MEMORANDUM

June 12, 1997

TO: DIRECTOR, DIVISION OF RECORDS AND REPORTING (BAYO)

FROM: DIVISION OF COMMUNICATIONS (SIRIANNI) ^{MS}
DIVISION OF LEGAL SERVICES (KEATING) ^{AK}

RE: DOCKET NO. 970450-TP - REQUEST FOR APPROVAL OF THE
INTERCONNECTION, RESALE, AND UNBUNDLING AGREEMENT
NEGOTIATED BY TELECOMMUNICATIONS SERVICE CENTER, INC. AND
GTE FLORIDA INCORPORATED

AGENDA: JUNE 24, 1997 - REGULAR AGENDA - PARTIES MAY PARTICIPATE

CRITICAL DATES: COMMISSION MUST APPROVE OR DENY BY 7/9/97 PER
TELECOMMUNICATIONS ACT OF 1996

SPECIAL INSTRUCTIONS: S:\PSC\CMU\WP\970450TP.RCM

CASE BACKGROUND

On April 10, 1997, Telecommunications Service Center, Inc. (TSC) and GTE Florida Incorporated (GTEFL) filed a request for approval of their interconnection, resale, and unbundling agreement. The agreement was executed on March 14, 1997. The parties are seeking approval of the agreement under the Telecommunications Act of 1996.

DOCUMENT NUMBER-DATE

05932 JUN 12 5

FPSC-RECORDS/REPORTING

DOCKET NO. 970450-TP
DATE: June 12, 1997

DISCUSSION OF ISSUES

ISSUE 1: Should the Commission approve the the proposed interconnection, resale, and unbundling agreement between TSC and GTEFL?

RECOMMENDATION: Yes. The Commission should approve the proposed interconnection, resale, and unbundling agreement between TSC and GTEFL. The Commission should require TSC and GTEFL to file any subsequent supplements or modifications to their agreement for Commission review under the provisions of 47 U.S.C. § 252(e). (Siriani)

STAFF ANALYSIS: As stated in the Case Background, TSC and GTEFL are seeking approval of their interconnection, resale, and unbundling agreement (Attachment A) under the Telecommunications Act of 1996 (the Act). Both the Act and revised Chapter 364, Florida Statutes, encourage parties to enter into negotiated agreements to bring about local exchange competition as quickly as possible. If the parties reach a negotiated agreement, under 47 U.S.C. § 252(e), the agreement is to be filed with the state commission for approval. 47 U.S.C. § 252(a)(1) requires that "the agreement shall include a detailed schedule of itemized charges for interconnection and each service or network element included in the agreement." Under 47 U.S.C. § 252(e)(4), the state commission must approve or reject the agreement within 90 days after submission, or the agreement shall be deemed approved.

The agreement is a two-year agreement governing the relationship between the companies regarding interconnection, unbundling, and resale of various services. The agreement provides the rates and terms regarding unbundled loops and ports, local interconnection trunk arrangements, points of interconnection, meet point arrangements, 911/E911, information services and ancillary services such as busy line verify and interrupt, directory listings and directory distribution, directory assistance, and interim number portability. The wholesale discounts for the resale rates are not a fixed percentage, but vary by tariff element based on the avoided cost for each element. Staff has reviewed the TSC and GTEFL proposed agreement for compliance with the Act and recommends approval of the proposed agreement.

DOCKET NO. 970450-TP
DATE: June 12, 1997

ISSUE 2: Should Docket No. 970450-TP be closed?

RECOMMENDATION: Yes, with the adoption of staff's recommendation in Issue 1, and issuance of the Commission's order approving the amendment to the agreement, Docket No. 970450-TP should be closed.

APPENDIX I
TERMS ADOPTED FROM THE MCI ARBITRATION AGREEMENT
..... I-4

This Interconnection, Resale and Unbundling Agreement (the "Agreement"), is made effective as of March 14, 1997, by and between GTE Florida Incorporated, with its address for purposes of this Agreement at 201 N. Franklin, Tampa Florida 33602 ("GTE"), and Telecommunications Service Center, Inc., in its capacity as a certified provider of local dial-tone service ("TSC"), with its address for this Agreement at 412 E. Madison, Suite 1200, Tampa, Florida 33602. (GTE and TSC being referred to collectively as the "Parties" and individually as a "Party"). This Agreement covers services in the state of Florida (the "State").

WHEREAS, interconnection between competing Local Exchange Carriers ("LECs") is necessary and desirable for the mutual exchange and termination of traffic originating on each LEC's network; and

WHEREAS, the Parties desire to exchange such traffic and related signaling in a technically and economically efficient manner at defined and mutually agreed upon points of interconnection, and

WHEREAS, the Parties wish to enter into an agreement to interconnect their respective telecommunications networks on terms that are fair and equitable to both Parties; and

WHEREAS, Section 251 of the Telecommunications Act of 1996 (the "Act") imposes specific obligations on LECs with respect to the interconnection of their networks, resale of their telecommunications services, access to their poles, ducts, conduits and rights-of-way and, in certain cases, the offering of certain unbundled network elements and physical collocation of equipment in LEC premises;

WHEREAS, GTE is entering, under protest, into certain aspects of this Agreement that incorporate adverse results from the arbitrated agreements approved by the Commission in this state and is doing so in order to avoid the expense of arbitration while at the same time preserving its legal positions, rights and remedies,

NOW, THEREFORE, in consideration of the mutual provisions contained herein and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, GTE and TSC hereby covenant and agree as follows:

ARTICLE I SCOPE AND INTENT OF AGREEMENT

Pursuant to this Agreement, the Parties will extend certain arrangements to one another within each area in which they both operate within the State for purposes of interconnection and the exchange of traffic between their respective end user customers, and reciprocal access to their poles, ducts, conduits and rights-of-way. This Agreement also governs the purchase by TSC of certain telecommunications services provided by GTE in its franchise areas for resale by TSC, the purchase by TSC of certain unbundled network elements from GTE, and the terms and conditions

of the collocation of certain equipment of TSC in the premises of GTE. This Agreement is an integrated package that reflects a balancing of interests critical to the Parties. This Agreement will be submitted to the Commission (the "Commission"), and the Parties will specifically request that the Commission refrain from taking any action to modify, supplement, suspend or otherwise delay implementation of this Agreement. For the term of this Agreement, the Parties shall not advocate before any legislative, regulatory, judicial or other public forum that any terms of this Agreement between the Parties be modified, supplemented, suspended or eliminated. Notwithstanding this mutual commitment, the Parties agree that their entrance into this Agreement is without prejudice to any positions they may have taken previously, or may take in the future, in any legislative, regulatory, judicial or other public forum addressing any matters, including matters related to the same types of arrangements covered in this Agreement. GTE's execution of this Agreement is not a concession or waiver in any manner concerning its position that certain of the rates, terms and conditions contained herein are unlawful, illegal and improper.

ARTICLE II
DEFINITIONS

1. General Definitions.

Except as otherwise specified herein, the following definitions shall apply to all Articles contained in this Agreement. Additional definitions that are specific to the matters covered in a particular Article may appear in that Article.

- 1.1 An "Affiliate" of a Party means a person, corporation or other legal entity that, directly or indirectly, owns or controls a Party, or is owned or controlled by, or is under common ownership or control with a Party. For purposes of this definition, the term "own" means to have a majority ownership interest in, or have voting control of a majority of the ownership interests in, such corporation or other legal entity.
- 1.2 "Automatic Number Identification" or "ANI" refers to the number transmitted through the network identifying the calling party.
- 1.3 "Bellcore" means an organization owned jointly by the Bell regional holding companies and that may in the future be owned partially or totally by other persons, that conducts research and development projects for its owners, including development of new telecommunications services. Bellcore also provides certain centralized technical and management services for the regional holding companies and also provides generic requirements for the telecommunications industry for products, services and technologies.
- 1.4 "Business Day" shall mean Monday through Friday, except for holidays on which the U.S. mail is not delivered.
- 1.5 "CLLI codes" means Common Language Location Identifier Codes.
- 1.6 "Common Channel Signaling" or "CCS" means a high-speed specialized packet-switched communications network that is separate (out-of-band) from the public packet-switched and message networks. CCS carries addressed signaling messages for individual trunk circuits and/or database-related services between Signaling Points in the CCS network using SS7 signaling protocol.
- 1.7 "DS-1" is a digital signal rate of 1.544 Mbps.
- 1.8 "DS-3" is a digital signal rate of 44.736 Mbps.
- 1.9 "Exchange Message Record" or "EMR" means the standard used for exchange of telecommunications message information among LECs for billable, unbillable, sample, settlement and study data. EMR format is contained in BR-010-200-010 CRIS Exchange Message Record, a Bellcore document that defines industry standards for exchange message records.

- 1.10 "Exchange Service" refers to all basic access line services, or any other services offered to end users which provide end users with a telephonic connection to, and a unique telephone number address on, the public switched telecommunications network ("PSTN"), and which enable such end users to place or receive calls to all other stations on the PSTN.
- 1.11 "EIS" or "Expanded Interconnection Service" means a service that provides interconnecting carriers with the capability to terminate basic fiber optic transmission facilities, including optical terminating equipment and multiplexers, at GTE's wire centers and access tandems and interconnect those facilities with the facilities of GTE. Microwave is available on a case-by-case basis where feasible.
- 1.12 "FCC" means the Federal Communications Commission.
- 1.13 "Guide" means the GTE Customer Guide for CLEC Establishment of Services - Resale and Unbundling, which contains GTE's operating procedures for ordering, provisioning, trouble reporting and repair for resold services and unbundled elements. A copy of the Guide has been provided to TSC.
- 1.14 "Interconnection" means the physical connection of separate pieces of equipment, transmission facilities, etc., within, between and among networks, for the transmission and routing of Exchange Service and Exchange Access. The architecture of interconnection may include collocation and/or mid-span meet arrangements.
- 1.15 "IXC" or "Interexchange Carrier" means a telecommunications service provider authorized by the FCC to provide interstate long distance communications services between LATAs and authorized by the State to provide long distance communications services.
- 1.16 "ISDN" or "Integrated Services Digital Network" means a switched network service providing end-to-end digital connectivity for the simultaneous transmission of voice and data.
- 1.17 "ISUP" means a part of the SS7 protocol that defines call setup messages and call takedown messages.
- 1.18 "Local Exchange Carrier" or "LEC" means any company certified by the Commission to provide local exchange telecommunications service. This includes the Parties to this Agreement.
- 1.19 "Local Exchange Routing Guide" or "LERG" means the Bellcore reference customarily used to identify NPA-NXX routing and homing information.
- 1.20 "Local Traffic" means traffic that is originated by an end user of one Party and terminates to the end user of the other Party within GTE's then current local serving area, including mandatory local calling scope arrangements. A mandatory local calling scope arrangement

is an arrangement that requires end users to subscribe to a local calling scope beyond their basic exchange serving area. Local Traffic does not include optional local calling scopes (i.e., optional rate packages that permit the end user to choose a local calling scope beyond their basic exchange serving area for an additional fee), referred to hereafter as "optional EAS."

- 1.21 "MDF" or "Main Distribution Frame" means the distribution frame used to interconnect cable pairs and line trunk equipment terminating on a switching system.
- 1.22 "Meet-Point Billing" or "MPB" refers to an arrangement whereby two LECs jointly provide the transport element of a switched access service to one of the LEC's end office switches, with each LEC receiving an appropriate share of the transport element revenues as defined by their effective access tariffs.
- 1.23 "MECAB" refers to the *Multiple Exchange Carrier Access Billing* ("MECAB") document prepared by the Billing Committee of the Ordering and Billing Forum ("OBF"), which functions under the auspices of the Carrier Liaison Committee ("CLC") of the Alliance for Telecommunications Industry Solutions ("ATIS"). The MECAB document, published by Bellcore as Special Report SR-BDS-000983, contains the recommended guidelines for the billing of an access service provided by two or more LECs, or by one LEC in two or more states within a single LATA.
- 1.24 "MECOD" refers to the *Multiple Exchange Carriers Ordering and Design* ("MECOD") *Guidelines for Access Services - Industry Support Interface*, a document developed by the Ordering/Provisioning Committee under the auspices of the Ordering and Billing Forum, ("OBF"), which functions under the auspices of the Carrier Liaison Committee ("CLC") of the Alliance for Telecommunications Industry Solutions ("ATIS"). The MECOD document, published by Bellcore as Special Report SR-STS-002643, establish methods for processing orders for access service which is to be provided by two or more LECs.
- 1.25 "Mid-Span Fiber Meet" means an Interconnection architecture whereby two carriers' fiber transmission facilities meet at a mutually agreed-upon POI.
- 1.26 "NANP" means the "North American Numbering Plan", the system of telephone numbering employed in the United States, Canada, and the Caribbean countries that employ NPA 809.
- 1.27 "NID" or "Network Interface Device" means the point of demarcation between the end user's inside wiring and GTE's facilities.
- 1.28 "Numbering Plan Area" or "NPA" is also sometimes referred to as an area code. This is the three digit indicator which is defined by the "A", "B", and "C" digits of each 10-digit telephone number within the NANP. Each NPA contains 800 possible NXX Codes. There are two general categories of NPA, "Geographic NPAs" and "Non-Geographic NPAs". A Geographic NPA is associated with a defined geographic area, and all

telephone numbers bearing such NPA are associated with services provided within that geographic area. A Non-Geographic NPA, also known as a "Service Access Code" or "SAC Code" is typically associated with a specialized telecommunications service which may be provided across multiple geographic NPA areas. 800, 900, 700, and 888 are examples of Non-Geographic NPAs.

- 1.29 "NXX", "NXX Code", "Central Office Code" or "CO Code" is the three digit switch entity indicator which is defined by the "D", "E", and "F" digits of a 10-digit telephone number within the NANP. Each NXX Code contains 10,000 station numbers. Historically, entire NXX code blocks have been assigned to specific individual local exchange end office switches.
- 1.30 "POI" means Point of Interconnection.
- 1.31 "Provider" means GTE and "Customer" means TSC with respect to those services performed by GTE pursuant to Article IV and any services for resale or unbundled network elements provided by GTE pursuant to Articles V and VI. TSC shall be referred to as Provider and GTE shall be referred to as Customer with respect to those services performed by TSC pursuant to Article IV.
- 1.32 "PSAP" means Public Safety Answering Points.
- 1.33 "Rate Center" means the specific geographic point and corresponding geographic area that are associated with one or more particular NPA-NXX Codes that have been assigned to a LEC for its provision of Exchange Services. The geographic point is identified by a specific V&H coordinate that is used to calculate distance-sensitive end user traffic to/from the particular NPA-NXXs associated with the specific Rate Center.
- 1.34 "Routing Point" denotes a location that a LEC has designated on its network as the homing (routing) point for traffic that terminates to Exchange Services provided by the LEC that bear a certain NPA-NXX designation. The Routing Point is used to calculate airline mileage for the distance-sensitive transport element charges of Switched Access Services. Pursuant to Bellcore Practice BR795-100-100, the Routing Point may be an end office location, or a "LEC Consortium Point of Interconnection." The Routing Point must be in the same LATA as the associated NPA-NXX.
- 1.35 "Service Control Point" or "SCP" is the node in the signaling network to which informational requests for service handling, such as routing, are directed and processed. The SCP is a real time database system that, based on a query from the SSP, performs subscriber or application-specific service logic, and then sends instructions back to the SSP on how to continue call processing.
- 1.36 "Service Switching Point" or "SSP" means a Signaling Point that can launch queries to databases and receive/interpret responses used to provide specific customer services.

