Duke Energy Florida Clean Energy Connection Program
Large Customer and Local Government Pre-Registration
Terms and Conditions
May 2020 V2

General Overview

The Duke Energy Florida (DEF) Clean Energy Connection (CEC) Program is a tariffed voluntary community solar program in which all DEF customers can participate in the development of clean renewable energy. DEF is currently developing the specifics of the Program, which will be submitted to the Florida Public Service Commission (Commission) for ultimate approval. These general terms and conditions are intended to provide additional details regarding the Program, but to the extent these terms and conditions conflict with the tariff that is approved by the Commission, the tariff provisions will govern.

Enrollment Process

a) During enrollment, Customer will indicate the desired subscription size in whole 1-kW unit increments, associated with and generally not to exceed 100% of the customer's annual kWh consumption on an energy basis. However, given that expected demand for the Program will be larger than the supply, DEF will contact Customer to confirm the accepted subscription size. It may not be the amount requested.
b) When Customer confirms enrollment in the Program, Customer's kW subscription will be reserved in the event that the Program is filed and approved by the Commission. If the Program is either not filed or not approved, neither Customer nor DEF will have any obligation under the Program.
c) The Company may contact customers who subscribed in a first come, first serve methodology to see if they would like to increase their inaugural kW subscription level if there is availability between the time the enrollment window closes and the program starts.
d) DEF will not charge any fees until the time the first CEC solar plants are placed in service.
e) Customer is committed to the Program for at least one month.

Monthly Clean Energy Connection, (CEC) Program Cost Calculation

a) Monthly Subscription Charge = Subscription Quantity x $8.35 / kW
b) Monthly Subscription Credit = $0.040370 / kWh (escalating annually at 1.5% after 3 years of continuous participation) x Subscription Quantity x Program Output (kWh) Program Capacity (kW)
c) Monthly Subscription and bill credits may change slightly between the enrollment window and Florida Public Service Commission approval. Customers will be notified of changes and will have the opportunity to reduce or cancel their subscriptions if the net cost increases.

Increases in number of kW units after the customer's inaugural kW subscription enrollment will be limited to once per rolling 12-month period from the anniversary date of Program enrollment, and subject to Program availability. Any subsequent kW units subscribed after the customer's inaugural kW subscription level is established will receive the year 1 energy credit rate.

General and Availability

a) The Program is available to any customer taking service under a DEF rate schedule, who does not either: i) have a past due amount, or ii) is on a payment plan.
b) DEF reserves the right to remove customers from the Program who do not pay Program fees for two consecutive months or who start bankruptcy proceedings. Customers who meet the eligibility criteria may enroll again, starting at Program year 1 if there is availability one calendar year later.
c) DEF may contact customers periodically via email to provide Program updates or seek Program feedback.

Environmental Attributes

a) All environmental attributes, including but not limited to "renewable energy certificates" (RECs), "renewable energy credits" or "green tags," associated with the CEC solar photovoltaic (PV) generation portfolio shall be retired on behalf of all customers on a yearly basis.
b) Photovoltaic (PV) generation portfolio shall be retired on behalf of all customers on a yearly basis.
c) Customers who want to have RECs associated with their subscription moved to their own account may do so. DEF should be given as much notice as possible ensure that those RECs are available and have not already been retired. Customers will be invoiced by DEF for the North American Renewables Registry™ fees associated with the REC transfer. After the fee is paid, the RECs will be moved. The customer shall then provide DEF proof of retirement within one calendar year.

Cancellations

a) There is no fee to cancel participation in the Program.
b) Customers may choose not to participate at any time by calling or emailing DEF (866-233-2290, CleanEnergyConnection@duke-energy.com) to cancel their subscriptions. Upon receiving notice of cancellation, DEF will assess the Subscription Charge, and apply the Subscription Credit, in the billing period during which the cancellation notice is received.
c) After cancelling, a customer may not re-enroll for one calendar year. If a customer chooses to re-enroll, the new subscription amounts will receive the year 1 credit.

Moving

a) If Customer moves to another location within DEF's service territory, participation in the Program shall be transferred to the new location unless Customer otherwise notifies DEF.
b) The Program is only available to customers receiving service in DEF's service territory. If customer moves out of the service territory, the subscription ends. There will be no charges on the final bill.

Apply Now

Thank you for your interest in the Clean Energy Connection program. Your monthly program fee will help fund the development of several utility-scale solar projects on the Duke Energy grid, plus you will earn monthly bill credits equal to the value of the solar energy produced by your share in the program. Complete the fields below to apply.*

EXHIBIT NO. LULAC-64C

DOCKET NO: 20200176-EI

PARTY: LULAC

DESCRIPTION: CEC REVENUE REQUIREMENTS from DEF's CONFIDENTIAL RESPONSE to LULAC's FIRST REQUEST for PRODUCTION of DOCUMENTS (NOS.1-8)

Solar and Network Capital Inputs
- Capital costs from CEC - Project Cost Forecasting (Filing).xlsx
- Includes AFUDC for 2022 assets due to 2 factor trigger being met on combined solar and network upgrades on a per project basis

O&M Inputs
- Assumptions based on similarly configured projects
- Inputs based on COD year of individual projects
- Estimates based on information provided in March 2020 request

Property Taxes
- Solar Projects use CEC - Solar Prop Tax (Filing).xlsx
- Uses average rate from SoBRA projects and applies abatement through 2037 based on COD
- Network Upgrades use standard DEF property tax assumptions based on gross book value as no abatements apply

Land Lease
- Estimated acreage based on standard configuration and layout
- Lease rates, escalation and acreage based on combination of SoBRA results and initial CEC site development
- CEC - Land Lease (Filing).xlsx

WACC, Tax and AFUDC Rates
- Derived from Standard Treasury Assumptions updated in March 2020
- AFUDC rate based on May 2020 filing
- Tax Rate based on forecasted composite rate beginning 2022

Rates
