JULIE I. BROWN
JIMMY PATRONIS

ORDER APPROVING MODIFICATIONS TO SWING SERVICE CHARGE

BY THE COMMISSION:

Background

On October 9, 2015, Peoples Gas System (Peoples) filed a petition for approval of tariff modifications related to its swing service charge. The swing service charge is assessed to all customers who take service under Peoples' Natural Choice Transportation Service program called Rider NCTS.

The swing service charge was first approved in 2000 when Peoples filed numerous tariff changes to make transportation service available to all non-residential customers pursuant to Rule 25-7.0335, Florida Administrative Code (F.A.C.).¹ The tariff changes are shown in Attachment A to this order. The tariff page is in legislative format to display the changes. In its petition, Peoples waived the 60-day file and suspend provisions of Section 366.06(3), Florida Statutes, (F.S.).

On October 12, 2015, the Office of Public Counsel (OPC) filed a notice of intervention in the docket and on October 21, 2015, Peoples, OPC and Commission staff met in a noticed meeting. During its evaluation of the petition, Commission staff issued a data request to Peoples for which a response was received on October 26, 2015. We have jurisdiction over this matter pursuant to Sections 366.03, 366.05, and 366.06, F.S.

¹ Order No. PSC-00-1814-TRF-GU, issued October 4, 2000, in Docket No. 000810-GU, In re: Petition for approval of modifications to tariff provisions governing transportation of customer-owned gas and tariff provisions to implement Rule 25-7.0335, F.A.C., by Tampa Electric Company d/b/a Peoples Gas System.

Decision

The swing service charge is assessed to all customers who choose to take transportation service under Rider NCTS. The Rider allows residential customers with an annual consumption of 2,000 or more therms and non-residential firm customers to use a third party supplier or pool manager to meet their natural gas requirements. The NCTS customer is part of a group of customers called a customer pool. The pool manager assumes the responsibility for supplying and managing the natural gas supply for a customer pool. Currently, NCTS customers can choose from 15 pool managers. Peoples receives gas delivered by the pool manager and redelivers the gas to the customer's site. Peoples introduced the NCTS program in 2000 and it has grown from 3,398 customers in October 2000 to 22,123 customers as of December 2014. Customers who buy their gas from Peoples are referred to as sales customers and are subject to Peoples' purchased gas adjustment (PGA) charges.

The pool managers deliver the monthly gas supply for their customer pool at a constant level every day even though customer usage varies. Therefore, the level of gas delivered daily differs from the quantity actually consumed by the customer pool. To offset this daily difference, Peoples varies ("swings") the level of gas and upstream pipeline capacity nominated for delivery to the Peoples system. Peoples is required to manage the customer swing for sales and NCTS customers with operational purchases or sales. The cost to manage the customer swing is included in the calculation of the PGA. A portion of the cost is paid by the NCTS customers via the swing service charge mechanism. The revenues derived from the swing service charge are credited to the PGA. The sales customers' share of the swing service costs remain embedded in the PGA.

Swing Service Charge Methodology

Peoples' methodology for determining the level of the swing service charge is consistent with the methodology approved in Order No. PSC-00-1814-TRF-GU.² First, the swing service cost is estimated on a system-wide basis. Costs are estimated based on six primary tools used by Peoples to balance its system:

- Reserve capacity – interstate and intrastate pipeline capacity contracted to be available when customer usage increases.
- Swing gas supply – typically purchased on the spot market at varying levels of quantity and price.
- No-notice transportation service – purchased from interstate pipelines at tariffed rates and allows system imbalances to be absorbed by the interstate pipeline.
- Storage contracts – scheduling of gas in or out of a storage facility (typically subterranean salt domes outside of Florida) to efficiently manage supply constraints, demand reductions, and price volatility.

² Id.

- Swing sale agreements – agreements with large interruptible customers that have the ability to use alternative fuel to sell their gas supply to Peoples and switch to the customer’s alternative fuel source.
- Park and loan services – an interruptible service which gives Peoples the flexibility of putting gas in an upstream pipeline’s system for later use or borrowing gas from an upstream pipeline’s system and paying back the volume at a later date.

Once the system-wide swing service cost has been determined, it is allocated among the rate classes according to the relative variation in monthly consumption for each rate class. Allocation among rate classes is based on the magnitude of the difference between each rate class’s maximum monthly consumption and its minimum monthly consumption. Once allocated, the balancing cost assigned to each rate class is divided by the annual consumption of that class to yield the appropriate swing charge.

Swing Service Charge Modifications

Peoples proposed to update the swing service charges to reflect Peoples’ current cost of providing swing service. Specifically, the swing service charge revisions incorporate the following: (a) updated no-notice transportation service charges from Florida Gas Transmission Company, (b) updated costs associated with reserved upstream pipeline capacity that Peoples holds to ensure enough upstream capacity to meet customer demand during peak months, and (c) updated calculations of the swing service charge to include additional storage contracts, swing sale agreements from interruptible customers, and park and loan services provided by upstream pipelines.

