

910163-TL

Southern Bell Tel. & Tel. Co.
FPSC Docket No. 910163-TL
Late Filed Exhibit Requests
June 17, 1992
Late Filed Exhibit No. 47
Page 1 of 5

Request: All documents, including those relating to the duration of the problem, regarding the correction of a timing bug. This problem related to a software fix designed to prevent clear time from showing prior to an intermediated status code time. Phil Peterson should respond to this late filed exhibit.

Response: IMOS software release G3I1.M.3 corrected the problem described above. Attached is the AT&T document shipped with the software release outlining the system trouble reports fixed in the release, plus a description of the trouble (page 25).

This particular system trouble, TR 9202105147, was filed with AT&T on July 20, 1989.

The software release was delivered to BellSouth in September, 1991, and installed on the Florida IMOS Front-Ends on October 2, 1991.

THE ATTACHED DOCUMENTS SHOULD BE TREATED AS PROPRIETARY INFORMATION - THEY INCLUDE INFORMATION RELATIVE TO THE SECURITY OF THE IMOS SYSTEM.

Phil Peterson

17. MODULE: /lms/bis/TEST

ORIG: 920108147

DOCUMENT: none

DESCRIPTION OF MODIFICATION AND TESTING INFORMATION:

RM, DFC and ELD items will no longer be considered for backdating beyond the last EST status time.

To test, do a GST with the DATE/TIME argument older than the last status, and verify the new status has a date/time not older than the last status.
