with direct current continuity type of equipment. Signaling (current and voltage) must be within the criteria as described following and circuits are limited to three station locations. This type channel may also be used to furnish auxiliary features (such as lights, hold, signaling, etc.).

Current applied by CPE -	ac & dc components per conductor, not to exceed 0.150 amperes rms
--------------------------	---

Magnitude of the peak - of the voltage between any conductor and ground	not to exceed 70.7 volts (50 volts rms) except continuous dc voltage not to exceed 135 volts
---	--

- 2) Type 1205 (1010/1110) - a two-wire interface with two-wire facilities suitable for low speed, uni-directional series-operated signaling. Transmission specifications as described in Technical Reference, "Transmission Specification for Low Speed Signaling System Channels." Service is limited to three serving wire centers and 26 stations.

OBSOLETE SERVICE OFFERINGS-
PRIVATE LINE SERVICE AND CHANNELS

E. PRIVATE LINE SERVICE (Central Telephone exchanges only)

4. Sub Voice Grade Service (Series 1000)

- 1) These channels are furnished for operation on a two point or multipoint basis subject to the number of point limitations indicated for each type and are provided for use with customer provided power and signaling equipment. It is expressly declared that metallic facilities are in continually decreasing supply and that the Company does not hold itself in a position to make such facilities available. In addition, if modernization programs dictate the replacement of existing metallic facilities with non-metallic facilities such as fiber optics, the Company will not be required to continue this service over metallic facilities. The various types of service are:

- (a) Type 1204 - A two-wire interface with two-wire facilities suitable for use with direct current continuity type of equipment. Signaling must be within the criteria as described in Technical Reference, "Transmission Specifications for Private Line Metallic Circuits" and limited to three station locations. This type channel may also be used to furnish auxiliary features (such as lights, hold, signaling, etc.).

Current applied by - ac & dc components CPE per conductor, not to exceed 0.150 amperes RMS

Magnitude of peak - not to exceed 70.7 volts of the voltage between (50 volts RMS) except any conductor and continuous dc voltage ground not to exceed 135 volts

1) (Cont'd)

(b) Type 1205 - A two-wire interface with two-wire facilities suitable for low speed, uni-directional series-operated signaling. Transmission specifications as described in Technical Reference, "Transmission Specifications for Low Speed Signaling System Channels". Service is limited to three serving wire centers and 26 stations.

2) Service is for 7 days per week, 24 hours per day, for a minimum period of one month. These channels are not suitable for the transmission of alternating current tones, but are capable of transmitting direct current mark-space or binary signals at rates from 30 up to 150 bauds.

3) These channels, when furnished for remote metering, supervisory control and miscellaneous signaling purposes, may be used for such purposes as indicating readings of meters at local locations, operating switching which in turn perform some desired operation, or operating special signaling devices of the customer.

4) These channels, when used for low speed teletypewriter or data transmission service, may be connected to extend service to another customer when such connection is made in accordance with the provision of Section A15.

PRIVATE LINE SERVICE AND CHANNELS

J. Private Line Service (Central and United Telephone)

1. Definitions

CHANNEL SERVICE UNIT (CSU) - Denotes equipment provided by the customer to terminate a digital facility on the customer's or other Common Carrier's premises.

CLEAR CHANNEL - Denotes an optional feature that allows the customer full use of the information capacity available in a high capacity channel. Clear Channel is provided by B8ZS line code, which reconfigures the address bits to allow full use of the available data stream.

DIGITAL INTEROFFICE CHANNEL - Denotes a path (or paths) for digital transmission between two Serving Wire Centers within an exchange.

DIGITAL LOCAL CHANNEL - Denotes a path for Digital Private Line service furnished from the Serving Wire Center to the customer's premises.

OBSOLETE SERVICE OFFERINGS-
PRIVATE LINE SERVICE AND CHANNELS

J. Private Line Service (Central and United Telephone) (Cont'd)

1. Definitions (Cont'd)

DS1 - Denotes a channel service expressed in terms of its digitally encoded data bit rate in accordance with the North American hierarchy of digital signal levels. It has a 1.544 Mbps transmission data rate, and provides for the two-way simultaneous transmission of isochronous timed, Bipolar Return-to-Zero (BPRZ) bit stream format, except where intentional bipolar violations are introduced by Bipolar with 8 Zero Substitution (B8ZS) format. Unframed signal formats are not permitted or compatible with Company equipment.

HIGH SPEED - Denotes a rate of speed of 56.0 or 64.0 Kbps.

INTEROFFICE CHANNEL - Denotes a path (or paths) for digital transmission between Company Serving Wire Centers within an exchange. An interoffice channel may be furnished in such a manner as the Company may elect.

LOW SPEED - Denotes a rate of speed of 19.2 Kbps.

MULTIPOINT SERVICE - Denotes a service which provides communications capability between more than two private line station locations by means of a bridging or hubbing arrangement.

SECONDARY CHANNEL - Denotes the offering of a companion digital transmission capability over the same physical facility as the primary channel at a lower bit rate. Terminal equipment required to support secondary channel capability must be provided by the Company.

SERVING WIRE CENTER - The local telephone central office assigned to subscribers within an exchange.

2. Rate Regulations

a. Termination Liability Charge

A Termination Liability Charge is applicable at the date of termination for services under contract. If a customer disconnects any portion of their service prior to the end of month 12, the customer will be liable for 100% of the payments remaining for the first twelve months and 50% of the payments remaining in the contract period. If a customer disconnects any portion of their service after the end of the 12th month, the customer will be liable for 50% of the payments remaining for the rest of the contract period. However, Termination Liability Charges will not apply for customer requests for moves of service under CSPP subject to the provisions set forth in A20.A.9.d. following.

3. Regulations Applicable to Channels

a. General

- 1) The regulations specified herein are applicable to specific facilities as indicated in the appropriate sections of this tariff for channel services.
- 2) Facilities furnished under the Channel Services Payment Plan (CSPP) are subject to all general regulations applicable to the provision of service by the Company as stated elsewhere in this tariff except as noted herein.
- 3) The CSPP is a payment plan which allows customers to pay fixed or variable rates for channel service equipment and facilities over optional contractual payment periods. A specific monthly rate applies for the duration of each period.
 - a) 12-23 month Term Payment Plan - payment periods may be selected from 12 months to 23 months in length, at applicable rates and charges.
 - b) 24-35 month Term Payment Plan - payment periods may be selected from 24 months to 35 months in length, at applicable rates and charges.
 - c) 36-59 month Term Payment Plan - payment periods may be selected from 36 months to 59 months in length, at applicable rates and charges.
 - d) 60-84 month Term Payment Plan - payment periods may be selected from 60 months to 84 months in length, at applicable rates and charges.

J. Private Line Service (Central and United Telephone) (Cont'd)

3. Regulations Applicable to Channels (Cont'd)

b. Application of Rates and Charges

- 1) The monthly rate applicable at the time a customer subscribes to Channel Service under a CSPP is not subject to Company initiated change during the optional payment period longer than one month.
- 2) In the event that all or any part of a service is disconnected at a customer request prior to expiration of any selected payment period of greater than one month's duration, the customer will be required to pay a termination charge as stated in that service's section of this tariff.
- 3) When customers renew or change the length of their payment period, the rates applicable for the new period are those currently in effect at the time of the renewal or change in the length of the payment period. A service order charge will not be applicable for such renewals or changes to the payment period.
- 4) Recurring rates and installation, termination, service establishment, Service Connection and other nonrecurring charges apply according to the appropriate schedules for services offered as associated items to Channel Services, and are filed elsewhere in this tariff.
- 5) Customer requests for inside moves of service will not affect the contract period.

c. Additions

- 1) Facilities can be added to an existing system where capacity permits. New rates, charges and regulations as stated in the Channel Services section of the tariff, for any period available under CSPP, may be selected at the rates currently in effect for new customers at the time of the addition.

c. Additions (Cont'd)

- 2) Termination charges for premature disconnection of added contractual services will apply as set forth under Disconnects.
- 3) Additions under CSPP are exempt from Company initiated rate changes for all payment periods longer than one month.
- 4) Installation, service order, service establishment and any other nonrecurring charges, as specified in this tariff, will apply to the added channel service.

d. Disconnects

- 1) Facilities disconnected from a system prior to the expiration date of the payment period for such services will require termination charges for premature disconnection if applicable.
- 2) The expiration date of the remaining facilities will not be affected.

e. Moves of Equipment

- 1) The appropriate nonrecurring charges for inside moves for items associated with channel services as specified in this and other tariffs are applicable. This type movement will not affect the contract period.
- 2) Inside moves of channel services provided under CSPP will be handled on an individual case basis based upon costs incurred.
- 3) Customer requests for moves of service(s) under CSPP, other than inside moves, will be subject to the conditions stated in Section J.3.k. following.

