

BEFORE THE
FLORIDA PUBLIC SERVICE COMMISSION

DOCKET NO. 20210007-EI

IN RE: ENVIRONMENTAL COST RECOVERY FACTORS

2020 FINAL TRUE-UP

TESTIMONY AND EXHIBIT

M. ASHLEY SIZEMORE

FILED: APRIL 1, 2021
REVISED: JUNE 7, 2021

BEFORE THE PUBLIC SERVICE COMMISSION

PREPARED DIRECT TESTIMONY

OF

M. ASHLEY SIZEMORE

Q. Please state your name, address, occupation, and employer.

A. My name is M. Ashley Sizemore. My business address is 702 N. Franklin Street, Tampa, Florida 33602. I am employed by Tampa Electric Company ("Tampa Electric" or "Company") in the position of Manager, Rates in the Regulatory Affairs department.

Q. Please provide a brief outline of your educational background and business experience.

A. I received a Bachelor of Arts degree in Political Science and a Master of Business Administration from the University of South Florida in 2005 and 2008, respectively. I joined Tampa Electric in 2010 as a Customer Service Professional. In 2011, I joined the Regulatory Affairs Department as a Rate Analyst. I spent six years in the Regulatory Affairs Department working on environmental and fuel and capacity cost recovery clauses. During the last three years as a Program Manager

1 in Customer Experience, I managed billing and payment
2 customer solutions, products and services. I returned to
3 the Regulatory Affairs Department in 2020 as Manager,
4 Rates. My duties entail managing cost recovery for fuel
5 and purchased power, interchange sales, capacity
6 payments, and approved environmental projects. I have
7 over ten years of electric utility experience in the areas
8 of customer experience and project management as well as
9 the management of fuel clause and purchased power,
10 capacity, and environmental cost recovery clauses.

11
12 **Q.** What is the purpose of your testimony in this proceeding?

13
14 **A.** The purpose of my testimony is to present, for Commission
15 review and approval, the actual true-up amount for the
16 Environmental Cost Recovery Clause ("Environmental Clause")
17 and the calculations associated with the environmental
18 compliance activities for the January 2020 through December
19 2020 period.

20
21 **Q.** Did you prepare any exhibits in support of your testimony?

22
23 **A.** Yes. Exhibit No. MAS-1 consists of nine documents prepared
24 under my direction and supervision.

25 ▪ Form 42-1A, Document No. 1, provides the final true-

- 1 up for the January 2020 through December 2020 period;
- 2 ▪ Form 42-2A, Document No. 2, provides the detailed
- 3 calculation of the actual true-up for the period;
- 4 ▪ Form 42-3A, Document No. 3, shows the interest
- 5 provision calculation for the period;
- 6 ▪ Form 42-4A, Document No. 4, provides the variances
- 7 between actual and actual/estimated costs for O&M
- 8 activities;
- 9 ▪ Form 42-5A, Document No. 5, provides a summary of
- 10 actual monthly O&M activity costs for the period;
- 11 ▪ Form 42-6A, Document No. 6, provides the variances
- 12 between actual and actual/estimated costs for capital
- 13 investment projects;
- 14 ▪ Form 42-7A, Document No. 7, presents a summary of
- 15 actual monthly costs for capital investment projects
- 16 for the period;
- 17 ▪ Form 42-8A, Document No. 8, pages 1 through 29,
- 18 illustrates the calculation of depreciation expense
- 19 and return on capital investment for each project
- 20 recovered through the Environmental Clause.
- 21 ▪ Form 42-9A, Document No. 9, details Tampa Electric's
- 22 revenue requirement rate of return for capital
- 23 projects recovered through the Environmental Clause.
- 24
- 25 **Q.** What is the source of the data presented in your testimony

1 and exhibits?

2

3 **A.** Unless otherwise indicated, the actual data is taken from
4 the books and records of Tampa Electric. The books and
5 records are kept in the regular course of business in
6 accordance with generally accepted accounting principles
7 and practices, and provisions of the Uniform System of
8 Accounts as prescribed by this Commission.

9

10 **Q.** What is the final true-up amount for the Environmental
11 Clause for the period January 2020 through December 2020?

