Tallahassee, Florida 32399-0850

Dear Ms. Salak:

Pursuant to Florida Statute 364.051, we are filing herewith revisions to our Access Services Tariff. Following are the affected pages:

Access Services Tariff

See Attachment

The purpose of this filing is to introduce a new DS3 Network Interface Unit to meet customer's communication needs.

Acknowledgment, date of receipt and authority number of this filing are requested.

Your consideration and approval will be appreciated.

Yours very truly,

Jerry D. Hendrix (slg)

Vice-President

ACCESS SERVICES TARIFF

Section E7	Fourth Revised Page 38
Section E13	First Revised Page 52 Fifth Revised Contents Page 2

EXECUTIVE SUMMARY

Introduction

This tariff filing introduces a new DS3 Network Interface Unit (NIU) that has loop back testing capabilities.

Special Access customers have a need for new testing capabilities associated with their DS3 service arrangements. Approval of this filing will allow BellSouth to expand Special Access service capabilities to meet those needs.

Service Description

Presently, DS3 Special Access service arrangements are terminated via an arrangement that does not have capabilities that would allow customers to perform trouble isolation testing on their service.

This tariff filing introduces a new DS3 NIU that has loop back testing capability. This loop back capability will allow customer's to perform trouble isolation on their SMARTRing service (a.k.a. BellSouth SPA Dedicated Ring) or SMARTGate service (a.k.a. BellSouth SPA Managed Shared Ring Network) DS3s. The DS3 Network Interface Unit (NIU) loop back function is accessible only by the customer of the DS3 service.

Revenue Impact

BellSouth will recover its cost for this service.

E7. DEDICATED ACCESS SERVICES

E7.4 Rate Regulations (Cont'd)

E7.4.1 Types of Rates and Charges (Cont'd)

B. Nonrecurring Charges (Cont'd)

3. Service Rearrangements (Cont'd)

- If the change involves changing a customer's 1.544 Mbps high capacity service, as described in E7.2.9 preceding, to SMARTPath service (a.k.a. BellSouth SPA Shared Ring), the change will be considered a disconnect of the existing service and full nonrecurring charges apply for the SMARTPath service (a.k.a. BellSouth SPA Shared Ring). If the existing 1.544 Mbps high capacity service is provided under a Channel Services Payment Plan (CSPP) agreement, a change to SMARTPath service (a.k.a. BellSouth SPA Shared Ring) under CSPP will be considered an upgrade and termination liability charges will not apply.

-If the change involves changing (reconfiguring) an existing BellSouth Metro Ethernet service Connection, appropriate charges provided in E7.4.32 following apply.

- If the change involves the addition of a DS3 Network Interface Unit (NIU) to a SMARTRing service (a.k.a. BellSouth SPA Dedicated Ring) or SMARTGate service (a.k.a. BellSouth SPA Managed Shared Ring Network) the rates and charges shown in E13.3.25 of this Tariff shall apply.

- For all other changes, including a change of the customer of record involving no physical changes to the service provided or the addition of optional features without separate nonrecurring charges, a charge equal to a Local Channel rate element nonrecurring charge will apply. Only one such charge will apply per service, per change.

4. Transfer of Service

When a change in billing data (e.g., name, address, contact name, or telephone number) is requested in association with a change in the customer of record, transfer of service charges, as set forth in E7.5.13 following will apply. Charges are applied on a Billing Account Number (BAN) and per circuit basis.

E7.4.2 Dedicated Access Services Capable of Using the Local Exchange Network

A. General

When a Dedicated Access Line, intraLATA interexchange private line or Private Bypass facility is connected to a device capable of interconnecting the Dedicated Access line, intraLATA interexchange private line or Private Bypass facility to the Local Exchange Network, the Exchange Service Rate associated with that device (e.g., the PBX trunk in the case of a PBX) will be rated as Message or Measured Service as specified in the Local Exchange Company's General Subscriber Service Tariff.

B. Application of Measured or Message Service

Application of Measured or Message exchange service charges for services existing on the effective date of this Tariff will commence March 16, 1986, unless the certification process described in C. following is met on or before February 8, 1986. For new Dedicated Access services, intraLATA interexchange private line or Private Bypass facilities ordered on or after the effective date of this Tariff and terminating for an end user at the same address at which a PBX trunk or other similar exchange service is also provided, that exchange service will automatically be rated on a Measured or Message basis unless the certification process described in C. following is met. Measured or Message service rates will be applied at the discretion of the Local Exchange Company for exchange services not certified by the process described in C., following.

E13.3.25 DS3 Network Interface Unit With Loop Back Capability

A. General Description

The DS3 Network Interface Unit (NIU) with loop back capability is available for use with SMARTRing service (a.k.a. BellSouth SPA Dedicated Ring) or SMARTGate service (a.k.a. BellSouth SPA Managed Shared Ring Network). The DS3 Network Interface Unit (NIU) loop back function is accessible only by the customer of the DS3 service. For installation of such DS3 NIUs associated with existing services, an outage of the customer's service is required. This outage shall be as authorized by the customer and a credit for service outage will not be applicable.

B. Rates and Charges

1. Per DS3 NIU With Loop Back Capability

	Nonrecurring Charges		Monthly	USOC
	Initial	Subsequent	Rate	
(a) Per DS3 NIU With Loop Back Capability	\$400.00	\$475.00	NA	NW1D3
