**DEF's response to staff's second set of
interrogatories Nos. 6-16**

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Storm protection plan cost recovery clause.	DOCKET NO. 20220010-EI DATED: July 11, 2022
--	--

**DUKE ENERGY FLORIDA, LLC'S
RESPONSE TO STAFF'S SECOND SET OF INTERROGATORIES (NOS. 6-16)**

Duke Energy Florida, LLC ("DEF") responds to the Staff of the Florida Public Service Commission's ("Staff") Second Set of Interrogatories to DEF (Nos. 6-16) as follows:

INTERROGATORIES

6. Please refer to page 4, line 6 of Witness Lloyd's April 1, 2022 testimony. Witness Lloyd states that the capital variance of the Distribution Feeder Hardening program is primarily driven by delays in completing work due to "standing this new program up, onboarding new vendors and lasting impacts from the ongoing pandemic."
- a. Please clarify what you mean by the phrases "standing this new program up" and "onboarding new vendors."
- b. Please provide a full description of the tasks involved in "standing this new program up" and "onboarding new vendors."

Response:

- a. "Standing this new program up"- Distribution Feeder Hardening was a net new program for DEF in 2021. Upon approval of DEFs storm protection plan, DEF initiated steps necessary for developing this new program within its technology systems and business integration practices.
"Onboarding new vendors"- selection and training of incremental resources to support the new Distribution Feeder Hardening program
- b. Tasks associated with "standing this new program up":
- Accounting configuration
 - Creation of new job plans within work management systems
 - Publishing of standards

- Creation of process documents
- Development and execution of training
- Completion of change management activities
- Identifying resource strategy
- Communicating material acquisition needs with suppliers

Tasks associated with “onboarding new vendors”:

- Launched a “RFI” request for information and “RFP” request for pricing
- Selection process
- Obtain list of contract workers
- Provide access to necessary applications and processes
- Execution of training

7. Please refer to page 4, line 1 of Witness Brong’s April 1, 2022 testimony. Witness Brong mentions \$4.3 million of work that is shifting into 2022 because of outage constraints in 2021. When did DEF first learn of the outage constraints in 2021?

Response:

DEF first learned in the fall of 2021 of outage constraints that would cause work to shift to 2022.

DEF’s transmission network operates as a system that is ever changing. DEF learns about new outage constraints as the Transmission Structure Hardening - Wood to Non-wood pole replacement sub-program plan is executed and as the system changes due to load changes, ties with other utilities, etc.

When DEF loses clearances due to outage constraints, DEF attempts to reschedule impacted work to a later date in the same year. However, as the year progresses, DEF’s ability to do so diminishes.

8. Please refer to line 1T “Subtotal of Overhead Hardening O&M Programs - Distribution” of Exhibit No. CAM-1, Schedule Form 4A, page 4 of 45, DEF’s April 1, 2022 filing. Please identify the primary factors that resulted in a variance.

Response:

DEF had initially estimated a lower volume of asset transfers for the Feeder Hardening projects than what occurred during the design and construction of the 2021 projects. This resulted in a higher Project O&M cost.

9. Please refer to line 2T “Subtotal of Overhead O&M Programs - Transmission” of Exhibit No. CAM-1, Schedule Form 4A, page 4 of 45, DEF’s April 1, 2022 filing. Please identify the primary factors that resulted in a variance.

Response:

The primary factor that resulted in this variance was that DEF expected to incur an associated amount of O&M totaling \$212,864 to the Transmission Structure Hardening – Cathodic Protection sub-program of the PSC-approved Storm Protection Plan, as shown on Schedule Form 5A (page 4 of 45) (Line 2.3), in Exhibit No. __ (CAM-1); however, DEF’s actual 2021 O&M spend was \$0 because repair O&M activities were not required.

10. Please refer to line 3T “Subtotal of Vegetation Management O&M Programs” of Exhibit No. CAM-1, Schedule Form 4A, page 4 of 45, DEF’s April 1, 2022 filing. Please identify the primary factors that resulted in a variance.

Response:

DEF’s Vegetation Management programs were not included in DEF’s Exhibit No. CAM-1 since those costs were recovered in DEF’s base rates in 2021. As such, there is a 0% variance associated with these programs.

11. Please refer to the May 2, 2022 testimony of Christopher A. Menendez, Exhibit No. CAM-2, Form 7E, Page 74 of 141. Please explain why a depreciation rate of 3.1 percent was used for Account 373, rather than 4.23 percent, which was approved by Order No. PSC-2021-0202-AS-EI, issued June 6, 2021, in Docket No. 20210016-EI.

Response:

DEF agrees this was an error; DEF used prior Depreciation Schedule rates for Lighting (FERC 373). DEF estimates correcting the depreciation rate is de minimis and would increase the 2022 revenue requirement by roughly \$4,100. DEF proposes to make these changes in the future 2022 True-Up and 2023 Actual/Estimated filings rather than increasing the revenue requirements in the current docket.

