

BEFORE THE
FLORIDA PUBLIC SERVICE COMMISSION

In the Matter of : DOCKET NO. 960786-TL

Consideration of BellSouth
Telecommunications, Inc.'s
Entry into interLATA services
pursuant to Section 271 of the
Federal Telecommunications
Act of 1996.

FIFTH DAY - MORNING SESSION

VOLUME 19

Pages 1998 through 2147

PROCEEDINGS: HEARING

BEFORE: CHAIRMAN JULIA L. JOHNSON
COMMISSIONER J. TERRY DEASON
COMMISSIONER SUSAN F. CLARK
COMMISSIONER DIANE K. KIESLING
COMMISSIONER JOE GARCIA

DATE: Monday, September 8, 1997

TIME: Commenced at 9:15 a.m.

PLACE: Betty Easley Conference Center
Room 148
4075 Esplanade Way
Tallahassee, Florida

REPORTED BY: JOY KELLY CSR, RPR
Chief, Bureau of Reporting
H. RUTHE POTAMI, CSR, RPR
Official Commission Reporters

APPEARANCES:

(As heretofore noted.)

DOCUMENT NUMBER - DATE

P R O C E E D I N G S

(Hearing reconvened at 9:15 a.m.)

(Transcript follows in sequence from
Volume 18.)

CHAIRMAN JOHNSON: We're going to go on the record. Counselor, are there any preliminary matters before we entertain the oral arguments?

MS. BARONE: Staff doesn't have any. I don't know if any of the parties have any that they would like to bring up other than the oral argument.

CHAIRMAN JOHNSON: Mr. Horton, did you --

MR. HORTON: Madam Chairman, just to let you know when we left here Friday Mr. Falvey was due in last night, the ACSI witness, and I received a message over the weekend that he was not able to make his connections until this morning, so hopefully he's landing now. I don't think it's going to be a problem when we get to him, but just to let you know he may be a little bit late.

CHAIRMAN JOHNSON: Thank you very much. Any other preliminaries? Seeing none, then I guess we can proceed into the oral arguments. It's AT&T's motion?

MS. RULE: Well, this is a joint motion. It's on behalf of AT&T, MCI, Intermedia, FCCA, ACSI and WorldCom.

1 **CHAIRMAN JOHNSON:** And will you be
2 conducting all of the argument?

3 **MS. RULE:** Unless somebody else wants to
4 jump in.

5 **CHAIRMAN JOHNSON:** Okay.

6 **MS. RULE:** Thank you, Commissioners. You
7 have in front of you a package of information, and the
8 parties should also have copies by now. And what you
9 have is an outline of Section 271, an outline of
10 Section 252, an excerpt from the FCC's Ameritech
11 order, specifically Paragraphs 110 and 114, and also a
12 full length version of 271 and 252, and a longer
13 excerpt from the Ameritech order. And lest the amount
14 of material alarm you, I'm not going to talk about all
15 of it. I'm just going to talk about the outlines.

16 We're asking you today to either strike
17 BellSouth's draft SGAT or sever it for consideration
18 in a separate proceeding. And this action is correct
19 under federal law as well as state law.

20 First I'd like to take a moment -- actually
21 it will take a few moments to explain why BellSouth's
22 draft SGAT is irrelevant to this proceeding under
23 federal law. And the purpose of your proceeding here
24 is to allow the Commission to gather evidence in order
25 to verify BellSouth's compliance with Section 271(c)

1 of the Telecommunications Act of 1996, and I think
2 I've also heard it called lately the "Regulatory
3 Attorney's Full Employment Relief Act."

4 This means that your job here today, and the
5 entire proceeding, is a prelude to BellSouth's
6 eventual application to the FCC under Section 271. So
7 we need to look to the Act to determine whether, and
8 to what extent, BellSouth can rely on a SGAT to show
9 compliance with 271 requirements.

10 And as I mentioned, you have before you
11 several pieces of paper that I've handed out. And the
12 first one I'd like you to look at is an outline of
13 Section 271. I find it much easier to understand
14 things I can see rather than things I can only hear,
15 so I wanted to show you the provisions that are before
16 you today, and those that are not.

17 And I apologize in advance for the amount of
18 time it might take to go through this with you. But
19 your understanding of this section is essential to
20 your decision in the case and it will also give you
21 framework both for evaluating our motion today and
22 BellSouth's response, as well as your eventual
23 decision in November.

24 And the issue of your understanding of 271
25 is vitally important to this case whether or not you

1 decide to grant our motion.

2 The requirements for interLATA approval are
3 found in (c) of 271. And if you take a look at the
4 first page of the outline, you'll see that the
5 paragraphs are successively indented. That's intended
6 to show you what the structure is of the section, and
7 that was I think paragraphs are less likely to be
8 taken out of context. I think one thing we've seen
9 over the course of your experience, and the FCC's
10 experience, with Section 271 is it's very easy to take
11 paragraphs out of context.

12 Your role is to verify BellSouth's
13 compliance with 271(c) and that's the section with the
14 box around it in the outline.

15 Paragraph 1 says that BellSouth can meet the
16 requirements of 271 if it meets the requirements of
17 either Subparagraph A, and that's Track A, or
18 Subparagraph B which is Track B; and that's in the
19 disjunctive; they get one choice here. Subparagraph A
20 lists the requirements for a Track A proceeding. And
21 as you know BellSouth has testified that this is a
22 proceeding under Track A so this is the section that
23 applies to BellSouth.

24 Track A is the correct track in this case
25 because BellSouth has entered into one or more binding

1 interconnection agreements that you've already
2 approved under Section 252 of the Act. BellSouth also
3 says it meets the other requirements of Track A and
4 you'll have to decide whether or not they do when it
5 comes time to vote. And you'll see in the right-hand
6 margin I've listed the issues next to the sections of
7 the Act to which they apply.

8 Now, BellSouth testified that it's not
9 proceeding under Track B. And a Bell operating
10 company can only meet the requirements of Track B if
11 no provider has requested interconnection and access,
12 and if the company had an SGAT approved, or permitted
13 to take effect under Section 252 of the Act. And
14 again I've listed those issues in the margin next to
15 Track B.

16 As you can clearly see from the structure of
17 the Act, the SGAT is applicable only to a Track B case
18 and BellSouth has assured you that this is not a
19 Track B case.

20 Now, this isn't the only reference to the
21 SGAT in Section 271. And if you take a look down at
22 Subparagraph 2 which comes next, it again emphasizes
23 the difference between Track A and Track B. And it
24 states that a BOC, Bell operating company, meets the
25 requirements of this paragraph, Paragraph 2, if one of

1 two things occurs: it's either providing access and
2 interconnection pursuant to a Track A-type agreement,
3 that is a 252 arbitrated or agreed upon
4 interconnection agreement, or it's generally offering
5 access pursuant to a statement described in Track B.

6 So this paragraph again makes its clear that
7 Track A requires interconnection agreements, not a
8 SGAT; and Track B requires a SGAT, not interconnection
9 agreements.

10 In its motion BellSouth -- I'm sorry, in its
11 response to our motion BellSouth states that Section
12 271(c)(2), the provision we just looked at, does not
13 set out one method to meet the checklist if Track A is
14 followed and a second if Track B is followed. If you
15 look at Section 271, however, this simply does not
16 support BellSouth's argument.

17 Section 271(c)(2), the paragraph we just
18 looked at, does not allow use of a SGAT under Track A.
19 The rest of Paragraph C sets forth the terms of the
20 competitive checklist, and those are Issues 2 to 15 in
21 this docket, and I haven't listed them on the outline.
22 Whether the company is proceeding under Track A or
23 Track B, it has to meet the requirements of the
24 competitive checklist through whatever its chosen
25 entry vehicle is.