3. Regulations Applicable to Channels (Cont'd)

f. Requests for Changes in Length of Optional Payment Period

1) Subsequent to the establishment of a contract with a CSPP period, and prior to the completion of that period, the existing payment period may be replaced by:

a) A currently offered payment period at the current rates, with a length equal to or longer than the time remaining in the existing service agreement, subject to the following conditions:

- No credit will be given for payments made during the formerly selected period.
- The new payment period begins with the date requested.
- No termination charge applies for the remaining portion of the former payment period.
- Nonrecurring charges will not be reapplied.
- A service order charge will not apply.

g. Renewal Options

1) The customer has the following renewal options:

a) Prior to completion of the current payment period, any period available under the CSPP may be selected at the rates in effect for new customers at the time of the renewal. The customer will be charged the current rate for the newly selected payment period, commencing the day following completion of the prior payment period.

3. Regulations Applicable to Channels (Cont'd)

g. Renewal Options (Cont'd)

1) The customer has the following renewal options. (Cont'd)

b) Service may be continued on a month-to-month basis at the current rate for the one month payment period, unless otherwise specified in this tariff. The customer has no additional service commitment and, consequently, when service is terminated will not be subject to any termination charge. The one month service will be subject to Company-initiated rate adjustments when approved by the regulatory authority.

c) If the customer does not elect an additional payment period or does not request discontinuance of service, service will be continued at the monthly rate currently in effect for the month-to-month payment rate, under the terms specified in Section J.1 preceding.

2) Service connection charges are not applicable for services renewed under the CSPP. Any new services added at the time of renewal will be subject to all appropriate service connection charges and other nonrecurring charges.

3) The Company may discontinue or change any or all renewal options with approval of the appropriate regulatory authority.

h. Transfer of Service

Service may be transferred to a new customer at the same locations under prior written concurrence by the new customer as specified in this tariff. The new customer will be subject to all provisions and equipment configurations currently in effect for the previous customer. Regulations concerning transfer of service between subscribers as stated in other sections of this tariff also apply under CSPP.

3. Regulations Applicable to Channels (Cont'd)

i. Deferred Payment

1) Payment of nonrecurring charges for channel services with contract payment plans may be deferred over the length of the customer's payment period or a shorter period (in annual increments) subject to the conditions specified in this paragraph.

a) The charges to be deferred must be among the following types:

Nonrecurring Charges
Service Establishment

b) The customer must select a payment period longer than one month.

c) The total amount of nonrecurring charges as defined in Section A20.A.8.a.2) may be deferred.

d) The minimum amount deferrable per CSPP Contract is \$4,000.00.

e) Interest on deferred amounts will be calculated at the rate set forth in the deferred payment agreement executed by the customer. The interest rate to be charged on deferred payments will be revised periodically by the Company. If, in the judgment of the Company, the maximum interest rate allowed by law is insufficient to cover the costs of providing the deferred payment option, the Company will suspend the availability of said option until such time as the costs of providing said option can be recovered through the application of a lawful interest rate. Suspension of the deferred payment option will not affect customers who have executed a deferred payment agreement prior to the effective date of such suspension.

i. Deferred Payment (Cont'd)

1) (Cont'd)

f) All deferred charges must be paid in full when the customer:

- Selects a payment period with an expiration date prior to the expiration date of the deferral period.
- Disconnects service, for the system, prior to expiration of the selected deferral period.
- Fails to pay a monthly amount within 30 days of its due date.
- Moves a service under CSPP to another location in Company territory within the same state and jurisdiction, with the exception of an inside move.

h) The customer may prepay only the total outstanding deferred charges at any time during the selected deferral period. Customers will be given a credit for the amount of unearned interest. Customers may not prepay less than the total of the outstanding deferred charges.

j. Prepayment

- 1) For payment periods longer than one month, the customer may prepay the total outstanding recurring monthly rates. The prepayment of monthly rates in no way constitutes a purchase and the Company retains full ownership of all services covered by the prepayment. The following conditions apply:

4. Service Descriptions (Cont'd)

a. Digilink Service (Digital Data Service) (Cont'd)

3) Application of Rates (Cont'd)

h) Secondary Channel Capability is also available on an optional features and functions basis. The secondary channel operates parallel with the primary Digilink channel, and is used for diverse network capabilities. Examples of such capabilities include, but are not limited to, providing a lower speed data channel to a network management system in order to perform on-line diagnostics, testing, data monitoring or traffic measurement. This feature is available on a point-to-point basis where facilities are available.

b. TransLink Service (High Capacity Service)

1) Description of Service

a) TransLink Service is furnished for the simultaneous two-way transmission of serial, Bipolar Return-to-Zero (BPRZ) isochronous digital signals, except where intentional bipolar violations are introduced by Bipolar with 8 Zero Substitution (B8ZS) format, at a speed of DS1/1.544 Mbps between two points located within a LATA. The service name "High Capacity Service" previously used in the Central Telephone area will be changed to the service name "TransLink" as of the effective date of this tariff.

b) TransLink service is furnished for Private Line Intraexchange and Interexchange Communications by the Company.

b. TransLink Service (High Capacity Service) (Cont'd)

1) Description of Service (Cont'd)

- c) TransLink service is a service for the transmission of digital signals only and using only digital transmission facilities.
- d) The terminal equipment provided by the customer must be compatible with the DS1/1.544 Mbps channel facility provided by the Company.
- e) Multipoint service is not available.
- f) Unless specified following, the regulations for TransLink service specified herein apply in addition to the regulations set forth in Section J.1. preceding.
- g) The rates specified for TransLink in Section J.5. following contemplate the provision of digital quality facility utilizing existing interoffice carrier equipment and/or exchange cable facilities compatible with this service. If such equipment, new facilities or changes to existing facilities are required for the provision of this service, a special construction charge as specified in Section A5 of this tariff will apply in addition to the rates for TransLink service.
- h) TransLink service is available on a month-to-month basis or under variable rate periods with rates based on length of 36 months, 60 months or 84 months, under conditions specified in Section J.3.a.3) of this tariff. A minimum initial service period of 1 month is required.

J. Private Line Service (Central and United Telephone) (Cont'd)

4. Service Descriptions (Cont'd)

b. TransLink Service (High Capacity Service) (Cont'd)

4) Clear Channel Capability

- a) Clear Channel Capability (CCC) is an arrangement that alters a DS1/1.544 Mbps signal with unconstrained information bits, to meet pulse density requirements.

This will allow a customer to transport an all zero octet over a TransLink service channel providing an available combined maximum 1.536 Mbps data rate. This arrangement requires the customer signal at the channel interface to conform to Bipolar with 8 Zero Substitution (B8ZS) line code.

- b) CCC is provided on TransLink Service channels between two customer designated premises and is subject to the availability of facilities. This optional feature may be ordered at the same time the TransLink service channel is ordered, or it may be ordered as an additional feature of an existing TransLink service channel.
- c) When providing CCC via a DS3/44.736 Mbps High Capacity channel, that DS3 channel must be designated, in Company records, as having Clear Channel Capability prior to the provisioning of a DS1/1.544 Mbps High Capacity channel with CCC. Customers must agree to out-of-service periods required to add this feature to an existing TransLink service channel to be optioned for B8ZS.

4) Automatic Loop Transfer

The Automatic Loop Transfer provides protection on a IXN basis against failure of the facilities between a customer designated premises and the wire center serving that premises. Protection is furnished through the use of a switching arrangement that automatically switched to a spare channel line when a working line fails. The spare channel is not included as a part of the option. This option requires compatible equipment at both the serving wire center and the customer premises. The customer is responsible for providing the equipment at its premises. Equipment at the customer premises will be provided under tariff only if it existed in the Company inventory as of November 18, 1983. An additional Local Channel charge will apply whenever the spare line is provided as a leg to the customer premises.

Effective: May 10, 2002

OBSOLETE SERVICE OFFERINGS
DIGITAL CENTREX SERVICE FOR CITY, COUNTY,
FEDERAL AND STATE AGENCIES
(CENTRAL TELEPHONE EXCHANGES ONLY)

A. GENERAL PROVISIONS

This information formerly appeared in Section A23 and became obsolete on May 10, 2002. No new customers may subscribe to this service. This service will continue to be provided to existing customer(s) until such time as discontinued by the customer, the Company, or the Florida Public Service Commission, or the service can no longer be maintained by the Company

1. General

- a. Embarq Florida, Inc., Digital Centrex Service is provided through a digital central office. It provides the customer with features normally associated with key telephone systems or switchboards.
- b. The service is offered subject to the availability of facilities and provided the customer's serving central office is a digital central office equipped with the necessary software.
- c. The service does not include terminal equipment on the customer's premises. Provision of the telephone instruments or other equipment is the responsibility of the customer.
- d. Directory listings are furnished in accordance with the rates and regulations specified in Section A6 of this tariff.
- e. Service charges as specified in Section A4 of this tariff apply to the services offered in this Section.
- f. Directory assistance charges as specified in Section A6 of this tariff apply to the services offered in this Section.
- g. Toll traffic charges will apply between non-EAS exchanges for all access lines.

