

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Investigation into  
pricing of unbundled network  
elements.

DOCKET NO. 990649-TP  
ORDER NO. PSC-00-0380-S-TP  
ISSUED: February 22, 2000

The following Commissioners participated in the disposition of this matter:

JOE GARCIA, Chairman  
J. TERRY DEASON  
SUSAN F. CLARK  
E. LEON JACOBS, JR.

ORDER APPROVING STIPULATION ON  
INTERIM DEAVERAGING

BY THE COMMISSION:

The FCC's Local Competition Order, released August 8, 1996, included in its pricing rules a rule, 51.507(f), which requires each state commission to establish at least three geographic rate zones for unbundled network elements (the deaveraging rule).

State commissions shall establish different rates for elements in at least three defined geographic areas within the state to reflect geographic cost differences. 47 C.F.R. §51.507(f).

In response to various appeals, including that of this Commission, the U.S. Court of Appeals for the Eighth Circuit (Eighth Circuit) stayed the FCC's pricing rules on September 27, 1996. On July 18, 1997, the Eighth Circuit vacated the pricing rules on the grounds that the FCC lacked jurisdiction. On January 25, 1999, however, the U.S. Supreme Court reversed the Eighth Circuit's decision with regard to the FCC's jurisdiction over the pricing rules. In FCC Order 99-86, released May 7, 1999, in CC Docket No. 96-98, the FCC issued a *sua sponte* stay of its deaveraging rule until:

six months after the Commission issues its order in CC Docket No. 96-45 finalizing and ordering implementation of high-cost universal

service support for non-rural local exchange carriers (LECs) under section 254 of the Communication Act of 1934, as amended.

FCC 99-86, ¶ 1.

The FCC indicated that it had issued the stay in order to:

ameliorate the disruption that would otherwise occur, and [the stay] will afford the states an opportunity to bring their rules into compliance with section 51.507(f).

FCC 99-86, ¶ 4.

One such state is Florida, where deaveraged UNE rates have not been ordered.

On December 10, 1998, in Docket No. 981834-TP, the Florida Competitive Carriers Association (FCCA), the Telecommunications Resellers, Inc. (TRA), AT&T Communications of the Southern States, Inc. (AT&T), MCIMetro Access Transmission Services, LLC (MCIMetro), WorldCom Technologies, Inc. (WorldCom), the Competitive Telecommunications Association (Comptel), MGC Communications, Inc. (MGC), Intermedia Communications Inc. (Intermedia), Supra Telecommunications and Information Systems (Supra), Florida Digital Network, Inc. (Florida Digital Network), and Northpoint Communications, Inc. (Northpoint) (collectively, "Competitive Carriers") filed their Petition of Competitive Carriers for Commission Action to Support Local Competition in BellSouth's Service Territory. Among other matters, the Competitive Carriers' Petition asked that we set deaveraged unbundled network element (UNE) rates.

On May 26, 1999, we issued Order No. PSC-99-1078-PCO-TP, granting in part and denying in part the Competitive Carriers' petition. Specifically, we granted the request to open a generic UNE pricing docket for the three major incumbent local exchange providers in Florida, BellSouth, Sprint-Florida, Incorporated, and GTE Florida Incorporated (GTEFL). Accordingly, this docket was opened to address the deaveraged pricing of UNEs, as well as the pricing of UNE combinations and nonrecurring charges.

ORDER NO. PSC-00-0380-S-TP  
DOCKET NO. 990649-TP  
PAGE 3

On November 2, 1999, the FCC released Order 99-306 in CC Docket No. 96-45, which ordered that the stay of the deaveraging rule to be lifted on May 1, 2000, and stated that:

[B]y that date, states are required to establish different rates for interconnection and UNEs in at least three geographic areas pursuant to section 51.507(f) of the Commission's rules.

FCC 99-306, ¶ 120.

Neither the original schedule, nor the current schedule established in this docket will result in permanent deaveraged UNE rates being in effect until after May 1, 2000. Accordingly, our staff encouraged the parties to try to agree to interim deaveraged rates to avoid seeking a waiver of the deaveraging rule or conducting an accelerated proceeding. With our staff's encouragement and assistance, the parties agreed to a set of interim deaveraged rates, and on December 7, 1999, the parties filed a Joint Stipulation Regarding Interim Deaveraging (Interim Rate Stipulation), which is attached and incorporated herein as Attachment A.

This is our decision on the Interim Rate Stipulation.

