RECORDS/REPORTING

DISCUSSION OF ISSUES

ISSUE 1: Should Southern Bell Telephone and Telegraph Company's proposed tariff filings dealing with a 2-year experimental trial of the Market Reach plan in the Lake Mary Wire Center of the Sanford exchange be suspended?

RECOMMENDATION: Yes. Southern Bell Telephone and Telegraph Company's proposed tariffs dealing with a 2-year experimental trial of the Market Reach plan in the Lake Mary Wire Center of the Sanford exchange should be suspended.

STAFF ANALYSIS:

Overview

On November 29, 1989, Southern Bell Telephone and Telegraph Company (Southern Bell) proposed revisions (Attachment A) to its general subscriber's tariff for an experimental trial of the Market Reach plan (Market Reach) in the Lake Mary Wire Center of the Sanford exchange. This plan will mandate local measured service (LMS) for all Lake Mary business customers. The plan will be optional for residence customers. Southern Bell has stated that they do not plan to initially offer Market Reach in any other locations other than the Lake Mary Wire Center of the Sanford exchange. However, it can be concluded that Southern Bell will analyze the reactions and calling patterns of the Lake Mary customers during the experiment before potentially filing to expand the plans availability.

On December 14, 1989, Southern Bell proposed additional revisions (Attachment B) to its general subscriber tariffs to allow the sale of ESSX Service with measured network access registers. (T-89-622) This filing was

DOCKET NO. 891374-TL  
JANUARY 18, 1990

supposed to be filed with the original filing (T-89-597); however, was filed separately. These revisions are necessary for the trial of Market Reach and are solely dependent upon the approval of T-89-597.

The Market Reach Plan is a LATA wide calling plan which expands the local calling area and discounts toll charges along with mandating business customers to LMS. Southern Bell believes that a LATA wide plan helps respond to customer requests for expanded local calling areas and is in line with the recent movement of intraLATA toll rates towards cost. A discount on outgoing calls to the entire LATA is included as part of the basic Market Reach plan in order to make it more attractive (i.e., a discount on intraLATA toll calls helps to balance usage sensitive pricing for the local calling area). Basically, all Market Reach plan customers would have their outgoing local calls billed on a usage sensitive basis, with a cap for subscribing residence customers and a volume usage discount for business customers.

The Lake Mary wire center was chosen because customers requested such a plan and because of the ISDN and fiber to the home trials in Heathrow, a very advanced telecommunications housing development. Also, the small size of Lake Mary/Heathrow provides for a trial that is easily monitored. The Sanford exchange was chosen for this experiment because it is not considered a seasonal exchange, therefore, any months would be appropriate for conducting a usage study in this location. Other central offices were not chosen because of the additional facilities costs associated with equipping all central offices in the LATA to service in the new plan.

The proposed rates for the experimental Market Reach plan in the Lake Mary wire center in the Sanford exchange are as follows:

DOCKET NO. 891374-TL  
JANUARY 18, 1990

SANFORD MARKET REACH PLAN  
LAKE MARY CENTRAL OFFICE

RATES AND CHARGES

PROPOSED  
MONTHLY RATES

(1) <u>Residence</u>	
(a) Per access line	\$ 7.50
(2) <u>Business</u>	
(a) Per access line - w/o hunting	19.00
(b) Per access line - w/hunting	28.50
(3) <u>PBX trunk</u>	37.50
(4) <u>Direct indialing service</u>	37.50
(5) <u>ESSX, Megalink, LightGate, Channel Service NAR</u>	6.80

MARKET REACH PLAN  
WITHIN THE LOCAL CALLING AREA

USAGE CHARGES

PROPOSED RATES  
INITIAL      EACH ADDITIONAL  
MINUTE      MINUTE

(a) Band O (within Lake Mary area)	\$ .02	\$ .01
(b) Band A (calls to other telephone numbers currently included in the Lake Mary local calling area)	\$ .04	\$ .02
(c) Band B (calls to telephone numbers in the Orlando exchange)	\$ .08	\$ .04

- (1) 50% discount will be applied between 8 p.m.-8 a.m. every day, all hours Saturday and Sunday
- (2) Local messages are charged for at least one minute then rounded to the nearest 1/10th minute
- (3) Total monthly usage charges capped at \$8.50 per access line (residence only)
- (4) Market Reach business customers will be discounted 50% for usage above \$25.00 average usage line, \$50.00 average usage/line per PBX trunk, and \$50.00 average usage/line per NAR

OUTSIDE THE LOCAL CALLING AREA  
WITHIN THE ORLANDO LATA

- (1) For DDD calls to exchanges in the Orlando LATA outside the Market Reach plan local calling area, a 40% discount is applied to the MTS rates.

- 
- | (2) <u>Usage Rate</u> | <u>INITIAL MINUTE</u> | <u>EACH ADDITIONAL MINUTE</u> |
|-----------------------|-----------------------|-------------------------------|
| (a) Band B            | \$ .08                | \$ .04                        |
- (3) 50% discount will be applied 8:00 p.m. - 8:00 a.m. every day, all hours Saturday and Sunday
- (4) Local messages are charged for at least one minute of use rounded to the nearest 1/10th minute.