OBSOLETE SERVICE OFFERINGS
DIGITAL CENTREX SERVICE FOR CITY, COUNTY,
FEDERAL AND STATE AGENCIES
(CENTRAL TELEPHONE EXCHANGES ONLY)

A. GENERAL PROVISIONS (Cont'd)

1. General (Cont'd)

- h. At the expiration of the 12 month service period, the subscriber's service period will automatically renew for successive periods of 12 months each at the then current tariffed rates, unless the subscriber provides written or verbal notice of termination at least thirty (30) days in advance of any scheduled renewal.
- i. The minimum service period for Digital Centrex Service (Central Telephone Exchanges Only) is one year (12 months) unless the term of the agreement is modified in a C.S.A. agreement or longer term contract.
- j. Contract termination liability for the twelve month minimum service period is such that if a subscriber terminates their Centrex service prior to the expiration of the minimum 12 month service period, the subscriber shall immediately pay a termination liability in the amount of 100% of the monthly charges remaining in the 12 month period.

2. Service Features

- a. The features listed are station or attendant console related. The basic rate includes all features, but the number of features actually used depends upon the customer's operating procedures and the terminal equipment selected. The customer may utilize station features only or both station and attendant console features.

B. RATES AND CHARGES

1. Rates and Charges (Central Telephone Exchanges Only)

a. General

Digital Centrex Service (Central Telephone Exchanges Only) lines will be furnished at the following rates. The monthly rate depends upon the number of lines in service. The monthly rate does not include the Subscriber Line Charge (SLC). The Subscriber Line Charge may be calculated using the trunk equivalency table shown in A123.B.1.c. If the trunk equivalency table is used to calculate the SLC, the number of simultaneous conversions allowed on the system will be the number shown in the equivalent number of trunks column. If the customer elects to use a greater number of trunks, the regular SLC applies to each additional trunk.

B. RATES AND CHARGES (Cont'd)

1. Rates and Charges (Central Telephone Exchanges Only) (Cont'd)

b. Digital Centrex Service Line Rates (Central Telephone Exchanges Only)

<u>No. Lines</u>	<u>Monthly Rate*</u> Per Premises Location <u>Per Customer Group</u>
26-50	21.01
51-100	23.00
101-150	23.00
151-200	23.00
201-250	21.00
251-300	21.00
301-500	21.00
501-1,000	19.00
1,001-2,000	19.00
2,001 and up	19.00

- * The tiered rates will be applied on a per customer, per premises, per customer group basis with the applicable rate per line equal to the total number of lines subscribed to. Example: If a customer has 156 Digital Centrex lines and all 156 lines terminate at the same premises and are with the same Digital Centrex customer group, "ALL" 156 lines will be billed at \$20.01. However, if a customer has services at the same premises, but the Digital Centrex lines are terminated in multiple Digital Centrex customer groups, then the Digital Centrex lines will be rated independently based on the total number of lines terminating in each Digital Centrex customer group.

OBSOLETE SERVICE OFFERING

DATA TRANSPORT SERVICE

A. SWITCHLINK (United Telephone Exchanges Only)

1. General

- a. SwitchLink is a digital switched service that provides full duplex information transport at bit rates up to and including 19.2 kbps via a specially equipped two-wire SwitchLink access line.
- b. SwitchLink access lines allow a maximum 19.2 kbps digital call except that digital transmission rates of less than 19.2 may be accomplished as a function of the particular customer premises equipment connected to a SwitchLink access line.
- c. SwitchLink access lines are not voice functional.
- d. SwitchLink is furnished in conjunction with intraLATA communications provided by the Company. InterLATA communications are supported by the Embarq Florida, Inc., Access Service Tariff, Section E6.

2. Definitions

SWITCHLINK ACCESS LINE - refers to the non-loaded facility connecting the customer premises to the Switchlink switching equipment and is similar to an individual business line.

SWITCHLINK SERVICE ARRANGEMENT - refers to the equipment required in the central office per line to support 19.2 kbps data transport over the SwitchLink Access Line.

SWITCHLINK NETWORK CALL - refers to a call placed from one SwitchLink Access Line to another SwitchLink Access Line whether or not the lines are served from the same SwitchLink serving central office.

SWITCHLINK SERVING AREA - the Serving Area is defined by the technical limitations of each specific serving arrangement and in the Company's judgment are necessary to accommodate the data transmission without excessive degradation.

SWITCHLINK REMOTE CAPABILITY - refers to the facilities and equipment necessary to extend a SwitchLink Access Line to certain customers who are served by central offices rather than a SwitchLink serving central office.

SWITCHLINK MODEM POOLING - SwitchLink customers may subscribe to Modem Pooling either as one-way in, one-way out or two-way service. SwitchLink Modem Pooling provides access to the analog public switched network.

SWITCHLINK CENTRAL OFFICE - refers to the central office containing SwitchLink switching equipment.

SERVING WIRE CENTER - denotes the local telephone central office assigned to subscribers in a well defined area. A Serving Wire Center may be further designated by the Company as a SwitchLink Serving Central Office.

3. Regulations

- a. SwitchLink Service is provided subject to the availability of appropriate network facilities and equipment and is provided from the closest designated SwitchLink serving central office. Telephone numbers for SwitchLink access lines will be assigned from the SwitchLink serving central office.
- b. The minimum billing period will be one month.
- c. The Company shall not be responsible if changes in any of its equipment, operations, or procedures utilized in the provision of SwitchLink service render any facilities provided by a customer obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance. In such instances and when known in advance, the Company will notify customers of such changes.
- d. Vacation service is not allowed.
- e. Regulations for Allowance for Interruptions apply as specified in Section A2 of this tariff.
- f. When SwitchLink Remote Capability is purchased, the mileage charge will be calculated as follows:

The interoffice mileage charge will be based on the airline mileage between the SwitchLink serving central office and the customer's serving wire center. Airline distance between Company central offices is to be developed using the mileage formula in E10 of the BellSouth Service Tariff from V&H coordinates listed in the National Exchange Carrier Association (NECA) Tariff, FCC No. 4.

- g. SwitchLink Service requires the use of customer premises equipment which is compatible with Company facilities.
- h. Customer premises equipment associated with SwitchLink Service is subject to the limitations specified in the Bell Communications Research, Inc., Technical Reference, "DATAPATH* Network Access Interface Specification." TR-EOP-000277, until such time as the FCC adapts registration rules for the service under Part 68 of their rules and regulations. This technical reference is available from:

4. Rates and Charges

a. SwitchLink Network Call Usage Charges

1) The following charges apply whenever a SwitchLink Network Call is established to a number within the local toll-free calling area of the customer's serving wire center. Until such time as the Company's billing system can be modified to bill the network call usage charges in A.4.a.1), a flat-rate surrogate usage charge of \$12 per month will be billed to subscribers of Remote Capability per SwitchLink Remote Access Line.

a)	Initial one minute or fraction Thereof, per call	\$.06
b)	Additional minute increment Or fraction thereof	.02

2) A time-of-day discount is applicable to SwitchLink Network Call Usage charges as follows:

		<u>Discount</u>
All days:	8:00 p.m. - 9:00 a.m.	50%
Sat - Sun	9:00 a.m. - 8:00 p.m.	50%

3) Messages that span more than one rate period will have the total charges for the minutes in each rate period summarized. The results for each rate period are added together to obtain the total message charge.

4) Network Call Usage charges will be billed to the SwitchLink access line originating the call.

5) SwitchLink access lines utilizing the long distance network will have the applicable toll charges billed to the originating end. Long distance charges will be rated from the exchange rate center of the central office providing the SwitchLink Service Arrangement.

OBSOLETE SERVICE OFFERING

DATA TRANSPORT SERVICE

B. SWITCHLINK PLUS (Cont'd)

1. General (Cont'd)

- d. The Remote Access Line feature of the SwitchLink Service is available to subscribers of SwitchLink Plus at the rates specified in Section A29 of this tariff.
- e. SwitchLink Plus access lines are not voice functional.

