

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Application for authority to issue and sell securities during calendar year 2012 pursuant to Section 366.04, F.S., and Chapter 25-8, F.A.C., by Florida Power & Light Company.

DOCKET NO. 110273-EI
ORDER NO. PSC-11-0516-FOF-EI
ISSUED: November 3, 2011

The following Commissioners participated in the disposition of this matter:

ART GRAHAM, Chairman
LISA POLAK EDGAR
RONALD A. BRISÉ
EDUARDO E. BALBIS
JULIE I. BROWN

FINAL ORDER GRANTING FLORIDA POWER & LIGHT COMPANY
APPROVAL FOR AUTHORITY TO ISSUE AND SELL SECURITIES

BY THE COMMISSION:

Florida Power & Light Company (FPL) filed an application on September 20, 2011, seeking authority pursuant to Section 366.04, Florida Statutes, and Chapter 25-8, Florida Administrative Code, to issue and sell securities. Notice of FPL's application was given in the Florida Administrative Weekly on September 30, 2011.

Proposed Transactions

FPL is a Florida corporation and was incorporated in 1925. FPL seeks authority to issue and sell and/or exchange any combination of the long-term debt and equity securities and/or to assume liabilities or obligations as guarantor, endorser or surety in an aggregate amount not to exceed \$6.1 billion during calendar year 2012. In addition, FPL seeks permission to issue and sell short-term securities during calendar years 2012 and 2013 in an amount or amounts such that the aggregate principal amount of short-term securities outstanding at the time of and including any such sale shall not exceed \$4.0 billion.

FPL advises that the long-term debt securities may include first mortgage bonds, medium-term notes, extendible commercial notes, debentures, convertible or exchangeable debentures, notes, convertible or exchangeable notes or other similar rights exercisable for or convertible into debt securities, or other straight debt or hybrid debt securities, whether subordinated or unsubordinated, secured or unsecured, including renewals and extensions thereof, with maturities ranging from one to one hundred years. FPL may issue long-term debt securities by extending the maturity of short-term securities. FPL may enter into warrants, options, rights, interest rate swaps currency swaps or other derivative instruments or other arrangements. FPL may also enter into debt purchase contracts, obligating holders to purchase from FPL, and obligating FPL to sell, debt securities at a future date or dates.

FPSC-COMMISSION CLERK

In addition, FPL may enter into forward refunding or forward swap contracts during calendar year 2012. In conjunction with these forward contracts, FPL may issue and sell long-term debt through December 31, 2012, which FPL may commit to deliver under these forward contracts. Moreover, FPL may enter into installment purchase and security agreements, loan agreements, or other arrangements with political subdivisions of the States of Florida, Georgia, or other states, if any, where FPL becomes qualified to do business, or pledge debt securities or issue guaranties in connection with such political subdivisions' issuance, for the ultimate benefit of FPL, of pollution control revenue bonds, solid waste disposal revenue bonds, industrial development revenue bonds, variable rate demand notes or other "private activity bonds" with maturities ranging from one to forty years, bond anticipation notes or commercial paper. Such obligations may or may not bear interest exempt from federal, state or local tax.

Contemplated to be included as long-term or short-term debt securities, as appropriate, are borrowings from banks and other lenders under FPL's credit facilities and other loan agreements, as those may be entered into and amended from time to time. Also contemplated to be included as long-term or short-term debt securities, as appropriate, are borrowings by a wholly-owned, special purpose subsidiary or subsidiaries of FPL from banks and other lenders under credit facilities and other loan agreements or other arrangements, as those may be entered into and amended from time to time, with the proceeds of such borrowings to be used solely for the benefit of (1) FPL's Florida utility operations, or (2) FPL's customers. On May 10, 2006, FPL entered into a \$250 million resetting revolving term loan facility which expires in May 2014. On April 3, 2007, FPL entered into a \$2.5 billion revolving credit and letter of credit facility, due April 3, 2012, with banks and other lenders. The 2007 revolving credit and letter of credit facility provides for, in addition to direct borrowings thereunder, the issuance of letters of credit for general corporate purposes. Effective April 3, 2008, lenders with commitments aggregating approximately \$2.48 billion consented to the extension of their commitments to April 3, 2013 with one non-consenting lender's commitment of \$17.0 million maturing on April 3, 2012. Effective May 28, 2009, a credit commitment of \$26.9 million, which was scheduled to expire April 3, 2013, was terminated, thereby reducing the amount of total commitments under the 2007 revolving credit and letter of credit facility to approximately \$2.47 billion. The aggregate principal amount of loans and letters of credit at any one time outstanding under the revolving credit facility may not exceed the aggregate amount of the commitments. Borrowings under the 2007 revolving credit facility are available for general corporate purposes, including support of FPL's commercial paper program and other short-term borrowings and to provide additional liquidity in the event of a loss to FPL's operating facilities, including transmission and distribution facilities. On May 4, 2010, FPL entered into a \$500 million three-year revolving credit facility, due May 4, 2013 with banks and other lenders. The 2010 revolving credit facility provides for the funding of loans up to an aggregate total of \$500 million, which are available for FPL's general corporate purposes, including to provide back-up liquidity for FPL's commercial paper program and other short-term borrowings and to provide liquidity in the event of a loss to FPL's operating facilities, including transmission and distribution facilities. FPL's 2007 and 2010 bank revolving line of credit facilities are also available to support the purchase of outstanding unsecured pollution control revenue bonds, solid waste disposal revenue bonds and industrial development revenue bonds issued by certain political subdivisions of the State of

