FLORIDA PUBLIC SERVICE COMMISSION Capital Circle Office Center, 2540 Shumard Oak Boulevard Tallahassee, Florida 32399-0850

MEMORANDUM

APRIL 25, 1996

DIRECTOR OF RECORD AND REPORTING TO

FROM :

DIVISION OF ELECTRIC AND GAS (WHEELER, BREMAN)

DIVISION OF LEGAL SERVICES (WAGNER) (W)

DOCKET NO. 960325-ET - REVISION OF TARIFFS ON UNDERGROUND RE

DISTRIBUTION DIFFERENTIAL COSTS FOR FLORIDA POWER AND LIGHT COMPANY, FLORIDA POWER CORPORATION, GULF POWER

COMPANY AND TAMPA ELECTRIC COMPANY

MAY 7, 1996 - TARIFF FILING AGENDA:

INTERESTED PERSONS MAY PARTICIPATE

CRITICAL DATES: MAY 11, 1996: 60-DAY TARIFF SUSPENSION DATE

I:\PSC\EAG\WP\950325;RCM SPECIAL INSTRUCTIONS:

CASE BACKGROUND

Florida Power Corporation (FPC), Florida Power & Light Company (FPL), Gulf Power Company (Gulf), and Tampa Electric Company (TECO) have filed updated tariffs and charges which are applicable to the installation of underground residential distribution service. Rule 25-6.078, Florida Administrative Code requires that these charges be updated annually. The charges represent the additional costs to provide underground service in place of standard overhead service. The proposed changes were accompanied by work papers explaining their derivation.

DOCUMENT NUMBER - DATE

04757 APR 25 %

ISSUE 1: Should the Commission suspend Gulf Power Company's updated tariff sheets and charges associated with the installation of underground electric distribution facilities?

RECOMMENDATION: Yes. (WHEELER, BREMAN)

STAFF ANALYSIS: The method used by Gulf to determine its underground residential distribution charges this year differs from that used in the past. In addition, Gulf has indicated to the staff that they intend to file revisions to the tariffs that were filed initially. As a consequence, the staff is unable to make a recommendation regarding Gulf's tariff changes at this time, and the tariffs should be suspended to allow time for additional discovery.

April 25, 1996
Docket No. 960325-EI

ISSUE 2: Should the Company's, Tampa E Corporation's updated installation of undergreen RECOMMENDATION: Yes

ISSUE 2: Should the Commission approve Florida Power & Light Company's, Tampa Electric Company's, and Florida Power Corporation's updated tariff sheets and charges associated with the installation of underground electric distribution facilities?

RECOMMENDATION: Yes. The changes are appropriate and should be approved. (WHEELER, BREMAN)

STAFF ANALYSIS: The underground residential distribution (URD) tariffs provide customers with standard charges for certain types of new underground service. Each utility develops the charges based on the same three model subdivisions: a 210-lot low-density single-family home subdivision, a 176-lot high density subdivision served by individual meters, and a 176-lot high density mobile home subdivision served by ganged meters.

This year the utilities are utilizing a new subdivision design for developing the differential for low-density subdivisions. The new design was adopted to reflect the typical subdivision being built today, and was approved for use in the 1996 filings in Docket No. 951199-EI. As reflected in the new design, subdivisions typically employ more curved streets than they have in the past.

The differential rates for each model subdivision are developed by estimating the cost per lot of both underground service and overhead service. The difference between these numbers is the per lot charge that customers must pay when they request underground service in lieu of standard overhead service. The estimates are based on each company's standard engineering and design practices, and incorporate company-wide material costs and labor rates. Table 1 below shows the proposed 1996 differentials.

TABLE 1

1996 UNDERGROUND PER LOT DIFFERENTIAL COSTS

RESIDENTIAL SUBDIVISIONS	FPC	FPL	TECO	GULF
Low Density	\$288	\$277	\$251	N/A
High Density Individual Meters	\$151	\$193	\$195	N/A
High Density Ganged Meters	\$31	\$0	N/A	N/A

Because TECO does not install a large number of ganged meter high density subdivisions, they have not developed a differential for this type of installation. FPL's differential for their ganged meter high density subdivision is \$0 because the differential costs for this subdivision were found to be minimal (\$3.16). FPL has determined that it would not be cost-effective to bill such a small differential, and has rounded the differential to zero. Staff believes that this is reasonable.

In addition to changes to the differentials for each of the subdivision types, the utilities also proposed changes to the credits they offer customers who chose to do their own trenching or other work. Changes were also proposed to the charges for other types of underground service, such as underground service laterals from overhead lines and the undergrounding of primary feeder mains.

FPC has also proposed changes to its fees for binding cost estimates for commercial and residential conversion to underground facilities which are not covered by the tariff for new residential subdivisions. These fees cover the engineering design time required to provide a cost estimate which is valid for 180 days.

Tables 2, 3, and 4 show comparisons between the existing and proposed underground differentials for each subdivision type.