12

13 **A.** The final true-up amount for the Environmental Clause for
14 the period January 2020 through December 2020 is an over-
15 recovery of \$4,237,191. The actual environmental cost
16 under-recovery, including interest, is \$3,603,985 for the
17 period January 2020 through December 2020, as identified in
18 Form 42-1A. This amount, less the \$7,841,176 under-recovery
19 approved in Commission Order No. PSC-2020-0433-FOF-EI,
20 issued November 13, 2020, in Docket No. 20200007-EI,
21 results in a final over-recovery of \$4,237,191, as shown on
22 Form 42-1A. This over-recovery amount will be applied in
23 the calculation of the environmental cost recovery factors
24 for the period January 2022 through December 2022.

1 **Q.** Are all costs listed in Forms 42-4A through 42-8A incurred
2 for environmental compliance projects approved by the
3 Commission?

4

5 **A.** Yes. All costs listed in Forms 42-4A through 42-8A for
6 which Tampa Electric is seeking recovery are incurred for
7 environmental compliance projects approved by the
8 Commission.

9

10 **Q.** How do actual expenditures for the January 2020 through
11 December 2020 period compare with Tampa Electric's
12 actual/estimated projections as presented in previous
13 testimony and exhibits?

14

15 **A.** As shown on Form 42-4A, total costs for O&M activities are
16 \$3,216,922, or 18.3 percent less than the actual/estimated
17 projection costs. Form 42-6A shows the total capital
18 investment costs are \$118,847, or 0.3 percent less than the
19 actual/estimated projection costs. Additional information
20 regarding substantial variances is provided below.

21

22 **O&M Project Variances**

23 O&M expense projections related to planned maintenance work
24 are typically spread across the period in question.
25 However, the company always inspects the units to ensure

1 that the maintenance is needed, before beginning the work.
2 The need varies according to the actual usage and associated
3 "wear and tear" on the units. If an inspection indicates
4 that the maintenance is not yet needed or if additional
5 work is needed, then the company will have a variance when
6 actual amounts expended are compared to the projection.
7 When inspections indicate that work is not needed now, then
8 maintenance expense will be incurred in a future period
9 when warranted by the condition of the unit.

10

11 ▪ **Big Bend Unit 3 Flue Gas Desulfurization Integration:**

12 The Big Bend Unit 3 Flue Gas Desulfurization Integration
13 project variance is \$108,626 or 38.7 percent less than
14 projected. The variance is due to less maintenance costs
15 incurred than expected while operating the unit on
16 natural gas instead of coal.

17

18 ▪ **SO2 Emission Allowances:** The SO2 Emission Allowance
19 variance is \$37 or 209.2 percent greater than projected.
20 The variance is primarily attributable to differences in
21 the calculated estimate for 2020 and the actual activity
22 for the period.

23

24 ▪ **Big Bend Units 1 & 2 FGD:** The Big Bend Units 1 & 2 FGD
25 project variance is \$114,486, or 82.4 percent less than

1 projected. The variance is due to less maintenance costs
2 incurred than expected while operating the unit on
3 natural gas instead of coal.

- 4
- 5 ▪ **Big Bend PM Minimization and Monitoring:** The Big Bend
6 Minimization and Monitoring project variance is
7 \$104,870, or 34.8 percent less than projected. The
8 variance is due to less maintenance costs while operating
9 on natural gas instead of coal.

- 10
- 11 ▪ **Big Bend NOx Emission Reduction:** The Big Bend NOx
12 Emission Reduction project variance is \$6,000, or 99.9%
13 percent less than projected. The variance is due to less
14 maintenance costs while operating on natural gas instead
15 of coal.

- 16
- 17 ▪ **Bayside SCR Consumables:** The Bayside SCR Consumables
18 project variance is \$16,661, or 17.9 percent greater than
19 projected. The variance is due to the units running more
20 in the summer than projected, increasing ammonia use.

- 21
- 22 ▪ **Big Bend Unit 1 Pre-SCR:** The Big Bend Unit 1 Pre-SCR
23 project variance is \$5,400, or 100 percent lower than
24 projected. The variance is due to reduced operating hours
25 for Unit 1 during the year.