OPTION B

(Incoming calls within Southern Bell long distance calling zone.)  
(i.e., LATA wide)

- | (1) <u>Recurring Charges</u> | <u>Monthly Rate</u> |
|------------------------------|---------------------|
| (a) Residence                | \$ 15.00            |
| (b) Business                 | 20.00               |
| (c) PBX                      | 30.00               |
| (d) ESSX/Mega Link/Lightgate | 30.00               |
- (2) Noncoin originated, intraLATA DDD calls received from Southern Bell exchanges will be billed to Market Reach plan customers at a 50% discount on the MTS rates.
- (3) Local messages are charged for at least one minute then rounded to the nearest 1/10th minute.

Southern Bell has previously provided ballots (page 16) to each Lake Mary business customer to explain the proposed Market Reach plan. These ballots indicate their preference for/against the plan and were mailed to the

DOCKET NO. 891374-TL  
JANUARY 18, 1990

independent accounting firm of Peat, Marwick and Mitchell Company to analyze the results of the ballot. Each business customer was given a comparison bill to show what their rates would be under the proposed plan versus the current plan. The bills showed that out of 338 business accounts, 243 accounts are projected to save. Because the Market Reach plan is optional for residential customers served out of the Lake Mary wire center, Southern Bell did not provide ballots to those customers. Of the 197 business customers balloted, 135 ballots were returned, with 123 for and 11 against and 1 indicating no preference.

Staff has the following concerns regarding Southern Bell's tariff filing. The first is that Southern Bell is requiring mandatory LMS for business accounts. As stated previously, staff believes that requiring all business accounts to subscribe to Market Reach may not be in the best interest of the consumer. Such a policy could possibly squeeze the smaller business accounts as they begin to feel pressure from higher telephone business rates. Therefore, Market Reach would not be a well served plan in this instance.

Another concern staff has regarding the filing is why the Market Reach plan is being proposed only in the Lake Mary wire center of the Sanford exchange. Southern Bell states that the Market Reach plan was designed to enable the Lake Mary/Heathrow business customer to expand his market reach via lower priced calling to intraLATA points and in particular to Orlando. Since only those business accounts which would benefit will subscribe, Southern Bell states that Market Reach will be mandatory for businesses because not all the benefits of a usage sensitive plan would be experienced if only a portion of the businesses subscribed. The plan is optional for residential customers

DOCKET NO. 891374-TL  
JANUARY 18, 1990

because Southern Bell estimates that of the potential 900 out of 1418 customers that would save from the plan, only 214 (15.3%) would subscribe.

We also have some concerns that while the company has proposed local measured service, they continue to show a PBX trunk access rate which is higher than the business line access rate. One of the reasons staff might look favorably on a LMS proposal is because it can place all similarly situated users on a similar rate structure and rate level. With this differentiation between the trunk and line rate, the proposal neglects to address this point. Also relating to this concern is that Southern Bell excludes pay telephone providers (PATS) and shared tenant services (STS) lines from its tariff filing. We believe that in this plan, Southern Bell has the opportunity to introduce elements from its ONA plan, unbundling the network into its component parts. This has not been proposed.

We are also concerned whether the discontinued toll rates, cover access costs. We believe this needs to be addressed.

There are still several outstanding requests recently made by staff for which we do not have answers yet. Some of this information relates to Southern Bell's access analysis on intraLATA toll discounts rates with regard to current access charges. Also, staff requires a better understanding of the company's levelized incremental usage cost (LIUC) study and the background on LIUC vs. the basis for flat rate pricing. Staff is going to review Southern Bell's LIUC study at their office on January 23, 1990 with the company's LIUC

DOCKET NO. 891374-TL  
JANUARY 18, 1990

specialist. Staff also needs to gather more information in order to analyze the access line, trunk, and NAR differential within the filing. Further, we need the information of customer impact clarified to show customer rather than account impact. Also, we want to know what the company's goals are with this experiment and how they will measure success in meeting these goals. While the company has been extremely responsive to our requests, staff believes that additional time is warranted to make a rational recommendation for mandatory LMS (even on a trial basis) in the State of Florida.

Therefore, based on the number of concerns we have and the significance of this filing in this docket, it is staff's position that Southern Bell's proposed tariff filing for the Market Reach Plan should be suspended.

DOCKET NO. 891374-TL  
JANUARY 18, 1990

ISSUE 2: Should this docket be closed?

RECOMMENDATION: No. This docket should not be closed.

STAFF ANALYSIS: It is staff's position that Southern Bell's proposed tariff filing for a two-year experimental trial of the Market Reach plan should be suspended.