1 BellSouth argues that it may rely on access
2 and interconnection either provided or generally
3 offered to meet the checklist. But that language is
4 taken out of context. You find it only in
5 subparagraph 2(B); that is you find it only in the
6 competitive checklist. And as we've seen the
7 checklist applies equally to both Track A and Track B,
8 so, of course, you're going to see both options
9 offered there.

10 Continuing on to Page 2 of the outline you
11 can see Subsection D. This subsection requires the
12 FCC to consult with you. And the reason for the
13 consultation is to verify the compliance of the Bell
14 operating company with the requirements of (c). So
15 again your role is under (c); to determine their
16 compliance with that paragraph. It then states the
17 circumstances under which the FCC may approve a 271
18 application. And it again makes it clear that Track A
19 requires interconnection agreements while Track B
20 requires a SGAT, and that's found in (3).

21 According to this paragraph, before the FCC
22 can approve a 271 application, it's got to find either
23 that the company has met the requirements of
24 subsection (c)(1), that is either Track A or Track B,
25 and must find either that the interconnection provided

1 pursuant to Track A implements the competitive
2 checklist, or that the interconnection generally
3 offered pursuant to a SGAT offers all of the items in
4 the checklist. And these two items are separate and
5 distinct. You provide interconnection under Track B.
6 You generally offer access under an SGAT. I'm sorry,
7 I just messed that up. You provide under Track A; you
8 generally offer under an SGAT in Track B.

9 And this paragraph, (3), again makes it
10 clear that interconnection agreements are relevant to
11 Track A and SGATs are relevant to Track B. And again,
12 this is not a Track B case. That's what BellSouth has
13 told you.

14 The FCC recently interpreted this provision
15 in its Ameritech order. And I'd like to direct your
16 attention next to Paragraph 110 of the Ameritech
17 order. And you've got that in front of you.

18 There the FCC concluded that an offer to
19 provide a checklist item pursuant to an SGAT does not
20 fulfill the requirements of Track A. You can see this
21 in the highlighted material. The mere fact that a BOC
22 has offered to provide checklist items will not
23 suffice for a BOC petitioning for entry under Track A
24 to establish compliance. To be providing a checklist
25 item a BOC must have a concrete and specific legal

1 obligation to furnish the item upon request pursuant
2 to state-approved interconnection agreements.

3 This means that a Track A applicant must
4 live and die by the terms of its interconnection
5 agreements. An SGAT is simply inapplicable to
6 determine checklist compliance for a Track A case.
7 Again, BellSouth says this is a Track A case.

8 A few paragraphs later in Paragraph 114 the
9 FCC again makes it clear that a Track A applicant must
10 provide the interconnection pursuant to agreements,
11 while a Track B applicant may generally offer
12 interconnection pursuant to a SGAT.

13 If you take a look at the highlighted
14 material on Paragraph 114 they very bottom it says "We
15 conclude that Congress used the terms 'provide' and
16 'generally offer' to distinguish between two methods
17 of entry."

18 Commissioners, the FCC has made it clear
19 that Track A applicants must live and die by their
20 interconnection agreements. This means that BellSouth
21 must be able to show that it is either furnishing an
22 item, or if no competitor is actually using the
23 checklist item, that BellSouth can furnish the item
24 upon request pursuant to a state-approved
25 interconnection agreement, not pursuant to a SGAT.

1 BellSouth argues to you that it's not this
2 Commission's call to determine whether it may proceed
3 under Track A or Track B. And I happen to agree with
4 that. BellSouth also argues that it's not the role of
5 this Commission to decide whether it may rely on an
6 SGAT in a Track A proceeding. I'm not so sure I agree
7 with that one. In any event, you're not called upon
8 to make either of those two determinations.

9 BellSouth has already testified to you that
10 it's proceeding under Track A and not Track B. And
11 the FCC has stated that Track A requires provision of
12 service under interconnection agreements, not an SGAT.
13 Of course, you are certainly free to disagree or agree
14 with the FCC. And, indeed, you'll be called upon to
15 offer your consultation to that agency. But the FCC
16 is the agency that ultimately will determine the
17 success or failure of BellSouth's 271 case, and the
18 FCC has explained how it interprets the requirements
19 of Section 271.

20 The interpretation is well within its
21 jurisdiction, and according to the FCC, an SGAT simply
22 has no place in a Track A proceeding.

23 Now I'd like to switch gears and talk to you
24 about the reasons you should dismiss the SGAT or sever
25 it for consideration in another proceeding under

1 Florida law. And given the amount of time I've asked
2 you to spend on Section 271 I'll try to keep this one
3 a little shorter.

4 In our motion we've set forth several
5 reasons why you should dismiss or sever the SGAT.
6 First of all, it's a draft. And as you can see from
7 Section 271(c)(1)(B), there's no legal significance at
8 all to a draft of a SGAT. It's not recognized under
9 271.

10 Next, the current draft was filed or revised
11 after the close of all of the discovery in this case.
12 That's reason enough to consider that that version
13 should not be determined in this case. And we still
14 haven't seen an SGAT as of today, although you heard
15 the testimony that BellSouth intended to file it last
16 week.

17 Additionally, BellSouth has proposed no
18 issue specific to approval of an SGAT. Issue (1)(B)
19 (b), which is in the Prehearing Order, incorporates
20 none of the substantive requirements of Section 252(f)
21 and that's the section of the Act that sets the
22 standards for your approval of an SGAT.

23 BellSouth should have completed this SGAT
24 process well before it filed this petition. In Order
25 No. PSC 97-0703 Chairman Johnson directed BellSouth to

1 file with its original petition all of the evidence it
2 relies upon to demonstrate that the checklist had been
3 met as of the time of filing. You've heard testimony
4 that BellSouth hasn't met it; even if the SGAT were
5 somehow applicable, there is no SGAT today. This
6 isn't just an academic issue and it's not just legal
7 posturing as BellSouth suggests in its reponse to the
8 joint motion.

9 I'd like you to take a look at section
10 252(f), and that's the one-page document in front of
11 you.

12 Your role is shown under 252(f)(2), entitled
13 "State commission review." In order to approve an
14 SGAT you must specifically find that it complies with
15 Section 252(d) and the implementing regulations for
16 that section. That section requires nondiscriminatory
17 cost-based prices. There's no issue in this case
18 regarding prices. And you've heard testimony that
19 there are no cost studies either. And even though
20 there are some arbitrated prices in the SGAT, nobody
21 except the parties to those arbitrations had the
22 ability to challenge those prices because they were
23 excluded as intervenors.

24 Under 252(d) you must also find that the
25 SGAT complies with 251(f) and its implementing

1 regulations. That section defines duties of
2 interconnection, unbundled access and resale among
3 other things. There's no issue in this case
4 incorporating those standards.

5 And finally, you may establish or enforce
6 other requirements of state law when reviewing the
7 SGAT, including compliance with state quality
8 standards. There's no issue in this case regarding
9 those requirements either.

10 I want you to be very clear what you're
11 doing when you approve an SGAT. You're setting rates.
12 That's a ratemaking proceeding. You're establishing
13 the terms and conditions of interconnection. You're
14 determining what services are going to be available to
15 interconnectors without lengthy and expensive
16 negotiation, and you're also determining what services
17 will not be available. And most importantly, you're
18 allowing BellSouth to impose those rates, terms and
19 conditions on companies who are not represented in
20 this docket.

21 I'd like to hand out a copy of the FAW
22 notice. It was issued in this docket and it doesn't
23 meet the notice requirements of the APA for an SGAT
24 approval docket.

25 Commissioners, there's nothing in that

1 notice that places the public on notice that the
2 Commission will be setting rates in this proceeding.
3 There's nothing in it that places the public on notice
4 that the Commission will be setting the terms and
5 conditions under which ALECs may interconnect with
6 BellSouth. And there's nothing that places the public
7 on notice that this is their clear point of entry into
8 the agency's action under section 252(f). This notice
9 is simply insufficient under Chapter 120 to allow the
10 Commission to engage in those actions, which is
11 exactly what it would do if it approved an SGAT in
12 this docket.

