M	-	Moved from another Price List location
N	-	New rate or regulation
R	-	Change resulting in a reduction to a rate

When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between existing sheets 14 and 15 would be 14.1. 2.12.1 Cancellation by the Customer Prior to Installation (Cont'd.)

At its discretion, the Company may restore or re-establish service which has been suspended or disconnected for nonpayment of charges prior to payment of all charges due. Such restoration or re-establishment shall not be construed as a waiver by the Company of any rights to suspend or disconnect service for nonpayment of charges due and unpaid, or for the violation of the provisions of this Price List. Moreover, the Company's failure to suspend or disconnect service for nonpayment of any past due account or accounts shall not operate as a waiver or estoppel to suspend or disconnect service for nonpayment of such account or of any other past due account.

2.12.2 Cancellation of Service by a Customer Without Cause

(A) Discontinuance Charge

The Customer's rates and discounts, if any, are provided to the Customer in exchange for the Customer's commitment to obtain the Services for the agreed upon term of the Agreement for Service ("AFS"). If the Customer terminates all or any part of the Services obtained under the AFS prior to the expiration of the initial term or any renewal term then in effect for any reason other than Cause (as set forth in the following 2.12.2.1 below), then, in addition to payment for all Services rendered through the effective termination date, the Customer shall be liable to the Company for:

(A) Discontinuance Charge (Cont'd.)

- (3) any waived installation charges, the cost of any incentives and any miscellaneous charges incurred for dedicated access, including but not limited to engineering fees, expedite fees, carrier and local exchange order fees, change order charges, and miscellaneous configuration charges. In addition, the Company shall be entitled to the cost of collection of the forgoing amounts including, without limitation, court costs, reasonable attorney's fees and interest on past due amounts.

Because damages resulting from early termination are difficult to determine, the Discontinuance Charge is a reasonable approximation of such damage and shall be considered a liquidated damage and not a penalty.

(B) Discounts/ Incentives Received

Where the Customer received reduced rates or a discount because the Customer subscribed to more than one Service, the Customer's termination of one Service may result in the forfeiture of the Customer's reduced rates or discount for that Service or Services that are not terminated, and the Customer shall be liable to the Company for the amount of discount received by the Customer for the period from the beginning of the term of the Agreement for such Services up to and including the effective date of the termination of the Service or Services terminated.

Incentive(s) include but are not limited to free or discounted services under the Bundle/Term Discount Program, waiver of any fees (i.e., installation charges, loop charges), waived rental of equipment, etc. If Customer cancels any service provided under an Incentive in full or in part (i.e., Customer receives a discount for bundled services but cancels one of the services prior to the end of the Term), then Customer shall pay any fees Customer would have incurred without the Incentive. Likewise, Customer shall pay the then current rate for any equipment received under an Incentive (i.e., data CPE: multiplexers, CSU/DSU, routers, etc.) and/or, at the Company's discretion, allow the Company to retrieve the equipment from the Customer's premise during normal business hours.

SECTION 3 - SERVICE DESCRIPTIONS

3.1 Service Elements

3.1.1 Timing of Local Exchange Calls

Unless otherwise indicated, all calls are timed in six second increments and all calls which are fractions of a minute are rounded up to next six second increment.

For station to station calls, call timing begins when a connection is established between the calling telephone and the called telephone station.

For person to person calls, call timing begins when connection is established between the calling person and the particular person, station or mobile unit specified or an agreed alternate.

Call timing ends when the calling station "hangs up", thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telephone network or by the Company operator.

3.1.2 Time Periods Defined

Peak: 8:00 a.m. to, but not including 5:00 p.m. - Monday through Friday

Off-Peak: 5:00 p.m. to, but not including 8:00 a.m. - Monday through Friday, all day Saturday and Sunday, and all Holidays.

3.1.2 Time Periods Defined (Cont'd.)

Holidays include Christmas Day, New Year's Day, Thanksgiving Day, Independence Day, and Labor Day.

All times refer to local time.

3.1.3 Computation of Charges

For the computation of charges, the duration of each call is measured and rounded up to the applicable billing increment, then multiplied by the applicable rate and if the computed charge for any individual call results in a fraction of a cent, the fraction is then rounded up to the next whole cent on a per call basis. For example, a service may provide that each call will be charged a minimum of 18 seconds and thereafter timed in 6-second increments; therefore, under this example, a 10-second call will be rounded up to 18 seconds (0.3 minutes), and a 44-second call will be rounded up to 48 seconds (0.8 minutes). If, after multiplying the billing increment by the applicable rate, the computed charge for an individual call results in a fraction of a cent, the fraction is rounded up to the next whole cent (for example, \$1.523 would round up to \$1.53). Once the charge for each call is computed as described above, the calls are summed on the Customer's invoice.

3.51 IP Complete PRI

IP Complete PRI is a business offering that provides local and Internet service, accommodating PRI and DID services, with dynamic bandwidth. The local service and data transmission share the available dynamic bandwidth, available in three increments, up to: 1.5 Mbps, 3.0 Mbps, and 4.5 Mbps, employing the use of the entire available bandwidth for data transmission when voice service is not in use. Voice service takes precedence over data and, as voice transmission is required, Internet bandwidth is reduced to accommodate voice needs.

The base package requires a minimum of six (6) channels. The base monthly recurring charge for IP Complete PRI includes the six (6) required local channels. Additional channels can be added at an incremental charge. A maximum of twenty-three (23) channels are available with IP Complete PRI. Only one trunk group will be supported per D channel.

IP Complete PRI requires DID numbers. One block of twenty (20) DID numbers is included and additional blocks can be added at an incremental charge.

IP Complete PRI includes PRI hunting in the base package and will be configured in consultation with the Customer. Expanded Calling Service (LATA-Wide Calling) is included in the base package and will be automatically configured on all channels; thus, the Company must be selected as the Customer's presubscribed intraLATA toll carrier on all channels. Calling Number and Name Delivery is included. NFAS configurations, PRI Rollover, and CLASS features are not available with IP Complete PRI.
