Ms. Beth Salak, Director  
Division of Competitive Markets and Enforcement  
Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399-0850

Dear Ms. Salak:

Pursuant to Florida Statutes Section 364.051, "Price regulation," and Section 364.164, "Competitive market enhancement," Verizon Florida Inc. ("Company") submits this filing to adjust certain rates for basic and non-basic services and certain rates for intrastate switched access services. Specifically, the Company is making a single tariff filing that incorporates rate changes associated with rate rebalancing, approved by the Commission on December 24, 2003 in Docket No. 030867-TL, and its annual price regulation filing.

The basic local exchange rate increases related to the rate rebalancing docket contained in this filing are the same as those proposed in the Company's original filing in October 2003. Units for both basic local exchange and switched access services have been updated to the 12 months ending June 30, 2005. In order to remain revenue neutral, as required by statute, the rate decreases for switched access services have been adjusted accordingly.

The 2005 price regulation filing permits basic local exchange revenues to be increased by 1.9602% as determined by the increase in the Gross Domestic Product – Price Index (GDP-PI). The Company's proposal, as shown in Attachment 5, increases basic local revenues by 1.9059%. Rates for non-basic services can be increased by up to 20% per category. All five of the Company's non basic service categories are within the allowable increase. Units used in the price regulation filing have been updated to June 30, 2005.

Currently approved tariffed rates were used as the basis for both the rate rebalancing docket and the annual price regulation filings. Each set of rate increases were then added together to determine the rates to be included in the proposed tariffs.

There are three attachments to this filing.

.3 Rates

a. Application of Rates

The rates shown herein entitle the customer to local messages to all telephones of the exchanges of the expanded local calling area listed in A3.16.4 following.

b. LCP Category Determination

The determination of which LCP category into which a particular exchange will fall when optional local calling plans are made available is calculated using two basic factors. The first is the current rate group where the exchange is located, which is based on the number of main station lines and PBX trunks in the existing local calling area. There are five of these groups in the tariff as shown in Section A3.2, Rate Schedules. The second factor is the total number of local access lines in the LCP expanded local calling area for a particular exchange at the time of implementation. These expanded calling scopes are divided into three classifications: 200,000 or less lines; 200,001 to 500,000 lines; and 500,001 and greater. There are nine potential LCP rating categories. Exchanges currently in Rate Groups 1 and 2 that receive LCP capability will be assigned to Categories I, II or III. Exchanges in local rate groups 3 and 4 will be assigned to Categories IV, V, or VI; and exchanges in local calling area 5 will be assigned to Categories VII, VIII, or IX. For example, an exchange in current Rate Group 3 that offers the LCP with an expanded LCP local calling area of over 200,001 local access lines, but less than 500,000 local access lines, will fall into LCP rating Category V.

- b. Dual name listings may be provided as the primary listing at no recurring charge for the addition of the second name to the listing.
- c. Dual name listings may be provided as an additional listing at the subscriber's option, at the regular additional listing rate.

## .4 Business Designations

- a. The designation in a business listing consists of a word or phrase, abbreviated where necessary, that describes the general character of the subscriber's business. Designations will not be used where the name under which the subscriber is doing business indicates the character of the business. The listing of an individual, together with his title and the name of the business with which he is associated or represents, in lieu of a designation of the general character of the business, is not permitted. Likewise, the listing of the name of a firm or corporation, together with the name or name and title of an individual connected therewith, in lieu of a business designation is not permitted.

A6.4 Nonpublished Telephone Numbers

## .1 Upon request a subscriber's primary telephone number may be "nonpublished" subject to the following conditions:

- a. A nonpublished telephone number is omitted from both the telephone alphabetical directory and information records available to the general public. However, when a call is placed from a telephone number associated with a nonpublished listing, the number may be disclosed if the called party has the necessary equipment for receiving and/or disclosing incoming telephone numbers.
- b. Requests for nonpublished numbers will be accepted only when, in the judgment of the Company, such an arrangement will not be detrimental to the service in general.
- c. Incoming calls to nonpublished numbers will be connected only when the calling party places the call by the correct number. The Company will not connect a call to a nonpublished subscriber on behalf of another caller when the caller does not furnish the nonpublished number to the Company. The Company will adhere to this practice notwithstanding any claim of emergency the calling party may present. The acceptance by the Company of the subscriber's request to refrain from publishing his telephone number in the directory does not create any relationship or obligation, directly or indirectly, to any person other than the subscriber.
- d. In the absence of gross negligence or willful misconduct, no liability for damages arising from publishing a nonpublished number in the directory or disclosing said number to any person shall attach to the Company and, where such a number is published in the directory, the Company's liability shall be limited to and satisfied by a refund of any monthly charges which the Company may have made for such nonpublished number. At the subscriber's request, the Company will change the nonpublished telephone number at no charge to the subscriber.

