PRICE LIST FORMAT

- A. Sheet Numbering** - Page numbers appear in the upper right corner of the sheet. Pages are numbered sequentially. However, new pages are occasionally added to the price list. When a new page is added between existing pages with whole numbers, a decimal is added. For example, a new page added between pages 34 and 35 would be page 34.1.
- B. Sheet Revision Numbering** - Revision numbers also appear in the upper right corner of the page. These numbers are used to determine the most current page version on file with the Commission. For example, 4th Revised Page 34 cancels the 3rd Revised Page 34. Consult the check sheet for the page currently in effect.

- D. Check Sheet** - When a price list is filed with the Commission, an updated check sheet accompanies the price list filing. The check sheet lists the price list pages, with a cross reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made. - 3.1.4 Where applicable, charges will be rounded up to the nearest penny.

SECTION 3 - DESCRIPTION OF SERVICE (Cont'd)

3.2 Start of Billing

For billing purposes, the start of service is the day following acceptance by the Customer of the Company's service or equipment, or another date mutually agreed-upon by the Customer and the Company. The end of service date is the last day of the minimum notification of cancellation or any portion of the last day, after receipt by the Company of notification of cancellation as described in Section 2 of this price list.

3.3 Calculation of Distance

3.3.1 Where applicable, usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the Call.

3.3.2 Where applicable, the airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The Company uses the rate centers that are produced by Bell Communications Research in their NPA-NXX V&H Coordinates Tape and Bell's NECA Tariff No. 4.

3.3.2.A The airline distance between any two (2) rate centers is determined as follows:

3.3.2.B Obtain the "V" (vertical) and "H" (horizontal) coordinates for each Rate Center from the above-referenced document.

3.3.2.C Compute the difference between the "V" coordinates of the two (2) rate centers; and the difference between the two (2) "H" coordinates ($X_1 - X_2 = V$; $Y_1 - Y_2 = H$).

3.3.2.D Square each difference obtained in step (B) above (V^2 ; H^2).

Issued: July 5, 2000

Effective: NOV 14 2000

**By: Julia Strow
Vice President -- Regulatory and Industry Relations
320 Interstate North Parkway
Atlanta, Georgia 30339**

SECTION 3 - DESCRIPTION OF SERVICE (Cont'd)

3.3 Calculation of Distance (cont'd)

- 3.3.2.E Add the square of the "V" difference and the square of the "H" difference obtained in step C above ($V^2 + Y^2 = S$).
- 3.3.2.F Divide the sum of the squares by 10 ($S/10 = M$).
- 3.3.2.G Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.

3.4 Minimum Call Completion Rate

The Customer may expect a Call completion rate of at least ninety-percent (90%) of dialed, local interoffice calls attempted during peak use periods or the busy hour.

3.5 Levels of Service Quality Objectives

The Company will endeavor to provide its Customers with high quality, reliable telecommunications services. However, the Company's ability to meet the stated service quality objectives is ultimately subject to the availability of any ILEC network and outside plant facilities and equipment which it utilizes, and the timeliness of the ILEC's response to Company-initiated requests for service installation and repair.

3.5.1 Limitations