TABLE 2

1996 OVERHEAD VS. UNDERGROUND PER LCT COST DIFFERENTIALS

210-Lot Low- Density Subdivision	1995 Existing	1996 Proposed	Percent (%) Change
FPC	\$256.50	\$288.01	12.28
FPL	\$329.33	\$276.85	-15.94
TECO	\$273.75	\$250.67	-8.43
GULF	N/A	N/A	N/A

TABLE 3

1996 OVERHEAD VS. UNDERGROUND PER LOT COST DIFFERENTIALS

176-Lot High-Density Individual Meters	1995 Existing	1996 Proposed	Percent (%) Change
FPC	\$174.89	\$151.46	-13.40
FPL	\$182.32	\$192.99	5.85
TECO	\$183.44	\$194.80	6.19
GULF	N/A	N/A	N/A

TABLE 4

1996 OVERHEAD VS. UNDERGROUND PER LOT COST DIFFERENTIALS

176-Lot High-Density Ganged Meters	1995 Existing	1996 Proposed	Percent (%) Change
FPC	\$40.84	\$30.78	-24.63
FPL	\$ 8.46	\$ 3.16	-62.65

Staff has reviewed all the proposed changes and recommends that they be approved. The attached Schedules 1 through 4 are for informational purposes. Schedule 1 contains a comparison of present and proposed underground and overhead per unit costs segregated into labor and material costs. Schedule 2 contains a series of graphs which show the total underground and overhead costs for each subdivision type for years 1975 through 1995. Schedule 3 provides a detailed breakdown of the overhead and underground per lot costs which were used to arrive at the differential charges. Schedule 4 shows for each company the total numbers and percentages of customers at year end which were served from underground and overhead lines for the years 1988 through 1995.

ISSUE 3: What are the appropriate effective dates for the revised
tariffs?

RECOMMENDATION: FPL: June 6, 1996. FPC: May 7, 1996.

TECO: May 7, 1996. (WAGNER)

STAFF ANALYSIS: If the Commission approves the revised tariffs, they should become effective immediately, with the exception of FPL, who requested that their tariffs become effective 30 days from the date of the Commission vote approving the tariffs.

ISSUE 4: Should the Commission's decisions to approve the tariff revisions for the updated tariff sheets and charges associated with the installation of underground electric distribution facilities be severable for each utility?

RECOMMENDATION: Yes. (WAGNER)

STAFF ANALYSIS: Staff recommends that the issues relative to each utility be severable from the others and if a protest is filed it will be specific to the respective utility's proposed tariff. Staff recommends that a protest of one proposed utility's tariff will not delay or prevent another utility's proposed tariff revision from becoming final.

ISSUE 5: Should this docket be closed?

RECOMMENDATION: No. This docket should remain open pending resolution of Gulf Power Company's updated tariff. If no timely protests are filed to the tariff revisions for FPL, FPC, and TECC (ISSUE 2) then as to those utilities this docket should be automatically closed. Staff, however, recommends that in the event a protest is filed specific to FPL's, FPC's, or TECO's tariff (ISSUE 2), within 21 days from the issuance date of the order, the tariff should remain in effect with any increase held subject to refund, pending resolution of the protest for that particular utility. (WAGNER)

STAFF ANALYSIS: Staff recommends that this docket should remain open pending resolution of Gulf Power Company's updated tariff sheets and charges associated with the installation of underground electric distribution facilities. (ISSUE 1). Staff, however, recommends that in the event a protest is filed specific to FPL's, FPC's, or TECO's tariff (ISSUE 2), this docket shall remain open for that respective utility's tariff. If no timely protest is filed regarding FPL's, FPC's, or TECO's tariff, this docket should be closed regarding these utilities.

ELECTRIC UTILITIES OVERHEAD AND UNDERGROUND COSTS

SCHEDULE 3 Page 5 OF 5 Docket 960325-E

1996 NOTES

- (a) "MATERIAL" INCLUDES SALES TAX.
- (b) "SERVICE" FPL INCLUDES METER

FPC & TECO - INCLUDES METER AND METER SOCKET

- "STORES HANDUNG" FPC 10% (1995), 11% (1994), 13% (1993, 1992) OF ALL MATERIAL EXCEPT TRANSFORMERS AND METERS.
 - FPL 10.9% (1995), 9.33% (1994), 7.50% (1993), AND 10.02% (1992) OF ALL MATERAL EXCEPT METERS.
 4.67% (1994), 3.75% (1993), AND 5.01% (1992) OF METERS.

TECO - 10% OF ALL MATERIAL (1985, 1994, 1993, & 1992)

- (d) "LABOR" INCLUDES ADMINISTRATIVE EXPENSES, GENERAL EXPENSES AND TRANSPORTATION.
- (e) "ENGINEERING" -

FPC - 15% (1994, 1993, AND 1992) OF ALL MATERIAL AND LABOR EXCEPT TRANSFORMERS AND METERS.

FPL - 21.61% (1985), 22.41 (1994), 19.75% (1993), AND 18.47% (1992) OF ALL MATERIAL AND LASOR.

TECO - LOW DENSITY
OVERHEAD: 14% (1995), 20% (1994), 17% (1993), AND 16% (1992) OF LABOR.
UNDERGROUND: 8% (1995), 11% (1994), 9% (1993), AND 8% (1992) OF LABOR.

HIGH DENSITY
 OVERHEAD: 17% (1995), 21% (1994), 23% (1993) AND 21% (1992) OF LABOR.
 UNDERGROUND: 11% (1995), 13% (1994), 12% (1993), 11% (1992) OF LABOR.

FPL HAS ROUNDED THE ACTUAL DIFFERENTIAL COST TO ZERO.