A. M. Lombardo  
Assistant Vice President -  
Regulatory Relations

November 29, 1989

RECEIVED

NOV 29 1989

Florida Public Service Commission  
Communication Department

Mr. Walter D'Haeseleer  
Director, Communications Department  
Florida Public Service Commission  
101 East Gaines Street  
Tallahassee, Florida 32301

Dear Mr. D'Haeseleer:

Pursuant to Florida Statute 354.05, we are filing herewith revisions to our General Subscriber Service Tariff. Following is a list of the pages being filed:

General Subscriber Service Tariff

- Section A3 - Contents - Eighth Revised Page 2.1  
 - Sixth Revised Page 39.7  
 - Fourth Revised Page 83.2.18  
 - Original Page 83.2.18.1  
 - Original Page 83.2.18.2  
 - Original Page 83.2.18.3  
 - Original Page 83.2.18.4

The purpose of these revisions is to provide for a trial of the MarketReach<sup>SM</sup> plan in the Lake Mary wire center of the Sanford exchange. This plan will expand the current local calling area of Lake Mary subscribers to include Orlando for outgoing calls (on a 7 digit dialing basis), decrease their IntraLATA long distance bills and provide business customers with options to further expand their market coverages. This proposed two year trial would be universal for business and optional for residence.

Acknowledgment, date of receipt and authority number of this filing are requested. A duplicate letter of transmittal is attached for this purpose.

*John  
11/29/89*

Your consideration and approval will be appreciated.

Yours very truly,

*A. M. Lombardo*

Assistant Vice President -  
Regulatory Relations

Executive Summary

INTRODUCTION

This experimental tariff filing proposes to implement the MarketReach<sup>sm</sup> plan for customers served by the Lake Mary wire center in the Sanford Exchange. This plan would replace the current Basic Local Service for all Lake Mary business customers and would be an option for residence customers. (The MarketReach<sup>sm</sup> plan would not apply to coin customers.)

PLAN DESCRIPTION

The MarketReach<sup>sm</sup> plan provides residence and business customers with access line (trunk and NAR) rates that are lower than the current associated flat rates and also provide lower rates for DDD intraLATA toll calls. Also, outgoing local calling would be extended to include the Orlando exchange on a 7 digit basis. All MarketReach<sup>sm</sup> plan customers would have their outgoing local calls billed on a usage sensitive basis, with a maximum amount billed (i.e., cap) for residence and a volume usage discount for business.

In addition to the above described basic plan, two additional options would be available to each MarketReach<sup>sm</sup> plan customer. One option would provide for an Orlando telephone number such that any call received would be call forwarded to the Lake Mary MarketReach<sup>sm</sup> plan customer and thus allow the customer to receive calls from the Orlando local calling area at no cost to the calling party. These calls would be billed to the MarketReach<sup>sm</sup> plan customer at the same local usage rates as his/her calls to the Orlando exchange. The second option would allow a MarketReach<sup>sm</sup> plan customer to pay for all non-coin originated, DDD, intraLATA toll calls received from other Company exchanges at a 50% discount on the existing toll rates plus a fixed monthly charge for the option. A MarketReach<sup>sm</sup> plan customer could subscribe to either or both of these incoming options.

RATIONALE

Southern Bell's reason for proposing the usage sensitive local rates associated with the MarketReach<sup>SM</sup> plan is that such a rate structure provides benefits to both our customers and to the company. The potential benefits are as follows:

Customers

- Promotes equity; customers pay for their Basic Local Service based on each individual's local usage
- Promotes efficiency; provides customer incentive/ability to make economic choices
- Lowers local bills for customers with average or lower than average usage
- Provides flexibility; allows customers to tailor application, service options, and cost to individual needs
- Enhances universal service objective through a lower buy-in (i.e., access line) rate for access to the network

Southern Bell

- Increases efficiency; allows efficient investment based on network utilization
- Provides flexibility; creates additional options for the company and regulators
- Enhances the attractiveness of new uses and usage made possible by technology
- Eliminates need for customer and use restrictions
- Reduces reliance on access line growth

The discount on outgoing intraLATA toll calls combined with the even lower local usage rates for calls to Orlando make the plan a more viable offering (i.e., these discounts help to balance the local usage sensitive rate structure). In addition, the 7 digit dialing to the Orlando exchange responds to customer requests for expanded local calling areas. As the name implies, the MarketReach<sup>SM</sup> plan with its discount on outgoing intraLATA calls and the option of paying for intraLATA calls received provides our Lake Mary business customers with an economic incentive to further expand their market coverage.

CUSTOMER BALLOTING

Southern Bell personnel have met with or corresponded with each Lake Mary business customer to explain the proposed MarketReach<sup>SM</sup> plan. Ballots were provided to each business customer in order for them to indicate their preference for or against the plan and mail to the independent accounting firm of Peat Marwick. (A sample ballot and the associated letter describing the plan are provided as Attachment C.) As of November 27, 1989, all 197 business customers have been provided with ballots, with 135 ballots returned to Peat Marwick. Of the 135 completed ballots, 123 indicate a preference for the MarketReach<sup>SM</sup> plan, 11 are against the plan, with 1 customer indicating no preference. The Company will continue to monitor the results of the balloting with this information available to the Commission upon request. (Note that there are 197 Lake Mary business customers but, as stated in the following Customer and Revenue Impact statement, 338 business accounts. The higher number of business accounts is due to multi-account customers.)