- 1.37 "Signaling Point" or "SP" means a node in the CCS network that originates and/or receives signaling messages, or transfers signaling messages from one signaling link to another, or both.
- 1.38 "Signaling System 7" or "SS7" means the signaling protocol, Version 7, of the CCS network, based upon American National Standards Institute ("ANSI") standards.
- 1.39 "Signal Transfer Point" or "STP" means a packet switch in the CCS network that is used to route signaling messages among SSPs, Sps, SCPs and other STPs in order to set up calls and to query databases for advanced services. GTE's network includes mated pairs of local and regional STPs. STPs are provided in pairs for redundancy.
- 1.40 "Subsidiary" of a Party means a corporation or other legal entity that is majority owned by such Party.
- 1.41 "Synchronous Optical Network" or "SONET" means synchronous electrical ("STS") or optical channel ("OC") connections between LECs.
- 1.42 "Switched Access Service" means the offering of facilities for the purpose of the origination or termination of traffic to or from Exchange Service customers in a given area pursuant to a switched access tariff. Switched Access Services include: Feature Group A, Feature Group B, Feature Group D, 800 access and 900 access services.
- 1.43 "Vertical Features" (including "CLASS Features") means vertical services and switch functionalities provided by GTE, including: Automatic Call Back; Automatic Recall; Call Forwarding Busy Line/Don't Answer; Call Forwarding Don't Answer; Call Forwarding Variable; Call Forwarding - Busy Line; Call Trace; Call Waiting; Call Number Delivery Blocking Per Call; Calling Number Blocking Per Line; Cancel Call Waiting; Distinctive Ringing/Call Waiting; Incoming Call Line Identification Delivery; Selective Call Forward; Selective Call Rejection; Speed Calling; and Three Way Calling/Call Transfer.
- 1.44 "Wire Center" means a building or space within a building that serves as an aggregation point on a LEC's network, where transmission facilities and circuits are connected or switched.

ARTICLE III
GENERAL PROVISIONS

1. Scope of General Provisions. Except as may otherwise be set forth in a particular Article or Appendix of this Agreement, in which case the provisions of such Article or Appendix shall take precedence, these General Provisions apply to all Articles and Appendices of this Agreement.

2. Term and Termination.
 - 2.1 Term. Subject to the termination provisions contained in this Agreement, the term of this Agreement shall be two (2) years from the effective date referenced in the first paragraph of this Agreement and shall continue in effect for consecutive one (1) year terms until either Party gives the other Party at least ninety (90) calendar days' written notice of termination, which termination shall be effective at the end of the then-current term.

 - 2.2 Post-Termination Arrangements. Except in the case of termination as a result of either Party's default or a termination upon sale, for service arrangements made available under this Agreement and existing at the time of termination, those arrangements may continue without interruption under (a) a new arrangement voluntarily executed by the Parties; (b) standard terms and conditions approved and made generally effective by the Commission, if any; or (c) tariff terms and conditions made generally available to all competitive local exchange carriers.

 - 2.3 Termination Upon Default. Either Party may terminate this Agreement in whole or in part in the event of a default by the other Party, *provided however*, that the non-defaulting Party notifies the defaulting party in writing of the alleged default and that the defaulting Party does not cure the alleged default within thirty (30) calendar days of receipt of written notice thereof. Default is defined to include:
 - (a) A Party's insolvency or the initiation of bankruptcy or receivership proceedings by or against the Party, or

 - (b) A Party's refusal or failure in any material respect properly to perform its obligations under this Agreement, or the violation any of the material terms or conditions of this Agreement.

 - 2.4 Termination Upon Sale. Notwithstanding anything to the contrary contained herein, a Party may terminate this Agreement as to a specific operating area or portion thereof of such Party if such Party sells or otherwise transfers the area or portion thereof. The Party shall provide the other Party with at least ninety (90) calendar days' prior written notice of such termination, which shall be effective on the date specified in the notice. Notwithstanding termination of this Agreement as to a specific operating area, this Agreement shall remain in full force and effect in the remaining operating areas.

- 2.5 **Liability upon Termination.** Termination of this Agreement, or any part hereof, for any cause shall not release either Party from any liability which at the time of termination had already accrued to the other Party or which thereafter accrues in any respect to any act or omission occurring prior to the termination or from an obligation which is expressly stated in this Agreement to survive termination.
3. **Amendments.** Any amendment, modification, or supplement to this Agreement must be in writing and signed by an authorized representative of each Party. The term "this Agreement" shall include future amendments, modifications, and supplements.
4. **Assignment.** Any assignment by either Party of any right, obligation, or duty, in whole or in part, or of any interest, without the written consent of the other Party shall be void, except that either Party may assign all of its rights, and delegate its obligations, liabilities and duties under this Agreement, either in whole or in part, to any entity that is, or that was immediately preceding such assignment, a Subsidiary or Affiliate of that Party without consent, but with written notification. The effectiveness of an assignment shall be conditioned upon the assignee's written assumption of the rights, obligations, and duties of the assigning Party.
5. **Authority.** Each person whose signature appears on this Agreement represents and warrants that he or she has authority to bind the Party on whose behalf he or she has executed this Agreement.
6. **Billing and Payment.**
- 6.1 **Dispute.** If Customer disputes a billing statement, Customer shall notify Provider in writing regarding the nature and the basis of the dispute within sixty (60) calendar days of the statement date or the dispute shall be waived. Provider and Customer shall diligently work toward resolution of all billing issues.
- 6.2 **Late Payment Charge.** If any undisputed amount due on the billing statement is not received by Provider on the payment due date, Provider may charge, and Customer agrees to pay, interest on the past due balance at a rate equal to the lesser of one and one-half percent (1½%) per month or the maximum nonusurious rate of interest under applicable law. Late payment charges shall be included on the next statement.
- 6.3 **Taxes.** Provider shall charge and collect from Customer, and Customer agrees to pay to Provider, appropriate federal, state, and local taxes, except to the extent Customer notifies Provider and provides to Provider appropriate documentation that Customer qualifies for a full or partial exemption.
7. **Binding Effect.** This Agreement shall be binding on and inure to the benefit of the respective successors and permitted assigns of the Parties.

8. Compliance with Laws and Regulations. Each Party shall comply with all federal, state, and local statutes, regulations, rules, ordinances, judicial decisions, and administrative rulings applicable to its performance under this Agreement.
9. Confidential Information.
- 9.1 Identification. Either Party may disclose to the other proprietary or confidential customer, technical, or business information in written, graphic, oral or other tangible or intangible forms ("Confidential Information"). In order for information to be considered Confidential Information under this Agreement, it must be marked "Confidential" or "Proprietary," or bear a marking of similar import. Orally disclosed information shall be deemed Confidential Information only if contemporaneously identified as such and reduced to writing and delivered to the other Party with a statement or marking of confidentiality within twenty (20) calendar days after oral disclosure.
- 9.2 Handling. In order to protect such Confidential Information from improper disclosure, each Party agrees:
- (a) That all Confidential Information shall be and shall remain the exclusive property of the source;
 - (b) To limit access to such Confidential Information to authorized employees who have a need to know the Confidential Information for performance of this Agreement;
 - (c) To keep such Confidential Information confidential and to use the same level of care to prevent disclosure or unauthorized use of the received Confidential Information as it exercises in protecting its own Confidential Information of a similar nature;
 - (d) Not to copy, publish, or disclose such Confidential Information to others or authorize anyone else to copy, publish, or disclose such Confidential Information to others without the prior written approval of the source;
 - (e) To return promptly any copies of such Confidential Information to the source at its request; and
 - (f) To use such Confidential Information only for purposes of fulfilling work or services performed hereunder and for other purposes only upon such terms as may be agreed upon between the Parties in writing.
- 9.3 Exceptions. These obligations shall not apply to any Confidential Information that was legally in the recipient's possession prior to receipt from the source, was received in good faith from a third party not subject to a confidential obligation to the source, now is or later becomes publicly known through no breach of confidential obligation by the recipient, was developed by the recipient without the developing persons having access to any of the Confidential Information received in confidence from the source, or that is

required to be disclosed pursuant to subpoena or other process issued by a court or administrative agency having appropriate jurisdiction, provided, however, that the recipient shall give prior notice to the source and shall reasonably cooperate if the source deems it necessary to seek protective arrangements.

- 9.4 Survival. The obligation of confidentiality and use with respect to Confidential Information disclosed by one Party to the other shall survive any termination of this Agreement for a period of three (3) years from the date of the initial disclosure of the Confidential Information.
10. Consent. Where consent, approval, or mutual agreement is required of a Party, it shall not be unreasonably withheld or delayed.
11. Cooperation on Fraud Minimization. The Parties shall cooperate with one another to investigate, minimize and take corrective action in cases of fraud. The Parties' fraud minimization procedures are to be cost effective and implemented so as not to unreasonably burden or harm one Party as compared to the other. At a minimum, such cooperation shall include, when permitted by law or regulation, providing the other Party, upon reasonable request, information concerning end users who terminate services to that Party without paying all outstanding charges, when that Party is notified that such end user seeks service from the other Party. If required, it shall be the responsibility of the Party seeking the information to secure the end user's permission (in the format required by law) to obtain the information. Although in most circumstances the end user's current telephone number may be retained by the end user when switching local service providers, if an end user has past due charges associated with the account, for which payment arrangements have not been made with GTE, the end user's previous telephone number will not be made available to TSC until the end user's outstanding balance has been paid.
12. Dispute Resolution.
- 12.1 Alternative to Litigation. Except as provided under Section 252 of the Act with respect to the approval of this Agreement by the Commission, the Parties desire to resolve disputes arising out of this Agreement without litigation. Accordingly, except for action seeking a temporary restraining order or an injunction related to the purposes of this Agreement, or suit to compel compliance with this dispute resolution process, the Parties agree to use the following alternative dispute resolution procedure as their sole remedy with respect to any controversy or claim arising out of or relating to this Agreement or its breach.
- 12.2 Negotiations. At the written request of a Party, each Party will appoint a knowledgeable, responsible representative to meet and negotiate in good faith to resolve any dispute arising under this Agreement. The Parties intend that these negotiations be conducted by non-lawyer, business representatives. The location, format, frequency, duration, and conclusion of these discussions shall be left to the discretion of the representatives. Upon agreement, the representatives may utilize other alternative dispute resolution procedures such as mediation to assist in the negotiations. Discussions and correspondence among

the representatives for purposes of these negotiations shall be treated as confidential information developed for purposes of settlement, exempt from discovery and production, which shall not be admissible in the arbitration described below or in any lawsuit without the concurrence of all Parties. Documents identified in or provided with such communications, which are not prepared for purposes of the negotiations, are not so exempted and may, if otherwise admissible, be admitted in evidence in the arbitration or lawsuit.

- 12.3 Arbitration. If the negotiations do not resolve the dispute within sixty (60) days of the initial written request, the dispute shall be submitted to binding arbitration by a single arbitrator pursuant to the Commercial Arbitration Rules of the American Arbitration Association. A Party may demand such arbitration in accordance with the procedures set out in those rules. Discovery shall be controlled by the arbitrator and shall be permitted to the extent set out in this section. Each Party may submit in writing to a Party, and that Party shall so respond to, a maximum of any combination of thirty-five (35) (none of which may have subparts) of the following: interrogatories, demands to produce documents, or requests for admission. Each Party is also entitled to take the oral deposition of one individual of another Party. Additional discovery may be permitted upon mutual agreement of the Parties. The arbitration hearing shall be commenced within sixty (60) days of the demand for arbitration. The arbitration shall be held in Tallahassee. The arbitrator shall control the scheduling so as to process the matter expeditiously. The Parties may submit written briefs. The arbitrator shall rule on the dispute by issuing a written opinion within thirty (30) days after the close of hearings. The times specified in this section may be extended upon mutual agreement of the Parties or by the arbitrator upon a showing of good cause. Judgment upon the award rendered by the arbitrator may be entered in any court having jurisdiction.
- 12.4 Costs. Each Party shall bear its own costs of these procedures. A Party seeking discovery shall reimburse the responding Party the costs of production of documents (including search time and reproduction costs). The Parties shall equally split the fees of the arbitration and the arbitrator.
13. Entire Agreement. This Agreement constitutes the entire agreement of the Parties pertaining to the subject matter of this Agreement and supersedes all prior agreements, negotiations, proposals, and representations, whether written or oral, and all contemporaneous oral agreements, negotiations, proposals, and representations concerning such subject matter. No representations, understandings, agreements, or warranties, expressed or implied, have been made or relied upon in the making of this Agreement other than those specifically set forth herein.
14. Expenses. Except as specifically set out in this Agreement, each Party shall be solely responsible for its own expenses involved in all activities related to the subject of this Agreement.
15. Force Majeure. In the event performance of this Agreement, or any obligation hereunder, is either directly or indirectly prevented, restricted, or interfered with by reason of fire,

flood, earthquake or likes acts of God, wars, revolution, civil commotion, explosion, acts of public enemy, embargo, acts of the government in its sovereign capacity, labor difficulties, including without limitation, strikes, slowdowns, picketing, or boycotts, unavailability of equipment from vendor, changes requested by Customer, or any other circumstances beyond the reasonable control and without the fault or negligence of the Party affected, the Party affected, upon giving prompt notice to the other party, shall be excused from such performance on a day-to-day basis to the extent of such prevention, restriction, or interference (and the other Party shall likewise be excused from performance of its obligations on a day-to-day basis until the delay, restriction or interference has ceased); *provided however*, that the Party so affected shall use diligent efforts to avoid or remove such causes of nonperformance and both Parties shall proceed whenever such causes are removed or cease.

