TARIFF FORMAT

A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the FPSC. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the FPSC follows in its tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.

C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1.
- 2.1.1.
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1.(a).
- 2.1.1.A.1.(a).I.
- 2.1.1.A.1.(a).I.(i).
- 2.1.1.A.1.(a).I.(i).(1).

D. Check Sheets - When a tariff filing is made with the FPSC, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The tariff user should refer to the latest Check Sheet to find out if a particular sheet is the most current on file with the FPSC.

SECTION 3 - DESCRIPTION OF SERVICE

3.1 Timing of Calls

- 3.1.1 Long distance usage charges are based on the actual usage of INTEX's network. Chargeable time begins when the called party answers the call. Chargeable time ends when either party "hangs up" thereby releasing the network connection.
- 3.1.2 Unless otherwise specified in this tariff, the minimum call duration for billing purposes is thirty seconds.
- 3.1.3 Unless otherwise specified in this tariff, usage is measured and rounded to the next higher six second increment for billing purposes.
- 3.1.4 There is no billing applied for incomplete calls.

3.2 Minimum Call Completion Rate

Customers can expect a call completion rate of not less than 90% during peak use periods for all Feature Group D Equal Access 1+ services. The call completion rate is calculated as the number of calls completed (including calls completed to a busy line or to a line which remains unanswered by the called party) divided by the number of calls attempted.

SECTION 3 - DESCRIPTION OF SERVICE, CON'T.

3.3 Service Offerings

International Telecommunications Exchange Corporation offers outbound message telecommunications service, inbound 800 number service, and travel card service to its Customers. Rates for these services may vary by call duration, type of access, time of day, and percentage of daytime traffic.

Rate banding in Section 4 reflects an average percentage of daytime traffic. This percentage is based on an historical analysis of the Customer's monthly billing prior to subscribing to INTEX services. A re-evaluation of an existing Customer's percentage of daytime traffic may result from one of the following:

- 1) A written request from the Customer for a re-evaluation by the Company. Re-evaluations are performed within sixty (60) days of receipt of the Customer's request.
- 2) The Company may perform periodic audits at its discretion. Customers moved to a higher band are given thirty (30) days written notice of a change in rate. Rates for Customers moved to a lower band will be effective in the billing cycle following the audit.

3.3.1 INTEX NET Long Distance Service

INTEX NET Long Distance Service allows Customers to place direct dialed calls to terminating locations. Customers are presubscribed to the INTEX network. Calls are placed by dialing "1+" and the destination telephone number, including the area code if applicable. Customers may access INTEX NET Long Distance Service through switched or dedicated access facilities.

3.3.2 INTEX 800 Service

INTEX 800 Service is an inward WATS service. It permits termination of interstate and intrastate calls from diverse geographic locations to customer local exchange lines or to dedicated access facilities. With INTEX 800 Service, the Customer is billed for the call rather than the call originator.

3.3.3 INTEX Travel Card Service

INTEX Travel Card Service allows Customers to place direct dialed calls to terminating locations from locations other than their normal place of business. An 800 access number must be dialed to reach the Carrier. A customer-specific authorization code must also be dialed in addition to the destination telephone number.

SECTION 4 - RATES

4.1 General

Each Customer is charged individually for each call placed through the Carrier. Customers are billed based on their use of International Telecommunications Exchange Corporation's long distance service. Rates vary by call duration, time of day, and originating or terminating access type. No installation charges apply.

Special access channels, if utilized, are provided and billed by the special access provider as legally defined in FPSC Rules and Orders. Special access channels may be provided by the local exchange telephone company or by carriers other than the LEC only in accordance with FPSC rules or if the special access channel is jurisdictionally interstate. Charges for the special access channel are determined by the special access provider.

4.2.2 Discounts for Hearing Impaired Customers

A telephone toll message which is communicated using a telecommunications device for the deaf (TDD) by properly certified hearing or speech impaired persons or properly certified business establishments or individuals equipped with TDDs for communicating with hearing or speech impaired persons will receive, upon request, credit on charges for certain intrastate toll calls placed between TDDs. The credit to be given on a subsequent bill for such calls placed between TDDs will be equal to the difference between the rate that would normally apply at the originating location and the next lowest percentage-of-daytime band rate for that same call based on the following table:

Originating Rate Code	Discount Rate Code

O1	H1

Discounts do not apply to add on charges for Travel Card Service, Directory Assistance, monthly recurring charges, or calls where H2 rate code charges would normally apply.
