===NOTE=====11/25/96--8:29am=
I was updating my files and noticed that this new docket. I'm a little confused - I thought we had to list all the rules being changed in the docket title not just the first one. Is that one of the many new changes to the procedure? I'd hate to have this challenged just because of clerical error on the docket title. Also, it's being shown as a conservation rule change which it isn't. Who determines which module it goes into and how do we get it changed? Thanks.

.....
Are you the right person to mention this to? In the rule flood, we may have sent the docket request with incomplete info. The rules at issue in this docket are: Proposed Changes to Rules 25-6.022, Record of Meters Test, 25-6.052, Test Procedures and Accuracies of Meters, 25-6.054, Laboratory Testing Equipment, 25-6.055, Portable Standards, 25-6.056, Periodic Meter tests, 25-6.058, Determination of Average Meter Error, and Repeal of Rules 25-6.053, Requirements as to Use of Instrument Transformers, and 25-6.057, Methods of Meter Test, F.A.C. (This is a corrected version of what was previously sent. The second rule listed should have read, 25-6.052.)