RELATED ENHANCED OPTIONAL EXTENDED AREA SERVICE (EOEAS) REVISION

In association with the MarketReach<sup>SM</sup> plan, the EOEAS offering for the Sanford exchange, of which the Lake Mary wire center is a part, is revised as follows:

- to indicate that the EOEAS options are not available to business customers served by the Lake Mary wire center, as these options would be superseded by the MarketReach<sup>SM</sup> plan, if approved; and
- to revise the rating of calls from Lake Mary residence Drop-back customers to the Geneva, Oviedo and Winter Park exchanges. Due to a billing system limitation, these calls must be rated at the 0-10 mileage band MTS rates instead of the current 11-22 mileage band MTS rates. (Note that since the Drop-back option would only appeal to customers with few if any local calls outside their home exchange, the revenue impact of this revision would be negligible.)

Customer and Revenue Impact

Residence

Total customers	1418	
Customers that <u>could</u> save with the plan (based on existing calling patterns)	900	63.5%
Customers projected to select the plan	217	15.3%
Average monthly savings for each	\$14.85	
Maximum monthly savings	\$253.59	
Total monthly customer savings	\$3222	
Less adjustment for potential EOEAS <sup>1</sup>	<u>-205</u>	
Projected gross monthly Southern Bell loss	\$3017	

Business<sup>1</sup>

Total accounts	338	
Avg. monthly customer savings (per account)	\$7.69	
Local only	(\$1.34)	
Calls to Orlando (including EOEAS)	\$5.25	
Other intraLATA toll	\$3.78	
Maximum monthly savings/account (lines)	\$208.52	
(trunks & NARs)	\$177.53	
Maximum monthly loss/account (lines)	\$206.31	
(trunks & NARs)	\$515.37	
Accounts that would save	243	71.9%
Projected gross monthly Southern Bell loss	\$2599	

TOTAL GROSS YEARLY SB REVENUE IMPACT (\$67,400)

Note 1 - Residence revenue adjustment due to difference between estimated and actual EOEAS percent takes and the resulting revenue loss that has yet to be realized. For business calculations, all trunk and NAR accounts that could save with EOEAS and all line accounts that could save at least \$15 per month with EOEAS were assumed to have EOEAS. Also, repression of local usage and stimulation of toll usage was assumed.

Southern Bell

## IMPORTANT NOTICE TO ALL BUSINESS CUSTOMERS IN THE LAKE MARY AREA

Please read this letter carefully. Southern Bell has proposed a new plan called MarketReach™ which, if approved by both the Lake Mary business subscribers and the Florida Public Service Commission, will be trialed in the Lake Mary area (telephone numbers beginning with 333 and 444). This is your chance to voice your choice on this important matter.

If a majority of Lake Mary business subscribers vote in favor of MarketReach and it is subsequently approved by the Florida Public Service Commission, the following rates will apply to all Lake Mary business subscribers, replacing today's rates.

### LOCAL RATES

When MarketReach is implemented, monthly access line charges will change from a flat rate per month to a usage rate structure as follows:

<u>ACCESS LINE CHARGES</u> (per month)	<u>Current</u>	<u>MarketReach</u>
Business Line	\$25.75	\$19.00
W/Hunting	13.15	9.50
PBX Trunk	57.86	37.50
ESSX NAR	26.63	6.80

All local calls will be billed based on minutes of use. For calls exceeding one minute, usage charges will be based on actual conversation time rounded to the nearest one tenth of a minute.

<u>Peak Time Period Rates</u>	<u>1st Min.</u>	<u>Add'l Min.</u>
Within Lake Mary area (telephone numbers beginning with 333 and 444)	\$ .02	\$ .01
Calls to other telephone numbers currently included in the Lake Mary local calling area. (telephone numbers beginning with 260, 263, 321, 322, 323, 327, 330, 331, 332, 339, 349, 365, 366, 539, 574, 623, 628, 629, 644, 645, 646, 647, 657, 660, 661, 668, 669, 671, 672, 677, 678, 679, 682, 695, 696, 699, 740, 767, 774, 788, 830, 831, 834, 860, 862, 869, 875)	.04	.02
Calls to telephone numbers in the Orlando Exchange	.08	.04

(OVER)

17

**Off Peak Period**

50% Discount - 8PM-8AM and Weekends

A 50% volume discount will be applied to each business line's local usage rate when local usage exceeds \$25.00 per month. The 50% volume discount will be applied to each PBX trunk and ESSX NAR when local usage exceeds \$50.00 per month. This is in addition to off peak discounts.

Local calls within the Lake Mary area, calls to other telephone numbers currently included in the Lake Mary local calling area and calls to telephone numbers within the Orlando exchange will be billed showing the total number of calls and total number of minutes.

