SECTION 3 - DESCRIPTION OF SERVICE

3.5 METERED USE SERVICE OPTIONS²

(T)

Metered Use Service offers the use of Interexchange communications facilities shared among multiple users, is provided on the basis of the service options set forth below. ^{1/} Depending on the option(s) chosen the customer may select the manner in which calls are originated and terminated, may obtain one-way or two-way service, may enjoy point-to-point or multipoint service, or may originate calls in multiple cities.

Metered Use Service may involve, at the customer's option, a monthly recurring minimum charge or an initiation of service fee for Interexchange facility usage. A monthly listing of each call and its duration is available as a standard feature. At additional cost, certain Metered Use Service options offers a customer the ability to: (1) identify the users and allocate the cost of his long distance service through the use of accounting codes, (2) reduce the amount of dialed digits through the use of speed numbers, and (3) receive his call records on magnetic tape.

Under each of the above service options, the individual customer's total monthly charges for use of the Interexchange communication facilities are based upon the total time the customer (account) utilizes such facilities. In that regard, individual Interexchange facilities usage charges, as well as other specific charges, discounts and/or features are applicable to each individual service option. When a metered use service call is established in one time-of-day rate application period and ends in another, the rate in effect in each rate application period applies to the portion of the call occurring within that rate application period. A specific description of each of the Metered Use Service options follows in this section. Recurring and non-recurring charges, features, and applicable discounts for all service options are located in Section 4. Metered Use Service is available as set forth in the various Service Availability Tables listed in this tariff.

^{1/} Customers reselling or rebilling the service options must obtain a Certificate of Public Convenience and Necessity as an interexchange carrier from the Florida Public Service Commission.

² Effective March 9, 2011, for all residential customers of Metered Use Service, all Calling Card service and Toll Free / 800 service will no longer be available to new customers.
