Mr. Walter D. Haesleer
Florida Public Service Commission
Division of Communications
2540 Shumard Oak Boulevard
Tallahassee, FL 32399-0800

**RE: Quincy Telephone Company - Advanced Calling Services**

Dear Mr. Haesleer:

Enclosed is the original and four (4) copies of the following tariff pages:

Section A13, First Revised Contents Sheet No. 4
First Revised Sheet No. 33-34
First Revised Sheet No. 36-37
Original Sheet No. 37.1
First Revised Sheet No. 38-41
Original Sheet No. 42

This tariff submission adds Caller ID - Deluxe (Name and Number) and Pay-Per-Use Call Return and Repeat Dialing to the Advanced Calling Services at Quincy Telephone Company. In addition, Caller ID Blocking (per call and per line) will block the delivery of the customer's number and name. Lastly, Anonymous Call Rejection is now packaged with Caller ID Services.

Enclosed you will find:

1. The proposed tariff sheets as indicated in this letter.
2. A coded copy of the tariff sheets that compare existing to the proposed.
3. A separate copy of the cover letter and self addressed envelope for you to return acknowledging receipt of the tariff filing.

If you have any questions, please contact me at (608) 845-4153.

Sincerely,

Handwritten signature of Amy E. Clark in cursive.

EFFECTIVE: AUG 20 1994

MISCELLANEOUS SERVICE ARRANGEMENTS

L. ADVANCED CALLING SERVICES

1. General

Advanced Calling Services (ACS) is a group of telephone company central office call management features offered in addition to basic telephone company services. ACS consists of the following:

a. Call Return

This feature enables a customer to place a call to the telephone number associated with the most recent call received whether or not the call was answered or the number is known. The customer can dial a code to request that the network place the call.

If the called line is not busy, the call is placed. If the called line is busy, a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next 30 minutes both the calling and the called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone the call will automatically be placed.

This feature is not available on operator handled calls. In connection with Call Return, ~~the company will deliver all numbers, subject to technical limitations, including telephone numbers associated with Non-Published Listing Service.~~

if the main number is not available, the system will attempt to call the alternate number.

If the incoming call is from a caller served by a PBX, only the main number of the PBX is transmitted and available for Call Return.

If the incoming call originated from a multi-line hunt group, the telephone number transmitted and Call Returned will always be the main number of the hunt group, unless, facilities permitting, the telephone numbers are identified within the group.

MISCELLANEOUS SERVICE ARRANGEMENTS

L. ADVANCED CALLING SERVICES - Continued

1. General - Continued

b. Repeat Dialing

Repeat Dialing, when activated, will automatically redial the last number the customer attempted to call. ~~If the called line is idle, the call will be placed.~~

If the called line is busy, a confirmation tone is heard, the customer hangs up and a queuing process begins. For the next 30 minutes both the calling and the called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone the call will automatically be placed.

c. Priority Ringing

Priority Ringing provides a distinctive ringing pattern to the subscribing customer for up to six specific telephone numbers.

The customer creates a screening list of up to six telephone numbers through an interactive dialing sequence. When a call is received from one of the predetermined telephone numbers, the customer is alerted with a distinctive ringing pattern. Calls from telephone numbers not included on the screening list will produce a normal ring.

If the customer subscribes to Call Waiting and a call is received from a telephone number on the Priority Ringing screening list while the line is in use, the Call Waiting tone will also be distinctive.

When a telephone number on the Priority Ringing screening list also appears on the Preferred Call Forwarding list, the Preferred Call Forwarding will take precedence. Likewise, when the same number is shown on the Call Rejection list, the call will be blocked.

MISCELLANEOUS SERVICE ARRANGEMENTS

L. ADVANCED CALLING SERVICES - Continued

1. General - Continued

e. Call Rejection - Continued

If the customer also subscribes to Preferred Call Forwarding and/or Priority Ringing and the same telephone numbers appear on those screening lists, Call Rejection will take precedence.

This feature will not work if the incoming call is from a telephone number in a multiline hunt group unless the telephone number is the main telephone number in the hunt group, or is telephone number identified.

f. Special Call Acceptance

Special Call Acceptance allows customers to automatically screen incoming calls by creating a list of phone numbers from which the customers is willing to accept calls. A call from a phone number not on the customers' list are sent to an announcement that informs the caller that the customer is not receiving calls at this time. Each list may have up to six numbers.

g. Call Trace

Call Trace enables the customer to initiate an automatic trace of the last call received.