**LONG DISTANCE RATES**

**Outgoing Calls**

Direct dialed long distance calls made from your business to locations within your LATA calling zone (see map included in brochure) will be discounted 40% from the long distance rate existing today. The 40% discount will be in addition to time of day and day of week discounts existing today.

**Incoming Calls**

When this plan is approved, the following incoming options will be available to business subscribers. One or both of the options shown below may be selected.

**I. Special Incoming Option for receiving calls from Orlando**

With this option, callers in the Orlando exchange can call you toll free. For an additional monthly fee of \$10.80 for business line accounts and \$16.20 for PBX or ESSX accounts, you will be assigned a special Orlando number. This special number may be listed at no charge in the white pages of the Orlando directory. Calls received from Southern Bell's Orlando local calling area using the special number will be billed to you as follows:

<u>Peak Period Time</u>		<u>Off Peak Period Time</u>
<u>1st Min.</u>	<u>Add'l Min.</u>	<u>8PM - 8AM and weekends</u>
\$.08	\$.04	50% discount

**II. Incoming Calls Within Your Southern Bell Long Distance Calling Zone**

With this option, callers within all Southern Bell's exchanges located in your LATA calling zone can call you at your Lake Mary number at no charge to them. If you choose this option, you will be billed an additional monthly fee per designated number of \$20.00 for business line accounts and \$30.00 for PBX or ESSX accounts. You will also be billed for 50% of the existing long distance rates that the incoming caller would normally be charged. This service will apply only to non-coin, direct dialed long distance calls received from Southern Bell exchanges within your LATA calling zone.

If MarketReach is approved by the Lake Mary business subscribers and the Florida Public Service Commission, it will replace existing optional calling plans, flat rate, and message rate telephone service within the LATA currently being offered to Lake Mary business subscribers.

If you find that you need further information prior to making your decision, please call 333-2911.

To be counted, your ballot must be returned within 30 days.

(c) Phase III	-	85.00	AASBL

##### A3.8.51 Orlando

###### A. Optional Calling Service from Orlando to West Kissimmee

###### 1. General

This calling plan allows Orlando subscribers the option of placing toll calls to West Kissimmee with a discount of 30% applied to the direct dial rate appropriate for the period in which the call was made.

When a customer subscribes to this service, the rate remains in effect for a minimum of one billing cycle period for that customer. Thereafter, it will remain in effect until discontinued by the customer with such ending period coinciding with the customer's billing cycle.

The service is available only to one or two-party Residence and Business services. It is not available on four-party, semipublic, Public Access Telephone or FX services.

As covered in A2.2.1.B of this Tariff, the resale of this service is not permitted.

##### A3.8.52 Sanford-MarketReach<sup>®</sup> Plan (Experimental)

###### A. MarketReach<sup>®</sup> Plan - Lake Mary Central Office

###### 1. General

Note 1: For locations where the two-way measurement capability is unavailable, the premium flat rate network usage package rate element will apply.

Note 2: Applicable effective dates as shown in a. preceding.

### A3. BASIC LOCAL EXCHANGE SERVICE

#### A3.8 Local Exception (Cont'd)

##### A3.8.52 Sanford-MarketReach® Plan (Experimental) (Cont'd)

###### A. MarketReach® Plan - Lake Mary Central Office (Cont'd)

###### 1. General (Cont'd)

- a. The Lake Mary Central Office of the Sanford exchange is a trial location for a usage sensitive Basic Local Exchange plan referred to as the MarketReach® plan.
- b. The MarketReach® plan replaces the current Basic Local Service for all existing Lake Mary business customers (including Shared Tenant Service) and is an option available to all residence customers. However, the MarketReach® plan is not available to subscribers of Semi-Public Telephone Service, Public Telephone Access Service for Customer Provided Equipment, or Public Telephone Service.

###### 2. Description

- a. The MarketReach® plan is a Basic Local Service pricing plan with monthly access line rates that are lower than the existing flat rates and includes the billing of outgoing local messages based on minutes of use. For outgoing messages, Orlando is added to the Local Calling Area. The plan also provides for DDD IntraLATA calling at rates that are less than existing Long Distance Message Telecommunications Service (MTS). In addition, there are two options that will provide Lake Mary MarketReach® plan customers with the ability to pay for IntraLATA toll calls received, including calls from Orlando, at rates that are lower than existing MTS rates.
- b. The monthly access line rates specified in 4. following of this Tariff provide customers with access to the local switched network and unlimited incoming messages from lines in the Sanford Local Calling Area as specified in A3.3. Outward local calls, including calls to the Orlando exchange, are priced based on the minutes of use of each call as specified in 4. following of this Tariff. Other IntraLATA messages will be discounted 40 percent from the Long Distance Message Telecommunications Service (MTS) rates, provided in Section A1E, in effect with the implementation of the MarketReach® plan.
- c. One option to the basic plan provides MarketReach® plan customers with an Orlando telephone number and an associated directory listing, if desired. (This number can be non-published at no additional charge.) Calls to that Orlando number will be forwarded to the Lake Mary customer with the associated Orlando to Lake Mary portion of the call billed to the Lake Mary customer at the same local usage rates that apply to calls from Lake Mary to Orlando, as specified in 4. following of this Tariff. There is also a fixed monthly charge associated with this option, also specified in 4. following.
- d. An additional MarketReach® plan option allows customers to pay for all non-coin, DDD IntraLATA calls received from Company exchanges at a 50 percent discount on the MTS rates in effect with the implementation of the MarketReach® plan plus a monthly fixed charge as specified in 4. following of this Tariff.

