ORDER APPROVING TARIFF

BY THE COMMISSION:

On February 19, 1992, AT&T Communications of the Southern States, Inc. (AT&T-C) filed a proposed tariff to enhance Plan D service.

AT&T Plan D service is a discount toll plan, targeted toward small business customers whose monthly toll charges average from \$50 to \$2,000 per month. This plan permits customer dialed outward calling from single or multiple customer locations to stations within Florida. Intrastate AT&T Plan D is an add-on to the interstate AT&T Plan D service and is only available to customers who subscribe to the interstate service.

When a customer subscribes to Plan D, he must indicate each location as either Type 1 or Type 2. A Type 1 location is comprised of all originating telephone numbers that are associated with a single LEC billing telephone number (BTN). The number of originating telephone numbers at a Type 1 location is unlimited, and a single AT&T Plan D service permits up to 50 BTNs to be designated as Type 1 locations. A Type 2 location allows for at most two originating telephone numbers per billing telephone number, and a maximum of five BTNs may be designated as Type 2 locations under the same Plan D service. Service Type 2 must be used in conjunction with Service Type 1.

This tariff proposes to increase the BTNs for Service Type 1 from a maximum of 50 to 70 BTNs and to increase Service Type 2 BTNs from a maximum of five to ten. The Company states that this will allow greater customer flexibility.

This tariff also revises the volume discount schedule associated with the Plan D service. The original discount schedule provided for a 10% discount for monthly changes in excess of \$200.