16. Governing Law. This Agreement shall be governed by and construed in accordance with the domestic laws of the state where the Services are provided or the facilities reside and shall be subject to the exclusive jurisdiction of the courts therein.
17. Headings. The headings in this Agreement are inserted for convenience and identification only and shall not be considered in the interpretation of this Agreement.
18. Independent Contractor Relationship. The persons provided by each Party shall be solely that Party's employees and shall be under the sole and exclusive direction and control of that Party. They shall not be considered employees of the other Party for any purpose. Each Party shall remain an independent contractor with respect to the other and shall be responsible for compliance with all laws, rules and regulations involving, but not limited to, employment of labor, hours of labor, health and safety, working conditions and payment of wages. Each Party shall also be responsible for payment of taxes, including federal, state and municipal taxes, chargeable or assessed with respect to its employees, such as Social Security, unemployment, workers' compensation, disability insurance, and federal and state withholding. Each Party shall indemnify the other for any loss, damage, liability, claim, demand, or penalty that may be sustained by reason of its failure to comply with this provision.
19. Liability and Indemnity.
 - 19.1 Indemnification. Each Party agrees to release, indemnify, defend, and hold harmless the other Party from all losses, claims, demands, damages, expenses, suits, or other actions, or any liability whatsoever, including, but not limited to, costs and attorney's fees, whether suffered, made, instituted, or asserted by any other party or person, for invasion of privacy, personal injury to or death of any person or persons, or for losses, damages, or destruction of property, whether or not owned by others, proximately caused by the indemnifying Party's negligence or willful misconduct, regardless of form of action.
 - 19.2 End User and Content-Related Claims. Customer agrees to release, indemnify, defend, and hold harmless Provider, its affiliates, and any third-party provider or operator of.

facilities involved in the provision of Services, unbundled network elements or facilities under this Agreement (collectively, the "Indemnified Parties") from all losses, claims, demands, damages, expenses, suits, or other actions, or any liability whatsoever, including, but not limited to, costs and attorney's fees, suffered, made, instituted, or asserted by Customer's end users against an Indemnified Party arising from Services, unbundled network elements or facilities. Customer further agrees to release, indemnify, defend, and hold harmless the Indemnified Parties from all losses, claims, demands, damages, expenses, suits, or other actions, or any liability whatsoever, including, but not limited to, costs and attorney's fees, suffered, made, instituted, or asserted by any third party against an Indemnified Party arising from or in any way related to actual or alleged defamation, libel, slander, interference with or misappropriation of proprietary or creative right, or any other injury to any person or property arising out of content transmitted by Customer or Customer's end users, or any other act or omission of Customer or Customer's end users.

- 19.3 **DISCLAIMER.** EXCEPT AS SPECIFICALLY PROVIDED TO THE CONTRARY IN THIS AGREEMENT, PROVIDER MAKES NO REPRESENTATIONS OR WARRANTIES TO CUSTOMER CONCERNING THE SPECIFIC QUALITY OF ANY SERVICES, UNBUNDLED NETWORK ELEMENTS OR FACILITIES PROVIDED UNDER THIS AGREEMENT. PROVIDER DISCLAIMS, WITHOUT LIMITATION, ANY WARRANTY OR GUARANTEE OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARISING FROM COURSE OF PERFORMANCE, COURSE OF DEALING, OR FROM USAGES OF TRADE.
- 19.4 **Limitation of Liability.** Provider's liability, whether in contract, tort or otherwise, shall be limited to direct damages, which shall not exceed the pro rata portion of the monthly charges for the Services, Unbundled Network Elements or facilities for the time period during which the Services, Unbundled Network Elements or facilities provided pursuant to this Agreement are inoperative, not to exceed in total Provider's monthly charge to Customer. Under no circumstance shall Provider be responsible or liable for indirect, incidental, or consequential damages, including, but not limited to, economic loss or lost business or profits, damages arising from the use or performance of equipment or software, or the loss of use of software or equipment, or accessories attached thereto, delay, error, or loss of data. In connection with this limitation of liability, the Parties recognize that Provider may, from time to time, provide advice, make recommendations, or supply other analysis related to the Services, unbundled network elements or facilities described in this Agreement, and, while Provider shall use diligent efforts in this regard, Customer acknowledges and agrees that this limitation of liability shall apply to provision of such advice, recommendations, and analysis.
- 19.5 **Intellectual Property.** Neither Party shall have any obligation to defend, indemnify or hold harmless, or acquire any license or right for the benefit of, or owe any other obligation or have any liability to, the other based on or arising from any claim, demand, or proceeding by any third party alleging or asserting that the use of any circuit, apparatus, or system, or the use of any software, or the performance of any service or method, or the provision or use of any facilities by either Party under this Agreement constitutes direct or contributory

infringement, or misuse or misappropriation of any patent, copyright, trademark, trade secret, or any other proprietary or intellectual property right of any third party.

20. **Multiple Counterparts.** This Agreement may be executed multiple counterparts, each of which shall be deemed an original, but all of which shall together constitute but one and the same document.
21. **No Offer.** Submission of this Agreement for examination or signature does not constitute an offer by Provider for the provision of the products or services described herein. This Agreement will be effective only upon execution and delivery by both Parties.
22. **Notices.** Any notice to a Party required or permitted under this Agreement shall be in writing and shall be deemed to have been received on the date of service if served personally, on the date receipt is acknowledged in writing by the recipient if delivered by regular U.S. mail, or on the date stated on the receipt if delivered by certified or registered mail or by a courier service that obtains a written receipt. Notice may also be provided by facsimile, which shall be effective on the next Business Day following the date of transmission. "Business Day" shall mean Monday through Friday, except for holidays on which the U. S. mail is not delivered. Any notice shall be delivered using one of the alternatives mentioned in this section and shall be directed to the applicable address indicated below or such address as the Party to be notified has designated by giving notice in compliance with this section:

If to GTE: GTE Florida Incorporated
 Attention: Regional Director Regulatory/Industry Affairs
 201 N. Franklin
 Tampa, Florida 33602
 Facsimile number: (813)223-4886

GTE Carrier Markets
201 N. Franklin
Tampa, Florida 33602

If to TSC: Telecommunications Service Center, Inc.
 Attention: Mr. Harold Shankland
 412 E. Madison, Suite 1200
 Tampa, Florida 33602
 Facsimile number: (813) 222-0875

23. **Protection.**
- 23.1 **Impairment of Service.** The characteristics and methods of operation of any circuits, facilities or equipment of either Party connected with the services, facilities or equipment of the other Party pursuant to this Agreement shall not interfere with or impair service over any facilities of the other Party, its affiliated companies, or its connecting and

concurring carriers involved in its services, cause damage to their plant, violate any applicable law or regulation regarding the invasion of privacy of any communications carried over the Party's facilities or create hazards to the employees of either Party or to the public (each hereinafter referred to as an "Impairment of Service").

- 23.2 **Resolution.** If either Party causes an Impairment in Service, the Party whose network or service is being impaired (the "Impaired Party") shall promptly notify the Party causing the Impairment of Service (the "Impairing Party") of the nature and location of the problem and that, unless promptly rectified, a temporary discontinuance of the use of any circuit, facility or equipment may be required. The Impairing Party and the Impaired Party agree to work together to attempt to promptly resolve the Impairment of Service. If the Impairing Party is unable to promptly remedy the Impairment of Service, then the Impaired Party may at its option temporarily discontinue the use of the affected circuit, facility or equipment.
24. **Publicity.** Any news release, public announcement, advertising, or any form of publicity pertaining to this Agreement, provision of services, unbundled network elements or facilities pursuant to it, or association of the Parties with respect to provision of the services described in this Agreement shall be subject to prior written approval of both GTE and TSC.
25. **Regulatory Agency Control.** This Agreement shall at all times be subject to changes, modifications, orders, and rulings by the Federal Communications Commission and/or the applicable state utility regulatory commission to the extent the substance of this Agreement is or becomes subject to the jurisdiction of such agency. Notwithstanding the date set forth in the first paragraph of this Agreement, if this Agreement is subject to advance approval of a regulatory agency, this Agreement shall not become effective until five (5) Business Days after receipt by the Parties of written notice of such approval. Such date (i.e., five Business Days after the Parties receive the written notice of approval) shall become the "effective date" of this Agreement for all purposes.
26. **Rule of Construction.** No rule of construction requiring interpretation against the drafting party hereof shall apply in the interpretation of this Agreement.
27. **Section References.** Except as otherwise specified, references within an Article of this Agreement to a Section refer to Sections within that same Article.
28. **Severability.** If any provision of this Agreement is held by a court or regulatory agency of competent jurisdiction to be unenforceable, the rest of the Agreement shall remain in full force and effect and shall not be affected unless removal of that provision results, in the opinion of either Party, in a material change to this Agreement. If a material change as described in this paragraph occurs as a result of action by a court or regulatory agency, the Parties shall negotiate in good faith for replacement language. If replacement language cannot be agreed upon within a reasonable period, either Party may terminate this

Agreement without penalty or liability for such termination upon written notice to the other Party.

29. Subcontractors. Provider may enter into subcontracts with third parties or affiliates for the performance of any of Provider's duties or obligations under this Agreement.
30. Subsequent Law. The terms and conditions of this Agreement shall be subject to any and all applicable laws, rules, regulations or guidelines that subsequently may be prescribed by any federal, state or local governmental authority. To the extent required by any such subsequently prescribed law, rule, regulation or guideline, the parties agree to modify, in writing, the affected term(s) and condition(s) of this Agreement to bring them into compliance with such law, rule, regulation or guideline.
31. Trademarks and Trade Names. Except as specifically set out in this Agreement, nothing in this Agreement shall grant, suggest, or imply any authority for one Party to use the name, trademarks, service marks, or trade names of the other for any purpose whatsoever.
32. Waiver. The failure of either Party to insist upon the performance of any provision of this Agreement, or to exercise any right or privilege granted to it under this Agreement, shall not be construed as a waiver of such provision or any provisions of this Agreement, and the same shall continue in full force and effect.
33. Amendment of Certain Rates, Terms and Conditions. The Parties agree as follows with respect to modification of the rates, terms and conditions initially provided for herein:

The rates, terms and conditions in this Agreement that are specified in Appendix I (the "MCI Terms") were taken from the GTE/MCI Interconnection, Resale and Unbundling Agreement (the MCI Agreement) approved by the Commission in Docket No. 960980-TP. The rates, terms and conditions not included in this Agreement but referenced in Appendix H (the "GTE Terms") were excluded from the MCI Agreement by the Commission in Docket No. 960980-TP. GTE and TSC agree that if the "MCI Terms" are deemed to be unlawful, or are stayed, enjoined or otherwise modified, in whole or in part, by a court or commission of competent jurisdiction, then this Agreement shall be deemed to have been amended accordingly, by modification of the "MCI Terms" or, as appropriate, the substitution of "GTE Terms" for all stayed or enjoined "MCI Terms", and such amendment shall be effective retroactive to the Effective Date of this Agreement.

GTE and TSC further agree that the terms and conditions of this Agreement reflect certain requirements of the FCC's First Report and Order in CC Docket No. 96-98. The terms and conditions of this Agreement shall be subject to any and all actions by any court or other governmental authority that invalidate, stay, vacate or otherwise modify the FCC's First Report and Order, in whole or in part. To the extent required by any such subsequent action, the parties agree to modify, in writing, the affected terms and conditions of this Agreement to bring them into compliance with the subsequent action. TSC acknowledges that GTE may seek to enforce such subsequent action before a

commission or court of competent jurisdiction. GTE does not waive any position regarding the illegality or inappropriateness of the FCC's First Report and Order.

The rates, terms and conditions (including rates which may be applicable under true-up) specified in both the "GTE Terms" and the "MCI Terms" are further subject to amendment, retroactive to the Effective Date of the Agreement, to provide for charges or rate adjustments resulting from future Commission or other proceedings, including but not limited to any generic proceeding to determine GTE's unrecovered costs (e.g., historic costs, contribution, undepreciated reserve deficiency, or similar unrecovered GTE costs (including GTE's end user surcharge)), the establishment of a competitively neutral universal service system, or any appeal or other litigation.

If the Commission (or any other commission or federal or state court) in reviewing this Agreement pursuant to applicable state or federal laws, including Section 252(e) of the Telecommunications Act of 1996, deletes or modifies in any way this Section 33, then the Parties agree that they will reopen negotiations within ten (10) days of receipt of the final decision making such deletion or modification to attempt to craft the new provision that will provide substantially the same protections to GTE as this Section 33. If the Parties cannot reach agreement on such a provision within twenty (20) calendar days thereafter, the Parties agree that this entire Agreement is void and will not become effective, and TSC agrees to withdraw this Agreement from consideration by the Commission (or any other commission or federal or state court). In such event, each Party shall have 25 days following the close of the 20-day negotiation period within which to file a petition for arbitration before the Commission under Section 252(e) of the Telecommunications Act of 1996 of the issues that remain in dispute under this paragraph.

ARTICLE IV
INTERCONNECTION AND TRANSPORT AND TERMINATION OF TRAFFIC

1. Services Covered by This Article.
- 1.1 Types of Services. This Article governs the provision of internetwork facilities (i.e., physical interconnection services and facilities), meet point billing by GTE to TSC or by TSC to GTE and the transport and termination of Local Traffic between GTE and TSC. The services and facilities described in this Article shall be referred to in this Article IV as the "Services."
- 1.2 Service Locations for Interconnection Services and Facilities. Appendix A, Service Matrix, attached to this Agreement and made a part hereof, sets forth the Services and each location in the State where a Service shall be provided (the "Service Locations") and the Point of Interconnection ("POI") for such Services. The Parties shall update Appendix A whenever a new Service or a new Service Location is added to this Agreement in accordance with Section 1.3.
- 1.3 Additional Services or Service Locations. If, during the term of this Agreement, GTE desires to provide to TSC and TSC desires to purchase from GTE, or TSC desires to provide to GTE and GTE desires to purchase from TSC, additional services in the State, or existing Services in new locations in the State, the Parties shall execute an amendment to this Agreement substantially in the form of Appendix B attached to this Agreement and made a part hereof, incorporating the additional locations and/or any additional terms necessary for the additional services. Upon the effective date of the amendment, and continuing through the remaining term of this Agreement, the new services shall be deemed part of the Services provided pursuant to this Article and/or the new locations shall be deemed part of the Service Locations.
2. Billing and Rates.
- 2.1 Rates and Charges. Customer agrees to pay to Provider the rates and charges for the Services set forth in the applicable appendices to this Agreement. GTE's rates and charges are set forth in Appendix C attached to this Agreement and made a part hereof.
- 2.2 Billing. Provider shall render to Customer a bill for interconnection services on a current basis. Charges for physical facilities and other nonusage sensitive charges shall be billed in advance, except for charges and credits associated with the initial or final bills. Usage sensitive charges, such as charges for termination of Local Traffic, shall be billed in arrears. Additional matters relating to billing are included in Appendix G attached to this Agreement and made a part hereof.

3. Transport and Termination of Traffic.

3.1 Types of Traffic. The Parties shall reciprocally terminate Local Traffic originating on each other's networks utilizing either direct or indirect network interconnections as provided in this Article. Neither Party is to send cellular traffic or traffic of any third party unless an agreement has been made between the originating Party and both the tandem company and the terminating company.

3.2 Audits. Either Party may conduct an audit of the other Party's books and records, no more frequently than once per twelve (12) month period, to verify the other Party's compliance with provisions of this Article IV. Any audit shall be performed as follows: (i) following at least ten (10) days' prior written notice to the audited Party; (ii) subject to the reasonable scheduling requirements and limitations of the audited Party; (iii) at the auditing Party's sole cost and expense; (iv) of a reasonable scope and duration; (v) in a manner so as not to interfere with the audited Party's business operations; and (vi) in compliance with the audited Party's security rules.

3.3 Compensation For Exchange Of Traffic.

3.3.1 Mutual Compensation. The Parties shall compensate each other for the exchange of Local Traffic in accordance with Appendix C attached to this Agreement and made a part hereof. Charges for the transport and termination of intraLATA toll, optional EAS arrangements and interexchange traffic shall be in accordance with the Parties' respective intrastate or interstate access tariffs, as appropriate.

