Docket No. 960288-SU

APPLICATION FOR APPROVAL OF REUSE PROJECT PLAN

Applicant, ALAFAYA UTILITIES, INC., by and through its undersigned attorneys and pursuant to Section 367.0817, Florida Statutes, files this application for approval of a reuse project plan, and in support thereof states:

1. The name and address of the applicant is:

Alafaya Utilities, Inc.  
1067 McKinnon Avenue  
Oviedo, Florida 32765

2. The name and address of the person authorized to receive notices and communications in respect to this application is:

Martin S. Friedman, Esquire  
Rose, Sundstrom & Bentley  
2548 Blairstone Pines Drive  
Tallahassee, Florida 32301

3. A description of the reuse project and five effluent disposal options is contained in Section 5 of the Alafaya Utilities, Inc. Wastewater Reuse Study prepared by Hartman & Associates, Inc., dated February, 1996, which is attached hereto and incorporated herein by reference.

4. On July 15, 1987, Alafaya Utilities, Inc. was issued Construction Permit No. DC59-13440 by the Florida Department of Environmental Protection for the construction of a 0.448 MGD wastewater effluent disposal system for spray irrigation on the

Twin Rivers Golf Course. The Florida Department of Environmental Protection subsequently issued Permit No. D059-175856 which included operation of the spray irrigation system for disposal of effluent on the Twin Rivers Golf Course. Alafaya Utilities, Inc. has not yet applied for permits for the reuse projects contained in the Wastewater Reuse Study pending this Commission's approval of one or some of the five reuse scenarios discussed in the Wastewater Reuse Study.

5. The reuse project is recommended by Section 403.064, Florida Statutes, and is required to be filed with the Commission by Alafaya Utilities, Inc. pursuant to a Memorandum of Intent with the City of Oviedo, which was part of a settlement between the City of Oviedo and Alafaya Utilities, Inc. by which the City of Oviedo withdrew its protest to the transfer of majority organizational control of Alafaya Utilities, Inc.

6. The number and identify of the project's proposed reuse customers are set forth in the four reuse scenarios set forth in Section 5 of the Wastewater Reuse Study.

7. The projected costs associated with each of the five scenarios for reuse projects are set forth on pages 5-12, 5-17, 5-21, 5-28, and 5-36 of the Wastewater Reuse Study. A summary of the costs for the five scenarios is set forth on page ES-6 of the Wastewater Reuse Study.

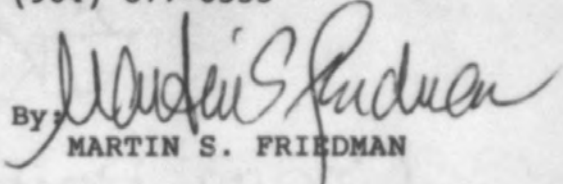

8. Alafaya Utilities, Inc. proposes to recover the project's costs through a combination of connection charges, rates to the reuse customer, and increases in rates to wastewater customers, in

such relative amounts as approved by the Commission. When compared to other reuse systems with rates and charges approved by the Commission. The expansion of Alafaya Utilities, Inc.'s reuse capabilities appears viable.

9. Upon approval of the Commission, Alafaya Utilities, Inc. will proceed expeditiously to completion of the project. The in service schedule depends upon the scenario or series of scenarios approved by the Commission, particularly since scenario four is dependent upon favorable Commission action in Docket No. 95-1419-SU.

Respectfully submitted on this  
6th day of March, 1996, by:

ROSE, SUNDSTROM & BENTLEY
