

VOTE SHEET

DATE: June 8, 1993

RE: DOCKET NO. 930455-WS - Request for approval of tariff filings for authority to continue existing billing policy in Broward County by ROYAL UTILITY COMPANY.

Issue 1: Recommendation that the proposed tariffs should be denied as filed. The utility should be required to charge rates consistent with the charges for the meter sizes established in its existing tariffs. The utility should begin billing the tariffed rates for all customers effective with the first full billing cycle following the issuance of the order. Prior to billing the tariffed rates, the utility should notify the affected customers of the change in the current billing practice.

Docket No. 930455-WB

June 8, 1993

Issue 2: Recommendation that, upon request by the customer, the utility should change out, at its own expense, the 1" meters for a 5/8" x 3/4" meter, provided the customer's consumption level justifies the installation of a 5/8" x 3/4" meter. The utility should not be required to refund the difference in the large meter and small meter fee. The utility should notify the affected customers that they may request a meter change at the utility's expense. This notice should be included with the notice recommended in Issue No. 1 and should be reviewed by the staff prior to mailing to utility customers.

Issue 3: Recommendation that this docket be closed at the conclusion of the proposed agency action period in Issue No. 2, if no timely protest is filed.