13 Now, why isn't that information here? It's
14 not here because that's not the purpose of this
15 docket. This docket was opened well over a year ago
16 as a docket to consider BellSouth's entry into
17 interLATA services pursuant to 271. And that's what
18 the title of this docket says, that's what the public
19 is entitled to believe will happen in this docket, but
20 that's not what BellSouth wants you to do.

21 I'd like you to keep in mind that BellSouth
22 and BellSouth alone has the keys to this case in its
23 pocket. BellSouth alone has been in a position to
24 determine how and when to file this case. The parties
25 couldn't do it. We've had a difficult enough time

1 just figuring out what Bell intends to do and when it
2 intends to do it. And we're certainly not required to
3 guess.

4 If you take a look in the petition in this
5 case, the petition doesn't even reveal whether
6 BellSouth intends to proceed under Track A or Track B
7 despite the clear instructions in the procedural order
8 that BellSouth should do so. Until depositions were
9 held in August, over a month after BellSouth filed its
10 case, BellSouth wouldn't even state whether it
11 intended to proceed under Track A or Track B, and you,
12 yourselves, heard last week how difficult it was to
13 extract a coherent explanation of why BellSouth thinks
14 it meets the requirements of 271, and we still don't
15 know when they plan to file the SGAT.

16 You've heard an argument from BellSouth that
17 the SGAT is for the little guys. Where are they?
18 They are not in this proceeding. Everybody here has
19 an interconnection agreement, has BellSouth has
20 pointed out. The little guys didn't get effective
21 notice. They are entitled to notice and they are
22 entitled to a clear point of entry under the APA.

23 I'd like you to take the time to read
24 Sections 252 and 271 carefully. I'd like you to look
25 at the issues in this docket. Those issues simply are

1 not sufficient for approving an SGAT under Section
2 252. Take a careful look at the FAW notice. It's not
3 legally sufficient under Chapter 120 to allow you to
4 do what BellSouth wants you to do.

5 You have independent grounds under federal
6 law and state law to dismiss this SGAT from this
7 proceeding. It doesn't mean BellSouth can't have an
8 SGAT and it doesn't mean they can't have a separate
9 proceeding, but this is not the time and place to do
10 it. We urge you to dismiss the SGAT, or at the very
11 least, sever it for consideration in a properly
12 noticed proceeding. Thank you.

13 **CHAIRMAN JOHNSON:** Thank you. Any
14 questions, Commissioners? Then we'll proceed into
15 BellSouth's response.

16 **MR. CARVER:** Thank you, Chairman Johnson.

17 There are really three things that need to
18 be looked at I think for purposes of deciding this
19 motion. The first is the question of substantively
20 whether the SGAT relates to Track A and B. The second
21 is procedurally whether there's any problem with it
22 being in the case. And the third are the positive
23 reasons why it should be here. In other words, the
24 utility of the SGAT.

25 And I think the third aspect is probably the

1 one that's the least controversial and the most simply
2 expressed, so I'm going to begin with that.

3 This case should really be about substance
4 and not about form. The issue here before the
5 Commission is whether BellSouth has made offerings
6 that are sufficient to be the checklist, whether they
7 comply with 271 and whether we provided to the
8 parties -- and by the "parties" I mean the parties
9 here and other new entrants -- the tools to enter the
10 market. What's really important is the substance of
11 the offerings and the decisions that you make about
12 them into your consultative role. What's much, much
13 less important is the source that you look to see what
14 those offerings are. And that's really what this
15 entire argument is about.

16 Because there are approximately 50
17 interconnection agreements out there. Some of these
18 agreements meet the checklist on particular items;
19 some of them exceed the checklist, some of them fall
20 short of the checklist. But if you put them together
21 there are numerous agreements that meet every
22 checklist item. However, it's a fairly complicated
23 process to go through those and mix and match and try
24 to find out which one goes where. And for that
25 reason -- well, let me back up and first of all say

1 the SGAT, however, is the only place where there is
2 one unified statement of precisely what BellSouth is
3 offering that we believe meets the checklist. So it's
4 the easiest and simplest place to look to find out
5 what we're offering and what we believe complies.
6 And, again, as I said, it's not that they are not in
7 the interconnection agreements, it's just the
8 interconnection agreements are much, much more
9 difficult to follow.

10 So what we're really talking about here is
11 what is the most convenient source to look to to
12 gather this information. And I think the fact that
13 the SGAT is the best source and most convenient source
14 is proven by the testimony of their own witness last
15 Friday. You heard Mr. Gillan talk about his view on
16 three of the 14 checklist items, and obviously
17 BellSouth disagrees with the substance, but you heard
18 him say that for purposes of putting together his
19 testimony he reviewed the SGAT. He also reviewed
20 Commission orders and he reviewed the testimony, but
21 he focused on the SGAT. He didn't focus on the
22 orders, and, in fact, he didn't seem to have a very
23 good knowledge of what was in the AT&T or MCI order.

24 And I point that out only because I think
25 that's a vivid example of the fact that the SGAT has a

1 tremendous use in this case, and that's to set forth
2 very succinctly what needs to be viewed.

3 **CHAIRMAN JOHNSON:** Let me interrupt just one
4 minute to make sure I'm following you here.

5 With respect to the SGAT then, you are --
6 it's Bell's position that all of the items that are
7 listed in the SGAT are actually taken from negotiated
8 agreements or interconnection agreements that are
9 actually filed. This isn't information in the
10 abstract; it is actually applied information.

11 **MR. CARVER:** It's applied information. Now,
12 to clarify, there may be some instances where we've
13 taken something directly from a Commission Order. And
14 I can't say that every aspect of every Commission
15 Order has been incorporated in an agreement somewhere,
16 so in some instances we have rulings of this
17 Commission.

18 But the basis of the SGAT are the
19 agreements. And I believe if we were forced to go
20 through the agreements and to restructure our
21 testimony, and to point to you where those agreements
22 are that a checklist compliant, we could do that. We
23 have structured the case the way we have simply
24 because it's a lot more efficient to say "Here's the
25 SGAT; here's what meets the requirements." Rather

1 than to say, "Here are 50 agreements and some meet
2 them and some don't," and they are all over the board.

3 But in answer to your question, yes, the
4 SGAT is based on the agreements. That's why I said to
5 begin with I think this argument is essentially one of
6 form over substance because the real issue here is
7 what BellSouth is offering.

8 **CHAIRMAN JOHNSON:** So as it relates to
9 Ms. Rule's argument, one are her procedural arguments
10 that this needs to be taken up in a full blown hearing
11 because we're setting rates and establishing terms and
12 conditions that we've not previously considered,
13 Bell's response is what?

14 **MR. CARVER:** I don't think you're setting
15 rates in the way that she represents. I think
16 basically you're acting pursuant to the Act, which
17 says that the SGAT is to be filed and within 60 days
18 it can be approved. Now, in this case, of course, we
19 filed the draft SGAT to in effect extend the time
20 period to 120 days. But we've made no secret of what
21 we're doing. We've made no secret of the fact that --
22 or approval of something that we're seeking here. And
23 I think the issue before you on the SGAT approval or
24 not is exactly the same as 271 issue, because you're
25 going to have to look for 271 purposes to see if our

1 offerings are checklist compliant. And the standard
2 for approval of the SGAT is whether it is checklist
3 compliant. So the issues are precisely the same.

4 As to her notice argument, I don't think
5 that either the issues or in the notices that there's
6 any procedural infirmity here. I think anyone who
7 wanted to intervene had adequate notice of what was
8 going on here that they could have done so.