3.4 Tandem Switching Services. The Parties will provide tandem switching for traffic between the Parties end offices subtending each other's access tandem, as well as for traffic between the Parties and any third party which is interconnected to the Parties' access tandems.

3.4.1 The originating Party will compensate the tandem Party for each minute of originated tandem switched traffic which terminates to third Party (e.g. other CLEC, ILEC, or wireless service provider). The applicable rate for this charge is identified in Appendix C.

3.4.2 The originating Party also assumes responsibility for compensation to the company which terminates the call.

3.4.3 Services Provided. Tandem switching services provided pursuant to this section 3.4 shall include the following:

- (a) signaling;
- (b) screening and routing;

- (c) recording;
- (d) access to AIN functionality;
- (e) access to operator services and directory assistance, in accordance with the terms and conditions of Article V and Article VII of this Agreement;
- (f) support of all trunk interconnections;
- (g) access to PSAPs, in accordance with the terms and conditions of Article VII of this Agreement; and
- (h) transit of traffic to and from third parties in accordance with the terms and conditions of this section.

4. Direct Network Interconnection.

4.1 Network Interconnection Architecture. Where the Parties mutually agree to directly interconnect their respective networks, interconnection will be as specified in the following subsections. The POIs shall be set forth in Appendix A attached to this Agreement and made a part hereof.

4.1.1 Subject to mutual agreement, the Parties may use the following types of network facility interconnection. For each POI set forth in Appendix A, the Parties shall specify the type of interconnection used at that POI.

(a) A Mid-Span Fiber Meet within an existing GTE exchange area whereby the Parties mutually agree to jointly plan and engineer their facility meet-point at a designated manhole or junction location. The meet point is the demarcation between ownership of the fiber transmission facility. Each party is individually responsible for its incurred costs in establishing this arrangement.

(b) A Virtual EIS arrangement at a GTE wire center subject to the rates, terms, and conditions contained in GTE's applicable tariffs.

(c) A special access arrangement terminating at a GTE wire center subject to the rates, terms, and conditions contained in GTE's applicable tariffs.

4.1.2 Virtual EIS arrangements are governed by appropriate GTE tariffs. GTE shall not permit direct connections (optical patch panel) or cross-connection ("DSX") between any Virtual EIS arrangements at the same wire center location. However, this Agreement does not preclude TSC from acquiring GTE special access service to connect a Virtual EIS arrangement to a distant GTE wire center or connect between Virtual EIS arrangements in different wire centers.

- 4.2 Compensation. The Parties agree to the following compensation for internetwork facilities, depending on facility type.
- 4.2.1 Mid-Span Fiber Meet: GTE will charge special access (flat rated) transport from the applicable intrastate access tariff and will rate charges between the POI and GTE's interconnection switch. Charges will be reduced to reflect the proportionate share of the facility that is used for transport of traffic originated by GTE. TSC will charge flat rated transport to GTE for TSC facilities used by GTE. TSC will apply charges based on the lesser of, (i) the airline mileage from the POI to the TSC switch; or (ii) two (2) times the airline mileage from the GTE switch to the serving area boundary.
- 4.2.2 Virtual EIS: GTE will charge Virtual EIS rates from the applicable GTE tariff. TSC will charge GTE flat rated transport to reflect the proportionate share of the facility that is used for transport of traffic originated by GTE. TSC will apply charges based on the lesser of, (i) the airline mileage from the POI to the TSC switch; or (ii) two (2) times the airline mileage from the GTE switch to the serving area boundary.
- 4.2.3 Special Access: GTE will charge special access rates from the applicable GTE intrastate access tariff. Charges will be reduced to reflect the proportionate share of the facility that is used for transport of traffic originated by GTE.
- 4.2.4 The Parties agree to interconnect their respective Frame Relay Networks for purposes of local interconnection. Each Party will charge the other for Network to Network Interface ("NNI") ports at the appropriate State tariffed Frame Relay rates.
- 4.3 Trunking Requirements.
- 4.3.1 GTE shall make available to TSC trunks over which TSC shall terminate to end users of GTE-provided Exchange Services, Local Traffic and intraLATA toll or optional EAS traffic originated from end users of TSC-provided Exchange Services.
- 4.3.2 TSC shall make available to GTE trunks over which GTE shall terminate to end users of TSC-provided Exchange Services, Local Traffic and intraLATA toll or optional EAS traffic originated from end users of GTE-provided Exchange Service.
- 4.3.3 TSC and GTE shall, where applicable, make reciprocally available, by mutual agreement, the required trunk groups to handle different traffic types. TSC and GTE agree to work cooperatively to agree on network trunking within sixty (60) days following full execution of this Agreement. TSC and GTE will support the provisioning of trunk groups that carry combined or separate Local Traffic and

intraLATA toll and optional EAS traffic. GTE requires separate trunk groups from TSC to terminate interLATA calls and to provide Switched Access Service to IXCs.

- 4.3.4 Each Party agrees to route traffic only over the proper jurisdictional trunk group. Each Party shall only deliver traffic over the local interconnection trunk groups to the other Party's access tandem for those publicly-dialable NXX Codes served by end offices that directly subtend the access tandem or to those wireless service providers that directly subtend the access tandem. In no event shall either Party route Switched Access Service traffic over local interconnection trunks.
 - 4.3.5 TSC and GTE will reciprocally provide PLU factors to each other on a quarterly basis to identify the proper jurisdiction of each call type that is carried over the required trunks.
 - 4.3.6 Reciprocal traffic exchange arrangement trunk connections shall be made at a DS-1 or multiple DS-1 level, DS-3, (SONET where technically available) and shall be jointly-engineered to an objective P.01 grade of service.
 - 4.3.7 TSC and GTE agree to use diligent efforts to develop and agree on a Joint Interconnection Grooming Plan prescribing standards to ensure that the reciprocal traffic exchange arrangement trunk groups are maintained at consistent P.01 or better grades of service. Such plan shall also include mutually-agreed upon default standards for the configuration of all segregated trunk groups.
 - 4.3.8 Signaling System 7 (SS7) Common Channel Signaling will be used to the extent that such technology is available.
5. Indirect Network Interconnection. Neither Party shall deliver traffic destined to terminate at the other Party's end office via another LEC's end office. In addition, neither Party shall deliver traffic destined to terminate at an end office subtending the other Party's access tandem via another LEC's access tandem. Either Party may deliver traffic destined to terminate at the other Party's end office via another LEC's tandem provided that the Parties have established compensation agreements with the tandem company.
6. Number Resources.
- 6.1 Number Assignment. Nothing in this Agreement shall be construed to, in any manner, limit or otherwise adversely impact TSC's right to employ or to request and be assigned any NANP number resources including, but not limited to, Central Office (NXX) Codes pursuant to the Central Office Code Assignment Guidelines. Any request for numbering resources by TSC shall be made directly to the NANP Number Plan Administrator. Except with respect to those areas in which GTE is the NANP Number Plan administrator, GTE shall not be responsible for the requesting or assignment of number

- resources to TSC. TSC shall not request number resources to be assigned to any GTE switching entity.
- 6.2 Rate Centers. For purposes of compensation between the Parties and the ability of GTE to appropriately apply its toll tariff to its end user customers, TSC shall adopt the Rate Center areas and Rate Center points that the Commission has approved for the incumbent LEC and shall assign whole NPA-NXX codes to each Rate Center.
- 6.3 Routing Points. TSC will also designate a Routing Point for each assigned NXX code. TSC may designate one location within each Rate Center as a Routing Point for the NPA-NXX associated with that Rate Center; alternatively TSC may designate a single location within one Rate Center to serve as the Routing Point for all the NPA-NXXs associated with that Rate Center and with one or more other Rate Centers served by TSC within an existing GTE exchange area. TSC shall use diligent efforts to designate at least one Routing Point in GTE's exchange area for all NPA-NXXs associated with GTE's Rate Centers.
- 6.4 Code Administration. The Parties will comply with code administration requirements as prescribed by the FCC, the Commission, and accepted industry guidelines.
- 6.5 Programming Switches. It shall be the responsibility of each Party to program and update its own switches and network systems pursuant to the Local Exchange Routing Guide (LERG) guidelines to recognize and route traffic to the other Party's assigned NXX codes at all times. Neither Party shall impose any fees or charges whatsoever on the other Party for such activities.
7. Number Portability. Each Party shall provide the other Party with service provider number portability for the purpose of allowing end user customers to change service-providing Parties without changing their telephone number. GTE shall provide its Service Provider Number Portability Service ("SPNP") to TSC using remote call forwarding ("RCF"). The GTE rates for SPNP service using RCF are set out in Appendix D attached to this Agreement and made a part hereof. If TSC wishes to use Direct Inward Dialing ("DID") to provide SPNP to its end users, TSC may purchase DID service from GTE at the wholesale rate set out in Appendix E attached to this Agreement and made a part hereof. TSC shall provide SPNP service to GTE in the manner and at the rates specified for TSC in Appendix D.
8. Meet-Point Billing.
- 8.1 Meet-Point Arrangements.
- 8.1.1 TSC may establish Meet-Point Billing ("MPB") arrangements with GTE in order to provide Switched Access Services to third parties (or the TSC if acting as an IXC) via a GTE access tandem in accordance with the MPB guidelines adopted by

and contained in the Ordering and Billing Forum's MECAB and MECOD documents, except as modified herein

- 8.1.2 Except in instances of capacity limitations, GTE shall permit and enable TSC to sub-tend the GTE access tandem(s) nearest to the TSC Rating Point(s) associated with the NPA-NXX(s) to/from which the Switched Access Services are homed. In instances of capacity limitation at a given access tandem, TSC shall be allowed to subtend the next-nearest GTE access tandem in which sufficient capacity is available.
- 8.1.3 Interconnection for the MPB arrangement shall occur at the POI.
- 8.1.4 Common Channel Signaling rather than in-band signaling shall be utilized in conjunction with MPB interconnection arrangements to the extent such signaling is resident in the GTE access tandem switch.
- 8.1.5 TSC and GTE will use diligent efforts, individually and collectively, to maintain provisions in their respective federal and state access tariffs, and/or provisions within the National Exchange Carrier Association ("NECA") Tariff No. 4, or any successor tariff, sufficient to reflect this MPB arrangement, including MPB percentages.
- 8.1.6 As detailed in the MECAB document, TSC and GTE will, in a timely fashion, exchange all information necessary to accurately, reliably and promptly bill third parties for Switched Access Services traffic jointly handled by TSC and GTE via the meet-point arrangement. Information shall be exchanged in Electronic Message Record ("EMR") format, on magnetic tape or via a mutually acceptable electronic file transfer protocol.
- 8.1.7 TSC and GTE shall work cooperatively to coordinate rendering of Meet-Point bills to customers, and shall reciprocally provide each other usage data and related information at no charge.

8.2 Compensation

- 8.2.1 Initially, billing to third parties for the Switched Access Services jointly provided by TSC and GTE via the MPB arrangement shall be according to the multiple-bill/multiple-tariff method (MB/MT method). The MB/MT method means that each company will render their bill at their own rates to the third party.
- 8.2.2 Subsequently, TSC and GTE may mutually agree to implement one of the following options for billing to third parties for the Switched Access Services jointly provided by TSC and GTE via the MPB arrangement: single-bill/single tariff method, single-bill/multiple tariff method, multiple-bill/single tariff method, or to continue the multiple-bill/multiple tariff method. Should TSC prefer to

change among these billing methods, TSC shall notify GTE of such a request in writing, ninety (90) days in advance of the date on which such change is desired to be implemented.

9. Common Channel Signaling

- 9.1. Service Description. The Parties will provide Common Channel Signaling ("CCS") to one another via Signaling System 7 ("SS7") network interconnection, where and as available, in the manner specified in FCC Order 95-187, in conjunction with all traffic exchange trunk groups. The Parties will cooperate on the exchange of all appropriate SS7 messages for local and intraLATA call set-up signaling, including ISUP and Transaction Capabilities Application Part ("TCAP") messages to facilitate full interoperability of all CLASS Features and functions between their respective networks. Any other SS7 message services to be provided using TCAP messages (such as data base queries) will be jointly negotiated and agreed upon.
- 9.2. Signaling Parameters. All SS7 signaling parameters will be provided in conjunction with traffic exchange trunk groups, where and as available. These parameters include Automatic Number Identification ("ANI"), Calling Party Number ("CPN"), Privacy Indicator, calling party category information, originating line information, charge number, etc. Also included are all parameters relating to network signaling information, such as Carrier Information Parameter ("CIP"), wherever such information is needed for call routing or billing.
- 9.3. Privacy Indicators. Each Party will honor all privacy indicators as required under applicable law.
- 9.4. Connection Through STP. TSC must interconnect with the GTE STP(s) serving the geographic area in which the traffic exchange trunk groups are interconnected.
- 9.5. Third Party Signaling Providers. TSC may choose a third-party SS7 signaling provider to transport messages to and from the GTE SS7 network. In that event, that third-party provider must present a letter of agency to GTE, prior to the testing of the interconnection, authorizing the third party to act on behalf of TSC in transporting SS7 messages to and from GTE. The third-party provider must interconnect with the GTE STP(s) serving the geographic area in which the traffic exchange trunk groups are interconnected.
- 9.6. Multi-Frequency Signaling. In the case where CCS is not available, in band Multi-Frequency ("MF"), wink start, E & M channel associated signaling with ANI will be provided by the Parties. Network signaling information, such as CIC/OZZ, will be provided wherever such information is needed for call routing or billing.

ARTICLE V
RESALE OF SERVICES

1. General.

The purpose of this Article V is to define the Exchange Services and related Vertical Features and other Services (collectively referred to for purposes of this Article V as the "Services") that may be purchased from GTE and resold by TSC and the terms and conditions applicable to such resold Services. Except as specifically provided otherwise in this Agreement, provisioning of Exchange Services for resale will be governed by the GTE Customer Guide for CLEC Establishment of Services - Resale and Unbundling (the "Guide"), which Guide may be amended from time to time by GTE as needed. GTE shall provide reasonable advance notification to TSC of any changes to the Guide.

2. Terms and Conditions.

2.1 Class of Service. TSC will resell to its end user customers the same class of service as was or would be provided by GTE to that end user customer, in accordance with State requirements. For example, TSC shall not resell GTE residential service to an end user customer for use as a business class of service.

2.2 Resale to Other Carriers. Services available for resale may not be used by TSC to provide access to the local network as an alternative to tariffed switched and special access by other carriers, including, but not limited to; interexchange carriers, wireless carriers, competitive access providers, or other retail telecommunications providers.

3. Ordering and Billing.

3.1 Local Service Request. Orders for resale of Services will be placed utilizing a standard Local Service Request ("LSR") form. A complete and accurate LSR (containing the requisite end user information as described in the Guide) must be provided by TSC before a request can be processed.

3.2 Certificate of Operating Authority. When ordering, TSC must represent and warrant to GTE that it is a certified provider of local dial-tone service. TSC will provide a copy of its Certificate of Operating Authority or other evidence of its status to GTE upon request.

3.3 Letter of Authorization. A Letter of Authorization ("LOA") will be required before resold Services will be provided in cases in which the subscriber currently receives Exchange Service from GTE or from a local service provider other than TSC. Such LOA may be a blanket LOA or such other form as agreed upon between GTE and TSC, provided, however, that TSC complies with the requirements for a signed LOA from the end user as specified in Section 3.4 when requesting information from GTE end user customer accounts.

