4. The Conservation Cost Recovery Factor was calculated in accordance with the methodology which has been previously approved by the Commission in this docket. The factor is designed to recover the projected conservation program expenses of SJNG for the twelve month period ending March 31, 1996 adjusted for the net true-up (which includes the estimated conservation true-up for the six month period ending September 30, 1994), as well as interest calculated in accordance with the methodology established by the Commission.

5. SJNG projects total conservation program expenses, net of all programs revenue of \$16,000.00 for the six month period ending March 31, 1996. The estimated net true-up for the twelve months ending September 30, 1995 is an underrecovery of \$22,974.00. After increasing the projected conservation expenses by the amount of this underrecovery, a total of \$38,974.00 remains to be collected during the twelve months ending March 31, 1996. Dividing this total by the projected sales for the period of 1,154,308 therms, and expanding for taxes, results in the conservation adjustment factor of