9 I'm not sure -- I hesitate to make technical
10 arguments but I'm not sure that AT&T really has
11 standing to speak for as they call them, "the little
12 guys." All of the parties that are here are here. I
13 don't know that anyone else has really been deprived
14 of an opportunity to appear. I will say that the way
15 that we restructured this case, which is to have the
16 SGAT approval and 271 approval in the same case has
17 been we've done it this way in six states. Many of
18 these parties have been involved in those cases. None
19 of them have complained before. And since we did the
20 first 271 hearing, which I believe again last January,
21 no one in any state has gone forward and complained
22 that they were deprived of an opportunity to
23 participate, or that there was some mystery to them as
24 to what was going on.

25 So, again, from a procedural standpoint, or

1 at least that piece of the procedural argument, and
2 certainly from the utility's standpoint, the SGAT
3 belongs in the case.

4 **COMMISSIONER KIESLING:** Go ahead. I had a
5 question, too, along the same lines.

6 **CHAIRMAN JOHNSON:** Okay. The final question
7 then -- Ms. Rule cited to 110 of the Ameritech order
8 where the FCC concluded -- they kind of defind or
9 clarified the definition of "provides" and I get
10 Ameritech agreed with them, that "provides" means a
11 check -- "We conclude that a BOC 'provides' a
12 checklist item if it actually furnishes the item at
13 rates and terms and conditions that comply with the
14 Act." But I guess the operative thing is that they
15 are actually providing and not just offering.

16 I'm understanding you to say that your SGAT
17 is a composition of things that are being actually
18 provided. Is that correct.

19 **MR. CARVER:** That's correct. That's
20 correct. And I think there's an independent question
21 of whether a state-approved SGAT creates a concrete
22 and legal binding obligation. I'd actually planned to
23 address that a little bit later in my response but I
24 think that's another line. But actually, I mean the
25 point you raise is one that's very important, which is

1 to the extent the SGAT incorporates the agreements,
2 it's simply a different expression of those
3 agreements. If the agreements are binding, then to
4 the extent the SGAT incorporates them, then obviously
5 those same offerings would be required to be offered
6 in exactly the same way. So it's a binding
7 obligation, whether it is taken directly from the
8 agreement or whether the SGAT incorporates the terms
9 of the agreement. And, again, I do have some more I
10 want to say about that but I'll save that for a little
11 bit later, if I may.

12 **CHAIRMAN JOHNSON:** Commissioner Kiesling.

13 **COMMISSIONER KIESLING:** I'm just a little
14 bit confused on the draft SGAT. If everything in it
15 is based on either negotiated or arbitrated existing
16 interconnection agreements, how do you square that
17 with the 252(f) language that requires that it -- they
18 be cost based? Do you have cost studies on all of
19 those, or did you pull them out of interconnection
20 agreements?

21 **MR. CARVER:** For the most part we pulled
22 them out of either interconnection agreements, and I
23 believe arbitrated interconnection agreements. To
24 address the cost based issue more generally, I think
25 there's sort of a subtext here, which is that the

1 parties filed this motion don't agree that the rates
2 that the Commission have set are cost based. They
3 have argued in the other states for TELRIC studies.
4 But what we have here is arbitrations with MCI, with
5 AT&T, and with MFS in which rates were set. We took
6 those rates and we put them into the agreement, both
7 the permanent and interim one. Now there may be some
8 instances in which there are a few rates that were not
9 specifically arbitrated. And as I sit here now I
10 cannot give you every rate that would apply to, but I
11 believe there are comes studies to support those.

12 But in the main, the rates that are in the
13 SGATs are the rates that have been set by this
14 Commission in the arbitrated proceedings, and the
15 standard that was applied was, of course, that they be
16 calls based. So I think any argument they make that
17 they are not cost based is, in effect, I suppose some
18 sort of a request for reconsideration of the
19 Commission's order, because that is, in fact, where
20 they came from.

21 **COMMISSIONER CLARK:** What I'm trying to
22 figure out, though, is that if this Commission is
23 required to approve the statement, what's the
24 proceeding, and where is the proceeding in which we
25 are going to examine each element of your draft SGAT

1 and look at your cost based -- your cost information
2 and decide if each and every one of those is based on
3 nondiscriminatory cost based studies?

4 **MR. CARVER:** Again, I think that's been done
5 already because the rates, for the most part, are
6 preapproved rates from the arbitration.

7 **COMMISSIONER KIESLING:** See, that's my
8 problem. You keep saying "for the most part." Until
9 someone points out to me -- goes through your SGAT and
10 says "This rate is based on this arbitration and this
11 was the cost data that supported that rate," et
12 cetera, all the way down through the whole thing,
13 there are some that are not based on any arbitrated
14 agreement.

15 **MR. CARVER:** That's true. And to be
16 perfectly candid with you as I sit here I can't tell
17 you which are which. What I can do is I can provide
18 for the Commission a list. It may take us a day or so
19 to do that, but I can have someone go through the SGAT
20 and provide you with a reference for every price
21 that's in the entire document if that would be
22 helpful.

23 **COMMISSIONER DEASON:** Mr. Carver, I have a
24 couple of questions. Is it your position that the
25 arbitrated agreements taken as a whole prove that you

1 are in compliance with all of the requirements to get
2 approval under 271 to enter into in-region interLATA
3 service?

4 MR. CARVER: Yes, sir, that is our position.

5 COMMISSIONER DEASON: Okay. Is it your
6 position legally that you can take aspects of
7 different agreements and show that taken as a whole
8 that you meet the requirements. It doesn't have to be
9 one agreement that meets everything. You can take
10 this section of this agreement and this section of
11 another agreement, mix and match, so to speak, and
12 meet the requirements.

13 MR. CARVER: Yes, sir, I believe we could do
14 that. And it would be a much more difficult to follow
15 process and it would be a lot harder to get to the
16 core issue of what BellSouth is offering and the
17 substance of our offerings. But to give you direct
18 answer, yes, I think we could do that.

19 COMMISSIONER DEASON: So you're saying as a
20 matter of convenience you filed an SGAT in this
21 proceeding to help demonstrate what can already be
22 demonstrated under the various interconnection and
23 arbitrated agreements.

24 MR. CARVER: Yes, sir. That's our position.

25 COMMISSIONER DEASON: Let me ask you another

1 question then. Why did you choose to seek approval of
2 the SGAT in this proceeding as opposed to filing the
3 SGAT while we were going through the arbitrations and
4 everything else and saying, "We want approval of this
5 because at some point we may need it, and we'll just
6 treat it on its own merits, and we'll deal with it."
7 And then if it got approved, fine, you could have
8 included it in this proceeding. If I wasn't approved,
9 well then you knew basically you had to use the
10 interconnection agreements themselves.

11 MR. CARVER: I think what we were trying to
12 do is to make the SGAT offering as consistent as we
13 could with what came out of the arbitration. So for
14 that reason -- first of all let me say, we could have
15 done it the way you suggested. I'm not saying we
16 couldn't have. But what we wanted to do was to make
17 the offerings as consistent as possible with what had
18 been arbitrated. So, for example, when we had a
19 dispute with AT&T, or MCI, or whoever about what was
20 required by the Act on a particular point and we
21 submitted that to arbitration. When we had a decision
22 we had something we believed was consistent with what
23 this Commission would approve. So after that process
24 was complete, then we put together the SGAT to reflect
25 the rulings of this Commission.

1 Now, in terms of why we didn't do it the
2 other way, again, I can't give you a definitive
3 answer. I will tell you that we've done this in nine
4 states and we've followed this procedure consistently.

5 **COMMISSIONER DEASON:** But you are asking us
6 to do two things in the proceeding: Is to approve the
7 SGAT and then say that it meets all of the checklist
8 items, and, therefore, make a recommendation to the
9 FCC that you should be granted authority.

10 **MR. CARVER:** Yes, sir, we are. And the
11 standard is exactly the same. I believe that if
12 the -- I should put it this way, that if the SGAT's
13 terms, which are taken from the agreements, are
14 checklist compliant, then it should be approved. I
15 mean the Act doesn't really get into specific criteria
16 outside of the checklist that would militate in favor
17 of approving it or disapproving it.