Florida which presently pay interest at a variable rate that are tendered by individual bond holders and not remarketed prior to maturity.

In addition, FPL has established an uncommitted credit facility with a bank. The bank may, at its discretion upon the request of FPL, make a short-term loan or loans to FPL in an aggregate amount determined by the bank, which is subject to change at any time. The terms of specific borrowings under the uncommitted credit facility, including maturities, are set at the time borrowing requests are made by FPL. Borrowings under the uncommitted facility may be used for general corporate purposes. Additionally, debt securities may be issued by FPL or its affiliates or subsidiaries in connection with one or more facilities secured by accounts receivable or involving the sale of accounts receivable or interests therein to be used solely for the benefit of FPL's regulated utility operations.

According to FPL, the equity securities may include common stock, preferred stock, preference stock, convertible preferred or preference stock, or warrants, options or rights to acquire such securities, or other similar rights exercisable for or convertible into preferred or preference stock, or purchase contracts obligating holders to purchase such securities, or other equity securities, with such par values, terms and conditions and relative rights and preferences as deemed appropriate by FPL and as are permitted by its Restated Articles of Incorporation, as they may be amended from time to time.

FPL also states that it may enter into financings, whereby FPL would establish and make an equity investment in one or more special purpose limited partnerships, limited liability companies, statutory trusts or other entities. FPL, or a wholly-owned subsidiary of FPL, would act as or appoint the general partner, managing member, sponsor, or other members of each such entity. The entity would offer preferred or debt securities to the public and use the proceeds to acquire debt securities from FPL. FPL would issue debt securities to the entity equal to the aggregate of FPL's equity investment and the amount of preferred or debt securities sold to the public by the entity. FPL may also guarantee, among other things, the distributions to be paid by the affiliated entity to the preferred or debt securities holders. Payments by FPL on the debt securities sold to the entity would be used by that entity to make payments on the preferred or debt securities as well as on FPL's equity investment. Consequently, in the event of such a financing, to avoid double-counting, FPL would only count the total amount of debt securities issued to the entity, and would not count the equity securities issued by the entity to FPL, the preferred or debt securities issued by the entity, or the related FPL guaranties against the total amount of proposed long-term debt and equity securities.

In connection with the issuance (i) by FPL of long-term or short-term debt securities or preferred or preference stock or (ii) by an affiliated entity of preferred or debt securities, in which FPL, or the affiliated entity is permitted by the terms of such securities to defer principal, interest or other distributions for certain payment periods, FPL may agree to sell additional equity securities and/or long-term or short-term debt securities and to use the proceeds from the sale of those other securities to make principal, interest or other distributions on such securities. In addition, in connection with the issuance (i) by FPL of long-term or short-term debt securities or preferred or preference stock or (ii) by an affiliated entity of preferred or debt securities, FPL

may covenant, pledge or make other commitments in favor of holders of such new securities or the holders of previously issued securities, providing that the securities will not be redeemed, purchased or otherwise satisfied, discharged, defeased or otherwise acquired in certain circumstances unless the securities are redeemed, purchased or otherwise satisfied, discharged, defeased or otherwise acquired with the proceeds from the issuance of a security or securities satisfying the provisions set forth in such covenant, pledge or other commitment.