- 3.4 Services Ordered. TSC shall specify each specific GTE Service ordered for each TSC end user customer: i.e., GTE will not transfer Services "as is." GTE will not release information to TSC on GTE end user customer accounts unless TSC first provides a written Letter of Authorization, signed by the end user customer, authorizing the release of such information to TSC.
- 3.5 Nonrecurring Charges. TSC shall be responsible for the payment of all nonrecurring charges ("NRCs") applicable to resold Services. NRCs applicable to each of the Services available for resale are listed in Appendix E.
- 3.6 Transfers Between TSC and Another Reseller of GTE Services. When TSC has obtained an end user customer from another reseller of GTE services, TSC will inform GTE of the transfer by submitting a standard LSR to GTE. Such LSR must contain the code of the displaced reseller, indicating that TSC has advised the displaced reseller that the end user has chosen TSC as their new local service provider.
- 3.7 Responsibility for Payment. All charges for Services provided for resale under this agreement will be billed to TSC, including all applicable taxes and surcharges, as well as the End User Common Line ("EUCL") Charge from GTOC Tariff FCC No. 1. TSC is responsible for payment of charges billed, regardless of any billing arrangement or situation between TSC and its end user customer.
- 3.8 Fraud. TSC assumes responsibility for all fraud associated with its end user customers and accounts. GTE takes no responsibility, will not investigate and will make no adjustments to TSC's account in cases of fraud.
- 3.9 Local Calling Detail. Except for those Services and in those areas where measured rate local service is available to end users, monthly billing to TSC does not include local calling detail.
- 3.10 Customer Contact and Referral. TSC will provide GTE with a number for referral of inquiries from TSC end user customers. GTE will refer to TSC all inquiries or other calls from TSC's end user customers. GTE will also provide TSC with a number for referral of inquiries from GTE end user customers, to which TSC will refer all inquiries or other calls from GTE's end user customers.
- 3.11 Procedures. An overview of the procedures for preordering, ordering, provisioning and billing for resold services are outlined in Appendix G, attached hereto and made a part hereof.
- 4 Maintenance
- 4.1 Maintenance, Testing and Repair. GTE will provide repair and maintenance services to TSC and its end user customers for resold Services in accordance with the same standards used for such services provided to GTE end user customers. GTE will not initiate a

maintenance call or take action in response to a trouble report until such time as trouble is reported to GTE by TSC. TSC must provide to GTE all end user information necessary for the installation, repair and servicing of any facilities used for resold Services according to the procedures described in the Guide.

4.2 Specifics and Procedures for Maintenance. An overview of the procedures for maintenance of resold services and additional matters agreed to by the Parties concerning maintenance are set forth in Appendix G.

5. Services Available for Resale.

5.1 Description of Local Exchange Services Available for Resale. Resold basic Exchange Service includes, but is not limited to, the following elements;

- (a) Voice Grade Local Exchange Access Line - includes a telephone number and dial tone.
- (b) Local Calling - at local usage measured rates if applicable to the end user customer.
- (c) Access to long distance carriers
- (d) Access to GTE Operator Services
- (e) Access to GTE Directory Assistance
- (f) E-911 Emergency Dialing
- (g) Access to Special Access Codes - e.g., 800, 888, 900
- (h) Listing of telephone number in appropriate "white pages" directory; and
- (i) Copy of "White Pages" and "Yellow Pages" directories for the appropriate GTE service area

5.2 List of Services Available for Resale. The Services available for resale by TSC are indicated on Appendix E, attached hereto and made a part of this Agreement, are. Additional regulations, terms and conditions relating to the Services listed on Appendix E can be found in the appropriate intrastate local, toll and access tariffs referenced in the third column of the rate list attached as Appendix E and in Article VIII of this Agreement. Terms, conditions and other matters concerning rate applications, technical parameters, provisioning capability, definitions and feature interactions contained in such tariffs are applicable to the Services offered under this Agreement and are incorporated herein by reference. Notwithstanding the foregoing, to the extent that there is a direct conflict

between the terms, conditions and other matters in such tariffs and any specific provision of this Agreement, the terms and conditions in this Agreement shall control.

- 5.3 Rates. The wholesale rates for all Services available for resale are listed in Appendix E.
- 5.4 Non-Recurring Charges. Charges associated with the installation of new services or features or changes to existing services or features are identified in Appendix E. No discount applies to nonrecurring charges.
- 5.5 Grandfathered Services. Services identified in GTE Tariffs as grandfathered in any manner are available for resale only to end user customers that already have such grandfathered service. An existing end user customer may not move a grandfathered service to a new service location.
- 5.6 ICB Services. Services provided by GTE to its end users established as an ICB (Individual Case Basis) service are available for resale. However, no discount applies to ICB Services.
- 5.7 Access. GTE retains all revenue due from other carriers for access to GTE facilities, including both switched and special access charges.
- 5.8 Operator Services. Access to GTE Operator Services for local and toll assistance (for example, call completion, busy line verification and emergency interruption) is included as an element of Exchange Services offered for resale. TSC will be billed in accordance with rates included in GTE'S end user rates as shown in Appendix E. No discount applies to operator services.
- 5.9 Directory Assistance. Access to GTE Directory Assistance is included as an element of Exchange Services offered for resale. TSC will be billed in accordance with GTE'S end user tariff rates included in Appendix E. No discount applies to directory assistance.

ARTICLE VI
UNBUNDLED NETWORK ELEMENTS

1. General. The purpose of this Article VI is to define the unbundled network elements that may be purchased by TSC from GTE. Unless otherwise specified in this Agreement, provisioning of unbundled network arrangements will be governed by the GTE Customer Guide for CLEC Establishment of Services - Resale and Unbundling. Additional procedures for preordering, ordering, provisioning and billing of unbundled network elements are outlined in Appendix G.
2. Unbundled Network Elements.
 - 2.1 Categories. There are several separate categories of Network Components that shall be provided as unbundled network elements by GTE:
 - (a) Network Interface Device or NID
 - (b) Loop Elements
 - (c) Port Elements
 - (d) Transport Elements
 - (e) Signaling Elements
 - (f) Call-Related Databases
 - 2.2 Prices. Individual unbundled network elements and prices are identified on Appendix F attached to this Agreement and made a part hereof, or under the appropriate GTE tariff as referenced in this Article. Nonrecurring charges relating to unbundled elements are also listed on Appendix F. The port element consists of two components, termination and usage (i.e. minutes of use). Additional switch features may be purchased in bulk at a price to be agreed upon by the Parties, or switch features may be purchased individually as Services pursuant to Article V.
 - 2.3 Interconnection to Unbundled Elements. TSC may lease and interconnect to whichever of these unbundled network elements TSC chooses, and may combine these unbundled elements with any facilities or services that TSC may itself provide, pursuant to the following terms:
 - 2.3.1 Interconnection shall be achieved via expanded interconnection/collocation arrangements TSC shall maintain at the wire center at which the unbundled services are resident.

- 2.3.2 Each loop or port element shall be delivered to the TSC collocation arrangement over a loop/port connector applicable to the unbundled services through other tariffed or contracted options.
- 2.3.3 TSC shall combine unbundled network elements with its own facilities. TSC shall not combine unbundled network elements purchased from GTE in such a manner as to permit TSC to bypass GTE's resale offerings.

3. Network Interface Device.

- 3.1 Direct Connection. TSC shall be permitted to connect its own Loop directly to GTE's Network Interface Device or NID in cases in which TSC uses its own facilities to provide local service to an end user formerly served by GTE, as long as such direct connection does not adversely affect GTE's network. In order to minimize any such adverse effects, TSC shall follow the procedures in Sections 3.1.1 and 3.1.2 below.
 - 3.1.1 When connecting its own loop facility directly to GTE's NID for a residence or business customer, TSC must make a clean cut on the GTE drop wire at the NID so that no bare wire is exposed. TSC shall not remove or disconnect GTE's drop wire from the NID or take any other action that might cause GTE's drop wire to be left lying on the ground.
 - 3.1.2 At multi-tenant customer locations, TSC must remove the jumper wire from the distribution block (i.e. the NID) to the GTE cable termination block. If TSC cannot gain access to the cable termination block, TSC must make a clean cut at the closest point to the cable termination block.
- 3.2 NID to NID Connection. Rather than connecting its loop directly to GTE's NID, TSC may also elect to install its own NID and effect a NID to NID connection to gain access to the end user's inside wiring.

4. Loop Elements.

- 4.1 Service Description. A "Loop" is an unbundled component of Exchange Service. In general, it is the transmission facility (or channel or group of channels on such facility) which extends from a Main Distribution Frame ("MDF") or functionally comparable piece of equipment in a GTE end office or wire center to a demarcation or connector block in/at a subscriber's premises. Traditionally, Loops were provisioned as 2-wire or 4-wire copper pairs running from the end office MDF to the customer premises. However, a loop may be provided via other media, including radio frequencies, as a channel on a high capacity feeder/distribution facility which may, in turn, be distributed from a node location to the subscriber premises via a copper or coaxial drop facility, etc.
- 4.2 Categories of Loops. There are three general categories of loops:

- 4.2.1 "2-wire analog voice grade" loops will support analog transmission of 300-3000 Hz, repeat loop start or ground start seizure and disconnect in one direction (toward the end office switch), and repeat ringing in the other direction (toward the end user). This loop is commonly used for local dial tone service;
- 4.2.2 "4-wire analog voice grade" loops conform to the characteristics of a 2-wire voice grade loop and, in addition, can support the simultaneous independent transmission of information in both directions;
- 4.2.3 "DS-1" loops will support the transmission of a digital signal rate of 1.544 mbps to provide the equivalent of 24 incoming trunk type Exchanges Services.
- 4.2.4 "DS-3" loops will support the transmission of isochronous bipolar serial data at a rate of 44.736 Mbps. This DS-3 type of loop provides the equivalent of 28 DS-1 channels.
- 4.3 Loops for Digital Services. TSC may also lease 2-wire or 4-wire Loops that have been conditioned to transmit the digital signals needed to provide services such as ISDN, ADSL, HDSL and DS-1 level signals, subject to the limitations indicated in Sections 4.6 and 4.7. The price for such conditioned Loops shall be the price for the basic 2-wire or 4-wire loop, as applicable, that is listed in Appendix F, plus the applicable charge for the special conditioning as provided for in the appropriate GTE intrastate special access tariff. Prices for DS-3 grade Loops are the prices set forth in the appropriate GTE intrastate special access tariff.
- 4.4 Features, Functions, Attributes, Etc. To the degree possible, all transport-based features, functions, service attributes, grades-of-service, installation, maintenance and repair intervals that apply to the bundled services will apply to unbundled loops.
- 4.4.1 GTE will not perform routine testing of the unbundled loop for maintenance purposes. TSC will be required to provision a loop testing device either in its CO, Network Control Center or in its collocation arrangement to test the unbundled loop. GTE will perform repair and maintenance once trouble is identified by TSC.
- 4.4.2 All Loop facilities furnished by GTE on the premises of TSC's end users and up to the network interface or functional equivalent are the property of GTE. GTE must have access to all such facilities for network management purposes. GTE employees and agents may enter said premises at any reasonable hour to test and inspect such facilities in connection with such purposes or, upon termination or cancellation of the Loop facility, to remove such facility.
- 4.5 Digital Loop Carrier. Where GTE utilizes integrated digital loop carrier ("IDLC")* technology to provision the Loop element, GTE will take the necessary affirmative steps to provide unbundled Loops. The basic Loop provided will support voice grade services.

Loop capabilities beyond voice grade (i.e., ISDN, ADSL, etc.) will be provided under the terms and conditions, and at the prices indicated in Section 4.3.

* See Bellcore TR-TSY-000008, Digital Interface Between the SLC-96 Digital Loop Carrier System and Local Digital Switch and TR-TSY-000303, Integrated Digital Loop Carrier (IDLC) Requirements, Objectives and Interface.

4.5.1 GTE will permit TSC to collocate digital loop carriers and associated equipment in conjunction with collocation arrangements TSC maintains at a GTE wire center for the purpose of interconnecting to unbundled Loop elements.

4.6 Unbundled Loop Facility Certification.

4.6.1 Before deploying any service enhancing copper cable technology (e.g., HDSL, ISDN, etc.) over unbundled 2-wire analog voice grade loops leased from GTE, TSC shall notify GTE of such intentions to enable GTE to assess the loop transport facilities to determine whether there are any existing copper cable loop transport technologies (e.g., analog carrier, etc.) deployed within the same cable sheath that would be interfered with if TSC deployed the proposed service enhancing copper cable technology. If there are existing copper cable loop transport technologies already deployed within the same cable sheath, or if GTE already has existing near term (within 18 months of the date of facility certification) plans to deploy copper cable loop transport technologies that would be interfered with as described above, GTE will so inform TSC and TSC shall not be permitted to deploy such service enhancing copper cable technologies. GTE will charge TSC the reasonable costs for engineering time and labor.

4.6.2 If TSC fails to notify GTE of its plans to deploy service enhancing copper cable technology and obtain prior certification from GTE of the facilities, if TSC's deployment of such technology is determined to have caused interference with existing or planned copper cable loop transport technologies deployed by GTE in the same cable sheath, TSC will immediately remove such service enhancing copper cable technology and shall reimburse GTE for all incurred expense related to this interference.

4.7 Unbundled Loop Facility Notification.

4.7.1 GTE reserves the right to deploy within its network at its sole discretion any and all copper cable loop transport technologies. If GTE plans to deploy copper cable loop transport technology within a cable sheath in which such technology was not previously deployed, GTE will provide notice to TSC of such planned deployment, indicating all service enhancing copper cable technologies that would cause interference with the technology to be deployed, or that would be interfered with by the deployment of such technology. Such notice will be provided at least ninety (90) days in advance of the planned deployment. If TSC has deployed any

technologies within the same cable sheath that would interfere with, or be interfered with, by the technology GTE plans to deploy, TSC shall remove such interfering technology.

- 4.7.2 If TSC fails to comply with GTE's notification and remove the interfering technology, and TSC's deployment of such technology is determined to have actually caused interference with the copper cable loop transport technologies deployed by GTE in the same cable sheath, a second notification will be sent to TSC. If TSC fails to comply with such second notification by immediately removing such service enhancing copper cable technology, GTE will take the necessary action to isolate the interfering technology from its network. In that event, TSC shall reimburse GTE for all incurred expense related to these activities.

5. Port Elements

- 5.1 Service Description. "Port" is an unbundled component of Exchange Service that provides for the interconnection of individual loops to the switching components of GTE's network. In general, it is a line card and associated peripheral equipment on GTE end office switch that serves as the hardware termination for the end user's Exchange Service on that switch and generates dial tone and provides the end user access to the public switched telecommunications network. Each port is typically associated with one (or more) telephone number(s), which serve as the end user's network address.