18 So when you approve the SGAT, what you're
19 really doing is finding it to be, in effect, checklist
20 compliant. And that we believe is another reason why
21 it's efficient. It's something that would conserve
22 the resources of the Commission to do both at the same
23 time because the standard is precisely the same. If
24 we were to split it out, in effect we would go through
25 the SGAT once and argue it was or wasn't compliant,

1 and then have a whole separate proceeding to argue, in
2 essence, the same issue all over again. And since the
3 standard is precisely the same, it really makes a lot
4 more sense to do it once.

5 Again, I don't believe that any party is
6 surprised that we've intended to do this, and I don't
7 believe anyone has been prejudiced by doing it this
8 way.

9 **COMMISSIONER KIESLING:** Then that brought up
10 another question for me. Can you tell me, since I
11 looked at all of this stuff and I've read it, I think,
12 pretty carefully, where in your petition or where in
13 the issues it is identified that you are asking us to
14 approve this SGAT. And there's an issue stated in
15 here that relates to the approval of the SGAT?

16 **MR. CARVER:** Well, the one -- well, the
17 issue that raises it directly would be Issue 1B and
18 the language of that is whether a Statement of General
19 Available Terms and Conditions has been approved or
20 allowed to take effect. And the position that we
21 filed in our prehearing statement was no, it hasn't
22 been approved yet, but it has been submitted for
23 approval in this proceeding. And our belief at the
24 time we agreed to include this issue was that that
25 properly raised the SGAT.

1 Now, I know that a number of other parties
2 have argued that it didn't properly raise that issue
3 but the fact is this issue has been as it has for a
4 year and there are perhaps some subissues that need to
5 be considered in order to make the determination
6 encompassed by 1B, we believe it is adequate. I think
7 frequently there are issues in cases that are fairly
8 broad and parties argue under the broad umbrella the
9 issue. And I would only say that if any of the other
10 parties this didn't adequately address the issue, then
11 they had a year to ask that the issue be changed.
12 Because everyone acquiesced to this issue. Everyone
13 agreed for it to be in the case. And if the parties
14 that opposed BellSouth's application think that this
15 should have been more detailed or it should have said
16 something else, then they had more than ample
17 opportunity to raise that and they didn't do so.

18 Turning back to the other points that I
19 wanted to make, there are two other aspects here: the
20 substantive aspect and the procedural. And in terms
21 of substance, I really don't believe you need to spend
22 too much time focusing on this because, in effect, the
23 movants have conceded that substantively this relates
24 to Track B, and they've conceded that Track B could
25 well be the basis upon which we file at the FCC. And

1 that's found in their motion at Page 2, and I'll just
2 read it to you because it's only a couple of
3 sentences. Four lines into Page 2, they state that
4 "On July 15th, 1997, the Commission determined that
5 its role is limited to the consultation with the FCC,
6 and thus it cannot prohibit BellSouth that pursuing
7 Track B access to interLATA authority. "Then in the
8 next paragraph they state as shown below, "And SGAT is
9 irrelevant to Track A and procedurally inappropriate
10 for consideration under Track B."

11 So the argument as originally posed in the
12 motion, which I believe is the argument they are still
13 traveling under, is that the SGAT does not relate to
14 Track A, but they have, in effect, conceded that it
15 relates to Track B and they've conceded that Track B
16 may well be the basis for what we filed with the FCC,
17 although admitted BellSouth believes we're Track A
18 compliant. So, from a substantive standpoint it
19 belongs in the case.

20 A lot of the argument that addresses Track A
21 and whether it relates to Track A is something that
22 doesn't need to be reached for purposes of your
23 decision. I do want to focus on that, though, because
24 I think it's an important part in the case in general.

25 **COMMISSIONER DEASON:** Let me interrupt for

1 just a second. You've indicated to me -- and I'm not
2 trying to put words in your mouth, so if I'm wrong
3 correct me -- but you've indicated to me that you've
4 included the SGAT in this proceeding for a number of
5 reasons, not the least of which is expediency and
6 trying to simplify things; to make it easier to review
7 the substance of your filing. Is that basically
8 right?

9 **MR. CARVER:** Yes, sir, that's correct.

10 **COMMISSIONER DEASON:** Okay. Well, for the
11 reasons of simplicity and expediency, wouldn't it have
12 been better if you had come to this Commission and
13 said, "Commission, we're filing under Track A." Or,
14 "Commission, we're filing under Track B." One or the
15 other. And let us concentrate on that and see if
16 that's the requirement that you meet, make our
17 recommendation to the FCC on that basis. Why is it
18 that we have both in front of us? Why is it necessary
19 that we have both in front of us? If you're so
20 concerned about expediency and simplicity.

21 **MR. CARVER:** I think ultimately the decision
22 is going to have to be made at the FCC on the basis of
23 what we file with them at that time. And for that
24 reason we want to preserve the option of filing both
25 because obviously we're getting FCC orders on an

1 almost weekly basis that have different requirements
2 and we'd like to keep that option open. For that
3 reason we have been hesitant to rule out either track.

4 Now, at this point I think we've said pretty
5 clearly we believe it's Track A, but there are ways
6 that Track B could be reached and they could be
7 reached on the basis of determinations by this
8 Commission. So we want to keep that option open. Let
9 me give you one example. This is by no means an
10 exhaustive list, but this is just one example.

11 In the SBC ruling the FCC said that in order
12 for a request for interconnection to meet Track A,
13 that is, to put a party on Track A it has to be a
14 qualifying request. Then they went on to say that not
15 all requests are qualifying requests. Someone may
16 request interconnection and use the interconnection in
17 a way that even once they implemented it, and there
18 was no question about implementation, it might very
19 well not satisfy Track A. And basically also -- and
20 there are several reasons; they might not serve
21 residential customers, they might not serve business
22 customers, it might not provide discriminatory access.
23 What they ask might not be adequate. So it suggested
24 that at the time the application is filed they are
25 going to scrutinize, to some extent, the request for

1 interconnection and determine whether they are
2 qualifying or nonqualifying. Now, in this case we
3 have had a lot --

4 **COMMISSIONER DEASON:** Are you saying it may
5 not qualify by actions of the person who he is seeking
6 interconnection even though the agreement specifies
7 all of the nondiscriminatory that is applicable to
8 residential business, all of those things, it's
9 actions of the person seek the interconnection; if
10 they fail, that causes you to fail?

11 **MR. CARVER:** I think that's a possibility.
12 Now, I think given the recent ruling in Ameritech
13 that's a little bit less likely. I'm going to have to
14 get into that discussion in a moment because of the
15 discussion about what it means to provide, and the
16 fact that if you generally offer something, that's
17 good enough. But up until that decision came out, the
18 FCC seemed to be saying -- and certainly the parties
19 adverse to BellSouth were arguing -- that someone had
20 to actually be using it. And that was the real
21 problem.

22 What we still have is we have a situation
23 where Track A requires service to both residential and
24 business customers. So, for example, we could have a
25 situation where let's say Company X comes to us and

1 they enter inot an interconnection agreement and it
2 meets all 14 of the checklist items, and it's fully
3 compliant and there's no question about that
4 whatsoever. If they only use that to serve business
5 customers and they don't serve any residential
6 customers at all whatsoever, then arguably Track A
7 hasn't been met because you have to have people served
8 both ways. So there's still an issue of the conduct
9 of the people who are interconnecting and what they
10 do.

11 And, again, we believe we meet Track A. But
12 there are a lot of vagaries at this point; there are a
13 lot of fact issues floating around and it's difficult
14 to know who hasn't entered the market for business
15 reasons; who hasn't entered the market because they
16 don't think the timing is right, or who hasn't entered
17 the market for some other reason. So, for that reason
18 we don't want to foreclose the option of going
19 Track B, although I hope I've said as clearly as I can
20 that we think Track A is more appropriate for us.
21 Technically we believe B should be left open because
22 of all the vagaries of the facts and the way they
23 continue to come out. The fact the FCC standard seems
24 to change quite a bit.