#### INTERIM RATE STIPULATION

The parties agreed to interim rate deaveraging to avoid the necessity either for expedited proceedings on interim deaveraging or for the Commission to seek a waiver of the Deaveraging Rule pending the completion of the permanent pricing proceedings in this docket; . . ."

Interim Rate Stipulation, page 2.

The parties also agreed that "this Stipulation is not intended to set a precedent for the resolution of any issue related to permanent deaveraged rates; . . ." (Ibid.)

The Interim Rate Stipulation provides for interim deaveraged loop rates for BellSouth, GTEFL, and Sprint-Florida. The interim deaveraged rates will become effective on May 1, 2000, unless the FCC changes the effective date for deaveraged rates, in which case

the effective date for the interim deaveraged rates will be the new FCC effective date. These interim deaveraged rates will remain in effect until this Commission sets permanent deaveraged rates or June 30, 2001, whichever is sooner. The interim rates will be available to parties which have an interconnection agreement with the respective incumbent local exchange carrier. The interim rates will not be subject to true-up once permanent rates have been set.

The Interim Rate Stipulation also states that this Stipulation does not "establish any precedent for the Commission's resolution of any issue in this docket." Interim Rate Stipulation at 8. In addition each party to the Interim Rate Stipulation agreed that:

. . . if this Stipulation is approved, it will not challenge in any forum (i) the interim rates set forth on Attachment A, as to the period during which the rates are in effect, or (ii) the absence of interim deaveraged rates for any elements not included on Attachment A.

Interim Rate Stipulation at 11.

Sprint-Florida currently has deaveraged recurring loop rates tariffed in Section E19 of its intrastate Access Service Tariff. Sprint-Florida also has deaveraged rates for local switching and transport. The Interim Rate Stipulation states that those deaveraged rates will be Sprint-Florida's interim deaveraged rates.

For BellSouth and GTEFL, interim deaveraged rates will be available for each loop type "for which the company currently has a non-deaveraged rate contained in any tariff or interconnection agreement." Interim Rate Stipulation at 3. The parties agreed that "[N]o interim deaveraging will be performed for non-recurring charges for any ILEC." Interim Rate Stipulation at 4. Interim deaveraged rates for BellSouth, GTEFL and Sprint-Florida are listed in Attachment A.

The general procedure used to develop interim deaveraged rates for BellSouth and GTEFL is described in ¶ 5 of the Interim Rate Stipulation. The cost and access line data used as the basis for computing the rates came from the final compliance runs of the Benchmark Cost Proxy Model 3.1 for BellSouth and GTEFL submitted in response to Order No. PSC-99-0068-FOF-TP, in Docket No. 980696-TP. The Interim Rate Stipulation states that:

ORDER NO. PSC-00-0380-S-TP  
DOCKET NO. 990649-TP  
PAGE 5

[T]he intent of the calculation . . . is that the weighted average of the deaveraged prices for each loop element should equal the current price in effect for such element.

Interim Rate Stipulation at ¶ 5(d).

ANALYSIS AND DECISION

Upon consideration, we find that the Interim Rate Stipulation is a reasonable, interim solution to bring Florida into compliance with the FCC's rule regarding geographic deaveraging. These interim rates are available to any local exchange carrier, which has an interconnection agreement with BellSouth, GTEFL, and Sprint-Florida. In addition, the Interim Rate Stipulation will allow us to focus on developing permanent, deaveraged UNE rates. Therefore, we hereby approve the Joint Stipulation Regarding Interim Deaveraging, which is attached and incorporated herein as Attachment A.

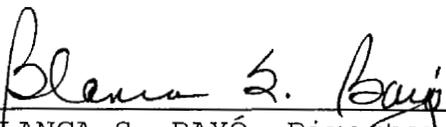

It is, therefore

ORDERED by the Florida Public Service Commission that the December 7, 1999, Joint Stipulation Regarding Interim Deaveraging filed in this Docket, which is attached and incorporated herein as Attachment A, is hereby approved. It is further

ORDERED that this docket shall remain open pending the outcome of the two hearings, scheduled for July and September, 2000, for the purpose of setting permanent UNE rates.

NOTICE OF FURTHER PROCEEDINGS OR JUDICIAL REVIEW

The Florida Public Service Commission is required by Section 120.569(1), Florida Statutes, to notify parties of any administrative hearing or judicial review of Commission orders that is available under Sections 120.57 or 120.68, Florida Statutes, as well as the procedures and time limits that apply. This notice should not be construed to mean all requests for an administrative hearing or judicial review will be granted or result in the relief sought.

