EXECUTIVE SUMMARY

Introduction

The purpose of this filing is to introduce Message Waiting Indication - without Audible Stutter Dial Tone.

Description of Present Tariff

This feature is not in the present tariff.

Description of Proposed Tariff

The proposed tariff introduces Message Waiting Indication - without Audible Stutter Dial Tone.

Technical Information

Due to feature interaction between Call Forwarding, Rotary Service (hunting), and Message Waiting Indication - Audible (MWI-A), all lines in a rotary hunting group in which MWI-A exists must be equipped for the Message Waiting Indication - without Audible Stutter Dial Tone feature to allow the Call Forwarding feature to function.

Market Information

This will allow the preceding features to function as intended for those customers who require the combined use of all these features.

### A13. MISCELLANEOUS SERVICE ARRANGEMENTS

#### A13.45 Reserved for Future Use

(T)

#### A13.46 Simplified Message Desk Interface (SMDI)

##### A13.46.1 General

- A. Simplified Message Desk Interface (SMDI) is a feature that provides an interface to a customer-provided message system. Call related information is passed to the customer's message system via a data link from the central office to the customer's premises. This information includes the originating telephone number (intra-office only), called telephone number, and the reason for forwarding the call (busy or don't answer).
- B. SMDI has the capability to activate and deactivate Message Waiting Indication - Audible (see A13.47) on an end user's line on an intra-office basis.

##### A13.46.2 Regulations

- A. SMDI is furnished only from central offices which have been arranged to provide this feature. The feature is provided subject to the availability of facilities.

##### A13.46.3 Rates and Charges

- A. Applicable service order charges as specified in Section A4. of this Tariff will be incurred in addition to the rates and charges following.

#### A13.47 Message Waiting Indication - Audible (MWI)

##### A13.47.1 General

- A. Message Waiting Indication - Audible (MWI) is a feature that enables end users to receive Message Waiting Indication on their lines. SMDI (see A13.46) is used to activate or deactivate an audible alerting signal (stutter dial tone) on the end user's line notifying the end user that a message is waiting.

##### A13.47.2 Regulations

- A. MWI is furnished only from central offices which have been arranged to provide this feature. The feature is provided subject to the availability of facilities.
- B. In certain digital switches, when Call Forwarding and Rotary Service (as defined in A3.6.1) are provided on a group of station lines and one or more of the station lines in that group are equipped with the Message Waiting Indication - Audible feature, the remaining station lines in the group must be provisioned for Message Waiting Indication - without Audible Stutter Dial Tone.