2. Regulations

- a. SwitchLink Plus requires a data-conditioned local loop from the serving central office to the subscriber's premises. The local loop is limited to the transport of digital information only. The service may not be used for analog transmissions.
- b. Compatible data units must be utilized at the originating and terminating ends of the transmission to transmit and receive the data at the 56 Kbps speed. The same data unit may be used for either SwitchLink or SwitchLink Plus. The subscriber is responsible for obtaining and maintaining the data unit.
- c. If the data is to be transmitted over interexchange facilities, the carrier chosen by the subscriber must be capable of passing high speed data end-to-end over a digital network. If the requirements in b. and c. are not met, the information will not be transmitted correctly.

3. Rates and Charges

- a. Local usage rates are billed for outward local and EAS calling only. Long distance rates will apply to calls beyond the local calling area.

b. SwitchLink Plus Rates

	<u>Nonrecurring Charges</u>	<u>Monthly Rates</u>
1) Basic service, per line	\$150.00	\$50.00
2) Local Usage		
First minute, or fraction thereof, per call	.06	
Each additional minute, or fraction thereof	.02

B. SWITCHLINK PLUS (Cont'd)

3. Rates and Charges (Cont'd)

b. SwitchLink Plus Rates (Cont'd)

2) Local Usage (Cont'd)

- a) Call usage charges will be billed to the SwitchLink Plus access line originating the call.
- b) Per call usage charges are not applicable to Centrex customers for SwitchLink Plus calls placed within the customer's central office defined 4-digit dialing user group. SwitchLink Plus calls dialed outside the customer's user group are subject to applicable usage charges.
- c) Messages which span more than one rate period will have the total charges for the minutes in each rate period summarized. The results for each rate period are added together to obtain the total message charge.

c. A time-of-day discount applies to the local SwitchLink Plus usage rates as follows:

		<u>Discount</u>
All Days	8:00 p.m. - 9:00 a.m.	50%
Saturday and Sunday	9:00 a.m. - 8:00 p.m.	50%

d. Other Rates and Charges

- 1) Optional Features (i.e., Speed Calling) are available at the rates provided in the applicable sections of the tariff.
- 2) Service Connection Charges from Section A4 of this tariff are applicable to SwitchLink Plus service establishment.

CENTEL METROPOLITAN DATA SERVICES (CMDS)
(Central Telephone exchanges only)

DATA TRANSPORT SERVICE

C. CENTEL METROPOLITAN DATA SERVICES (CMDS) (Central Telephone exchanges only)

This information formerly appeared in Section A28 and became obsolete on September 18, 2002. No new customers may subscribe to this service. This service will continue to be provided to existing customer(s) until such time as discontinued by the customer, the Company, or the Florida Public Service Commission, or the service can no longer be maintained by the Company.

1. General

- a. Centel Metropolitan Data Services (CMDS) is a group of telecommunication services designed for use within the metropolitan area of Tallahassee, Florida. CMDS is defined by "Classes of Service." The first group of services being offered provide Local Area Network (LAN) inter-networking over a shared fiber optic network. The shared network utilizes Fiber Distributed Data Interface (FDDI) to transport a subscriber's LAN data across the metropolitan area. The Company's FDDI Metropolitan Area Network (Man) is capable of supporting multiple subscriber network connections at their native LAN speeds.
- b. A "Class of Service" will be used to define each tariffed service for the present LAN inter-networking services and undefined future services.

Classes 4,5,6,7,9 define classes of access for LAN inter-networking via the CMDS MAN. Each class provides Media Access Control (MAC) level bridging services to a subscriber's LANs across the CMDS network as shown following:

<u>CLASS NAME</u>	<u>ACCESS SPEED</u>	<u>FACILITIES</u>	<u>PROTOCOLS SUPPORTED</u>
Class 4	1,536,000 BPS	Copper	802.3/802.5/FDDI
Class 5	4,000,000 BPS	Fiber	802.5
Class 6	10,000,000 BPS	Fiber	802.3
Class 7	16,000,000 BPS	Fiber	802.5
Class 9	100,000,000 BPS	Fiber	FDDI

DATA TRANSPORT SERVICE

C. CENTEL METROPOLITIAN DATA SERVICES (CMDS) (Central Telephone exchanges only) (Cont'd)

1. General (Cont'd)

- c. The network demarcation point is the LAN interface on the CMDS equipment at the subscriber premises. This would be a IEEE 802.3, IEEE 802.5, or FDDI. The subscriber is responsible for providing cabling necessary to hook up to the CMDS equipment and is responsible for placing all facilities and cabling required to get to the CMDS demarcation within the building.

2. Requirements for Access Classes 5,6,7, and 9

- a. The customer must ensure site requirements are met as specified following:

1) Power

Customer will provide the Company with two (2) duplex isolated ground 20 amp., 120v. AC outlets. The outlets are to be within five (5) feet of the equipment. All electrical work must meet NECA codes.

2) Footprint

Customer will provide the Company with adequate space to place an equipment cabinet on the premises. Equipment cabinet dimensions are: H70"xW30"xL30". Customer will provide a two (2) foot clearance on all sides and above the equipment cabinet.

3) Conduit

a) Exterior

Customer is responsible to ensure adequate conduit space is available to place fiber from the closest right-of-way into the main telephone room within a building.

b) Interior

If Company-provided equipment is to be located in another space other than the telephone room, the customer will provide a two (2) inch interior conduit suitable to run fiber jumpers to the equipment.

4) Access (maintenance)

Customer will provide the Company's maintenance personnel or contractors with access to the equipment for regular maintenance and service.

5) Environment

a) Air

It is the customer's responsibility to provide adequate cooling to maintain the equipment operating environment parameters as follows:

Temperature: 55-85 degrees Fahrenheit

Humidity: 70% or less

b) Space

It is the customer's responsibility to provide a clean environment free from flooding for the Company provided equipment.

3. Limitations

a. Classes 5,6,7,and 9 are available only within the Tallahassee metropolitan area.

b. Classes 4,5,6 and 7, LAN bridging services are available only for LANs adhering to the IEEE 802.3 and IEEE 802.5 specifications.

4. Discounts

Pricing discounts of 50% on nonrecurring charges are available for subscriber sites with three or more connections regardless of the class of service.

5. Definitions

ANSI - American National Standards Institute is a private, nongovernmental, non-profit organization.

BRIDGING - The linking of LANs at layer two (2) of the ISO OSI 7 layer Reference Mode. Bridge devices operate on networks having compatible Data Link Layer addressing schemes (such as IEEE 802.3 and IEEE 802.5), but are transparent to protocols of the Network and higher layers. Bridging makes multiple LANs appear as if they are on a contiguous network.

CLASS OF SERVICE - The definition of a CMDS service includes interface type and interface speed.

CMDS - Centel Metropolitan Data Services is a definition of services available within a metropolitan area.

FDDI - Fiber Distributed Data Interface is a 100-Megabit network developed by the American National Standards Institute. FDDI is designed for both LAN and MAN configurations. FDDI has four (4) component standards covering the physical and data-link layers of the ISO Reference Model.

IEEE - The Institute of Electrical and Electronics Engineers is a professional organization providing educational services to its members and developing standards in the area of electrical engineering and computing.

INTER-NETWORKING - Inter-networking is the linking of networks. Network to network communications inspired the need for the OSI Reference Model first published in 1978.

5. Definitions (Cont'd)

ISO - International Organization for Standardization produces international standards and is a voluntary, nontreaty organization founded in 1946. Its members are the national standards organizations of the 89 member countries. The U.S. representative in ISO is ANSI.

LAN - A Local Area Network is a collection of computing devices connected together to form a network, typically within a single site or building. LANs were initially conceived to provide interconnection of computing assets available at one site. MAC - Medium Access Control frames are used for network management. In the seven layer Open Systems Interconnection (OSI) model, the MAC layer is in the lower half of layer 2. There are 25 different types of MAC frames, and these are divided into four categories: Medium Control, which is concerned with the reliable operation of the network; Station Initialization, which is used when a station wishes to join the ring; Error Monitoring, which indicates soft errors that have occurred; and Network management, which controls the network configuration and station parameters.

MAC - Medium Access Control frames are used for network management. In the seven layer Open Systems Interconnection (OSI) model, the MAC layer is in the lower half of layer 2. There are 25 different types of MAC frames, and these are divided into four categories: Medium Control, which is concerned with the reliable operation of the network; Station Initialization, which is used when a station wishes to join the ring; Error Monitoring, which indicates soft errors that have occurred; and Network management, which controls the network configuration and station parameters.

MAN - A Metropolitan Area Network is a network that covers an entire city. A MAN network interconnects many networks into a Metropolitan network and extends beyond the scope of a LAN, which is typically within a single office, site or building.

NATIVE SPEED - The speed (bit rate) equal to the full rate of speed at which a given LAN operates.