25 So Track B, we believe, needs to be there,

1 and the SGAT inarguably relates to Track B. I don't
2 think anyone has argued you can't use the SGAT for
3 Track B. The only procedural issue -- I'm sorry, the
4 only substantive issue, and, again, I don't think it's
5 one you need to reach for purposes of this motion --
6 is whether the SGAT relates to Track A. And we
7 believe it does for really two reasons. One is the
8 actual language of the Act.

9 Now, you have been given an outline and I
10 would suggest that rather than reading the outline
11 it's more appropriate to read through the Act. And
12 what you'll find is that there are two different
13 provisions that are operative here, or two different
14 sections. There's 271(c)(1) and there's 271(c)(2).

15 271(c)(1) sets forth Track A and Track B and
16 it says that under these, interconnection and access
17 is to be provided or generally made available. And
18 then in the independent section, 271(c)(2), it also
19 states the independent requirement is the access and
20 interconnection that is either provided or made
21 generally available has to meet the 14-point
22 checklist.

23 Now, the argument has been made that Track A
24 has to be shown in one way; Track B has to be shown in
25 another way. And I simply believe that is

1 hypertechnical argument that doesn't really get to the
2 fact as I said before what really needs to be focused
3 upon is the substance of the offering.

4 Now, Track A can be satisfied through
5 interconnection agreements, that those interconnection
6 agreements should be consistent with the SGAT and we
7 believe that ours are. And there's nothing wrong with
8 looking at the SGAT to actually see what it offered
9 and to look at it for the purposes of checklist
10 compliance. And obviously we believe that that's
11 appropriate under the Act, and that's what we're
12 urging.

13 Now, the argument has been made that
14 Ameritech interprets this provision otherwise, and I
15 think the short answer to that is that the movants are
16 misinterpreting Ameritech. Ameritech dealt with a
17 narrow issue.

18 In that case Ameritech did not have a
19 state-approved SGAT. So Ameritech and I believe Bell
20 Atlantic came before the Commission and they argued
21 that under Track A the word "provide" didn't have to
22 mean only furnish; that it could mean furnish or it
23 could mean make available. There were some other
24 parties, and I know in one paragraph AT&T is mentioned
25 specifically, but there are other IXCs that came in

1 and said no, that's not correct. To provide something
2 it has to be furnished. Simply making it available or
3 offering it in any form is not enough.

4 But the narrow issues before them, which was
5 raised by Ameritech, was if you have an agreement and
6 if the agreement has been state-approved, and if the
7 agreement has a term in it that makes an item
8 available but no one buys it, can that still be
9 compliant? And looking at that issue the FCC yes,
10 that can be complaint.

11 Now, it went on in dictum to say that some
12 other parties had urged that offers would be enough.
13 And they said, well, no, offers generally aren't
14 because the obligation has to be concrete and binding;
15 it has to create a specific legal obligation. But
16 what they never reached was the question of if you
17 have a Statement of Generally Available Terms and
18 Conditions that is unified, if it's presented to a
19 state Commission, if it's approved and if that's
20 submitted to the FCC, does that create a binding
21 obligation? That question was never reached. And if
22 you look at the paragraphs, both of the ones that have
23 been excerpted, and if you look at the full text of
24 the Ameritech order, I believe it begins about
25 Paragraph 109, the words "state-approved SGATs,

1 state-approved statement, state-approved offering,"
2 those words don't appear anywhere in there because
3 that simply wasn't the issue.

4 I would have to agree with the FCC that if
5 someone was offering something in a way that was not
6 formal or that was not binding or that was not
7 state-approved, then there might be a legal problem
8 enforcing that.

9 But what we believe is if you have an SGAT,
10 particularly if you have an SGAT that is drawn from
11 agreements that are binding -- but even apart from
12 that, if you have an SGAT that is state-approved and
13 that's the basis of your showing checklist compliance,
14 and it comes through the state mechanism and the
15 record is gathered and that's submitted to the FCC,
16 then we believe that is adequate. And we believe that
17 creates a binding obligation. But I'll have to say at
18 the same time, that's never really been tested at the
19 FCC. Because this particular case, and the issue
20 before the FCC, was something different. So they
21 haven't really replied on this one way or another.
22 They said that a state-approved agreement is enough.
23 As to whether a state-approved SGAT is enough, they
24 haven't said anything one way or the other, but I
25 would submit to you for all of the reasons I've talked

1 about, there really is no difference between the two.
2 Again the substance of the offerings is what should
3 control.

4 **COMMISSIONER DEASON:** If you're going to be
5 relying on the fact, what you hope is that this
6 Commission considers your SGAT and approves it, if
7 you're going to be relying upon that as meeting the
8 requirements, what about the argument that this
9 proceeding has not been noticed for SGAT approval? In
10 fact, there's not even the sufficient issues
11 identified to adequately consider and give approval of
12 a SGAT consistent with the requirements of the Act.

13 **MR. CARVER:** I think -- well, -- I think the
14 issues could be read together.

15 First of all, I think issue (1)(B) is the
16 one that raises the SGAT specifically. As you get
17 beyond that, Issues 2 through, I believe, 15, look at
18 each of the checklist items specifically. And in
19 order to resolve Issues 2 through 15 you have to look
20 at BellSouth's offerings. To the extent those
21 offerings are embodied in the SGAT you have to review
22 the SGAT.

23 So our position going into this and our view
24 was that 2 through 15 was going to necessarily require
25 a consideration of our offerings at whatever form:

1 through agreements or through SGATs. So what we have
2 done is we have agreements on file, we have SGATs, and
3 depending on how you rule on 2 through 15, that's
4 going to determine whether the SGAT should be approved
5 or not. If you find that on 2 through 15 our items
6 are compliant, then the SGAT should be approved. If
7 you find there are problems with any of those, then
8 the SGAT could perhaps be approved in part but in the
9 in whole. Those are the particular ones that raise
10 the standard and allow you to focus on the particular
11 provisions of SGAT.

12 The fact that the SGAT is part the case we
13 believe is set for the by 1B, which is the question of
14 whether this is an approved SGAT. And the position
15 we've taken consistently, which is no, there's not,
16 but we're requesting approval in the same proceeding.
17 Again, it's simply a question of trying to do this as
18 efficiently as possible. Because the same issues that
19 relate to checklist compliance and the issues that
20 relate to approval, those issues are the same. So
21 that's why we've raised those here.

22 And I've said this before, but at the risk
23 of repeating myself I'll just say I think all of the
24 parties to this proceeding have known what the
25 proceeding was going to be about for most of the year

1 that this has been going on. There were a lot of
2 filings, as long as two, four and six months ago
3 asking us to declare what we were going to do and
4 asking us to come forward. And I think that everyone
5 understood that the SGAT was going to be a part of
6 this. And I think that if anyone believed that
7 particular subissues and particular things needed to
8 be consider, and (1)(B) as inadequate to do so, then
9 the appropriate action would have been for some of
10 these joint movants to say that at some point; and to
11 say that there was something else they wanted to have
12 testimony about or something they wanted to argue, and
13 that it wasn't adequately encompassed in (1)(B)
14 because 1(B) wasn't broad enough. But no one did
15 that. We didn't do that because we believe (1)(B) is
16 adequate. The other parties didn't do it and I'm not
17 quite sure why but they didn't.

18 So I believe that that umbrella issue, which
19 has been there a year, and during that year we've
20 traveled under the assumption it was adequate is what
21 states that the SGAT is there.

22 **COMMISSIONER DEASON:** You would agree that
23 the wording of of Issue (1)(B), Section B, is has
24 there been an SGAT approved; not should there be an
25 SGAT approved, or the filed SGAT, should that be

1 approved? It's a very simple factual issue: Has
2 there been one approved? And I think everybody could
3 stipulate no, there has not been one approved.

