ORDER APPROVING TARIFF

BY THE COMMISSION:

On March 19, 1991, AT&T Communications of the Southern States (ATT-C or the Company) filed tariffs to expand the hours in which the Company bills the night rate for its Software Defined Network (SDN) service. SDN is a service which allows a customer to establish a communication path between designated SDN stations that are connected by dedicated access facilities to designated AT&T Central Offices. It includes such features as call management, uniform 7 digit numbering plan, and on-network / off-network calling capability. The proposed tariff expands the night rate period for SDN calls during Saturdays and Sundays and thus, provides for some weekend calls, currently billed as evening rate calls, to be billed as night rate calls.

ATT-C anticipates, and our staff agrees, that the proposed tariff should have no revenue effect. The proposed rates are virtually identical to the rates currently in effect and fall between the floor and the cap for SDN service rates authorized in the ATT-C Forbearance Order (Order No. 19758). The only proposed changes under this filing are the time of day changes discussed above. ATT-C seeks approval of this filing so that its time of day rate periods for intrastate and interstate SDN services will be the same. We approve the Tariff filing.

Based on the foregoing, it is
