TARIFF FORMAT

- A. Sheet Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the FPSC. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the FPSC follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff pages in effect. Consult the check sheet for sheet currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).

- D. Check Sheets** - When a tariff filing is made with the FPSC, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the FPSC.

SECTION 3.0 - DESCRIPTION OF SERVICE, (Cont'd.)

3.5 Calculation of Distance

Usage charges for mileage sensitive services vary based on the type of service subscribed to by the Customer. For services utilizing switched access, mileage measurements for rate schedules are based on the distance in airline miles between rate centers associated with the originating and terminating stations. For services utilizing dedicated access, mileage measurements for rate schedules are based on the distance in airline miles between the Wireless network access point associated with the station utilizing Dedicated Access Origination/Termination and the rate center associated with the called/calling station.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the serving wire centers as defined by BellCore (Bell Communications Research), in the following manner:

- Step 1: Obtain the "V" and "H" coordinates for the serving wire center or network access point serving the Customer's location and the called/calling station.
- Step 2: Obtain the difference between the "V" coordinates. Obtain the difference between the "H" coordinates.
- Step 3: Square the differences obtained in Step 2.
- Step 4: Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5: Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6: Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating locations of the call.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

- 3.6.2 Chargeable time ends when the calling service point terminates, thereby releasing the network connection.
- 3.6.3 Unless otherwise specified in this tariff, the minimum call duration for billing purposes is one (1) minute.

SECTION 3.0 - DESCRIPTION OF SERVICE, (Cont'd.)**3.7 Debit Card Service**

Debit Card Service allows Customers to place direct dialed calls between locations within the state of Florida. Customers access the Wireless network by dialing a Toll Free (i.e. 800/888) number or other access dialing sequence and entering a Personal Account Code. The Company's system informs the Customer of the Available Usage Balance remaining in his/her Debit Account and prompts the Customer to place a call by entering a destination telephone number. Network usage for calls placed is deducted from the Available Usage Balance in the Customer's account on a real time basis as the call progresses. Customers purchase a Debit Card which assigns each Customer a Debit Account, provides each Customer with a Personal Account Code and lists instructions for accessing and using the service. See Section 4 of this tariff for available denominations.

Purchase of a Debit Card entitles the Customer to use the Wireless network for a number of minutes equivalent to the card denomination divided by the effective per minute rate. The Debit Account expires, if the Debit Account is not replenished within 5 calendar days from the date of the last call that caused the Debit Account value to be depleted. No minimum service period applies. Payment for Debit Card Services and any Available Usage in a Customer's Debit Account is non-refundable. Any unused balances will be applied toward renewal value of the Debit Account.

Debit Card service rates are not distance or time of day sensitive. Holiday discounts do not apply. Network usage for Debit Card Calls is deducted from the Available Usage Balance in Customer's Debit Account in full minute increments. For debiting purposes, the minimum call usage is one (1) minute; one domestic minute is equal to one unit.

Account balances are available from the system upon access to place a call. The Toll Free access number assigned to a given account is listed on the card.

Customers may presubscribe Wireless as their primary interexchange carrier or access the Wireless network by dialing a Toll Free (i.e. 800/888) number or other access dialing sequence and entering a Personal Account Code. The Company's system informs the Customer of the Available Usage Balance remaining in his/her Debit Account and prompts the Customer to place a call by entering a destination telephone number. Network usage for calls placed is deducted from the Available Usage Balance in the Customer's account on a real time basis as the call progresses. Customers purchase Debit Toll Service by depositing a dollar amount reflective of their telecommunication needs based on the per minute rate. The Company assigns each Customer a Debit Account, provides each Customer with a Personal Account Code and lists instructions for accessing and using the service. Account balances are available from the system upon access to place a call.

Purchase of Debit Toll Service entitles the Customer to use the Wireless network for a number of minutes equivalent to the deposit denomination divided by the effective per minute rate. No minimum service period applies. Payment for Debit Toll Services and any Available Usage in a Customer's Debit Account is non-refundable. Any unused balances will be applied toward renewal value of the Debit Account.

Debit Toll service rates are not distance or time of day sensitive. Holiday discounts do not apply. Network usage for Debit Toll Calls is deducted from the Available Usage Balance in Customer's Debit Account in full minute increments. SECTION 4.0 - RATES, (CONT'D.)**4.2 Discounts for Hearing Impaired Customers**

A direct dialed telephone toll message which is communicated using a telecommunications device for the deaf (TDD) by properly certified hearing or speech impaired persons or properly certified business establishments or individuals equipped with TDDs for communicating with hearing or speech impaired persons will receive, upon request, credit on charges for certain intrastate toll calls placed between TDDs. The credit to be given on a subsequent bill for such calls placed between TDDs will be equal to applying the off-day rate during business day hours. Discounts do not apply to per call add-on charges for services when the call is placed by a method that would normally incur the surcharge.

4.3 Emergency Call Exemptions

The following calls are exempted from all charges: Emergency calls to recognizable authorized civil agencies including police, fire, ambulance, bomb squad and poison control. Frontier will only handle these calls if the caller dials all of the digits to route and bill the call. Credit will be given for any billed charges pursuant to this exemption on a subsequent bill after verified notification by the billed Customer within thirty (30) days of billing.

4.4 Telecommunications Relay Service Rates

For 1+ toll calls received from the relay service, call charges shall be discounted by 50% from the otherwise applicable usage rate for a voice non-relay call, except that where the calling or called party indicates that either party is both hearing and visually impaired, the call shall be discounted 60 percent.

The business arrangement with the company that supplies the prepaid cards and airtime will not allow distributors to offer telecommunications service without posting a \$50,000 deposit. Once Wireless Comm. This business arrangement makes the Company prove to their supplier that they have sufficient financial capability before providing service. Thus, the end user's will never be interrupted because Wireless Comm. Corp. of America has prepaid their bills to their supplier.

2. Please provide documentation that the applicant has sufficient financial capability to maintain the requested service.
