- M - Moved from another Tariff Location
- N - New
- R - Change Resulting in a Reduction to a Customer's Bill

TARIFF FORMAT

- A. Sheet Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the FPSC. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the FPSC follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff pages in effect. Consult the check sheet for sheet currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).1.
 - 2.1.1.A.1.(a).I.(1).
 - 2.1.1.A.1.(a).I.(1).(1).
- D. Check Sheets** - When a tariff filing is made with the FPSC, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the FPSC.

Credit allowances for interruptions of service which are not due to the Company's testing or adjusting, to the negligence of the Customer or Subscriber, or to the failure of channels, equipment and/or communications systems provided by the Customer or Subscriber, are subject to the general liability provisions set forth in this tariff. It shall be the obligation of the Customer to notify Company immediately of any interruption in service for which a credit allowance is desired by Customer. Before giving such notice, the Customer shall ascertain that the trouble is not within his or her control, or is not in wiring or equipment, if any, furnished by Customer. Interruptions caused by Customer-provided, Subscriber-provided or Company-provided automatic dialing equipment are not deemed an interruption of service as defined herein since the Customer has the option of using the long distance network via LEC access. For purposes of credit computation, every month shall be considered to have 30 days. SECTION 3.0 - DESCRIPTION OF SERVICE, (Cont'd.)

3.5 Calculation of Distance

Usage charges for mileage sensitive services vary based on the type of service subscribed to by the Customer. For services utilizing switched access, mileage measurements for rate schedules are based on the distance in airline miles between rate centers associated with the originating and terminating stations. For services utilizing dedicated access, mileage measurements for rate schedules are based on the distance in airline miles between the INS network access point associated with the station utilizing Dedicated Access Origination/Termination and the rate center associated with the called/calling station.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the serving wire centers as defined by BellCore (Bell Communications Research), in the following manner:

- Step 1: Obtain the "V" and "H" coordinates for the serving wire center or network access point serving the Customer's location and the called/calling station.
- Step 2: Obtain the difference between the "V" coordinates. Obtain the difference between the "H" coordinates.
- Step 3: Square the differences obtained in Step 2.
- Step 4: Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5: Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6: Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating locations of the call.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

SECTION 3.0 - DESCRIPTION OF SERVICE, (Cont'd.)

3.11 Schedule 5: Debit Card Service

Debit Card Service allows Customers to place direct dialed calls between locations within the state of Tennessee. Customers access the INS network by dialing a Toll Free (i.e., 800/888) number or other access dialing sequence and entering a Personal Account Code. The Company's system informs the Customer of the Available Usage Balance remaining in his/her Debit Account and prompts the Customer to place a call by entering a destination telephone number. Network usage for calls placed is deducted from the Available Usage Balance in the Customer's account on a real time basis as the call progresses. Customers purchase a Debit Card which assigns each Customer a Debit Account, provides each Customer with a Personal Account Code and lists instructions for accessing and using Carrier's service. Debit Cards are available in varying denominations.

Purchase of a Debit Card entitles the Customer to use the INS network for a number of minutes equivalent to the card denomination divided by the effective per minute rate. The Customer's right to utilize network usage within a given Debit Account expires one year after issuance and activation of the Debit Card associated with that Debit Account number. No minimum service period applies. Payment for Debit Card Services and any Available Usage in a Customer's Debit Account is nonrefundable. Any unused balances will be applied toward renewal value of the card account.

Debit Card service rates are not distance or time of day sensitive. Holiday discounts do not apply. Network usage for Debit Card Calls is deducted from the Available Usage Balance in Customer's Debit Account in full minute increments. For debiting purposes, the minimum call usage is one (1) minute; one domestic minute is equal to one unit.