The exchange of FPL's securities may be by way of an exchange of a security of FPL for another security or securities of FPL or of one of its subsidiaries or affiliates, or the exchange of a security of FPL or of one of its subsidiaries or affiliates for the security or securities of another entity.

The manner of issuance and sale and/or exchange of securities will be dependent upon the type of security being offered, the type of transaction in which the securities are being issued and sold and/or exchanged and market conditions at the time of the issuance and sale and/or exchange.

FPL also states that the short-term securities will have maturities of not more than twelve months and may be secured or unsecured, subordinated or unsubordinated. FPL may enter into warrants, options, rights, interest rate swaps, currency swaps or other derivative instruments or other arrangements relating to, as well as contracts for the purchase or sale of, short-term securities. Consistent with Securities and Exchange Commission "no-action" letters, FPL may issue and sell commercial paper without compliance with the registration requirements of the Securities Act of 1933, as amended, subject to certain conditions.

The short-term securities are issued to provide funds to temporarily finance portions of FPL's construction program and capital commitments and for other corporate purposes. Significant parts of FPL's construction program may be financed temporarily through the sale of short-term securities from time to time. Also, during the 2012-2013 period, FPL may need short-term financing for seasonal fuel requirements, for contingency financing such as fuel adjustment under-recoveries or storm restoration costs, and for the temporary funding of maturing or called long-term debt or equity securities.

The interest rate that FPL could pay on debt securities will vary depending on the type of debt instruments and the terms thereof, including specifically the length of maturity and whether the debt is secured or unsecured and subordinated or unsubordinated, as well as market conditions. As of June 30, 2011, it is estimated that a new issue of a 30-year first mortgage bond of FPL would have carried a yield to maturity of approximately 5.30%. The dividend rate for preferred or preference stock is similarly affected by the terms of the offering. As of June 30, 2011, it is estimated a new issue of preferred stock of FPL would have carried a dividend yield of approximately 6.60%.

In addition, FPL states that it may from time to time issue instruments of guaranty, collateralize debt and other obligations, issue other securities, and arrange for the issuance of letters of credit and guaranties, in any such case to be issued (i) by FPL or by one or more of its

subsidiaries for the benefit of FPL's utility operations, (ii) by non-affiliates in connection with FPL's utility operations, (iii) by FPL or by or on behalf of one or more of its subsidiaries in connection with FPL customers' installations of energy efficiency measures, and/or (iv) in connection with other financings by FPL or on its behalf. To the extent that FPL issues instruments of guaranty, collateralizes debt or other obligations, issues other securities or arranges for the issuance of letters of credit or guaranties by or on behalf of FPL or by or on behalf of one or more of its subsidiaries or non-affiliates to benefit its utility operations, FPL will clearly demonstrate such benefits.

FPL states that it will file a consummation report in compliance with Rule 25-8.009, Florida Administrative Code, within 90 days after the end of any fiscal year in which it issues securities.

Purposes

According to FPL, it is expected that the net proceeds to be received from the issuance and sale and/or exchange (if there are any net proceeds from an exchange) of the additional long-term debt and equity securities (with the exception of the proceeds of the issuance and sale of any pollution control revenue bonds, solid waste disposal revenue bonds, industrial development revenue bonds, variable rate demand notes or other "private activity bonds" or similar securities which will be used for specific purposes) will be added to FPL's general funds and will be used to finance the acquisition or construction of additional electric facilities and equipment, as well as capital improvements to and maintenance of existing facilities; to reacquire, by redemption, purchase, exchange or otherwise, or to otherwise satisfy, discharge or defease, any of its outstanding debt securities or equity securities; to repay all or a portion of any maturing long-term debt obligations; to satisfy FPL's obligations under guaranties; to repay all or a portion of short-term bank borrowings, commercial paper and other short-term debt outstanding at the time of such transactions; and/or for other corporate purposes. Proceeds, if any, may be temporarily invested in short-term instruments pending their application to the foregoing purposes. During the period 2012-2013, approximately \$503 million of FPL's long-term debt will mature.

FPL maintains a continuous construction program, principally for electric generation, transmission, and distribution facilities. As of June 30, 2011, FPL estimated that capital expenditures under its 2012-2013 construction program will approximate \$5.7 billion, including Allowance for Funds Used During Construction (AFUDC).

Anticipated construction expenditures in the 2012-2013 period include three projects that required a determination of need. Preconstruction expenditures and potential construction expenditures relate to a fourth project that also required a determination of need, and although identification of projects involving preconstruction expenditures is not required by the applicable rules, FPL advises that the fourth project is identified for the sake of completeness and transparency.