Any party adversely affected by the Commission's final action in this matter may request: 1) reconsideration of the decision by filing a motion for reconsideration with the Director, Division of Records and Reporting, 2540 Shumard Oak Boulevard, Tallahassee, Florida 32399-0850, within fifteen (15) days of the issuance of this order in the form prescribed by Rule 25-22.060, Florida Administrative Code; or 2) judicial review by the Florida Supreme Court in the case of an electric, gas or telephone utility or the First District Court of Appeal in the case of a water and/or wastewater utility by filing a notice of appeal with the Director, Division of Records and reporting and filing a copy of the notice

ORDER NO. PSC-00-0380-S-TP  
DOCKET NO. 990649-TP  
PAGE 7

of appeal and the filing fee with the appropriate court. This filing must be completed within thirty (30) days after the issuance of this order, pursuant to Rule 9.110, Florida Rules of Appellate Procedure. The notice of appeal must be in the form specified in Rule 9.900(a), Florida Rules of Appellate Procedure.

ORDER NO. PSC-00-0380-S-TP  
DOCKET NO. 990649-TP

990649-TP  
January 20, 2000

Attachment A

for unbundled network elements (UNEs), including deaveraged rates where required; and

WHEREAS, the Federal Communications Commission (FCC) has announced that its stay of Rule 51.507(f) (the "Deaveraging Rule") will be lifted effective six months from the date of the release of the Order regarding New Mechanism for Federal Universal Service High Cost Support Provided to Non-Rural Carriers (CC Docket No. 96-45); and

WHEREAS, the Deaveraging Rule provides in part that "State commissions shall establish different rates for elements in at least three defined geographic areas within the state to reflect geographic cost differences"; and

WHEREAS, the on-going proceedings in this docket to establish permanent rates are not expected to be concluded by the date the stay of Rule 51.507(f) is lifted; and

WHEREAS, the Parties are willing to agree to a plan for interim rate deaveraging to avoid the necessity either for expedited proceedings on interim deaveraging or for the Commission to seek a waiver of the Deaveraging Rule pending the completion of the permanent pricing proceedings in this docket; and

WHEREAS, this Stipulation is not intended to set a precedent for the resolution of any issue related to permanent deaveraged rates;

NOW THEREFORE, the Parties agree as follows:

990649-TP  
January 20, 2000

1. Interim deaveraged rates will be set only for the three large incumbent local exchange companies, BellSouth, GTE and Sprint.

2. As to Sprint, the existing deaveraged rates for loops, switching and transport shall remain in effect as interim deaveraged rates for those elements as shown on Attachment A.

3. As to BellSouth and GTE, interim deaveraged rates will be set for each of the unbundled loop elements listed in Attachment A, which are the elements for which the company currently has a non-deaveraged rate contained in any tariff or interconnection agreement.

4. As to BellSouth and GTE, interim deaveraged recurring loop rates will be set separately for each company for three geographic zones. No interim deaveraging will be performed for non-recurring charges for any ILEC.

5. The deaveraged rates described in Paragraph 4 will be developed using the per-loop investment data (on a wire center basis) produced by the final compliance run of the Benchmark Cost Proxy Model 3.1 for each company submitted in response to Commission Order No. PSC-99-0068-FOF-TP in Docket No. 980696-TP, using the following procedure:

a. BellSouth and GTE each shall group its wire centers into three proposed zones -- a low-cost zone, a mid-cost zone, and a high-cost zone -- and shall determine a weighted average loop investment for each proposed zone.

990649-TP  
January 20, 2000

Attachment A

b. The relationship between the weighted average loop investment for each proposed zone and the company's statewide average loop investment will used by each company to develop three factors for the company such that:

$$\begin{aligned} & (\text{Factor 1} \times \text{Access Lines in Zone 1}) + \\ & (\text{Factor 2} \times \text{Access Lines in Zone 2}) + \\ & (\text{Factor 3} \times \text{Access Lines in Zone 3}) \\ & \text{-----} = 1.0 \\ & \text{Total Access Lines} \end{aligned}$$

c. The interim deaveraged rates for each loop element shall then be determined by multiplying the factor for each proposed zone times the current price of such element.

d. The intent of the calculation in subparagraphs 5.a to 5.c is that the weighted average of the deaveraged prices for each loop element should equal the current price in effect for such element.