###### 3. Applications and Regulations

- a. The basic MarketReach® plan replaces all other Basic Local Service options for all Lake Mary business customers and is optional for residence customers. If a residence customer chooses the basic MarketReach® plan, it will apply to all lines on that residence account.
- b. The 40 percent discount on existing IntraLATA MTS rates applies to DDD calls within the Orlando LATA from MarketReach® plan customers. Other IntraLATA toll calls from, or billed to, Lake Mary customers are rated at the tariffed MTS rates.
- c. In order to subscribe to one or both of the Incoming Options, a customer must subscribe to the basic MarketReach® plan.

(N)

**d. Suspension of the MarketReach® plan is allowed subject to the terms and conditions specified in A2.3.16 of this tariff. During the suspension period, the monthly recurring access line rates for the service are rated at one-half their normal MarketReach® plan amounts.**

(N)

**e. During the first six months of this trial the normal service order charge will be waived for all inward and outward movement to/from the basic MarketReach® plan, including the addition and deletion of the incoming options. (This waiver does not apply to new connect service orders involving the MarketReach® plan.) Following this six month period the appropriate service order charge as specified in Section A4, will apply to all MarketReach® plan activity. Residence and business customers selecting Incoming Option A (for receiving calls from the Orlando Local Calling Area), who do not at the time of initial selection request a non-published number (for the line number assigned in Orlando), will pay a secondary service order charge if they later order non-published number service. Note that as stated above in 2, preceding, there will be no monthly recurring charge for this non-published number service.**

Dear Mr. D'Haeseleer:

Pursuant to Florida Statue 364.05, we are filing herewith revisions to our General Subscriber Service Tariff. Following is a list of the pages being filed:

General Subscriber Services Tariff

- Section A12 - Fourth Revised Page 3  
 - Fourth Revised Page 4  
 - Fourth Revised Page 5  
 - Third Revised Page 24  
 - Third Revised Page 25  
 - Fourth Revised Page 27  
 - Fifth Revised Page 28  
 - Fifth Revised Page 41  
 - Fifth Revised Page 53  
 - Second Revised Page 132

RATE AND REVENUE

The rate for measured Main Station Lines will be the same as the flat rate and message rate currently offered.

## A12. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

### A12.1 ESSX® Service<sup>1</sup> (Cont'd)

#### A12.1.2 Regulations (Cont'd)

- F. Tie lines for direct connections between a basic subscriber's system and other systems are provided primarily for communication between stations of the two systems. In such cases, rates and charges for tie line service as specified in Section A13 of this Tariff and miscellaneous line termination charges apply. In addition, these tie line connections may be arranged to provide completion of incoming or outgoing local and long distance calls through the subscriber's system to or from other systems (ESSX® service or non ESSX® service) provided such connections to the exchange or long distance network are only made one system at a time.
- G. Where completion of incoming and outgoing local and long distance calls through a subscriber's system is furnished to or from main station lines of a separate subscriber's system in another exchange or a non subscriber's system in the same or different exchange, the charges applicable for the following features apply in addition to the regular charges for the facilities connecting the systems except for Subsidiary System Arrangements furnished under the regulations specified in A12.1.12 of this Tariff.
1. Rates and charges as specified in Section B3 of the Private Line Service Tariff apply to miscellaneous lines furnished with unique access codes (trunk level access) except for tie lines furnished in connection with Subsidiary System Arrangements as specified in A12.1.12 of this Tariff.
  2. Optional features charges for ESSX® service as outlined in Section A12.1.12 apply for each trunk terminated main station line as offered in Section A12.1.7 of this Tariff, as appropriate.
- H. Where the lines are arranged to switch calls through the system to or from one or more tie lines or private lines, charges for Dial Cut-Through Arrangement as specified in A12.1.7 of this Tariff shall apply per tie line so equipped. The charge is in addition to the regular charges for the facilities connecting the systems.
- I. Dormitory service is furnished in accordance with the rules and regulations for Dormitory Communications Service specified in Section A13 of this Tariff.
- J. A system may not be provided for Intercommunication (stand alone) service only. Access to the exchange network must be provided.
- K. A mixture of Flat Rate and Message or Measured Rate Service will not be allowed within a single customer system except where that single customer system serves a Hotel/Motel or Hospital. For Hotel/Motel and Hospital applications, Message or Measured Rate Service, if provided for guest/patient service, must have a separate dial access code from the flat rate service provided for administrative stations and be restricted from use of the administrative flat rate service.
- L. Suspension of Service - With the exception of Network Access Registers, suspension of ESSX® service is not permitted.
- M. A twelve month minimum service period shall be required for subscription to ESSX® service-M or ESSX® service-L. The minimum service period as specified in Section A2 of this Tariff applies for ESSX® service-S.
- N. Touch-Tone service will be furnished subject to the regulations, specified in Section A13 of this Tariff. The rates and charges for ESSX® service include the provision of Touch-Tone Service. Rates and charges as specified in Section A13 of this Tariff do not apply for the provision of Touch-Tone Service to ESSX® service.
- O. Directory Listings will be furnished subject to the rates and regulations specified in Section A6 of this Tariff.