4 **MR. CARVER:** No, there hasn't been. And
5 part of the problem here candidly is the timing of the
6 case. I mean the docket opened a year ago and year
7 ago, frankly, we didn't know what we were going to
8 file. I don't think anyone knew then how the case was
9 going to travel. But the issues were set back then
10 because discovery began; I think probably everyone
11 anticipated we were going to file earlier than we did.
12 So the case opened, discovery began, we needed issues;
13 they were framed a year ago; the parties did a great
14 deal of discovery and the case moved along quite a
15 bit. So by the time we got to the actual filing of
16 our testimony it had been there for quite a time.

17 Now, at that point, based on what happened
18 during the past year, perhaps the issue could have
19 been reworded, and perhaps it could have been reworded
20 more artfully. But I assume what would have happened
21 if we had asked in June or July to reword the issue is
22 that parties would have objected. Because at one
23 point, in fact, we did on a different issue, I believe
24 it was public interest, request the addition of an
25 issue there, and what we heard from parties was their

1 objections because they said the issues have been as
2 they have been for a year and they shouldn't be
3 changed now. We should leave them the way they are.

4 So I think the assumption we made is that
5 the substance of what we're arguing is here. And
6 given the fact that the issues have been framed for a
7 long time, and that obviously parties are opposed to
8 their being changed, there's not a lot of use in
9 trying to reword that so that it would more artfully
10 raise what we were trying to raise here.

11 But I think the fact remains that everyone
12 knew for some time now, certainly since the beginning
13 of July, that SGAT approval was one of the issues that
14 we were presenting. So I think to move to the
15 substance of what's occurred, I don't think anyone can
16 say that they have been surprised by this; I don't
17 think anyone can say that they have been prejudiced by
18 this. And again, I think what is being made about the
19 (1)(B) issue is really a technical argument. While I
20 certainly will concede (1)(B) could be more artfully
21 framed, under the circumstances I think why it came
22 out this way is understandable, and I think why it
23 came this way -- I think the way it is is enough to
24 allow the parties to argue what they need to.

25 As to the other procedural aspects, the

1 draft SGAT issue I think, once again, it's form over
2 substance. The SGAT requirement is that it be filed
3 60 days before approval. And what we tried to do is
4 to begin at the time roughly that we anticipate a
5 vote, back up from that and file the SGAT 60 days from
6 then. And based on that, the SGAT should be filed any
7 day. I can get the precise date for you if you'd
8 like, but it should be filed, if not today, then
9 within the next couple of days.

10 What we did with the draft SGAT was to try
11 to take the precise language that will appear in the
12 agreement and put in a draft form and file it with
13 your testimony. Because in doing that we, in effect,
14 gave the Commission an extra couple of months or so to
15 review our offerings in order to make determinations
16 about them.

17 I think extending that review period is a
18 positive thing. I understand that it's given rise to
19 an argument technically it's not an SGAT, it's a draft
20 SGAT. But again, what we've done in state after state
21 is to file exactly the same thing as the official SGAT
22 that's in the draft SGAT, and I think the parties
23 would agree that's been their experience, and within a
24 day or two you can certainly see that it's doing the
25 same here.

1 Finally, I will say that there was one
2 revision and the revision was not made not too long
3 ago -- actually about a week before the hearing began.
4 That was occasioned by the Eight Circuit decision.
5 Had it not been for that, there would have been no
6 revisions at all.

7 One argument I think that was made in the
8 motion, and it was made a little bit last week, but
9 they de-emphasized today, was the argument that they
10 were somehow surprised or did not have a opportunity
11 to prepare to address the revisions. And in that I
12 would say two things. First of all, Mr. Scheye gave
13 his deposition on the 15th of August, and in that
14 deposition, on Page 58, he was specifically asked
15 whether there would be revisions of the SGAT? And he
16 specifically said yes, there would be minor ones to
17 bring it into line with the Eight Circuit. Now, after
18 that there's discussions off and on throughout the
19 remainder of the deposition and it's clear that
20 Mr. Scheye doesn't have complete knowledge and he
21 doesn't know about all of the changes, but he at least
22 tells them that there will be some. That was more
23 than a week from the end of the discovery period. And
24 given that the parties have not been bashful about
25 requesting discovery from BellSouth, I assume that if

1 someone really wanted to know about it, then we would
2 have had a request for a deposition.

3 That aside, the changes, the revisions to
4 the SGAT, there were only five of them. One was to
5 simply change the letter that was used to identify an
6 attachment. They were all fairly brief. In fact, the
7 document that summarize them was only about two pages
8 long, and then there was a red line version attached.
9 The parties have conducted extensive cross examination
10 on this, and they have, in fact, obtained leave to
11 conduct more if they need to. So I don't think that
12 anyone could argue they have been surprised or
13 prejudiced.

14 In closing I just want to say -- I keep
15 going back to word "prejudice" because that really is
16 the standard. Under Rule 1.270 of the Florida Rules
17 of Civil Procedure, severances are to be done when it
18 determine -- it refers to a court, but in this case
19 when the Commission determines that it is appropriate
20 for convenience or to avoid prejudice. And I think
21 what has been noticeably absent from their entire
22 argument is any indication that any of the six moving
23 parties have been prejudiced by this.

24 The fact is they knew what was in the case,
25 they've had ample opportunity to prepare for the case

1 and there's been no prejudice whatsoever. Thank you.

2 MS. RULE: Thank you. A couple of things,
3 Commissioners.

4 First of all, BellSouth has the opportunity
5 under federal law to waive that 60-day clock. That's
6 simply just not an important issue here.

7 It appears that Mr. Carver's argument boils
8 down to this: We should have known what they were
9 going to do.

10 You've heard the testimony. You know how
11 hard it was to figure out what they're going to do
12 when they are telling what they are going to do.
13 We're not required to guess in advance and propose
14 every issue that might allow BellSouth to come up with
15 some alternate entry approach. That's their job and
16 they simply didn't do it.

17 I'd also like to point out to you that
18 Chairman Johnson issued a procedural order on July
19 2nd. That was certainly pretty late in the game but
20 there were new issues added at that time. BellSouth
21 had every opportunity to throw in its new issues then.

22 With regard to the arbitration provisions in
23 the SGAT, I have a couple of questions on that. First
24 of all, how has BellSouth condensed 50 interconnection
25 agreements into its SGAT? There's no testimony on

1 that. Mr. Carver is basically testifying to you that
2 that's what they did, but that's not what we heard
3 from the stand. We just don't know and it's not been
4 tested.

5 Mr. Scheye did testify that some of the
6 costs or prices proposed in this proceeding have not
7 been subjected to any arbitration proceeding. He also
8 testified that there are no cost support documents in
9 this proceeding.

10 With regard to the costs that have not been
11 arbitrated, I don't believe you can make a decision to
12 approve them. There's no evidence.

13 With regard to those costs that were
14 approved in arbitrated proceedings, I'd like to remind
15 you that those proceedings were limited to the
16 parties. For example, the FCCA tried to intervene and
17 was told that was not appropriate. That those
18 arbitration proceedings were limited to the parties.
19 You certainly can't accept any cost in a arbitration
20 proceeding as being applicable to everybody. You
21 specifically said you were going to be doing that on a
22 case-by-case basis.

23 Finally, with regard to the costs I'd like
24 to point out to you that the only interconnection
25 agreements that can meet the 252 standard are

1 arbitrated agreements; not negotiated agreements.
2 Take a look carefully at that material I gave you.
3 BellSouth is relying on a lot of agreements here. A
4 lot of them are not arbitrated, therefore, they can't
5 rely on those costs.