The first project that received a determination of need and which involves anticipated construction expenditures in the 2012-2013 period was the planned addition of approximately

400 megawatts of increased generating capacity at FPL's existing Turkey Point Nuclear Generating Station and St. Lucie Nuclear Power Plant (each an Uprate and collectively, the Uprates). The updated estimate of generating capacity of approximately 450 megawatts is scheduled to come in service in 2011, 2012 and 2013. The need for these Uprates was approved by the Commission in Order No. PSC-08-0021-FOF-EI issued on January 7, 2008. The Florida Department of Environmental Protection Final Order for the Site Certification was issued in September 2008 for the St. Lucie Nuclear Power Plant Uprate and October 2008 for the Turkey Point Nuclear Generating Station Uprate. The non-binding cost estimate range for the Uprates is approximately \$2.32 billion to \$2.48 billion, including AFUDC and transmission interconnection costs. As of June 30, 2011, the total design and construction costs, including AFUDC and transmission interconnection costs expended on the Uprates were approximately \$1.0 billion.

The second project that received a determination of need and which involves anticipated construction expenditures in the 2012-2013 period is the Cape Canaveral Energy Center, a 1,210 megawatt (summer) natural gas-fired generating unit. The need for the Cape Canaveral Energy Center was approved by the Commission in Order No. PSC-08-0591-FOF-EI issued on September 12, 2008. The estimated construction cost for this project is approximately \$1.12 billion including AFUDC and transmission interconnection costs. As of June 30, 2011, development, design and construction costs, including AFUDC and transmission interconnection costs expended on Cape Canaveral Energy Center were approximately \$259.6 million.

The third project that received a determination of need and which involves anticipated construction expenditures in the 2012-2013 period is the Riviera Beach Energy Center, a 1,212 megawatt (summer) natural gas-fired generating unit. The need for the Riviera Beach Energy Center was approved by the Commission in Order No. PSC-08-0591-FOF-EI issued on September 12, 2008. The estimated construction costs for the Riviera Beach Energy Center is \$1.28 billion, including AFUDC and transmission interconnection costs. As of June 30, 2011, development, design and construction costs, including AFUDC and transmission interconnection costs expended on the Riviera Beach Energy Center were approximately \$87.7 million.

The fourth project that received a determination of need is the addition of two nuclear units at FPL's existing Turkey Point Nuclear Generating Station (Turkey Point Units 6 & 7) that, for planning purposes, are projected to be brought into service between 2022 and 2023. Each of the units is projected to add approximately 1,100 megawatts of firm capacity. The Commission approved the need for Turkey Point Units 6 & 7 in Order No. PSC-08-0237-FOF-EI issued on April 11, 2008. The non-binding cost estimate range for Turkey Point Units 6 & 7 is \$12.8 billion to \$18.8 billion, including AFUDC and transmission interconnection costs. As of June 30, 2011, total development, design and preconstruction costs, including AFUDC and transmission interconnection costs expended on Turkey Point Units 6 & 7 were approximately \$128.7 million.

Under future market conditions, the interest rate on new issue long-term debt or the dividend rate on new issue preferred or preference stock of FPL may be such that it becomes economically attractive to redeem or otherwise reacquire or otherwise satisfy, discharge or defease a portion or all of certain of its long-term debt securities or equity securities, providing

an opportunity for FPL to reduce interest or dividend expense even after accounting for such other considerations as the (i) redemption or other reacquisition premium, (ii) other associated reacquisition or discharge expenses, and (iii) related income tax effects. This reduction would be beneficial to FPL's customers and, with proper regulatory treatment, would not be detrimental to FPL's common shareholder. Other important considerations in making such a decision would include an assessment of anticipated future interest and dividend rates and FPL's ability to raise enough new capital to finance its construction program while concurrently pursuing any refinancing opportunities. FPL might also consider reacquiring or otherwise satisfying, discharging or defeasing a portion or all of certain of its long-term debt securities or equity securities for reasons other than interest or dividend expense reduction.

