Dataphone Select-A-Station is a multi-station, private line data system designed to establish point-to-point connections rapidly between a master station and a number of remote stations, one at a time, for the purpose of alarm monitoring and detection. Units for the service are no longer manufactured and supplies are limited to SBT's existing stock.

The service will be discontinued one year after the obsolescence date. The Company states it will provide notice to customers sixty (60) days after approval of the tariff. Currently there are 781 customers who generate total annual revenue of \$72,400 for Data Select-A-Station Service. SBT asserts the revenue produced by this service is declining monthly.