OSI - Open System Interconnection

OSI REFERENCE MODEL - The Open Systems Interconnection Reference Model is designed as a standard to allow various "open" systems to communicate. An open system is standards-based instead of proprietary-based. 802.3 - Part of the IEEE developed body of LAN standards. Colloquially known as Ethernet, 802.3 runs over coax, copper, or fiber at 10 megabits per second.

802.3 - Part of the IEEE developed body of LAN standards. Colloquially known as Ethernet, 802.3 runs over coax, copper, or fiber at 10 megabits per second.

802.5 - Also a LAN standard out of IEEE, known as Token Ring, 802.5 operates at 4 or 16 megabits per second.

6. Rates and Charges

- a. The following rates include the elements of demarcation, port electronics at the subscriber's premises, the local channel and the company's MAN switching system function.
- b. Nonrecurring charges apply for each service terminated at the customer's premises. For the installation of local channels when more than one of the same type of service, within the same building at the same premises for the same customer is ordered and installed, the first and second ports at each location are billed at the first and second NRC rate and the others are billed at the third and additional NRC rate; regardless of date of installation.
- c. Discounts of monthly recurring charges are also provided dependent upon the number of ports per building and the total number of ports per customer. Discounts of monthly rates are not available for Class 4.
- d. The rates shown in this tariff are based on costs associated with the installation of typical customer loops. Where a special type of customer loop installation is desired by the subscriber or where the individual requirements of a particular situation makes the installation unusually expensive, the subscriber is required to bear the excess as specified in Section A5 of this tariff.

OBSOLETE SERVICE OFFERING

DIGITAL NETWORK SERVICES

A. FRAME RELAY SERVICE

1. General

- a. This information formerly appeared in Section A29 and became obsolete on April 10, 2001. No new customers may subscribe to this service. This service will continue to be provided to existing customer(s) until such time as discontinued by the customer, the Company, or the Florida Public Service Commission, or the service can no longer be maintained by the Company.
- b. Frame Relay Service (FRS) is a "fast packet" network service that permits the transmission of data at speeds up to 1.544 Mbps using permanent virtual circuits.
- c. Permanent Virtual Circuits (PVCs) are logical circuits that define a specific bi-directional path for data sent by the customer to another location. These circuits are virtual because they are established in software tables and do not tie up capacity when not in use. This also allows multiple PVCs to be defined over a single access line, thereby providing a single access line the capability to transmit data to multiple destinations.
- d. In the operation of Frame Relay Service, Customer Premises Equipment (CPE) such as routers, encapsulate arriving data into variable length frames. These frames contain information identifying which PVC in the network should be used to forward the frame to the proper destination. The CPE then sends the frame into the Frame Relay network. The Frame Relay switch reads identifying information and routes the frame to the proper destination based on a pre-established PVC.
- e. The statistical multiplexing Frame Relay switches are able to provide shared network resources to end users of this service.
- f. Frame Relay Service conforms to the International Telecommunications Union (ITU), formerly the Consultative Committee for International Telegraph and Telephone (CCITT), and American National Standards Institute (ANSI) standards set forth in technical publications.
- g. Frame Relay Service, as provided for in this tariff section, is offered for intraLATA use only.
- h. The regulations and rates specified herein are in addition to the applicable regulations and rates specified in other sections of this tariff.
- i. The rates and charges set forth for Frame Relay Service provide for the furnishing of service where suitable facilities are available.

First Revised Sheet 2
Cancelling Original Sheet 2
Effective: April 15, 2001

OBSOLETE SERVICE OFFERING

DIGITAL NETWORK SERVICES

A. FRAME RELAY SERVICE (Cont'd)

2. Regulations

a. Explanation of Terms

- 1) Committed Information Rate (CIR) - A monthly rate, based on the amount of subscriber data throughput that the Telephone Company will support under normal network conditions. CIR is administered per PVC. Any data burst beyond the CIR may be labeled Discard Eligible (DE) if the data transfer rate exceeds the CIR of the PVC being used. If the frame Relay network develops congestion, the frames marked DE may be discarded.

In Frame Relay Service, the retransmission of discarded frames is administered by the CPE. The CIR ordered on a PVC connecting to a 56 Kbps Frame Relay Access Line (FRAL) may not exceed 48 Kbps.

- 2) Customer Designated Location (CDL) - The geographic location designated by the customer at which an access component of the customer's service is first considered to enter the Company's network.
- 3) Frame - A sequence of contiguous bits delimited by beginning and ending flag sequences.
- 4) Frame Relay Access Line (FRAL) - Frame Relay Access Line provides access to the Frame Relay Service (FRS) network, connecting customer facilities at the Network Interface with a corresponding Frame Relay Port. The FRAL includes the provision of a port.
- 5) Permanent Virtual Circuit (PVC) - A Permanent Virtual Circuit (PVC) is a logical channel from one Frame Relay Port to another Frame Relay Port within the FRS Network. PVCs are provisioned on either 56 Kbps, 64 Kbps, or 1.544 Mbps ports, depending on the customer's data networking requirements. The actual throughput of aggregated PVC bandwidths in use at the same time on the same port cannot exceed the port speed.

A customer subscribing to a PVC will be referred to as the Controller of the FRAL. A customer may request data transmission capability to another customer. Both customers must have a FRAL. The Controller of the FRAL must have written permission from the Controller of the other FRAL in order to establish PVCs between the two customers. This document must be presented to the Company before the request can be processed.

The FRAL and PVC are ordered and billed independently and can have different customers as Controllers. A request by one customer to discontinue a PVC does not result in the disconnection of the FRAL. Only the Controller of a FRAL may authorize a disconnect of that FRAL.

First Revised Sheet 3
Cancelling Original Sheet 3
Effective: April 15, 2001

OBSOLETE SERVICE OFFERING

DIGITAL NETWORK SERVICES

A. FRAME RELAY SERVICE (Cont'd)

2. Regulations (Cont'd)

a. Explanation of Terms (Cont'd)

6) Port - In a Frame Relay Service, ports are the physical entry points for Access Lines and the originating and termination points for PVCs. Ports include the electronic equipment used in connecting these service elements to the FRS network. Ports enable customers to allocate bandwidth to applications as needed at customer-designated transmission speeds of up to 56 Kbps, 64 Kbps or 1.544 Mbps. Port access is included in the FRAL but may be purchased separately if connecting to a Telephone Company approved access method to the Frame Relay network.

7) Protocol - A specific set of rules, procedures or conventions relating to format and timing of data transmission between two devices. A standard procedure that two data devices must accept and use to be able to understand each other.

Protocols break a file into equal parts called blocks or packets. These packets are sent and the receiving computer checks the arriving packet and sends an acknowledgment back to the sending computer. When a block is damaged in transit, an error occurs. The purpose of a protocol is to set up a mathematical way of measuring if the block came through accurately; and if it didn't, ask the distant end to re-transmit the block.

8) Statistical Multiplexing - A multiplexing technique in which time slots are dynamically allocated on the basis of need rather than being predefined. The data is typically transmitted on a first come, first served basis.

b. Frame Relay is provided to the customer in the form of the FRAL, PVC and the CIR. The FRAL forms the local access component which provides the customer access to the Frame Relay Network. A PVC must be ordered for transmission between any two locations. The CIR determines the speed the Telephone Company will support under normal operating conditions on a specific PVC.

c. The Company does not undertake to originate data, but offers the use of its service components, where available, to customers for the purpose of transporting customer-originated data.

DIGITAL NETWORK SERVICES

A. FRAME RELAY SERVICE (Cont'd)

3. Obligations of the Customer

- a. The customer's Frame Relay compatible terminal equipment has the responsibility for error correction. Frame Relay Service nodes may discard frames with errors and may discard frames when the network supporting FRS is in a state of congestion.
- b. Where FRS is available for use in connection with communications systems or equipment provided by a customer or user, the operating characteristics of such systems or equipment shall be such as not to interfere with any services offered by the Company. Such use is subject to the further provisions that the equipment provided by the customer or user does not endanger the safety of Company employees or the public; damage, harm, require change in or alteration of the equipment or other services of the Company interfere with the proper operation of the Company's equipment or otherwise injure the public in its use of the Company's services. Upon notice from the Company that the equipment provided by the customer or user is causing, or is likely to cause, such hazard or interference, the customer shall take such steps as shall be necessary to remove or prevent such hazard or interference.
- c. The customer, upon request, shall furnish such information as may be required to permit the Company to design and maintain the FRS it offers and to assure that the service arrangement is in compliance with the regulations contained herein.
- d. It shall be the responsibility of the customer to ensure the continuing compatibility of the customer-provided equipment that is used in conjunction with the FRS. The CPE shall be in compliance with rules and regulations as specified in Section A15 of this tariff.
- e. The customer shall be responsible for obtaining permission for the Company's agents or employees to enter the premises of the customer at any reasonable hour for the purpose of installing, inspecting, repairing, or upon termination of the service, removing the service components of the Company.
- f. The customer shall be responsible for the payment of a nonrecurring Trouble Location Charge as found in Section A4 of this tariff.
- g. The customer may only use a Frame Relay Access Line with Frame Relay Service.