12. Please refer to the May 2, 2022 testimony of Christopher A. Menendez, Exhibit No. CAM-2, Form 7E, Page 104 of 141. Please provide the source of the 14.3 percent depreciation rate used for Account 397.

Response:

Refer to document “SPPCRC_2022 Estimated Actual_ROG DR 2-12 Depreciation Study FERC rates – Asset Lives by FERC”, bearing Bates number 20220010-DEF-000302, for the source of the 14.3 percent depreciation rate used for Account 397.

13. For the following questions, please refer to the Testimony and Exhibits of Christopher A. Menendez, filed May 2, 2022 (Document No. 02762-2022), and Schedules 2.1.1, 3.1.1, and 3.2.1 of DEF’s 2022 Ten Year Site Plan (TYSP).
- a. Please explain why DEF’s 2023 Residential “Projected Effective Sales at Meter Level – mwh,” in the amount of 21.289 GWh, as appears in Form 6P, Column 10 of Exhibit No. CAM-3, does not match DEF’s forecasted 2023 “Rural Residential GWH” in the amount of 21.314, as shown in Schedule 2.1.1 of DEF’s 2022 TYSP.
- b. Please explain how the 2023 coincident peak and non-coincident peak demand forecasts appearing in Form 5P, Columns 8 and 9 of Exhibit No. CAM-3 relate to the 2023 peak demand forecasts reflected in Schedules 3.1.1 and 3.2.1 of DEF’s 2022 TYSP.

Response:

- a. The difference between 21.289 on Form 6P, Column 10 of Exhibit No. CAM-3 and 21.314 on Schedule 2.1.2 of the TYSP is due to residential lighting. The TYSP has historically included residential lighting as part of Rural Residential GWH. Form 6P is used to develop SPP billing factors for DEF’s various rate classes. Residential and Lighting are separate rate classes that are not combined for billing purposes.
- b. The 2023 coincident peak and non-coincident peak demand forecasts in Columns 8 and 9 of Exhibit No. CAM-3, Form 5P are unrelated to Net Firm Demand on Schedules 3.1.1 and 3.2.1 of DEF’s 2022 TYSP.

The 12 CP and NCP values in Columns 8 and 9 are calculated based on 12 months of data as follows:

Column 8 Calculation: $(\text{Column 3} / (8,760\text{hours} * \text{Column 1})) \times \text{Column 5}$
Column 9 Calculation: $(\text{Column 4} / (8,760\text{hours} * \text{Column 2})) \times \text{Column 5}$

The values included in Schedules 3.1.1 and 3.2.1 correspond to the System Peak Hour for Summer and Winter, respectively.

14. Please list the date(s) of all underlying forecasts that were used to formulate the billing determinants appearing in Form 6P of Exhibit No. CAM-3.

Response:

The values in Columns 1-4 on Form 6P of Exhibit No. CAM-3 are the same values as shown in Columns 10 -13 on Form 5P of Exhibit No. CAM-3, which were formulated, in part, from the 2021 Fall Sales Forecast dated 10/1/21.

15. For each energy and demand forecast used to support the Company's billing determinants appearing in Form 6P of Exhibit No. CAM-3, please provide the annual actuals for calendar years 2016-2021 and the annual projections for 2022 and 2023.

Response:

Please see the attached documents bearing Bates numbers 2022010-DEF-000303 through 20200010-DEF-000321.

16. Please identify all closed and open Commission dockets and all non-docketed Commission matters in which you submitted to the Commission and sought approval of the same load forecast you used to support the Company's billing determinants appearing in Form 6P of Exhibit No CAM-3.

Response:

The same load forecast (2023 KWH using 2021 Fall Sales Forecast) used to support the Company's billing determinants in this proceeding has been submitted for approval to the Commission and was used in the following closed and open Commission dockets and all non-docketed Commission matters:

(Open Dockets)

Storm Protection Cost Recovery Clause (SPPCRC) - Docket No. 20220010

Fuel & Capacity Clause - Docket 20210001 (DEF's mid-course filing made on December 17, 2021)

(Closed Dockets)

None

(Non-Docketed Items)

Ten-Year Site Plan – Except for the differences as explained in DEF's response to Data Request 2-Q13.

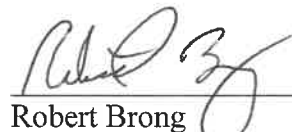

AFFIDAVIT

STATE OF FLORIDA

COUNTY OF SEMINOLE

I hereby certify that on this 11 day of July, 2022, before me, an officer duly authorized in the State and County aforesaid to take acknowledgments, personally appeared ROBERT BRONG, who is personally known to me, and he acknowledged before me that he provided the answers to interrogatory numbers 7 and 9, from STAFF'S SECOND SET OF INTERROGATORIES TO DUKE ENERGY FLORIDA, LLC D/B/A DUKE ENERGY (NOS. 6-16) in Docket No. 20220010-EI, and that the responses are true and correct based on his personal knowledge.

In Witness Whereof, I have hereunto set my hand and seal in the State and County aforesaid as of this 11 day of July, 2022.

Robert Brong

Notary Public
