RE: Geotechnical work for North Florida Resiliency Connection Transmission Line Project on I-75 and I-10

Dear Mr. Hronec:

Gulf Power Corporation has submitted a General Use Permit Application. The geotechnical work in Florida Department of Transportation's Right of Way proposed in the application will be allowed if Gulf Power Corporation meets all permitting requirements of the Florida Department of Transportation and the Florida Department of Environmental Protection. During the review of the application, and after issuance, the Florida Department of Environmental Protection will have full access to Florida Department of Transportation's Right of Way to inspect the area of proposed work in the Gulf Power Corporation permit application.

Please let me know if you have any questions.

Sincerely,

Douglas Dycus, P.E., CPM
District Permit Engineer
District Two, Maintenance
Douglas.Dycus@dot.state.fl.us