Note 1: Certain items which previously appeared in this section have been vintaged in 1988 and may be found in Section A112 of this Tariff.

## A12. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

### A12.1 ESSX® Service<sup>1</sup> (Cont'd)

#### A12.1.2 Regulations (Cont'd)

- P. The number of simultaneous exchange and toll network calls to and from main station lines and attendant positions of a subscriber's system is limited by the number of Network Access Registers subscribed to by the customer. Each Network Access Register may be arranged for two-way, one way incoming or one-way outgoing operation depending upon the option of the customer at the time the Network Access Register is installed. When a change in the type of operation is requested by the customer, the appropriate Service Charges as specified in Section A4 of this Tariff apply per occasion. The Central Office Line Charges (COLC) in Section A4 is applicable only to ESSX® service main station lines.
- Q. Service charges, as specified in Section A4 of this Tariff, apply to all subscriber's systems except as provided in A12.1.5 of this Tariff.
- R. ESSX® service installation charges due on an initial installation or subsequent addition may be paid in full at the time of installation or deferred over a predetermined period of time as specified in Section A22 of this Tariff.
- S. If the subscriber of an ESSX® service elects a Message or Measured Rate Service option, Message or Measured Rate Service usage charges specified in Section A3 of this Tariff are applicable on calls to locations outside the subscriber's system in addition to rates and charges in this and other tariff sections for ESSX® service and other associated services. Usage charges are not applicable on calls originated and terminated within the same subscriber's system.
- T. ESSX® service main station lines may be restricted from dialing three-digit central office and service codes by applying Code Restriction to the line. The three-digit codes which may be restricted constitute those codes to which Public Announcement, Directory Assistance or Dial-It Services (e.g. 900 and 976 calls) are assigned which could generate billing to the originating main station line. Code Restriction arrangements may also be used to prohibit toll calls to a carrier other than the Presubscribed Interexchange Carrier (dialed 10XXX). Interlata calls dialed 0- (operator handled) calls cannot be restricted. The term "Public Announcement Services" as used herein are those services which, in the judgement of the Company, furnish advertised recorded announcement messages to the general public (e.g., time, weather, sport scores and stock market reports). The Public Announcement Service central office codes will be determined by the Company and will be commonly denied access in the office serving the subscriber's systems subscribing to this service arrangement.
1. At the time a Code Restriction Arrangement is installed, the subscriber's system will be arranged for the code restriction specified by the customer and the main station lines designated by the customer will be so equipped. When the customer requests the subsequent addition or removal of code restriction on a main station line, the Service Order No Premises Visit (SONPV) charge as specified in Section A4 of this Tariff for a change in line termination applies per main station line affected except that no such charge applies when the Code Restriction Arrangement is disconnected in its entirety.
  2. Where Code Restriction applies to a particular central office code, direct outward dialed main station line access is denied to telephone numbers associated with that central office code.
  3. Code Restriction Arrangements to deny access to Directory Assistance and/or Public Announcement Services are not assured. These features are intended to limit main station line direct dialed outgoing calls but such calls may, in certain circumstances be completed and charges will apply as specified elsewhere in this Tariff.
- U. The first system established per customer within a Local Calling Area must consist of a minimum of fifteen (15) Main Station Lines. Systems installed or ordered prior to December 17, 1985 are not subject to this regulation. All additional systems must be established with a minimum of two (2) Main Station Lines.

Note 1: Certain items which previously appeared in this section have been vintaged in 1988 and may be found in Section A112 of this Tariff.

## A12. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

### A12.1 ESSX® Service<sup>1</sup> (Cont'd)

#### A12.1.2 Regulations (Cont'd)

- ~~X~~ V. ESSX® service subscribers with rates and charges applicable out of the Vintaged Section A112 of this Tariff may subscribe to features found in Section A12 of this Tariff but not offered in Section A112 of this Tariff. (T)
- ~~X~~ W. ESSX® service subscribers with rates and charges applicable out of the Vintaged Section A112 of this Tariff wishing to add or change features must apply nonrecurring charges as indicated in Section A12 of this Tariff. (T)
- ~~X~~ X. For purposes of application of End User Access Charges only, as set forth in BellSouth F.C.C. No. 4, ESSX® service main station lines for use by residents of dormitory living quarters will be considered residential service. Main station lines terminated in dormitory housing for administrative or other business use will not fall in this classification. (T)

#### A12.1.3 Definitions

##### ACCESS CODE RESTRICTION GROUP (ACRG/CAT CODES)

An ACRG will allow stations (assigned to that ACRG) access to predefined facilities. Station access to facilities is restricted by the station ACRG assignment to the predefined facilities. Up to eight ACRGs can be established by the Company for each ESSX® service group.