A103.4 Verizon Local Calling Plans (Continued)

.3 Rates

a. Application of Rates

The rates shown herein entitle the customer to local messages to all telephones of the exchanges of the expanded local calling area listed in A103.4.4 following.

b. LCP Category Determination

The determination of which LCP category into which a particular exchange will fall when optional local calling plans are made available is calculated using two basic factors. The first is the current rate group where the exchange is located, which is based on the number of main station lines and PBX trunks in the existing local calling area. There are five of these groups in the tariff as shown in Section A3.2, Rate Schedules. The second factor is the total number of local access lines in the LCP expanded local calling area for a particular exchange at the time of implementation. These expanded calling scopes are divided into three classifications: 200,000 or less lines; 200,001 to 500,000 lines; and 500,001 and greater. There are nine potential LCP rating categories. Exchanges currently in Rate Groups 1 and 2 that receive LCP capability will be assigned to Categories I, II or III. Exchanges in local rate groups 3 and 4 will be assigned to Categories IV, V, or VI; and exchanges in local calling area 5 will be assigned to Categories VII, VIII, or IX. For example, an exchange in current Rate Group 3 that offers the LCP with an expanded LCP local calling area of over 200,001 local access lines, but less than 500,000 local access lines, will fall into LCP rating Category V.

A3.16 Verizon Local Calling Plans (Continued)

.3 Rates

a. Application of Rates

The rates shown herein entitle the customer to local messages to all telephones of the exchanges of the expanded local calling area listed in A3.16.4 following.

b. LCP Category Determination

The determination of which LCP category into which a particular exchange will fall when optional local calling plans are made available is calculated using two basic factors. The first is the current rate group where the exchange is located, which is based on the number of main station lines and PBX trunks in the existing local calling area. There are five of these groups in the tariff as shown in Section A3.2, Rate Schedules. The second factor is the total number of local access lines in the LCP expanded local calling area for a particular exchange at the time of implementation. These expanded calling scopes are divided into three classifications: 200,000 or less lines; 200,001 to 500,000 lines; and 500,001 and greater. There are nine potential LCP rating categories. Exchanges currently in Rate Groups 1 and 2 that receive LCP capability will be assigned to Categories I, II or III. Exchanges in local rate groups 3 and 4 will be assigned to Categories IV, V, or VI; and exchanges in local calling area 5 will be assigned to Categories VII, VIII, or IX. For example, an exchange in current Rate Group 3 that offers the LCP with an expanded LCP local calling area of over 200,001 local access lines, but less than 500,000 local access lines, will fall into LCP rating Category V.

.3 Rates

a. Application of Rates

The rates shown herein entitle the customer to local messages to all telephones of the exchanges of the expanded local calling area listed in A103.4.4 following.

b. LCP Category Determination

The determination of which LCP category into which a particular exchange will fall when optional local calling plans are made available is calculated using two basic factors. The first is the current rate group where the exchange is located, which is based on the number of main station lines and PBX trunks in the existing local calling area. There are five of these groups in the tariff as shown in Section A3.2, Rate Schedules. The second factor is the total number of local access lines in the LCP expanded local calling area for a particular exchange at the time of implementation. These expanded calling scopes are divided into three classifications: 200,000 or less lines; 200,001 to 500,000 lines; and 500,001 and greater. There are nine potential LCP rating categories. Exchanges currently in Rate Groups 1 and 2 that receive LCP capability will be assigned to Categories I, II or III. Exchanges in local rate groups 3 and 4 will be assigned to Categories IV, V, or VI; and exchanges in local calling area 5 will be assigned to Categories VII, VIII, or IX. For example, an exchange in current Rate Group 3 that offers the LCP with an expanded LCP local calling area of over 200,001 local access lines, but less than 500,000 local access lines, will fall into LCP rating Category V.