4. Obligations of the Telephone Company

- a. The responsibility of the Company shall be limited to furnishing network equipment suitable for FRS and to the maintenance and operation of such equipment in a manner proper for such service. Subject to this responsibility, the Company shall not be responsible for the through transmission of signals generated by the customer-provided equipment or system, or for the quality of, or defects in, such transmission or the reception of signals by such equipment or systems.
- b. The Company shall not be responsible for installation, operation, or maintenance of any terminal equipment, data unit or communications system provided by the customer or user. The Company is not responsible for adapting FRS to the technological requirements of any specific customer equipment.
- c. When a customer orders a PVC which is relayed to other Local Exchange Carriers, Interexchange Carriers or other Frame Relay networks, the Company will provide advisory assistance as a part of the establishment of this PVC.
- d. The Company shall not be responsible to the customer or user if changes in any of the equipment, operations or procedures of the Company used in the provision of Frame Relay Service render any facilities provided by the customer or user obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance, provided the Company has met any applicable information disclosure requirements otherwise required by law.
- e. The Company undertakes the responsibility to maintain and repair the service which it furnishes. Network equipment installed by the Company on the customer's premises shall be and remain the property of the Company. The customer or user may not rearrange, disconnect, remove, attempt to repair, remote test, or interface with any network equipment installed by the Company without prior written consent by the Company.
- f. The Company, by written notice to the customer, may immediately discontinue the furnishing of FRS without incurring liability upon nonpayment of any sum due to the Company or a violation of any condition governing the furnishing of service.
- g. The Company has the service responsibility up to and including the network interface.

Cancelling Original Sheet 6
Effective: April 15, 2001

OBSOLETE SERVICE OFFERING

DIGITAL NETWORK SERVICES

A. FRAME RELAY SERVICE (Cont'd)

5. Rates and Charges

- a. The minimum contract period for Frame Relay Service is one month.
- b. When a customer orders additional PVCs, changes PVC assignments or changes the CIR on a PVC on a given FRS Port after the initial port installation, the Frame Relay PVC nonrecurring charge shall apply.
- c. Service Rearrangements

Service rearrangements are changes to existing (installed) services which do not result in a change in the physical location of the network interface. Changes in the physical location of the network interface are treated as moves and are described and charged for as set forth herein.

1) Additions to Service

- a) When service elements are added to an existing service, the added elements must meet the minimum period requirements associated with the service to which they are added.
- b) Related monthly rates and nonrecurring charges for addition(s) to service are the rates and charges in effect at the time of the addition(s).

- 2) Administrative Charge - An administrative charge will be applied whenever a change is made to a customer's Frame Relay configuration (including changes to existing group addressing) at the customer's request. Such changes are defined as those rearrangements necessary to add, delete, or rearrange the customer's configuration and changes of CIR on a PVC. Although multiple changes may be caused by such actions, only one administrative charge will apply.

d. Rate Elements

- 1) Frame Relay Access Line (FRAL) - A nonrecurring charge and monthly rate both based on the speed of the port connection (i.e., 56 Kbps, 64 Kbps or 1.544 Mbps) apply per port for each physical connection to the network supporting FRS. The FRAL includes the provision of a port.
- 2) Frame Relay Port (FRP) - A monthly rate based on the speed of the port connection (i.e., 56 Kbps, 64 Kbps or 1.544 Mbps) applies per port connection to the network supporting FRS. The port rate element can be used in lieu of the FRAL element if the customer has an alternative Company approved access to the Frame Relay Network.
- 3) Frame Relay PVC (FR-PVC) - A nonrecurring charge applies for the establishment of each PVC and for each subsequent order of PVC(s).
- 4) CIR - A monthly charge based on the desired Telephone Company supported speed of each PVC. The CIR ordered on a PVC connecting to a 56 Kbps FRAL cannot exceed 38.4 Kbps. The CIR ordered on a PVC connecting to a 64 Kbps FRAL cannot exceed 48 Kbps.
- 5) Administrative Charge - Applies to changes in a customer's network configuration such as additions or changes of PVCs. Although multiple changes can be caused by such actions, only one administrative charge applies.

e. Term Discounts

- 1) FRS is available on a month-to-month basis or under variable rate periods, with rates based on 36 and 60-month lengths.
- 2) FRS rates under any Term payment Plan are exempt from customer-initiated changes for the payment period selected. Rates in effect at the time the service is installed and/or as of the service order application date will be applicable until the contract expires. At the expiration date of the customer's payment period option, the customer may select a new payment period option at current rates or may revert to current month-to-month rates.
- 3) If the customer disconnects any portion of their Frame Relay service prior to the end of month 12, the customer will be liable for 100% of the payments remaining for the first twelve months and 50% of the payment remaining in the contract period.

If the customer disconnects any portion of their FRS after the end of the 12th month, the customer will be liable for 50% of the payments remaining for the remainder of the contract period. Termination Liability charges do not apply to requests for moves of service.

OBSOLETE SERVICE OFFERING

DIGITAL NETWORK SERVICES

B. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI)

1. General

- a. This information formerly appeared in Section A29 and became obsolete on July 5, 2001. No new customers may subscribe to this service. This service will continue to be provided to existing customer(s) until such time as discontinued by the customer, the Company, or the Florida Public Service Commission, or the service can no longer be maintained by the Company
- b. ISDN-PRI is an IntraLATA group of offerings supported by the Integrated Services Digital Network (ISDN) architecture.
- c. ISDN-PRI provides a method of access to the telephone network called Primary Rate Interface. PRI is an ISDN based T1 link to the telecommunications network and provides integrated digital channels for voice, data and video applications. The service will initially provide connectivity between an ISDN PBX or other ISDN compatible Customer Premises Equipment (CPE) and a serving central office. The basic channel structure for PRI is twenty-three 64 Kbps B channels and one 64 Kbps D channel. The B channels may be used to connect the PBX or ISDN compatible CPE to the public network (i.e., inward/outward calls, OutWats/TFC, or to tie lines, and FX service access lines). The D channel carries the signaling and call set-up information for the B channels.
- d. ISDN-PRI is a service for the transmission of digital signals only.
- e. Unless otherwise specified, the regulations for ISDN-PRI specified herein apply in addition to the regulations set forth in Section A20 A. And D. of this tariff.
- f. ISDN-PRI is provided within a LATA from wire centers where appropriate ISDN facilities are available, as determined by the Company. Service inquiries will be necessary to determine availability. If new equipment or facilities and/or changes to existing equipment/facilities are required for the provision of this service, special construction charges will apply as specified in Section A5, in addition to the applicable ISDN-PRI rates.

DIGITAL NETWORK SERVICES

B. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI)

2. Regulations

- a. Provisioning of CPE that is compatible with the ISDN-PRI interface is the responsibility of the user.
- b. The Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provision of ISDN-PRI render any facilities provided by the customer obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance.
- c. Digital transmission rates at speeds less than those indicated may be accomplished as a function of the particular CPE furnished by the user.
- d. Suspension of service is not permitted with this service.
- e. Regulations for Allowance of Interruptions apply as specified in Section A2 of this tariff.
- f. The minimum subscription period for which month-to-month PRI is furnished and for which charges are applicable is one month.
- g. OutWATS/TFC services utilizing ISDN-PRI are available in Section A19, tie lines are available in A20 and FX/FCO are available in A9.
- h. Verification and Emergency Interrupt service is not available for ISDN-PRI.
- i. Telephone numbers transmitted via the Calling Line Information feature are intended solely for the use of the ISDN-PRI subscriber or user. Resale of this information is prohibited by this tariff.
- j. Through Non-Facility Associated Signaling (NFAS), PRI can also be ordered with 24 B channels and no D channel. Under this option, the customer will order one ISDN-PRI service arrangement with 23 B channels and one D channel. Additional PRI services can then be provided with 24 B channels. The D channel on the initial PRI is used to control subsequent 24 B PRI circuits.

OBSOLETE SERVICE OFFERING

DIGITAL NETWORK SERVICES

B. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI)
(Cont'd)

3. Definitions

- a. B Channel - A bi-directional synchronous channel capable of supporting 64 Kbps of digital transmission.
- b. D Channel - A 64 Kbps digital signaling-only channel for call establishment and routing used for ISDN-PRI.
- c. 64 Kbps Clear Channel Capability - A B channel connection which provides end-to-end digital connection in which all 64 Kbps of bandwidth are available for customer use.
- d. Virtual Facility Group(s) (VFG) - A VFG simulates lines and trunks in software. When VFG is accessed, the central office switch checks for the availability of virtual facilities. If none are available, the call is blocked. If a virtual facility is available, the call is re-translated, recorded and routed to the appropriate access service.