##### ACCESS LINES TO CUSTOMER ORIENTED FACILITIES (AUXILIARY SERVICE)

Allows dial access from ESSX® service for connection to customer oriented facilities. (Recorded Telephone Dictation, Dial Code Sending Equipment and Loudspeaker Paging.)

##### ADVANCED PRIVATE LINE TERMINATIONS

See Miscellaneous Line Terminations.

##### ATTENDANT ACCESS CIRCUIT

An attendant access circuit connects customer provided attendant terminal equipment to the serving central office. These circuits are used for the completion of calls directed to the attendant, extension of those calls to stations and attendant assistance for stations.

##### ATTENDANT CALL-THROUGH TEST (AUXILIARY SERVICE)

This feature provides the large business customer with the ability to select tie facilities, Foreign Exchange (FX) trunks, network access trunks, and intermachine groups from a customer provided terminal. From one location, the customer attendant can dial up, test and busy/verify these facilities.

##### ATTENDANT CAMP-ON AND CAMP-ON MODE OPTIONS (AUXILIARY SERVICE)

This feature allows incoming listed number calls, which the attendant attempts to complete to a busy main station line, to be held waiting and then automatically connected when the called main station line becomes available. An indication of camp-on will be given to the busy main station line each time the attendant attempts a completion.

Attendant Camp-On options are available as follows: Audible Ringing (no additional charge), Silence, Music, and Recorded Announcement.

##### ATTENDANT CONFERENCE (AUXILIARY SERVICE)

Using a six-port conference circuit, an attendant may interconnect up to five conferees on one call. The sixth port is required for attendant access.

Note 1: Certain items which previously appeared in this section have been vintaged in 1988 and may be found in Section A112 of this Tariff.

## A12. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

### A12.13 Digital ESSX® Service<sup>1</sup> (Cont'd)

#### A12.13.2 Regulations (Cont'd)

- H. Dormitory service is furnished in accordance with the rules and regulations for Dormitory Communications Service specified in Section A13 of this Tariff. (AT)
- I. A system may not be provided for Intercommunication (stand alone) service only. Access to the Exchange Network must be provided. (AT)
- J. A mixture of Flat Rate and Message or Measured Rate Service will not be allowed within a single customer system except where that single customer system serves a hotel/motel or hospital. For hotel/motel and hospital application, Message or Measured Rate Service, if provided for guest/patient service, must have a separate dial access code from the flat rate service provided for administrative stations and be restricted from use of the administrative flat rate service. (AT) (C)
- K. Suspension of Service  
With the exception of Network Access Registers, suspension of Digital ESSX® service is not permitted. (AT)
- L. A twelve month minimum service period shall be required if the subscriber's system is a Digital ESSX® service -M or L. The normal minimum service period as specified in Section A2 of this Tariff will be applicable to Digital ESSX® service-S. (AT) (AT)
- M. Touch-Tone service will be furnished subject to the regulations, specified in Section A13 of this Tariff. The rates and charges for Digital ESSX® service station lines include the provision of Touch-Tone service. Rates and charges for Touch-Tone service as specified in Section A13 of this Tariff do not apply for the provision of Touch-Tone service to Digital ESSX® service. (AT) (AT)
- N. Directory Listings will be furnished subject to the rates and regulations specified in Section A6 of this Tariff. (AT)
- O. The number of simultaneous exchange and toll network calls to and from main station lines and attendant positions of a subscriber's Digital system is limited by the number of Network Access Registers subscribed to by the customer. Each Network Access Register may be arranged for two-way, one-way incoming or one-way outgoing operation depending upon the option of the customer at the time the Network Access Register is installed. When a change in the type of operation is requested by the customer, the appropriate Service Charges as specified in Section A4 of this Tariff apply per occasion. The Central Office Line Charge (COLC) in Section A4 is applicable only to Digital ESSX® service main station lines. (AT)
- P. Service charges, as specified in Section A4 of this Tariff, apply to all subscriber's of Digital systems except as provided in A12.13.5 of this Tariff. (AT)
- Q. Digital ESSX® service installation charges are due on initial installation or subsequent additions unless deferred over a predetermined period of time as specified in Section A22 of this Tariff. (AT)
- R. If the subscriber of Digital ESSX® service elects a Message or Measured Rate Service option, Message or Measured Rate Service usage charges specified in Section A3 are applicable on calls to locations outside the subscriber's Digital system in addition to rates and charges in this and other tariff sections for Digital ESSX® service and other associated services. Usage charges are not applicable on calls originated and terminated within the same subscriber's Digital system. (AT) (C)

Note 1: Certain items which previously appeared in this section have been vintaged in 1988 and may be found in Section A112 of this Tariff. (AT)