Upon activation by the customer, the network automatically sends a message to the Company equipment indicating the calling number, the time the trace was activated, and in some locations, the time the offending call was received. The customer using this feature would be required to contact the Telephone Company for further action. The customer is not provided the traced number.

Only calls from ~~within the same ACS capable area~~ are traceable using Call Trace.

EFFECTIVE: ^{June 2, 1994} ~~AUG 20 1994~~

MISCELLANEOUS SERVICE ARRANGEMENTS

L. ADVANCED CALLING SERVICES - Continued

1. General - Continued

h. Caller ID - Number Delivery

This feature enables the customer to view on a display unit the Directory Number on incoming telephone calls.

When Caller ID - Number is activated on a customer's line, the Directory Numbers of incoming calls are displayed on the called Customer Provided Equipment during the first long silent interval of the ringing cycle.

Any customer subscribing to Caller ID - Number delivery will be responsible for the provision of a display device. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein. ^{The Company will forward all telephone numbers where technically feasible.}

If the incoming call is from a caller serviced by PBX, only the main number of the PBX is transmitted and available for display.

If the incoming call originated from a multiline hunt group, the telephone number transmitted will always be the main number of the hunt group, unless, facilities permitting, the lines are Telephone Number identified within the group.

Calling party number is not available on operator handled calls.

^{or ID} 1. ~~Calling Number Delivery~~ Blocking - Per Call

^{or ID} ~~Calling Number Delivery~~ Blocking - Per Call allows subscribers to temporarily prevent the transmission of that customer's Directory Number and thus control its availability to the called party. The transmission of the Directory Number can be temporarily prevented on an as needed basis by dialing a preassigned access code prior to making a call. This action must be repeated each time a call is made to prevent the transmission of the Directory Number.

Handwritten notes: Any customer... included in the Caller ID Number... all originating from a telephone number which has selected a blocking option will automatically be rejected unless a customer subscribes to Caller ID Number Delivery

Handwritten notes: Insert Caller ID Section on Original Sheet No 37

Handwritten notes: Material moved to first sheet Sheet No 38

or ID *Per Line*
k. ~~Calling-Number-Delivery~~ Blocking-Permanent

This feature, when established on a customer's line, enables the calling customer to permanently prevent transmission of their Directory Number on all outgoing calls placed from the customer's line.

This service is available upon request, at no charge, to the following entities: (a) established shelters of private, non-profit and publicly funded domestic violence intervention agencies; and (b) federal, state, and local law enforcement agency offices.

or ID *Per Line*
~~Calling-Number-Delivery~~ Blocking - Permanent is established and/or removed from the customer's line via a service order.

j. Anonymous Call Rejection

This feature allows customers to automatically reject incoming calls when the call originated from a telephone number which has invoked a blocking feature that prevents the delivery of their number to the called party. When Anonymous Call Rejection is activated on the customer's line and an incoming call marked private is received, the called party's telephone will not ring.

The call will be routed to an announcement and subsequently terminated. The announcement informs the calling party that the number the caller is trying to reach will not accept the call as long as the calling number is not delivered. Incoming calls are checked for acceptance or rejection by Anonymous Call Rejection regardless of the current state of the ACS customer's line (e.g., off hook or idle.)

A service order is required to establish or discontinue Anonymous Call Rejection. Subsequent to establishment, the feature can be activated and deactivated at the customer's discretion through the use of preassigned feature access codes.

2. Regulations and Limitations of Service

- a. ACS is provided subject to the availability of facilities. Additionally, the features described will only operate on calls originating and terminating within and between other compatible ACS service equipped offices. Also feature screening lists can only effectively operate with telephone numbers of subscribers served out of such compatible ACS service equipped offices.
- b. ACS is available to single party residence and business customers.
- c. ACS basic features cannot be provisioned with Company provided Public and Semi-Public Telephone Service, Customer Owned Coin Operated Telephones, toll terminals, trunks or some remote switching locations.
- d. Appropriate service order charges apply except during Company selected periods of special promotion.
- e. The Company will deliver all ^{numbers} subject to technical limitations, including telephone numbers associated with Non-Published Service as described in other sections of this tariff unless the calling party subscribes to and/or has activated ~~Calling Number Delivery Blocking~~.
- f. Calling party number information via Call Trace is not available on operator handled calls.

Calling party ~~number~~ information via Call Trace and Caller ID - Number Delivery are each intended solely for the use of the subscriber of these features. Resale of this information is prohibited by this Tariff.