4. Application of Rates

- a. The Primary Rate Facility furnished between a Serving Wire Center and the customer's premises will be charged at rates and regulations contained in Section A20 A.10.d. All regulations of that tariff section will also apply.
- b. ISDN-PRI is available on a month-to-month basis or under variable rate periods, with rates based on lengths of 24-48 months, 49-72 months, or 73-96 months under conditions specified in this tariff except as modified following.
- c. ISDN-PRI service rates under any Term Payment Plan are exempt from customer-initiated changes for the payment period selected. Rates in effect at the time the service is installed and/or as of the service order application date will be applicable until the contract expires. At the expiration date of the customer's payment period option, the customer may select a new payment period option at current rates or revert to current rates on a month-to-month basis.

(Cont'd)

4. Application of Rates (Cont'd)

- d. If a customer disconnects any portion of their ISDN-PRI service prior to the end of month 12, the customer will be liable for 100% of the payments remaining for the first twelve months and 50% of the payment remaining in the contract period. If a customer disconnects any portion of their ISDN-PRI service after the end of the 12th month, the customer will be liable for 50% of the payments remaining for the rest of the contract period. However, termination liability charges will not apply for customer requests for moves of service under Channel Services Payment Plans (CSPP) subject to the provisions in A20.
- e. Nonrecurring charges for PRI facility will not be applicable for a PRI when upgrading an existing circuit to ISDN-PRI.
- f. The customer may be restricted to 56 Kbps B channel transmission in some locations of the Company's interoffice network.
- g. Subscriber Line Charges are applicable per public switched network capable B channel as specified in the Interstate Access Tariff.
- h. NFAS, D Channel Backup, and dynamic call-by-call connections to FX and tie lines may not be available in all areas.

5. Service Components

- a. The required components for ISDN-PRI are as follows:
 - 1) Primary Rate Facility - Provides a four-wire access loop from the customer premises to the serving wire center. The transmission characteristics of this loop support Clear Channel Capability. See Section A20 D.
 - 2) Primary Rate Access - Provides the multiplexing to support up to 23 B channels at 64 Kbps and one D channel for signaling also at 64 Kbps. Up to 24 B channels at 64 Kbps can be provided for subsequent PRI's if the customer chooses the NFAS option.
 - 3) Primary Rate B Channels - Will provide network service that will allow either voice or data transmissions at up to 64 Kbps.

Cancelling First Revised Sheet 15
Effective: August 7, 2002

OBSOLETE SERVICE OFFERING

DIGITAL NETWORK SERVICES

B. INTEGRATED SERVICES DIGITAL NETWORK-PRIMARY RATE INTERFACE (ISDN-PRI)
(Cont'd)

5. Service Components (Cont'd)

a. The required components for ISDN-PRI are as follows: (Cont'd)

3) Primary Rate Channels (Cont'd)

a) Customers will be billed a Network Access Register (NAR) charge per capable B channel. NAR rates depend on the rate group and can be found in Section A12 of this tariff.

b) Data transmission on the B channel will be at 64 Kbps within the switch and between ISDN compatible central offices. ISDN-PRI interconnection to non-ISDN-PRI equipped central offices may potentially be subjected to analog transmission or subrated to 56 Kbps.

c) The customer may choose to subscribe to additional non-exchange based services. Initial choices for these services will be OutWATS/TFC service, tie lines, and FX service. If ISA is used to dynamically connect B channels to FS, Tie and OutWATS, B channel charges are used in lieu of local channel charges for tie lines, FX, and OutWATS. Interoffice charges shall apply. The subscription to the services notes is in addition to the ISDN-PRI charges.

4) Call-by-Call/Integrated Service Access (ISA) Feature Capability - Allows the customers to dynamically allocate the use of channels for ISDN-PRI services. The customer may also choose voice or data transmission on a per call basis. ISA charges are based on the number of Virtual Facility Groups (VFG) established in the Company's central office. The Company will apply a VFG charge for each call type requested by the customer, for example, Public Access (incoming, outgoing), private network traffic, TFC, FC, tie line. Additional VFG charges may be applicable if the customer wishes the Company to provide more call control in the central office.

5) D Channel Access - Carries the signaling information for functional requirements of the ISDN B channels. Where end user access arrangements contain multiple PRI's the signaling in one interface structure may also carry signaling for B channels in another PRI structure without an activated D channel. The D channel contains Call Set Up, Call Tear Down, and Calling Number identification.

5. Service Components (Cont'd)

a. The required components for ISDN-PRI are as follows: (Cont'd)

6) D Channel Backup - Provides backup for the D channel for a customer with multiple PRI lines by automatically switching signaling capability over to another D channel if service to the primary D channel is interrupted.

b. Calling Line Information Delivery - This feature, inherent in PRI, provides the customer with the telephone number of the calling party. Incoming call identification is provided via the D channel associated with incoming calls on a B channel(s) to a PBX. Calling Number Delivery Blocking is available as stipulated in A13 of this tariff.

6. Rates and Charges

	<u>Nonrecurring Charge</u>	<u>Month to Month</u>	<u>24 to 48 Months</u>	<u>49 to 72 Months</u>	<u>73 to 96 Months</u>

OBSOLETE SERVICE OFFERING

ABBREVIATED DIALING

A. N11 Service

This information formerly appeared in Section A39 and became obsolete on April 27, 2000. No new customers may subscribe to this service. These services will continue to be provided to the one existing customer in the Winter Park basic local calling area until such time as discontinued by the customer, the Company, or the Florida Public Service Commission, or the service can no longer be maintained by the Company.

1. General

- a. N11 Service is a three-digit local dialing arrangement, available in specified areas, with Embarq Florida, Inc., recording and rating of the call, for delivery of general information via voice grade facilities. The N11 subscriber may apply a charge to its end users, within the N11 subscriber's local calling area, for services delivered in response to calls to an N11 number. The Company will record and rate these calls on behalf of the N11 subscriber. The Company will bill calls on behalf of the N11 subscriber as an optional service.
- b. The Local Calling Area of the N11 Service subscriber will be the basic Local Calling Area defined in Section A3. of this Tariff, as facilities permit.

N11 Service will be made available in the following Basic Local Calling Areas:

- 1) United Telephone Exchanges:

Basic Local Calling Areas

1) United Telephone Exchanges (Cont'd)

Overlapping basic local calling areas shall be addressed on a case-by-case basis. Such areas have been identified as follows:

Clermont -	To be excluded from Winter Park
Montverde -	To be included with Winter Park

- c. Only one N11 number will be assigned to an N11 subscriber or its affiliates, per local calling area.
- d. An "affiliate" (as used in c. above) of an N11 subscriber is an entity that directly, or indirectly through one or more intermediaries, controls, is controlled by, or is under common control with, the N11 subscriber. The term "control" (including the terms "controlling", "controlled by", and "under common control with") means the possession, direct or indirect, of the power to direct or cause the direction of the management and policies of an entity, whether through the ownership of voting securities, by contract, or otherwise.
- e. If the Company provides billing on behalf of the subscriber, the rules and regulations as defined in this Section will apply.
- f. To provide access to an N11 number to end users in another company's territory within the local calling area, the N11 subscriber must make appropriate arrangements with the company serving that territory.
- g. N11 Service can be delivered via regular exchange access lines (by individual business lines, PBX trunks, etc.).

A. N11 Service (Cont'd)

1. General (Cont'd)

- n. Operator assisted calls to an N11 subscriber will not be completed.
- o. N11 Service will not provide calling number information in real time to the N11 subscriber. If the N11 subscriber needs this type of information, the N11 subscriber must subscribe to a compatible Calling Number Identification service in Section A13 of this Tariff, as available.
- p. The N11 subscriber is restricted from selling or transferring the N11 number to an unaffiliated entity, either directly or indirectly.
- q. If an N11 subscriber becomes an affiliate of or is acquired by another N11 subscriber through merger, acquisition, or otherwise, then the affiliated subscribers must surrender all but one N11 number within 90 days of the merger or acquisition.
- r. If local calling areas are merged, and an N11 number exists in both areas, the N11 subscriber who established the N11 service first in time will be entitled to retain the N11 Service in the merged local calling area.
- s. If the basic local calling area of an exchange is expanded resulting in overlapping basic local calling areas, the established N11 local calling area for the effected exchange will not change. The Company reserves the right to redefine the associated basic local calling area for N11 where overlapping occurs and no N11 numbers exist in the associated local calling area prior to the overlap.

