ORDER APPROVING TARIFF

BY THE COMMISSION:

On August 24, 1990, AT&T Communications of the Southern States, Inc. (ATT-C or the Company) filed a revision to its channel services tariff proposing to expand ATT-C's digital capability in Florida by adding 21 additional serving locations for ACCUNET Spectrum of Digital Services (ASDS), 5 additional offices of ACCUNET T1.5 service and 13 additional offices ACCUNET switched 56 service.

The tariff also proposes to reprice ATT-C's Analog Channel Services by increasing the Channel Terminal rate element and decreasing the per mile charge. The tariff also proposes to temporarily grandfather Analog Channel Services except where ASDS is not available and withdraw this service effective July 31, 1991. ATT-C states that Analog services are already technologically obsolete and rapidly becoming obsolete in the market place. The Company's goal is to convert customers from analog to digital/ASDS. The Company maintains this conversion will not involve physical rearrangement of the customer's Channel Service or LEC Access.

We are concerned with the impact to the end user when the suggested repricing and phase out of Analog Channel Services by ATT-C is combined with the recent restructure of Special Access Services in the Private Line Docket No. 890505-TL. In that docket the rates were raised for Analog Special Access Services. This is scheduled over a three year phase-in period. We intend to gather additional impact data and to reevaluate this matter in light of this additional information. Because of this resolution, ATT-C shall hold any increase in revenues subject to refund until the reevaluation is completed.