As shown in Exhibit A to the petition, the current total annual expenses associated with providing swing service are \$12,622,934 compared to \$6,342,232 when the swing service charge was approved in 2000. However, the number of NCTS customers and associated therm usage has also increased in recent years, allowing Peoples to spread the increased swing service costs over more therms. Exhibit A to the petition also shows customer bill impacts of the revised swing charges for the various commercial rate schedules. Residential customers take sales service only and therefore do not pay a swing service charge.³

The swing service charge modifications by Peoples include NCTS customers’ portion of the reservation charges that Peoples would pay to SeaCoast Gas Transmission Company, L.L.C. (SeaCoast) pursuant to a firm transportation service agreement for which SeaCoast is requesting approval in Docket No. 150221-GU. In response to Commission staff’s data request, Peoples provided information (confidential) regarding the amount of reservation charges that Peoples would pay SeaCoast under that transportation service agreement and the relative impact of those charges on Peoples’ swing service charge modifications in this docket. Based on a review of the information provided by Peoples, the reservation charges associated with the SeaCoast-Peoples

³ Very large residential customers using 2,000 therms or more annually must take service under Peoples’ Small General Service tariff, and qualify for Rider NCTS.

transportation agreement would have a de minimis effect on Peoples' swing service charge factors in this docket.

Conclusion

The swing service charge has not been updated during its 15-year existence and the number of NCTS customers has increased significantly during that time frame. Peoples stated in the instant petition that it contemplates periodic filings to update the swing service charge. Updating the costs associated with providing the system balancing service that the swing service charge is designed to recover ensures an appropriate allocation of costs between NCTS and sales customers. Based on a review of the petition and information provided by Peoples in response to Commission staff's data request, we find that Peoples' swing service charge tariff modifications are reasonable. Therefore, we approve the tariff modifications to the swing service charge to become effective as of the date of our vote.

Based on the foregoing, it is

ORDERED by the Florida Public Service Commission that

ORDERED that the tariff modifications related to Peoples Gas System's swing service charge shall be approved and effective as of the date of the Commission's vote, December 3, 2015. It is further

ORDERED that if a protest is filed within 21 days of issuance of the Order, the tariff shall remain in effect with any charges held subject to refund pending resolution of the protest. It is further

ORDERED that if no timely protest is filed, this docket shall be closed upon the issuance of a Consummating Order. It is further

ORDERED that in the event this Order becomes final, this docket shall be closed.

By ORDER of the Florida Public Service Commission this 17th day of December, 2015.

NOTICE OF FURTHER PROCEEDINGS

The Florida Public Service Commission is required by Section 120.569(1), Florida Statutes, to notify parties of any administrative hearing or judicial review of Commission orders that is available under Sections 120.57 or 120.68, Florida Statutes, as well as the procedures and time limits that apply. This notice should not be construed to mean all requests for an administrative hearing or judicial review will be granted or result in the relief sought.

Mediation may be available on a case-by-case basis. If mediation is conducted, it does not affect a substantially interested person's right to a hearing.

The Commission's decision on this tariff is interim in nature and will become final, unless a person whose substantial interests are affected by the proposed action files a petition for a formal proceeding, in the form provided by Rule 28-106.201, Florida Administrative Code. This petition must be received by the Office of Commission Clerk, 2540 Shumard Oak Boulevard, Tallahassee, Florida 32399-0850, by the close of business on January 7, 2016.

In the absence of such a petition, this Order shall become final and effective upon the issuance of a Consummating Order.

Any objection or protest filed in this docket before the issuance date of this order is considered abandoned unless it satisfies the foregoing conditions and is renewed within the specified protest period.

GENERAL APPLICABILITY PROVISIONS (Continued)

D. SWING SERVICE CHARGE

The Pool Manager of a Customer receiving aggregated transportation service from Company under the Natural Choice Transportation Service Rider (Rider NCTS) provides a fixed daily quantity of Gas supply and interstate pipeline transportation capacity throughout each month. The Company must increase or reduce the system's Gas supply and use of interstate pipeline capacity in an effort to balance the actual daily consumption of a Rider NCTS Customer as it differs from the fixed daily quantity of Gas being delivered by the Customer's Pool Manager during the month. The Swing Service Charge is assessed to firm Rider NCTS Customers to cover the costs incurred by the Company to maintain the above-described balance and distribution system integrity.

The bill for aggregated transportation service provided by Company to a firm Customer pursuant to Rider NCTS in any Billing Period shall be adjusted as follows:

The monthly consumption of each Rider NCTS Customer shall be multiplied by the Swing

Service Charge factors listed below, each factor being increased or decreased to the nearest \$0.0001 per therm and include the regulatory assessment tax factor of 1.00503:

<u>Rate Class</u>	<u>Recovery Factor</u>
Small General Service	\$0.0388 per Therm
Commercial Street Lighting	\$0.0071 per Therm
Natural Gas Vehicle Service	\$0.0435 per Therm
General Service 1	\$0.0208 per Therm
General Service 2	\$0.0217 per Therm
General Service 3	\$0.0234 per Therm
General Service 4	\$0.0079 per Therm
General Service 5	\$0.0058 per Therm

Revenues derived from the Swing Service Charge are credited to the Purchased Gas Adjustment Clause to the extent applicable.
