ORDER APPROVING TARIFF PROPOSAL

BY THE COMMISSION:

On August 16, 1991, United Telephone Company of Florida (United or the Company) filed proposed revisions to its General Exchange Tariff to delete the abbreviated code for a dialing list of 70 numbers from the Company's Advanced Business Connection (ABC) service tariff. ABC service is United's version of Centrex/ESSX service.

A conflict arose when the Commission ordered per-call blocking for Caller ID services. The code for invoking per-call blocking (state-wide) is *67, followed by the destination number. The same code could be used by United's ABC customers who subscribe to the Speed Call 70 feature. A customer could have a number programmed as number 67; then, by trying to access the number by dialing *67, one of three adverse things could happen. First, per-call blocking may not work. Second, the number may not be dialed. Third, if the ABC customer is a law enforcement agency and has per-line blocking, dialing *67 could possibly disable the blocking and send the calling number.

United has proposed by this filing to delete Speed Call 70 and convert any customers to Speed Call 50 at no charge. All Speed Call 70 customers have been contacted by the Company and have agreed to this change.

Upon consideration, we find this tariff proposal to be appropriate. Accordingly, the tariff shall be approved as filed, with an effective date of October 21, 1991. The change avoids confusion and allows per-call blocking to function from United's ABC systems.