- 5.2 Types of Ports. There are two basic types of port services, line-side and trunk-side, each of which provide certain types of functions;

- 5.2.1 Line-side Ports provide the following types of functions,

- On-hook and off-hook detection
- Dial tone
- Digit reception and interpretation (dial pulse or dual tone multi frequency)
- Network call routing to the called telephone number
- Audible ringing and power ringing
- Automatic message accounting (AMA) recording
- Disconnect detection
- Access to GTE switch based services and functions

- 5.2.2 Trunk-side Ports provide the following types of functions;

- Digit pulsing (DP), dual tone multi frequency (DTMF) and multi frequency (MF)
- Digit reception and interpretation
- Network routing toward terminating telephone number
- Answer detection and supervision signaling
- Access to GTE switch based services and functions

- 5.3 Ports Available as Unbundled Network Elements. There are four types of Ports available as unbundled network elements;
- 5.3.1 "2-wire analog line" Port is a line side switch connection employed to provide basic residential and business type Exchange Service.
- 5.3.2 "2-wire ISDN digital line" Port is a Basic Rate Interface (BRI) line side switch connection employed to provide ISDN Exchange Services.
- 5.3.3 "DS-1 digital trunk" Port is a direct inward dialing (DID) trunk side switch connection employed to provide the equivalent of 24 analog incoming trunk type Exchange Services.
- 5.3.4 "4-wire ISDN digital DS-1 trunk" Port is a Primary Rate Interface (PRI) trunk side switch connection employed to provide the ISDN Exchange Services
- 5.4 Port Prices. Prices for 2-wire analog and DS-1 Ports are listed in Appendix F. 2-wire ISDN line side Ports and 4-wire ISDN trunk side Ports shall be provided at a price to be agreed to by the Parties.
- 5.5 Service Parity. To the degree possible, all service attributes, grades-of-service and installation, maintenance and repair intervals which apply to the bundled service will apply to unbundled Ports.
6. Transport Elements.
- 6.1 Service Description. Transport is an unbundled component of Exchange Service. In general, it is the transmission facility (or channel or group of channels on such facility) which extends from a Main Distribution Frame (MDF) or functionally comparable piece of equipment in a GTE end office or access tandem to either (i) another MDF or functionally comparable piece of equipment in a GTE end office or access tandem, or (ii) a meet point with transport facilities of TSC or another carrier. Transport may be provided over a variety of media, including, but not limited to, copper cables, radio frequencies or channels on a high capacity facility.
- 6.2 Categories/Types. Unbundled transport is provided under rates, terms and conditions of the applicable GTE special access tariff or local private line tariff.
7. SS7 Transport and Signaling. SS7 signaling and transport services in support of TSC's local exchange services shall be provided in accordance with the terms and conditions of appropriate tariffs.
8. LIDB Services. Access to GTE's LIDB shall be provided in accordance with the rates, terms and conditions of GTE's switched access tariff, GTOC Tariff FCC No. 1, Section 8.

9. Database 800/888 Services. Access to GTE's 800/888 database shall be provided in accordance with the rates, terms and conditions of GTE's standard 800 Data Base Carrier Selection Service Agreement.

ARTICLE VII
ADDITIONAL SERVICES AND COORDINATED SERVICE ARRANGEMENTS

1. Transfer of Service Announcements. When an end user customer transfers service from GTE to TSC, or from TSC to GTE, and does not retain its original telephone number, the Party formerly providing service to the end user will provide, upon request and if such service is provided to its own customers, a referral announcement on the original telephone number. This announcement will provide the new number of the customer.
2. Coordinated Repair Calls. The Parties will employ the following procedures for handling misdirected repair calls:
 - 2.1 The Parties will educate their respective customers as to the correct telephone numbers to call to access their respective repair or customer care centers.
 - 2.2 To the extent that the correct provider of service to the customer is identifiable, the Parties will refer customers that make misdirected repair calls to the other Party to the telephone number provided by the provider of service to that customer. Such referrals will be made in a courteous manner and at no charge to the other Party. Communications with end users of the other Party during such misdirected calls other than referral to the correct number are prohibited.
 - 2.3 The Parties will provide their respective repair/customer care contact numbers to one another on a reciprocal basis.
3. 911/E911 Arrangements.
 - 3.1 Description of Service. TSC will install a minimum of two dedicated trunks to GTE's 911/E911 selective routers (i.e., 911 tandem offices) that serve the areas in which TSC provides Exchange Services, for the provision of 911/E911 services and for access to all subtending PSAPs. The dedicated trunks shall be, at minimum, DSO level trunks configured as a 2-wire analog interface or as part of a digital (1.544 Mbps) interface. Either configuration shall use CAMA type signaling with multifrequency (MF) tones that will deliver ANI with the voice portion of the call. GTE will provide TSC with the appropriate CLLI codes and specifications of the tandem office serving area and the 10-digit POTS number of each PSAP.
 - 3.2 Transport. If TSC desires to obtain transport from GTE to the GTE 911 selective routers, TSC may purchase such transport from GTE at the rates set forth in GTE's intrastate switched access tariff or in GTE's intrastate special access tariff.
 - 3.3 Cooperation and Level of Performance. The Parties will work together to facilitate the prompt, reliable and efficient interconnection of TSC's systems to the 911/E911 platforms, with a level of performance that will provide the same grade of service as that which GTE provides to its own end users.

- 3.4 Updates to MSAG. It shall be the responsibility of TSC to ensure that the address of each of its end users is included in the Master Street Address Guide ("MSAG").
- 3.5 Updates to Database. GTE and TSC will work together to develop the process by which the 911/E911 database will be updated with TSC's end user 911/E911 information.
- 3.6 Compensation. In situations in which GTE is responsible for maintenance of the 911/E911 database and can be compensated for maintaining TSC's information by the municipality, GTE will seek such compensation from the municipality. GTE will seek compensation from TSC only if and to the extent that GTE is unable to obtain such compensation from the municipality. GTE shall charge TSC a portion the cost of the shared 911/E911 port.
4. Information Services Traffic.
- 4.1. Routing. Each Party shall route traffic for information services (e.g. 900, 976, N11, weather lines, sports lines, etc.) that originates on its network to the appropriate information services platforms connected to the other Party's network over the Local/IntraLATA trunks.
- 4.2. Recording. The Party on whose network the information services traffic originated (the "Originating Party") shall provide the recorded call detail information to the Party to whose information platform the information services traffic terminated (the "Terminating Party").
- 4.3. Rating. The Terminating Party shall provide to the Originating Party all rating information necessary to bill the information services traffic to the Originating Party's end users pursuant to the Terminating Party's agreements with each information provider.
- 4.4. Billing and Collection. The Originating party shall bill and collect such information service charges and shall remit the amounts collected to the Terminating Party less:
- (a) a mutually agreed upon fee for providing billing and collection of the information service charges; and
 - (b) any uncollectibles reserve, which shall be calculated based on the uncollectibles reserve in the Terminating Party's billing and collection agreement with the applicable information services provider; and
 - (c) any customer adjustment provided by the Originating Party.
- 4.5. Blocking. Nothing in this Agreement shall restrict either Party from offering to its end user customers the ability to block the completion of information service traffic.

5. Directory Assistance (DA) and Operator Services. At TSC's request, GTE will provide to TSC directory assistance services and/or operator services pursuant to separate contracts to be negotiated in good faith between the Parties.

6. Directory Listings and Directory Distribution. Subject to execution of a separate agreement between TSC and GTE (the "Directories Agreement"), TSC's end users' primary listings shall be included in the appropriate GTE white pages directory, as well as GTE's directory assistance database. TSC's business end users' listings also will be included in all appropriate GTE "yellow pages" or classified directories and directories will be provided to TSC's end users in accordance with the Directories Agreement. GTE will also list in the information pages of the appropriate white pages directories TSC's critical customer contact numbers (e.g. business office, repair service, billing) in accordance with the terms and conditions in the Directories Agreement.

7. Busy Line Verification and Interrupt. Each Party shall establish procedures whereby its operator assistance bureau will coordinate with the operator assistance bureau of the other Party to provide Busy Line Verification ("BLV") and Busy Line Verification and Interrupt ("BLVI") services on calls between their respective end users. Each Party shall route BLV and BLVI inquiries over separate inward operator services trunks to the operator services switch. Each Party's operator assistance bureau will only verify and/or interrupt the call and will not complete the call of the end user initiating the BLV or BLVI. Each Party shall charge the other for the BLV and BLVI services at the rates contained in Appendix E, or if there is no applicable rate listed in Appendix E, at the rates in their respective tariffs.

ARTICLE VIII

GENERAL RULES GOVERNING RESOLD SERVICES AND UNBUNDLED ELEMENTS

1. General. General regulations, terms and conditions governing rate applications, technical parameters, service availability, definitions and feature interactions, as described in the appropriate GTE intrastate local, toll and access tariffs, as referenced in the third column of Appendix E (the "GTE Retail Tariff"), apply to retail services made available by GTE to TSC for resale and unbundled network elements provided by GTE to TSC, when appropriate, unless otherwise specified in this Agreement. As applied to services or network elements offered under this Agreement, the term "Customer" contained in the GTE Retail Tariff shall be deemed to mean "TSC" as defined in this Agreement.

2. Liability of GTE.
 - 2.1 Inapplicability of Tariff Liability. GTE's general liability, as described in the GTE Retail Tariff, does not extend to TSC's customers or any other third party. Liability of GTE to TSC resulting from any and all causes arising out of services, facilities, network elements or any other items relating to this Agreement shall be governed by the liability provisions contained in this Agreement and no other liability whatsoever shall attach to GTE. GTE shall be liable for the individual services, facilities or elements that it separately provides to TSC and shall not be liable for the integration of components combined by TSC.

 - 2.2 TSC Tariffs or Contracts. TSC shall, in its tariffs or other contracts for services provided to its end users using services, facilities or network elements obtained from GTE, provide that in no case shall GTE be liable to TSC's end users or any third parties for any indirect, special or consequential damages, including, but not limited to, economic loss or lost business or profits, whether foreseeable or not, and regardless of notification by TSC of the possibility of such damages and TSC shall indemnify and hold GTE harmless from any and all claims, demands, causes of action and liabilities based on any reason whatsoever from its customers as provided in this Agreement. Nothing in this Agreement shall be deemed to create a third party beneficiary relationship with TSC's end users.

 - 2.3 No Liability for Errors. GTE is not liable for mistakes that appear in GTE's listings, 911 and other information databases, or for incorrect referrals of end users to TSC for any ongoing TSC service, sales or repair inquiries, and with respect to such mistakes or incorrect referrals, TSC shall indemnify and hold GTE harmless from any and all claims, demands, causes of action and liabilities whatsoever, including costs, expenses and reasonable attorney's fees incurred on account thereof, by third parties, including TSC's end users or employees. For purposes of this Section 2.3, mistakes and incorrect referrals shall not include matters arising out of the willful misconduct of GTE or its employees or agents.

3. Unauthorized Changes.

- 3.1 Procedures. If TSC submits an order for resold services or unbundled elements under this Agreement in order to provide service to an end user that at the time the order is submitted is obtaining its local services from GTE or another LEC using GTE resold services or unbundled elements, and the end user notifies GTE that the end user did not authorize TSC to provide local exchange services to the end user, TSC must provide GTE with written documentation of authorization from that end user within three (3) business days of notification by GTE. If TSC cannot provide written documentation of authorization within such time frame, TSC must within three (3) business days thereafter:
- (a) notify GTE to change the end user back to the LEC providing service to the end user before the change to TSC was made; and
 - (b) provide any end user information and billing records TSC has obtained relating to the end user to the LEC previously serving the end user; and
 - (c) notify the end user and GTE that the change back to the previous LEC has been made; and
 - (d) pay GTE fifty dollars (\$50.00) per affected line to compensate GTE for switching the end user back to the original LEC.
- 3.2 Option to Restrict Changes Without Evidence of Authorization. TSC's or GTE's end users may request GTE to permit changes of their provider of local exchange services only upon end user password-based notification to GTE that the end user wishes to change the end user's provider of local exchange services. In such a situation, GTE will not change an end user's provider of local exchange services without such password based notification.
4. Impact of Payment of Charges on Service. TSC is solely responsible for the payment of all charges for all services, facilities and elements furnished under this Agreement, including, but not limited to, calls originated or accepted at its or its end users' service locations. If TSC fails to pay when due any and all charges billed to TSC under this Agreement, including any late payment charges (collectively, "Unpaid Charges"), and any or all such charges remain unpaid more than forty-five (45) days after the due date of such Unpaid Charges, GTE shall notify TSC in writing that it must pay all Unpaid Charges to GTE within seven (7) business days. If TSC disputes the billed charges, it shall, within said seven (7) day period, inform GTE in writing of which portion of the Unpaid Charges it disputes, including the specific details and reasons for the dispute, immediately pay to GTE all undisputed charges, and shall pay disputed charges into an interest bearing escrow account. If TSC and GTE are unable, within thirty (30) days thereafter, to resolve issues related to the disputed charges, then either TSC or GTE may file a complaint with the Commission to resolve those issues. The Commission may direct the release of any or all funds (including any accrued interest) in the escrow account, plus applicable late fees, to be paid to GTE and or TSC. If TSC fails to pay any undisputed Unpaid Charges, TSC shall, at its sole expense, within five (5) business days notify its end users that their service may be disconnected for TSC's failure to pay Unpaid Charges, and that its end users must select a new provider of

local exchange services. If TSC fails to provide such notification or any of TSC's end users fail to select a new provider of services within the applicable time period, GTE will provide local exchange services to TSC's end users under GTE's applicable end user tariff at the then current charges for the services being provided. In this circumstance, otherwise applicable service establishment charges will not apply to TSC's end user, but will be assessed to TSC. GTE may discontinue service to TSC upon failure to pay undisputed charges as provided in this Section 4, and shall have no liability to TSC or TSC's end users in the event of such disconnection.

5. Unlawful Use of Service. Services, facilities or unbundled elements provided by GTE pursuant to this Agreement shall not be used by TSC or its end users for any purpose in violation of law. TSC, and not GTE, shall be responsible to ensure that TSC and its end users use of services, facilities or unbundled elements provided hereunder comply at all times with all applicable laws. GTE may refuse to furnish service to TSC or disconnect particular services, facilities or unbundled elements provided under this Agreement to TSC or, as appropriate, TSC's end user when (i) an order is issued by a court of competent jurisdiction finding that probable cause exists to believe that the use made or to be made of the service, facilities or unbundled elements is prohibited by law or (ii) GTE is notified in writing by a law enforcement agency acting within its jurisdiction that any facility furnished by GTE is being used or will be used for the purpose of transmitting or receiving gambling information in interstate or foreign commerce in violation of law. Termination of service shall take place after reasonable notice is provided to TSC, or as ordered by the court. If facilities have been physically disconnected by law enforcement officials at the premises where located, and if there is not presented to GTE the written finding of a court, then upon request of TSC and agreement to pay restoration of service charges and other applicable service charges, GTE shall promptly restore such service.

6. Timing of Messages. With respect to measured rate local service or other usage sensitive services provided under this Agreement, chargeable time begins when a connection is established between the calling station and the called station. Chargeable time ends when the calling station "hangs up", thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released by automatic timing equipment in the network.

