		GTE FLORIDA INCORPORATED
1		GTE FLORIDA INCORPORATED
2		REBUTTAL TESTIMONY OF LARRY HARTSHORN
3 4		DOCKET NO. 960980-TP 960847
5	Q.	PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.
6	Α.	My name is Larry Hartshorn. My business address is One GTE
7		Place, Thousand Oaks, California 91362.
8		
9	Q.	BY WHOM ARE YOU EMPLOYED AND WHAT IS YOUR
10		POSITION?
11	Α.	I am employed by GTE California Incorporated (GTE) as Manager-
12		Network Design.
13		
14		
15	Q.	PLEASE BRIEFLY DESCRIBE YOUR EDUCATION AND WORK
16		EXPERIENCE.
17	A.	I received my Bachelor of Science degree in electrical engineering
18		from the University of California at Davis. I have worked in the
19		telecommunications industry for over 27 years. I have been with GTE
20		for over 22 years, and have held positions in both manufacturing and
21		telephone operations. I started with GTE as an applications engineer
22		specializing in microwave radio and later served as Product Manager
23		for transmission and radio products. Between 1987 and 1993, I held
24		manager positions in both engineering and planning for GTE
25		Hawaiian Telephone Company. I join a California 04 1993 as
		10486 SEP 30 H

FPSC-RECORDS/REPORTING

1		Network Engineering Manager and assumed my current position of
2		Network Design Manager in 1994.
3		
4	Q.	WHAT ARE YOUR RESPONSIBILITIES IN YOUR CURRENT
5		POSITION?
6	Α.	I plan the growth and modernization of the network infrastructure for
7		GTE, including outside plant cable and electronics, central office
8		equipment, and interoffice facilities as well as developing
9		infrastructure necessary to deliver new products and services to GTE
10		customers.
11		
12	Q.	HAVE YOU PREVIOUSLY TESTIFIED BEFORE ANY STATE
13		COMMISSIONS?
14	Α.	Yes. I have testified in several matters in both Hawaii and California.
15		
16	Q.	DID YOU FILE DIRECT TESTIMONY IN THIS PROCEEDING?
17	Α.	No. I did not. But I am hereby adopting the Direct Testimony of
18		GTEFL witness Albert E. Wood, Jr. This witness substitution is
19		necessary because the GTE Operating Companies are involved in so
20		many arbitration hearings around the country at the same time.
21		Given this situation, it is inevitable that conflicts will arise for the
22		limited number of witnesses available to testify on any given subject
23		matter.
24		
25		

1	Q.	WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?
2	Α.	I will respond to certain unbundling and related demands by AT&T
3		and MCI.
4		
5	Q.	AT&T, AT LEAST, HAS ASKED FOR UNBUNDLED ACCESS AT
6		THE USER NETWORK INTERFACE (UNI) DATA NETWORKING
7		LEVEL. IS GTEFL WILLING TO PROVIDE SUCH ACCESS?
8	Α.	Yes. GTE has agreed to allow unbundled access at the UNI data
9		networking level.
10	•	
11	Q.	DOES GTEFL AGREE TO ALLOW UNBUNDLED ACCESS AT THE
12		NETWORK-TO-NETWORK INTERFACE (NNI) DATA
13		NETWORKING LEVEL, AS AT&T HAS ALSO REQUESTED?
14	Α.	GTEFL has agreed to allow this type of unbundled access on a case-
15		by-case, negotiated basis, due to potential protocol interface
16		differences that may exist between network technologies.
17		
18	Q.	SHOULD GTEFL BE REQUIRED TO PROVIDE DARK FIBER AS
19		REQUESTED BY MCI'S WITNESS CAPLAN AND AT&T'S WITNESS
20		CRAFTON?
21	Α.	No. Dark or dim fiber is not a network element, and so is not subject
22		to unbundling. The Act defines "network element" to include only
23		those facilities that are "used in the provision of a telecommunications
24		service." (Act at sec. 3(45) [emphasis added].) Because ILECs do
25		not use dark fiber in their networkstransport circuits must be "lit" to

be used--dark fiber does not meet the statutory definition. Therefore,
GTEFL should not be compelled to provide it to AT&T and MCI in this
proceeding.

4

## 5 Q. CAN YOU RESPOND TO AT&T'S DEMAND FOR LOOP TESTING?

6 Α. Yes. AT&T has requested that GTEFL perform loop testing in 7 accordance with AT&T's standards on each of GTEFL's loops before 8 AT&T initiates service. AT&T also demands that GTEFL provide complete reports of the test results. These are unreasonable 9 10 demands. In a resale environment, GTEFL will provide the same 11 quality service to AT&T's customers as it provides to other ALECs 12 and to itself. GTEFL will ensure that the network meets it own parameters, but it should not be required to satisfy unique--different 13 or higher--standards for each ALEC, as AT&T's would have it do. 14 15 GTEFL does not routinely test every loop on a new installation, and 16 should not be forced to do so by AT&T. Reporting parameter information to AT&T for its concurrence or validation in the instances 17 GTEFL does perform tests is also unwarranted and unnecessary. As 18 noted, the same standards will apply to service provided to both 19 20 GTEFL and AT&T end users.

- 21
- 22

If AT&T raises the loop testing question in an unbundling, rather than
resale, context, then AT&T must notify GTEFL of the service enhancing technologies it plans to use, so that it does not interfere

4

1		with GTEFL or other network users as discussed more fully in my
2		direct testimony.
3		
4	Q.	DOES THAT CONCLUDE YOUR REBUTTAL TESTIMONY?
5	Α.	Yes, it does.