6. BellSouth and GTE will calculate rates in accordance with Paragraph 5, and Sprint will calculate rates in accordance with Paragraph 2, and will furnish the proposed interim rates, the identification of which wire centers are included in each proposed zone, and the supporting calculations to the other Parties for review by November 17, 1999. For BellSouth and GTE, the supporting documentation will include a list of wire centers, in order from the lowest to the highest average loop investment. This list will show the break-points between the cost zones and the calculation of the weighted average per-loop investment for each zone. The Parties will meet by conference call beginning on

990649-TP  
January 20, 2000

Attachment A

November 23, 1999 for the purpose of finalizing the proposed rates and zones. Upon subsequent agreement of the Parties, the rates and zones shall be incorporated into Attachment A to this Stipulation.

7. The interim deaveraged rates will take effect on May 1, 2000 (unless the effective date of the lifting of the stay of Rule 51.507(f) is changed by the FCC, in which case the revised date established by the FCC will control) and will remain in effect until the earlier of (a) the date they are replaced by permanent deaveraged rates established by the Commission in this docket, or (b) June 30, 2001. The interim deaveraged rates will be available to parties which have an interconnection agreement with the respective ILEC. As between the Parties who are signatories to this Stipulation, the above-mentioned effective date shall have the effect of a Commission order and will not be delayed pending formal amendment of the Parties' individual interconnection agreements. The interim deaveraged rates will not be subject to true-up. The Parties intend that the interim deaveraged rates remain in effect for the minimum amount of time necessary to establish permanent rates, and the Parties will act in good faith to complete this docket as quickly as practicable.

8. Nothing in this Stipulation shall establish any precedent for the Commission's resolution of any issue in this docket. Each Party is free to advocate any position with respect to such matters. Without limiting the generality of the foregoing, the Stipulation shall not establish any precedent for:

990649-TP  
January 20, 2000

Attachment A

(a) the elements required to be offered; (b) the elements required to be deaveraged; (c) the appropriate deaveraging methodology; (d) the appropriate number of zones; (e) the appropriate permanent deaveraged rate levels; (f) whether or not non-recurring charges must be deaveraged; (g) the appropriate methodology to use in establishing UNE prices; (h) universal service funding issues; or (i) rate rebalancing issues.

9. This Stipulation will take effect as soon as the Parties have reached subsequent agreement pursuant to Paragraph 6 on the rates to be included in Attachment A.

10. This Stipulation will be submitted to the Commission for approval as soon as it takes effect under Paragraph 9. If this Stipulation is not accepted by the Commission in its entirety and without modification, it shall have no further force and effect and shall not be admissible for any purpose in any further proceedings in this docket, any appeal or other judicial proceedings related to this docket, or any future judicial or regulatory proceedings.

11. Each Party agrees that if this Stipulation is approved, it will not challenge in any forum (i) the interim rates set forth on Attachment A, as to the period during which the rates are in effect, or (ii) the absence of interim deaveraged rates for any elements not included on Attachment A. This Stipulation does not affect or prejudice the position of any party in any pending judicial or administrative proceeding relating to the level of any existing averaged loop price and/or the

appropriateness of the cost methodology used to establish such price. Nothing in this Stipulation shall prevent any party from pursuing or opposing, at any time, universal service funding, rate rebalancing, recovery of stranded costs, or other actions addressing the relationship between UNE and retail rates.

IN WITNESS WHEREOF, the parties have executed this Stipulation on the dates set forth next to their respective signatures.

0.00 1000

SPRINT-FLORIDA, INC.  
By: F. B. Poag, Director

First Revised Page 18.1.1.1  
Cancels Original Page 18.1.1

Effective: October 26, 1999

E19. SERVICES FOR COMPETING TELECOMMUNICATIONS PROVIDERS

E19.2 Unbundled Network Elements (Cont'd)

E19.2.14 Loops (Cont'd)

C. Loop services and port services shall be purchased by the Carrier at the interface level of the unbundled network element (i.e., two-wire voice grade). Multiplexing is optional at the charges specified in E19.8 following.

D. Rate Application

Loop rates are applied monthly on a per-loop basis. Nonrecurring charges, as listed in E19.8.2, as well as service order charges listed in E19.8.6, are applicable for service establishment. Additionally, a nonrecurring charge will apply for conditioning required for two-wire digital data ADSL capable non-standard loops with a calculated effective loop length over 18 Kft. Loop conditioning is the removal of load coils and excessive amounts of bridge tap to unfetter a digital data capable loop. When a non-standard 2W ADSL capable loop is ordered, an ICB charge will apply to remove the load coil.

E. Loop Rate Bands