7. Procedures For Preordering, Ordering, Provisioning, Etc. Certain procedures for preordering, ordering, provisioning, maintenance and billing and electronic interfaces for many of these functions are described in Appendix G. All costs and expenses for any new or modified electronic interfaces TSC requires that GTE determines are technically feasible and GTE agrees to develop will be paid by TSC. The schedule for implementation of any new or modified electronic interfaces will be developed by GTE according to industry standards and will be based upon the amount of work needed to design, test and implement the new or modified interface.

ARTICLE IX
COLLOCATION

1. Physical Collocation. GTE shall provide to TSC physical collocation of equipment necessary for interconnection or for access to unbundled network elements, provided that GTE may provide virtual collocation in place of physical collocation, or in some cases deny a particular collocation request entirely, if GTE demonstrates that physical collocation, or perhaps even virtual collocation, is not practical because of technical reasons or space limitations, as provided in Section 251(c)(6) of the Act. GTE will provide such collocation for purposes of interconnection or access to unbundled network elements pursuant to the terms and conditions in the applicable GTE federal and state collocation tariffs.

2. Existing Virtual Collocation. If, on the effective date of this Agreement, TSC is virtually collocated in a GTE premise, TSC may (i) elect to retain its virtual collocation arrangement in that premise or (ii) unless it is not practical for technical reasons or because of space limitations, convert its virtual collocation arrangement at that premise to physical collocation. If TSC elects the latter option, TSC's request shall be treated as a new physical collocation request and TSC shall pay GTE at the applicable tariff rates for construction and rearrangement of TSC's equipment as well as all applicable tariffed physical collocation recurring charges.

ARTICLE X
ACCESS TO POLES, DUCTS, CONDUITS AND RIGHTS-OF-WAY

To the extent lawfully required by the Act, GTE and TSC shall each afford to the other access to the poles, ducts, conduits and rights of way it owns or controls on terms, conditions and prices comparable to those offered to any other entity pursuant to each Parties tariffs and/or standard agreements.

WITNESS WHEREOF, each Party has executed this Agreement to be effective as of the date first above written.

APPENDIX B
INTERCONNECTION, TELECOMMUNICATIONS SERVICES
AND FACILITIES AGREEMENT

BETWEEN

GTE

AND

TELECOMMUNICATIONS SERVICE CENTER, INC.

AMENDMENT NO. _____

THIS AMENDMENT (herein so called) is made effective as of _____, 1997, by and between GTE Florida Incorporated ("GTE") and Telecommunications Service Center, Inc. ("TSC"). GTE and TSC are sometimes referred to herein collectively as the "Parties" and individually as a "Party." Either GTE or TSC may be referred to as "Provider" or "Customer" as the context requires.

WHEREAS, Provider is providing to Customer and Customer is purchasing from Provider those Services described in that certain Interconnection, Telecommunications Services and Facilities Agreement for the State of Florida by and between GTE and TSC dated effective as of _____, 199__ (the "Agreement"); and

WHEREAS, the Parties desire to amend the Agreement as provided in this Amendment.

NOW, THEREFORE, in consideration of the terms and conditions contained in this Amendment, the Parties agree as follows:

1.2. **Additional Services [if applicable]**

- 2.1 Provider agrees to provide to Customer and Customer agrees to purchase from Provider the following services under the terms and conditions set forth in the Agreement and within the service attachment listed below and attached to this Amendment:

Service Attachment _____ - _____

- 2.2 As of the effective date of this Amendment, and continuing through the remaining term of the Agreement, _____ is made a part of the Services provided under the Agreement and Service Attachment _____ shall be deemed to be a Service Attachment to the Agreement.

2.3 As of the effective date of this Amendment, and continuing through the remaining term of the Agreement, Appendix A, Service Matrix, to the Agreement is hereby deleted and Appendix A, Service Matrix, to this Amendment is hereby inserted in lieu thereof to reflect the additional Services and related Service Locations.

3. Provider agrees to provide to Customer and Customer agrees to purchase from Provider the following Services in the following locations:

<u>Service Location</u> (identified by tandem serving area)	<u>POI</u> (identified by CLLI code)	<u>Services</u> (identified by Service Attachment Number)
---	--	---

3.1 As of the effective date of this Amendment, the locations set forth in Section 3.1 above shall be deemed Service Locations under the Agreement.

3.2 As of the effective date of this Amendment, and continuing through the remaining term of the Agreement, Appendix A, Service Matrix, to the Agreement is hereby deleted and Appendix A, Service Matrix, to this Amendment is hereby inserted in lieu thereof to reflect additional Service Locations.

4. **Interpretation**

All capitalized terms used but not defined herein shall have the meanings ascribed to such terms in the Agreement.

5. **Effect**

Except as modified herein, the Agreement shall remain in full force and effect.

6. **Authority**

Each person whose signature appears below represents and warrants that he or she has the authority to bind the Party on whose behalf he or she has executed this Amendment.

7. **Multiple Counterparts**

This Amendment may be executed in multiple counterparts, each of which shall be deemed an original, and all of which shall constitute but one and the same instrument.

8. **No Offer**

Submission of this Amendment for examination or signature does not constitute an offer by Provider for the provision of the products or services described herein. This Amendment will be effective only upon execution by both Provider and Customer.

IN WITNESS WHEREOF, the Parties have executed this Amendment on the date or dates written below effective as of the date first above written.

GTE TELEPHONE OPERATIONS HEADQUARTERS RESALE PRODUCTS & SERVICES BY STATE					GTE South - Florida						
ST	CO	TAR	SEC	Rule	Service Description	Billing Type	Resale Position	Discount Position	Retail Rate	Avoided Cost	Resale Rate
					Footnote: (1) The retail rates above do not include the Carrier Access Line Charge (CALC). The ALEC will be responsible for the business charge, \$6.00						
					Footnote: (2) Confidential and proprietary. This document is subject to the terms and conditions of the nondisclosure agreement between customer and GTE.						
					Footnote: (3) This matrix is subject to Legal and/or Regulatory constraints.						
					Footnote: (4) The Initial Service Order charge is \$41.50, the Subsequent Service Order charge is \$24.00 and the Installation per line charge is \$26.25.						
					The Outside Facility Connection Charge will apply when field work is required for establishment of a new resale service. The terms, conditions and rates that apply for this work are described in the Company's retail local service tariffs.						
					Footnote: (5) Prices contained in this price list have been calculated according to the formula: (1) retail price, less (2) avoided retail costs. However, for all basic exchange access services, e.g., business line (B1), PBX trunk, CentraNet Line, or ISDN line, a further adjustment to service costs will be required to recognize the foregone contribution associated with complementary intraLATA toll service. Therefore, prices for these services must be recalculated according to the formula: (1) retail price, less (2) avoided retail costs, plus (3) toll opportunity loss (toll contribution), less (4) access opportunity gain from lost toll (access contribution).						

154

APPENDIX F
PRICES FOR UNBUNDLED ELEMENTS
GTE

Network Interface Device	
Basic NID	\$ 1.50
12 x NID	\$ 2.10
Unbundled Loop	
2 - Wire Basic Loop	\$23.00
4 - Wire Loop (Excl. Electronics)	\$33.00
Unbundled Port	
2 - Wire Basic Port	\$ 5.00
4 - Wire DS1 Port	\$75.60
Local Switching	\$0.0089

GTE will assess a per minute charge to TSC for all non local (intraLATA toll, InterLATA toll) traffic that traverses the port that would incur access charges in today's environment from the appropriate state access tariffs.

APPENDIX G
OPERATIONS SUPPORT FUNCTIONS

1. Service Ordering, Service Provisioning, and Billing Systems Generally. The following describes the operations support systems that GTE will use and the related functions that are available in the short term to TSC for ordering, provisioning and billing for resold services, interconnection facilities and services and unbundled network elements.

1.1 Operations Support Systems for Trunk-Side Interconnection

- 1.1.1 TSC will be able to order trunk-side interconnection services and facilities from GTE through a direct electronic interface over the GTE Network Data Mover ("NDM") in a nondiscriminatory manner. Orders for trunk-side interconnection will be initiated by an Access Service Request ("ASR") sent electronically by TSC over the NDM. ASRs for trunk-side interconnection will be entered electronically into GTE's Customer Access Management System ("CAMS") to validate the request, identify any errors, and resolve any errors back to TSC. CAMS is a family of GTE systems comprised of EXACT/TUF, SOG/SOP, and CABS.
- 1.1.2 The use of CAMS to support TSC's requests for trunk-side interconnection will operate in the following manner: GTE will route the ASR through its data center to one of two National Access Ordering Centers ("NAOC"). The ASR will be entered electronically into the EXACT/TUF system for validation and correction of errors. Errors will be referred back to TSC. TSC then will correct any errors that GTE has identified and resubmit the request to GTE electronically through a supplemental ASR. GTE then will translate the ASR into a service order for provisioning and billing. In order to convert the ASR into a service order, GTE personnel must apply the necessary elements to provision the service and include the billable elements necessary for GTE to bill TSC for the services provided. This application also requires a determination of the access tandem to end office relationships with the service requested.
- 1.1.3 At the next system level, translated service orders will be distributed electronically through the SOG/SOP systems to several destinations. The SOG/SOP system will begin the actual provisioning of the service for TSC. Other GTE provisioning systems are CNAS and ACES. The GTE Database Administrative Group ("DBA") and the Special Services Control Center ("SSCC") will be the two most important destinations at this level. The DBA location will identify codes for the appropriate GTE switch in order to provide the functions required by the ASR. The SSCC will provide the engineering for the facilities over which the services will be handled. Information from these two groups (and others) then will be transmitted electronically to GTE's field service personnel (Customer Zone Technicians or "CZTs") who will establish the trunks and facilities, thus connecting the GTE facilities to a connecting company, if one is required, and to TSC. GTE's CZTs also will contact TSC directly to perform testing, and upon acceptance by

TSC, will make the necessary entries into the GTE system to complete the order. The completed orders then will pass to GTE's Carrier Access Billing System ("CABS") which will generate the bill to TSC. The billing process under CABS requires coordination with several other systems.

- 1.1.4 Billing for transport and termination services cannot be accomplished without call records from GTE's central office switches. Records of usage will be generated at GTE's end office switches or the access tandems. Call usage records will be transmitted electronically from GTE's switches through GTE's Billing Intermediate Processor ("BIP"). This system will collect the call records, perform limited manipulations to the record and transfer them to a centralized data center where they will be processed through the Universal Measurement System ("UMS") to determine the validity and accuracy of the records. UMS also will sort the records and send them to the CABS billing system, from which GTE will produce a bill and send it to TSC.

1.2 Operations Support Systems for Resold Services and Unbundled Elements

- 1.2.1 TSC will also be able to order services for resale and unbundled network elements, as well as interim number portability, directly from GTE through an electronic interface. To initiate an order for these services or elements, TSC will submit a Local Service Request ("LSR") from its data center to GTE's Data Center using the same electronic NDM interface used for trunk-side interconnection. If TSC chooses not to use the electronic NDM, GTE will accommodate submission of LSR orders by facsimile, E-mail, internet or a dial NDM arrangement. An LSR is very similar to an ASR, except that it will be used exclusively for line-side interconnection requests. GTE will transfer LSRs to GTE's NOMC centralized service order processing center electronically. For TSCs who decide not to use an electronic interface to reach GTE's data center, or who do not have data centers similar to TSC's, GTE will accept requests for service through other forms or media directly to the NOMC.
- 1.2.2 Most LSRs will be used either to transfer an existing GTE customer to TSC or to request service for a new customer who is not an existing GTE customer. Depending on the situation, different information will be required on the LSR. LSRs for a conversion of a GTE local customer to TSC must include information relating to all existing, new and disconnected services for that customer, including the customer's name, type of service desired, location of service and features or options the customer desires. For service to a new customer who is not an existing GTE customer, the LSR must contain the customer's name, service address, service type, services, options, features and ALEC data. If known, the LSR should include the telephone number and due date/desired due date.
- 1.2.3 While TSC would have its own customer information and the SAG/GTE products on tape from GTE, TSC would not have the due date or new telephone number for

new customers since that information is contained in GTE's systems. Therefore, a process is required to provide this information to TSC. GTE itself does not have uniform access to this information electronically. Until there is agreement on electronic interfaces, TSC has agreed that an 800 number is the method that will be used. The 800 telephone number will connect TSC directly to GTE's NOMC service representatives. When TSC receives a request for service from a new local service customer, TSC will call GTE's NOMC through the 800 number, and, while the new customer is on hold, GTE will provide the due date for service and the new telephone number for that customer. At the same time, TSC will give GTE the new customer's name, service address and type of requested service (e.g., R1, B1, etc.). GTE will enter that information into its SORCES or SOLAR service ordering systems to be held in suspense until TSC sends the confirming LSR. TSC will then return to its customer holding on the line and provide the due date and new telephone number.

- 1.2.4 After concluding the telephone call with the new customer, TSC will complete a confirming LSR for the new service and send it electronically to GTE's data center for processing. Upon receipt, GTE will match the LSR with the service order suspended in GTE's system, and if there is a match, GTE will process the LSR. After the LSR is processed, GTE will transmit confirmation electronically to TSC through the NDM that the LSR has been processed, providing a record of the telephone number and due date. Of course, GTE cannot hold the LSR in suspension forever. Thus, TSC will be required to submit the confirming LSR by 12:00 p.m. each day local time, as defined by the location of the service address. If TSC fails to submit the LSR in a timely manner, the suspended LSR will be considered in jeopardy, at which time GTE will assign a new due date upon receipt of the delayed LSR for such customer requests and notify TSC of the change.
- 1.2.5 Number assignments and due date schedules for services other than single line service will be assigned using the standard Firm Order Confirmation ("FOC") report sent electronically to TSC over the NDM, thereby providing a record of the newly established due date. An exception would be a multi-line hunt group, for which the pilot number will be provided by the 800 number. The other numbers then will be provided through the normal electronic confirmation process.
- 1.2.6 The processing of specifically requested telephone numbers (called "vanity numbers") is as follows. GTE will work with TSC on a real time interface to process vanity numbers while TSC's customer is still on the line. If a number solution can be established expeditiously, it will be done while the customer is still on the line. If extensive time will be required to find a solution, GTE service representatives will work with TSC representatives off line as GTE would for its own customers. For all of this, the basic tariff guidelines for providing telephone numbers will be followed.

- 1.2.7 Once the order for line-side interconnection service is established, it is moved for provisioning to the next system level. Here, GTE will validate and process the LSR to establish an account for TSC and, if GTE continues to provide some residual services to the customer, GTE will maintain a GTE account. In GTE's system, GTE's account is called the Residual Account and TSC's account is referred to as the ALEC Account. If any engineering for the service is necessary, the account would be distributed to the SSCC. Otherwise, it will be distributed for facility assignment.
- 1.2.8 With the account established and any engineering and facility assignment complete, GTE then will transmit electronically a record to GTE's CZT field personnel if physical interconnection or similar activity is required. The CZTs will provision the service and then electronically confirm such provision in the SOLAR/SORCES system when completed. The accounts then will be transmitted to GTE's Customer Billing Services System ("CBSS"). Call records for actual service provided to TSC's customers on GTE facilities will be transmitted from GTE's switches through some usage rating systems (BIP, UMS), screened and eventually delivered to CBSS for the generation of bills.
- 1.2.9 CBSS is a different system than CABS, and it is the one that GTE will utilize to produce the required bills for resold services, unbundled elements and local number portability. CBSS will create a bill to TSC for resold services and unbundled elements along with a summary bill master. Daily unrated records on TSC's accounts also will be generated and transmitted electronically to TSC. CBSS is the same system that generates GTE's own end user bill for GTE local and residual services.
- 1.2.10 In addition to the LSR delivery process, TSC will distribute directory assistance and directory listing information (together sometimes referred to hereafter as "DA/DL information") to GTE's Data Center over the NDM. GTE will sort the data containing this information and process it to GTE's directory publication company and its directory assistance bureaus.

