ORDER APPROVING TARIFF

BY THE COMMISSION:

Current tariff language regarding the ordering of 800 and 900 access services states access is to be ordered on a statewide basis. This tariff filing by United Telephone Company of Florida (United) proposes the language be changed to state that service can be ordered for a local access transport area (LATA) as opposed to just statewide. This tariff parallels Southern Bell Telephone Company's (Bell) request, filed on June 15, 1992, to make the same changes.

According to United, when 800 service was first offered, there were problems with customer confusion concerning geography. To alleviate confusion, the service was defined as statewide. Whether the result of customer sophistication or economics, IXC customers have expressed interest in purchasing this service for a more narrowly defined market area, specifically a LATA.

Currently, an entity with an 800 or 900 number, wanting to target a specific market such as a single LATA, is unable to restrict calls to that single market. These entities can presently restrict calls only to a specific state or states. This filing will allow the entity to confine its scope to a single LATA or group of LATAs.

Making this access service available on a more narrowly defined geographic basis is beneficial to IXC customers such as sales and marketing enterprises.