Under future market conditions, it may be economical to enter into forward refunding or forward swap contracts. The forward refunding contracts would be for the purpose of refunding long-term debt (including but not limited to refunding pollution control revenue bonds, solid waste disposal revenue bonds and industrial development revenue bonds) which may be issued on FPL's behalf and which can be callable. Under federal tax law, the refunding of pollution control revenue bonds, solid waste disposal revenue bonds and industrial development revenue bonds with tax-exempt bonds issued more than 90 days prior to the redemption or retirement of the outstanding issue is heavily restricted. However, through a forward refunding contract, FPL could lock-in prevailing tax-exempt fixed rates for refunding pollution control revenue bonds, solid waste disposal revenue bonds and industrial development revenue bonds which would be issued 90 days prior to a call date of the outstanding issue. Alternatively, FPL could enter into a forward swap contract, to become effective on a call date of the outstanding issue, to lock-in prevailing tax-exempt fixed rates. Any anticipated savings generated by such forward transactions would be spread over the combined life of the outstanding bonds and the refunding bonds starting with the execution of the forward contract.

FPL presently has a subsidiary that promotes the installation of energy efficiency measures by contracting with customers to guarantee the anticipated energy savings. To facilitate FPL's customers' installations of energy efficiency measures, FPL may issue instruments of guaranty, collateralize debt or other obligations, issue other securities, or arrange for the issuance of letters of credit or guaranties to promote energy efficiency savings contracted for by FPL or FPL subsidiaries with FPL customers.

In connection with this application, FPL confirms that the capital raised pursuant to the application will be used in connection with the activities of FPL and FPL's regulated subsidiaries and not the unregulated activities of its unregulated subsidiary or affiliates.

Having reviewed the application, it is the finding of this Commission that the transactions described in the application will not impair the ability of FPL to perform the services of a public utility. These transactions are for such lawful purposes within FPL's corporate powers and, as such, the application is granted.

Our approval of the proposed issuance of securities by FPL does not indicate specific approval of any rates, terms, or conditions associated with the issuance. Such matters are properly reserved for review by this Commission within the context of a rate proceeding.

Based on the foregoing, it is

ORDERED by the Florida Public Service Commission that the application of Florida Power & Light Company to issue and sell securities is approved as set forth herein. It is further

ORDERED that Florida Power & Light Company's request to issue and sell and/or exchange any combination of long-term debt and equity securities and/or to assume liabilities or obligations as guarantor, endorser, or surety in an aggregate amount not to exceed \$6.1 billion during calendar year 2012 is granted. It is further

ORDERED that Florida Power & Light Company's request for authority to issue and sell short-term securities during calendar years 2012 and 2013 in an amount or amounts such that the aggregate principal amount of short-term securities outstanding at the time of and including any such sale shall not exceed \$4.0 billion. It is further

ORDERED that Florida Power & Light Company's request for authority to enter into forward refunding or forward swap contracts during calendar year 2012, as set forth in the body of this Order, is granted. It is further

ORDERED that Florida Power & Light Company shall file a consummation report in compliance with Rule 25-8.009, Florida Administrative Code, within 90 days of the end of any fiscal year in which it issues any securities authorized by this Order. It is further

ORDERED that this docket shall remain open to monitor the issuance and/or sale of securities until Florida Power & Light Company submits and we have reviewed the Consummation Report, at which time it shall be closed administratively.

By ORDER of the Florida Public Service Commission this 3rd day of November, 2011.

NOTICE OF FURTHER PROCEEDINGS OR JUDICIAL REVIEW

The Florida Public Service Commission is required by Section 120.569(1), Florida Statutes, to notify parties of any administrative hearing or judicial review of Commission orders that is available under Sections 120.57 or 120.68, Florida Statutes, as well as the procedures and time limits that apply. This notice should not be construed to mean all requests for an administrative hearing or judicial review will be granted or result in the relief sought.

Any party adversely affected by the Commission's final action in this matter may request: 1) reconsideration of the decision by filing a motion for reconsideration with the Office of Commission Clerk, 2540 Shumard Oak Boulevard, Tallahassee, Florida 32399-0850, within fifteen (15) days of the issuance of this order in the form prescribed by Rule 25-22.060, Florida Administrative Code; or 2) judicial review by the Florida Supreme Court in the case of an electric, gas or telephone utility or the First District Court of Appeal in the case of a water and/or wastewater utility by filing a notice of appeal with the Office of Commission Clerk, and filing a copy of the notice of appeal and the filing fee with the appropriate court. This filing must be completed within thirty (30) days after the issuance of this order, pursuant to Rule 9.110, Florida Rules of Appellate Procedure. The notice of appeal must be in the form specified in Rule 9.900(a), Florida Rules of Appellate Procedure.