2. Maintenance Systems.

2.1 General Overview

- 2.1.1 The maintenance operations support systems which GTE will use for TSC are essentially the same as those GTE uses to provide its own local repair service. If TSC requires maintenance for its local service customers, TSC will initiate a request for repair (sometimes referred to as a "trouble report") by calling GTE's Customer Care Repair Center. During this call, GTE service representatives will verify that the end-user is an TSC customer and will then obtain the necessary information from TSC to process the trouble report. While the TSC representatives are still on the line, GTE personnel will perform an initial analysis

of the problem and remote line testing for resale services. If engineered services are involved, the call will be made to the GTE SSCC for handling. If no engineering is required and the line testing reveals that the trouble can be repaired remotely, GTE personnel will correct the problem and close the trouble report while TSC representatives are still on the line. If on-line resolution is not possible, GTE personnel will provide TSC representatives a commitment time for repair and a trouble ticket number, and the GTE personnel then will enter the trouble ticket into the GTE service dispatch queue. TSC's repair service commitment times will be within the same intervals as GTE provides to its own end users.

- 2.1.2 Repair calls to the SSCC for engineered services will be processed in essentially the same manner as those by the GTE Customer Care Center. GTE personnel will analyze the problem, provide the TSC representative with a commitment time while they are still on the line, and then place the trouble ticket in the dispatch queue.
- 2.1.3 GTE then will process all TSC trouble reports in the dispatch queue along with GTE trouble reports in the order they were filed (first in, first out), with priority given to out-of-service conditions. If, at any time, GTE would determine that a commitment time given to TSC becomes in jeopardy, GTE service representatives will contact TSC by telephone to advise of the jeopardy condition and provide a new commitment time.
- 2.1.4 Trouble reports in the dispatch queue will be transmitted electronically to GTE CZT service technicians who will repair the service problems and clear the trouble reports. For cleared TSC trouble reports, GTE service technicians will make a telephone call to TSC directly to clear the trouble ticket. GTE service technicians will make the confirmation call to the telephone number provided by TSC. If TSC is unable to process the call or places the GTE technician on hold, the call will be terminated. To avoid disconnect, TSC may develop an answering system, such as voice mail, to handle the confirmation calls expeditiously.
- 2.1.5 GTE will not provide "on-line" access to GTE's maintenance support systems to "status" trouble tickets and close them except by special request on a per event basis.
- 2.1.6 GTE will resolve repair requests by or for TSC local service customers using GTE's existing repair system in parity with repair requests by GTE end users. GTE will respond to service requests for TSC using the same time parameters and procedures that GTE uses. TSC then would call GTE's Customer Care Center or SSCC while the customers were on hold.

**APPENDIX H
GTE TERMS**

Pursuant to Section 33 of Article III of this Agreement, the following terms shall be applied in the event the MCI Terms are deemed to be unlawful, or are stayed or enjoined by a court or commission of competent jurisdiction.

- The rates in Appendix C will apply instead of Appendix I.
- The resale discount in Appendix E will apply instead of Appendix I.
- The rates in Appendix F will apply instead of Appendix I.
- Sections 3.4, 5.4, 5.6, 5.8 and 5.9 of Article IV will apply instead of Appendix I.
- Section 2.3 of Article VI will apply instead of Appendix I.

APPENDIX I
TERMS ADOPTED FROM THE MCI ARBITRATION AGREEMENT
OF MCImetro/GTE AGREEMENT

Article V, § 1

9 Telecommunications Services Provided for Resale

1.1 At the request of MCI_m, and pursuant to the requirements of the Act, Commission Rules, Regulations and Orders, and FCC Rules and Regulations, GTE shall make available to MCI_m for unrestricted resale all Telecommunications Services that GTE currently provides or may offer hereafter to subscribers who are not Telecommunications Carriers. Resale shall be unrestricted except as provided herein. GTE shall also provide service functions, as set forth in Section 3.3 of this Article. The Telecommunications Services and service functions provided by GTE to MCI_m pursuant to this Article are collectively referred to as "Local Resale".

1.6 For purposes of MCI_m initiating its services, GTE shall release information to MCI_m regarding the subscriber's service, without requiring MCI_m to produce a written LOA, based on MCI_m's blanket representation that the customer has authorized MCI_m to obtain such CPNI. MCI_m and GTE agree to comply with the CPNI requirements of the Act and related FCC orders.

1.7 GTE shall allow MCI to initiate "as is transfers" of local exchange Telecommunications Services. For purposes of this Section 1.7, an "as is transfer" is the transfer of all the Telecommunication Services and features available for resale that are currently being provided for the specified account without the requirement of a specific enumeration of the services and features on the LSR without interruption of service.

Article V, § 2

10 No Restrictions on Resale. GTE will not prohibit, nor impose unreasonable or discriminatory conditions or limitations on the resale of its Telecommunications Service. To the extent that there is a conflict between the terms and conditions and other matters in GTE's tariff, and any specific provision of this Agreement, the terms and conditions of this Agreement shall control.

2.1 Restrictions on Resale

2.1.1 MCI_m agrees not to resell Residential Access Lines to non-residential subscribers.

APPENDIX I
TERMS ADOPTED FROM THE MCI ARBITRATION AGREEMENT
OF MCImetro/GTE AGREEMENT

2.1.2 MCIIm agrees not to resell Lifeline or Link-Up Service to non-qualifying residential customers. GTE shall retain any subsidy associated with resold Lifeline or Link-Up Services.

Article V, § 3

3.1.2 Contract Service Arrangements and Promotions. GTE shall offer for resale all of its services available to any retail subscriber, including but not limited to Contract Service Arrangements and Promotions.

3.1.2.1 Contracts. GTE shall offer for resale all existing (as of the Effective Date of this Agreement) contract service arrangements with end users. GTE shall offer for resale all future contract service arrangements. MCIIm will receive the wholesale discount for such contract services.

3.1.2.2 Promotions. Promotions not exceeding ninety (90) days in length shall be available for resale at GTE's promotional rate and the wholesale discount shall not apply. Promotions exceeding ninety (90) days in length shall be available for resale at GTE's promotional rate less the wholesale discount specified in Appendix C.

3.1.9 Subject to Sections 2 and 3 of this Article, GTE shall make available for MCIIm to resell at the wholesale discount all coin and coinless pay phone local services, features and functionalities that it provides at retail. GTE also must provide all support and service functions, as described in Section 276 of the Act and FCC and state regulations, at parity with those provided for its own pay phone local services including, but not limited to: (a) coin rating, (b) answer supervision, (c) access to maintenance/diagnostic platform, (d) call blocking, (e) call screening, (f) intraLATA timing, (g) far-end disconnect recognition, (h) ANI information digits, and (i) fraud protection. GTE must also provide billing detail showing all 1+ traffic in EMR format and transferred to MCIIm via Direct Connect.

Appendix C, § 1

1. Services

1.1 Local Service Resale. The prices charged to MCIIm for Local Service shall be calculated using the avoided cost discount applicable in Florida, determined on the basis of the retail rate charged to subscribers for the Telecommunications Service requested. The interim wholesale discount shall be 13.04% off the applicable retail rate for all GTE services subject to resale.

APPENDIX I
TERMS ADOPTED FROM THE MCI ARBITRATION AGREEMENT
OF MCImetro/GTE AGREEMENT

1.2 The prices shall be based on GTE's retail rates (including all promotions and contracts as described in Article V) applicable on the Effective Date, less the applicable discount. If GTE changes its retail rates after MCI executes this Agreement, the applicable discount shall be applied to the retail rates as changed.

1.21 Non-recurring Charges for Resale Services:

Non-recurring charges are as set forth in GTE's retail local service tariffs, less the wholesale discount of 13.04%.

Article III, § 2

2. **Combinations.** Subject to this Agreement, the Network Elements, ancillary services, local services, or other services provided pursuant to this Agreement may be connected to other Network Elements, ancillary services, local services, or other services provided by GTE or to any Network Elements, ancillary services, local services or other services provided by MCI itself or by any other vendor. Subject to the requirements of this Agreement, MCI may, at any time add, delete, or modify the Network Elements, ancillary services, local services, or other services purchased hereunder or relocate access to the foregoing. GTE will not discontinue any unbundled Network Element or ancillary service during the term of this Agreement without MCI's consent, except

- .1 To the extent required by network changes or upgrades, in which event GTE will comply with the network disclosure requirements stated in the Act and FCC regulations thereunder; or
- .2 If required or permitted by a final order of a court, the FCC or the Commission as a result of remand or appeal of the FCC Interconnection Order. In the event such a final order allows but does not require discontinuance, GTE may, on thirty (30) days written notice, require that such terms be renegotiated, and the Parties shall renegotiate in good faith such mutually acceptable new terms as may be required or appropriate to reflect the results of such action. In the event that such new terms are not renegotiated within ninety (90) days after such notice, or if the Parties are unable to agree either Party may submit the matter to the Dispute Resolution Process described in Section 41 of this Article.

Basic NID, per line, per month	\$1.45
12x NID, per line, per month	\$2.10
3. LOCAL SWITCHING	
2-Wire Analog Port, per month	\$4.75
DS-1 Port, per month	\$72.25
Local Switching, per MOU, originating	\$.004
Local Switching, per MOU, terminating	\$.00375
4. TANDEM SWITCHING	
Tandem Switching, per MOU	\$.0009512
5. INTEROFFICE TRANSMISSION	
Common Transport	
Transport Termination per MOU	\$.0001
Transport Facility per MOU per mile	\$.0000017
Dedicated Transport Entrance Facility - Recurring Charges	
2-wire voice, per circuit, per month	\$29.00
4-wire voice, per circuit, per month	\$35.00
DS-1 system first, per system, per month	\$135.00
DS-1 system additional, per system, per month	\$125.00
DS-3 protected, per system, per month	\$960.00
Voice facility, per facility, per month	\$2.60
DS-1 facility, per mile, per month	\$0.50
DS-1 per termination, per month	\$30.00
DS-3 facility, per mile, per month	\$13.00

APPENDIX I

**TERMS ADOPTED FROM THE MCI ARBITRATION AGREEMENT
OF MCImetro/GTE AGREEMENT**

Appendix C (Page 6) of MCImetro/GTE Agreement

DS-3 per termination per month	\$285.00
Dedicated Transport Entrance Facility - Nonrecurring Charges	
2-wire voice, per circuit	TBD
4-wire voice, per circuit	TBD
DS-1 system first, per system	TBD
DS-1 system additional, per system	TBD
DS-3 protected, per system	TBD
Multiplexing - Recurring Charges	
DS-1 to DS-0 MUX, per month	\$205.00
DS-3 to DS-1 MUX, per month	\$305.00
DS-3 to DS-3 MUX, per month	TBD
Multiplexing - Nonrecurring Charges	
DS-1 to DS-0 MUX	TBD
DS-3 to DS-1 MUX	TBD
DS-3 to DS-3 MUX	TBD
6. SIGNALING SYSTEM (SS7)	
Recurring Charges	
56 kbps link, per link, per month	\$80.00
DS-1 Links, per link, per month	\$125.00
Signal Transfer Point port termination, per termination per month	\$350.00
Nonrecurring Charges	
56 kbps link, per link	TBD
DS-1 Links, per link	TBD
Signal Transfer Point port termination, per termination	TBD
AIN Capabilities	TBD
LIDB (ABS) (per query with response)	\$0.04
Toll Free Calling (per query with response)	\$0.011
7. OPERATOR SERVICES & DA	
Directory Assistance	TBD
Operator Services	TBD
8. LOCAL INTERCONNECTION AND RECIPROCAL COMPENSATION	
Tandem	\$0.00125

APPENDIX I

TERMS ADOPTED FROM THE MCI ARBITRATION AGREEMENT
OF MCImetro/GTE AGREEMENTAppendix C (Page 7) of MCImetro/GTE Agreement

End Office	\$0.0025
9. COLLOCATION	
EISCC (Cross-Connect Jumper)	
DS-0, per month	\$1.60
DS-1, per month	\$4.00
DS-3, per month	\$31.00
Physical engineering fee, per request	\$6,946.00
Simple building modification, per office	\$13,484.00
Moderate building modification, per office	\$18,448.00
Complex building modification, per office	\$23,514.00
DC power, per 40 AMPs	\$2,900.00
Cable pull, per 12 fibers	\$1,213.00
Cage enclosure, per cage	\$4,559.00
Partitioned space, per square foot, per month	\$1.85
DC power, per 40 AMPs, per month	\$405.00
Cable space, per 12 fibers, per month	\$14.00
10. SERVICE PROVIDER NUMBER PORTABILITY	
Interim Number Portability (Interim)	no charge
11. NONRECURRING CHARGES	
11.1 UNBUNDLED SERVICES	
Service Ordering (loop or port)	
Initial Service Order, per order	\$47.25
Transfer of Service Charge, per order	\$16.00
Subsequent Service Order, per order	\$24.00
Customer Service Record Search, per request	\$5.25
Installation	
Unbundled Loop, per loop	\$10.50
Unbundled Port, per port	\$10.50
Loop Facility Charge, per order ¹	\$62.50
11.2 RESALE SERVICES	13.04% wholesale discount

¹ The Loop Facility Charge will apply when field work is required for establishment of a new unbundled loop service.

APPENDIX I

TERMS ADOPTED FROM THE MCI ARBITRATION AGREEMENT
OF MCImetro/GTE AGREEMENTAppendix C (Page 8) of MCImetro/GTE Agreement

12. BILLING AND RECORDING	TBD
13. OTHER SERVICES	
Busy Line Verification and Interrupt (per call)	\$0.65
E911 Service	
Recurring Charges	
E911 trunk, fixed rate each trunk (Interim)	\$26.00
E911 trunk, per airline mile each trunk (Interim)	\$1.50
E911 Selective Routing, per trunk (Interim)	\$30.00
E911 ALI Entry Software, per package (optional) (Interim)	\$11.00
Nonrecurring Charges	
E911 trunk, fixed each trunk (Interim)	\$89.00
E911 Selective Routing, per trunk (Interim)	\$260.00
Selective Routing Boundary Maps (Interim)	\$44.00
E911 ALI Entry Software, per package (optional) (Interim)	\$250.00
E911 ALI Entry User's Guide, per copy (optional) (Interim)	\$30.00
MSAG Copies, per county (Interim)	
diskette or magnetic tape (Interim)	\$45.00
paper copy (Interim)	\$110.00