First Revised Sheet 5
Cancelling Original Sheet 5
Effective: April 27, 2000

OBSOLETE SERVICE OFFERING

ABBREVIATED DIALING

A. N11 Service (Cont'd)

1. General (Cont'd)

- t. The N11 subscriber must comply with any rules, pertaining to N11 Service, adopted by the FCC in rulemaking proceeding (CC Docket 92-105).
- u. The N11 subscriber is prohibited from providing programming which involves live group interaction, such as "GAB" lines, "Chat" lines, or similar type programs where the primary purpose is for callers to interact with one another.

2. Service Requirements and Conditions

- a. A minimum usage charge will be billed to the N11 subscriber for any billing period in which the N11 subscriber's usage charges fall below the amount of the Minimum Usage Charge in A.3. of this Tariff section.
- b. The N11 subscriber must (1) obtain a new 7-digit number, (2) designate an existing non-published 7-digit number, or (3) change an existing published 7-digit number to a non-published number which will be established as the lead number in the hunt group, ACD, etc., of the subscriber. This 7-digit number must be non-published. When the N11 Service is disconnected or discontinued, the N11 subscriber must surrender this 7-digit number as part of the N11 Service. This 7-digit number can be either disconnected or a new 7-digit number can be assigned. Appropriate rates from Sections A.3. and A.4. of this Tariff will apply.

OBSOLETE SERVICE OFFERING

ABBREVIATED DIALING

A. N11 Service (Cont'd)

2. Service Requirements and Conditions (Cont'd)

- c. Use of N11 Service is subject to possible recall of the N11 code by the NANP (North American Numbering Plan) Administrator for national use. The N11 subscriber must, prior to provisioning of the service, sign a written acknowledgment of this condition and an agreement to return the code upon receipt of 6 months written notice of such a recall from the Company and abide by any subsequent rules which may be identified by the FCC regarding the use and return of such N11 codes. If a recall is effected by the NANP Administrator, the Company will work with all N11 subscribers affected by such recall to transfer their service arrangements, if technically and economically feasible at the time, to an abbreviated dialing arrangement, and if not feasible, to a seven-digit dialing arrangement, if technically and economically feasible at the time, within the 6-month notice period. The N11 subscriber will be required to migrate to any standard access arrangement for information services subsequently agreed to by the industry and approved by the FCC. The N11 subscriber will be charged the appropriate rates, as stated in A.6.b. of this tariff, for the establishment of the new access arrangement.
- d. The N11 Service is provided where facilities permit.
- e. N11 subscribers should work separately with cellular companies to ascertain whether Type 1 cellular customers will be able to reach information services provided by dialing an N11 number. Charges for calls to the N11 number made from cellular end users will be billed to the cellular company. This may require the N11 subscriber to enter into a contractual agreement with the cellular company to provide 3-digit access service and the billing associated with the service.

OBSOLETE SERVICE OFFERING

ABBREVIATED DIALING

A. N11 Service (Cont'd)

2. Service Requirements and Conditions (Cont'd)

f. N11 Service will be provided under the following conditions:

- 1) For network sizing and protection, each N11 subscriber must provide an estimate of annual call volumes, the expected busy hour and holding time for each call to an N11 number.
- 2) The Company report of the number of local calls completed to each N11 number will serve as the sole document upon which remittance will be made. In the event the Company's charges for calls exceed the revenue from billed calls, the subscriber will be liable for payment of the difference to the Company. Nonpayment of the N11 call billing by the end user shall not be cause for denial or termination of the end user's exchange telephone service.
- 3) The N11 subscriber is responsible for obtaining all necessary permission, licenses, written consents, waivers and releases and all other rights from all persons whose work, statements or performance are used in connection with the service, and from all holders of copyrights, trademarks, and patents used in connection with said service.
- 4) The N11 subscriber shall be liable for, and shall indemnify, protect, defend and save harmless the Company against all suits, actions, claims, demands and judgments, and of all costs, expenses and counsel fees incurred on account thereof, arising out of and resulting directly or indirectly from the Service or in connection therewith, including, but not limited to, any loss, damage, expense or liability resulting from any infringement or claim of infringement, of any patent, trademark, copyright, or resulting from any claim of liable and slander.

ABBREVIATED DIALING

A. N11 Service (Cont'd)

2. Service Requirements and Conditions (Cont'd)

f. N11 Service will be provided under the following conditions: (Cont'd)

- 5) Suspension of Service as covered in Section A.2. of this Tariff is not applicable for this service.
- 6) If the Company provides billing for N11 Service, when N11 Service is disconnected, all remittance money due to the N11 subscriber may be credited or applied to the final bill issued for the recurring charges associated with this Tariff.
- 7) If an N11 subscriber discontinues subscription to N11 Service, the N11 number will be disconnected.
- 8) Unless otherwise specifically provided in this Tariff, the Company shall be authorized to disconnect any tariffed service provided to the N11 subscriber utilized, directly or indirectly, with the N11 Service which fails to comply with regulations and conditions set forth herein, upon five (5) days written notice to the subscriber. Disconnection may be suspended at the discretion of the Company if it receives written certification that the N11 subscriber is in compliance with regulations and conditions of the tariffs. Continual noncompliance shall be cause for disconnection without notice at the discretion of the Company.

Cancelling Original Sheet 9
Effective: April 27, 2000

OBSOLETE SERVICE OFFERING

ABBREVIATED DIALING

A. N11 Service (Cont'd)

2. Service Requirements and Conditions (Cont'd)

f. N11 Service will be provided under the following conditions: (Cont'd)

- 9) The N11 subscriber is responsible for informing potential end users that a call to the N11 number will be at the charge the subscriber establishes and, if applicable, will be billed by the Company for calls from within the N11 subscriber's local calling area.

The N11 subscriber must notify the Company in writing at least 30 days in advance if the call charge is to be increased or decreased. Such charge shall begin on the date requested by the N11 subscriber. As a result, the N11 end user bills may show calls to the N11 number at different rates during the same billing period.

- 10) If the Company provides billing for N11 Service, descriptions to appear on the end user's bill must be specified by the N11 subscriber. If the N11 subscriber requires tax(es) to be billed to the end user, the tax(es) must be embedded in the N11 rate. The responsibility for tracking, reporting and remitting the tax(es) resides with the N11 subscriber.
- 11) The Company will rate the calls from end users of the N11 subscriber one charge per call to the N11 number.
- 12) The N11 subscriber shall subscribe to adequate exchange facilities to transport the calls to the N11 subscriber's premises.
- 13) The Company will not be responsible for recording and rating those calls that bypass the N11 routing.

2. Service Requirements and Conditions (Cont'd)

f. N11 Service will be provided under the following conditions: (Cont'd)

- 14) The N11 subscriber shall provide appropriate answer supervision for a minimum two-second duration for all calls completed to the N11 subscriber to ensure proper recording and rating for the service.
- 15) When end users are charged for services delivered in response to calls to an N11 number, the N11 subscriber must provide a preamble at the beginning of each N11 Service call for which the total charge exceeds \$3.00, stating the charge for the N11 Service call. The N11 subscriber must provide a preamble on all calls where there is a potential for minors (defined as under 18 years of age) to be attracted to the program, clear and conspicuous notification in language understandable to children of the requirement to obtain parental permission before placing or continuing with the call. The preamble message must be given within 15 seconds and must be followed by a 3 second period within which the caller can hang up without being charged the N11 service charge for the call. The N11 subscriber may allow a caller to affirmatively bypass a preamble. However, if the period of time from off-hook condition to on-hook condition is 18 seconds or less, the N11 Service charge will not be recorded or rated.

In addition, for those programs for which a preamble is not required, if the period of time from off-hook to on-hook condition is 18 seconds or less, recording and rating of the call to the N11 number will not occur.

5. N11 Service Billing Information

- a. N11 Service Billing Information is offered for N11 subscribers that provide billing for the N11 Service. This billing information is a monthly record of terminating traffic to the N11 subscriber per local calling area. The information will include the calling telephone number, date, time of day, call duration of each call received, and the rate to be charged for the call.
- b. The N11 Service Billing Information will be provided via magnetic tape to the N11 subscriber.
- c. The N11 Service Billing Information will be offered where facilities permit and where the Company's message billing process has been arranged to provide this feature.

6. Rates and Charges

a. Application of Rates

- 1) Nonrecurring charges shall apply for each N11 number per local calling area.
- 2) If the Company provides billing to the end user on behalf of the N11 subscriber, the Company will render bills to end users in the Company's territory to whom the Company normally provides a monthly telephone bill. Billing and collection services will be provided at the rates and charges as stated following:
 - a) Per message with inquiry 0.0666
 - b) Bulk-billed message with inquiry 0.0096

In addition to the above message rates, a non-recurring charge as stated in A.6.b.8 will apply for the establishment of the billing and collection service per local calling area.
