

VOTE SHEET

DATE: January 7, 1997

RE: DOCKET NO. 961002-EI - Petition for approval of Marketing Conservation Research and Development Program, as part of DSM plan, by Florida Power & Light Company.

Issue 1: Recommendation that the Commission deny Florida Power and Light Company's Marketing Conservation Research and Development program. Approval of this program would be inconsistent with Section 366.82(3), F.S., as staff would have unprecedented authority to administratively approve monetary incentive changes to existing Commission-approved programs that affect cost-effectiveness. In addition, FPL's petition contains no clear proposal as to how results from sample points will be extrapolated to the whole system nor does the petition state whether any kW or kWh savings from the research will count toward meeting goals.

DENIED

The program was approved as orally amended by the company.

Issue 2: Recommendation that, if the Commission approves Florida Power and Light Company's Marketing Conservation Research and Development program, Florida Power and Light Company should allocate individual research project cost to the rate class(es) to which research projects are targeted. Allocation of individual research project cost to the rate classes to which the research project is targeted will diffuse the impact of the Marketing Conservation Research and Development program being used as a competitive tool.

DENIED

Issue 3: Recommendation that, if no person whose substantial interests are affected by the Commission's proposed agency action files a protest within 21 days of issuance of this order, this docket be closed.
