ORDER GRANTING EXTENSION

BY THE COMMISSION:

Order No. 21552, as consummated by Order No. 21708, directed Utilities Inc. of Florida (Orangewood), hereinafter "utility", to convert its water system to gas chlorination on or before October 16, 1989. In an October 18, 1989 letter, the utility requested a 60 day extension of said deadline in view of delays in securing a permit from the Department of Environmental Regulation, ("DER"), to complete installation of the chlorination equipment.

The utility has indicated that approximately 90% of the chlorination equipment has been installed and that the only prerequisite to activating the system is permitting approval from DER. The letter notes that the delay resulted from conflicting information from DER as to the necessity of applying for a DER permit. Once the utility realized that a permit was required, it also realized that the deadline of this Commission would be exceeded and therefore requested an extension.

In view of the above, we find that a 60 day extension is reasonable. Therefore, we find it appropriate to grant the utility's request. However, we will consider whether to require the utility to show cause why it should not be fined for noncompliance with Order No. 21552 and this order should the revised deadline be exceeded.

It is therefore