- **Big Bend Unit 2 Pre-SCR:** The Big Bend Unit 2 Pre-SCR project variance is \$5,400, or 87.4 percent less than projected. The variance is due to less maintenance costs while operating on natural gas instead of coal.
 - **Big Bend Unit 3 Pre-SCR:** The Big Bend Unit 3 Pre-SCR project variance is \$6,000, or 88 percent less than projected. The variance is due to less maintenance costs while operating on natural gas instead of coal.
 - **Clean Water Act Section 316(b) Phase II Study:** The Clean Water Act Section 316(b) Phase II Study project variance is \$16,664, or 59.3 percent less than projected. The variance is due to the delay in receiving final the NPDES Permit leading to fewer expenditure than anticipated.
 - **Arsenic Groundwater Standard Program:** The Arsenic Groundwater Standard Program project variance is \$15,426, or 97.3 percent greater than projected. The variance is due to a replacement well not associated with the program being inadvertently charged during the period. The charge was subsequently reversed and will be reflected in the upcoming Actual/Estimate Projection filing.

- 1 ■ **Big Bend Unit 1 SCR:** The Big Bend Unit 1 SCR project
2 variance is \$70,977, or 81.1 percent less than projected.
3 The variance is due to reduced operating hours for Unit
4 1 during the year.
- 5
- 6 ■ **Big Bend Unit 2 SCR:** The Big Bend Unit 2 SCR project
7 variance is \$109,585, or 43.5 percent less than
8 projected. The variance is due to less maintenance costs
9 while operating on natural gas instead of coal.
- 10
- 11 ■ **Big Bend Unit 3 SCR:** The Big Bend Unit 3 SCR project
12 variance is \$108,523, or 23.7 percent less than
13 projected. The variance is due to less maintenance costs
14 while operating on natural gas instead of coal.
- 15
- 16 ■ **Big Bend Unit 4 SCR:** The Big Bend Unit 4 SCR project
17 variance is \$224,108, or 30.8 percent less than
18 projected. The variance is due to fewer unit operating
19 hours than projected, resulting in lower expenditures
20 for SCR consumables and maintenance than projected.
- 21
- 22 ■ **Big Bend Gypsum Storage Facility:** The Big Bend Gypsum
23 Storage Facility project variance is \$430,513, or 54.1
24 percent less than projected. The variance is due to less
25 facility yard maintenance being required than expected

1 as energy generation by coal was less than projected.

2

3 ▪ **Big Bend Coal Combustion Residuals Rule:** The Big Bend
4 Coal Combustion Residuals ("CCR") Rule project variance
5 is \$1,008,729, or 15.809.2 percent greater than
6 projected. This variance is due to timing. Costs
7 associated with activity that was previously deferred
8 were spent in 2020.

9

10 ▪ **Big Bend Coal Combustion Residuals Rule Phase II:** The
11 Big Bend Coal Combustion Residuals ("CCR") Rule Phase
12 II project variance is \$2,946,683, or 20.7 percent less
13 than projected. This variance is due to timing
14 differences in the project schedule when compared to the
15 original projection. Project disposal activities have
16 occurred more slowly than originally projected. The
17 project expenditures are still needed and will be
18 incurred in the future.

19

20 Capital Investment Project Variances

21 ▪ **Big Bend CCR Rule:** The Big Bend CCR Rule project variance
22 is \$25,850, or 15 percent less than projected. This
23 variance is due to timing differences in the project
24 schedule when compared to the original projection. The
25 project expenditures are still needed and will be

1 incurred in the future.

2

3 ▪ **Big Bend Unit CCR Rule Phase II:** The Big Bend CCR Rule
4 Phase II project variance is \$39,406, or 36.3 percent
5 less than projected. This variance is due to timing
6 differences in the project schedule when compared to the
7 original projection. The project expenditures are still
8 needed and will be incurred in the future.

9

10 ▪ **Big Bend ELG Compliance:** The Big Bend ELG Compliance
11 Project variance is \$52,834, or 66.6 percent less than
12 projected. This variance is due to timing differences
13 in the project schedule when compared to the original
14 projection. Project activities have occurred more slowly
15 than originally projected due to permitting delays. FDEP
16 issued its permit regarding the project on April 10,
17 2020. The project expenditures are still needed and will
18 be incurred in the future.

19

20 **Q.** Does this conclude your testimony?

21

22 **A.** Yes, it does.

23

24

25