6 Again, you don't have any testimony where
7 this all comes from. You're being asked to rely on
8 BellSouth's assertion that everybody should have known
9 and we all had the opportunity to inquire. But I'd
10 submit to you that's not the notice requirement in the
11 state of Florida.

12 **COMMISSIONER CLARK:** Ms. Rule, let me ask
13 you something. What is the standard we should follow
14 on a Motion to Strike?

15 **MS. RULE:** That's a good question. I don't
16 have an answer.

17 **COMMISSIONER CLARK:** Okay.

18 **MS. RULE:** So I suggest you just sever it
19 instead.

20 **COMMISSIONER CLARK:** I'm sorry, then the
21 motion to sever, you disagree with what --

22 **MS. RULE:** I guess here's my basic position:
23 You don't have any evidence before you that allows you
24 to make the sort of determination requested by
25 BellSouth. The notice in this docket is insufficient

1 to allow you to approve the costs requested by
2 BellSouth. I don't think it's a question of the
3 standard to be applied; I just don't think you have --
4 you have issued the legal notice to allow you to do
5 that. I don't think it's Staff's fault --

6 **COMMISSIONER CLARK:** So is it appropriate to
7 sever it as opposed to dealing with it straight on as
8 to whether or not you have had adequate notice?

9 **MS. RULE:** I don't think the question is
10 whether AT&T has had adequate notice. And I'd like to
11 respond to Mr. Carver's point that AT&T and others may
12 not have standing. Well, only parties with
13 interconnection agreements are the ones here. And if
14 none of us have standing, then who is here to
15 challenge the SGAT? Nobody. Nobody got any notice.

16 I think if you sever this proceeding you can
17 still continue on with BellSouth's SGAT, if indeed
18 they pursue it. Strike it, sever it; really it's all
19 the same for for purposes of this proceeding. It's
20 not been properly noticed and this isn't the time or
21 place to do it.

22 You know, when I was in law school, and I
23 imagine a lot of other people heard this, they always
24 told us argue the law. And if you don't have the law
25 on your side, then argue the facts. And if you don't

1 argue the facts on your side, then you better argue
2 fairness.

3 In this case BellSouth can't argue any of
4 them. They don't have the law on their side; they
5 don't have the facts on their side, and it's not fair
6 to ask you to make a cost proceeding out of this
7 docket when the little guys to whom the costs are
8 intended to apply haven't received any notice.

9 I'm going to ask you again, please read
10 Section 271. Please read Section 272. Read
11 paragraphs 110 and 114 of the Ameritech decision.
12 Read the FAW notice. And after you read them I think
13 you're going to come to the conclusion that this is
14 not the proper proceeding for a SGAT. Thank you.

15 MR. CARVER: May I make two brief points in
16 response?

17 CHAIRMAN JOHNSON: Briefly.

18 MR. CARVER: First of all, I just want to
19 make a general point, which I believe at this point
20 Ms. Rule has begun to argue the substance of SGAT
21 approval.

22 I listened to, a second time, her cost-based
23 arguments, and in effect she's trying to argue to you
24 that the SGAT shouldn't be approved as opposed to
25 arguing that it's not properly before the Commission.

1 I think the way she did it it points out something
2 that's very important and that's the fact that
3 Mr. Scheye and other BellSouth witnesses were cross
4 examined last week at great length about this. And
5 what she's in effect doing is arguing to you the
6 evidence, which would be appropriate if the question
7 were whether the SGAT should be approved. It's not
8 really appropriate for arguing that the SGAT is not
9 properly before the Commission.

10 And I think, again, that this approach
11 simply points up the fact that this has been a part of
12 the case for the last week. There has been extensive
13 inquiry about it. And I think Mr. Scheye addressed
14 this at great length in the testimony he gave from the
15 stand. And at this time I think it is in the case.

16 **COMMISSIONER KIESLING:** Mr. Carver, I have a
17 problem with that argument. And the problem I have is
18 that if this motion had been argued before we started
19 with evidence, then they wouldn't have had to cover
20 all their bases and guess what we might rule. They
21 had to cross examine your witnesses on these issues
22 because it was their only shot at it. And the reason
23 we didn't rule on this motion earlier was in deference
24 to your need for more time to respond; not because,
25 you know, we wanted them to go through having to cross

1 examine everyone. I mean they did the only thing they
2 could do.

3 MR. CARVER: Yes, ma'am, I would agree with
4 that. We appreciate having had the opportunity to
5 respond to this before we argued it. But I just want
6 to clarify one thing about the position I'm taking.

7 I'm not saying there's anything wrong with
8 their cross examining. I'm not saying that by cross
9 examining they have waived. What I'm saying is that
10 by cross examining they obtained information which
11 they are now using to argue that the SGAT is
12 insufficient. And I don't think the real issue is
13 whether or not the SGAT should be approved; at least
14 not for purposes of this motion. The question is
15 whether the SGAT is properly part of the case.

16 So I don't have a problem with their
17 conducting the cross examination. That's their right
18 to do it. And I agree that under the circumstances
19 they had to. I'm just saying that what they are doing
20 with what they've obtained is saying don't allow the
21 SGAT in the case, because in every instance the cost
22 support is no sufficient. That's an argument that
23 goes to the merits. And that's an argument that
24 should properly be considered for purposes of deciding
25 approve it or not approve it, but it's not a reason to

1 keep it out of the case.

2 The only other thing I wanted to note in
3 closing is that I took a quick look at the Florida
4 Rules of Civil Procedure and the only reference that I
5 could find that's striking, that jumped out at me was
6 a Motion to Strike that was referred to in Rule 1.140.
7 I'm not sure it's that helpful. It just says that "A
8 party may move to strike matters that are redundant,
9 immaterial, impertinent or scandalous." So that's the
10 standard for a Motion to Strike.

11 The motion for severance, which I referred
12 to previously, was in Rule 1.270, it's titled
13 "Consolidation" but I think the language regarding
14 separate trials in subpart B really gets to the motion
15 to sever what should be considered. That's all I
16 have. Thank you.

17 **CHAIRMAN JOHNSON:** Ms. Rule.

18 **MS. RULE:** Well, I'm told by Trawick's that
19 two types of motions to strike are authorized by
20 Rule 1.140. One is used as Mr. Carver said, to
21 eliminate immaterial, redundant, impertinent or
22 scandalous allegations and it is discussed in this
23 section of Trawick's, although you could, of course,
24 make a suggestion it's impertinent of Bell South to do
25 this. I think the real objection is that it's

1 immaterial.

2 The other, however, is stated as being used
3 to test the legal sufficientcy of a defense. I think
4 what we're doing here is testing the legal sufficiency
5 of BellSouth's case.

6 **CHAIRMAN JOHNSON:** Commissioners, any
7 questions? Staff, did you have any questions?

8 **COMMISSIONER DEASON:** I have a question for
9 Ms. Rule.

10 Is it your position that because BellSouth
11 has indicated they're going under Track A, that by the
12 language of the Act we are prevented from considering
13 an SGAT?

14 **MS. RULE:** No, sir. As I stated you are
15 free to offer the FCC whatever consultation you wish.
16 If you wish to examine the SGAT, you most certainly
17 may do so. BellSouth could have proposed one long
18 before. And certainly an SGAT is a good thing. And
19 as they've stated it does allow the little guys a way
20 to get into business without a lengthy and expensive
21 arbitration or negotiation. However, it's not
22 properly before you in this docket and it doesn't
23 relate to a Track A filing.

24 **COMMISSIONER DEASON:** When you say not
25 properly before us, why is it not properly before us?

1 **MS. RULE:** Several reasons, but the most
2 important -- well, one reason is based on federal law;
3 it's simply irrelevant to a Track A filing. But the
4 more important reason for you today is that it hasn't
5 been properly noticed. Agencies in Florida are
6 required to give --

7 **COMMISSIONER GARCIA:** Ms. Rule, if it's
8 irrelevant, then why are we discussing it? What is
9 the significance of it? If -- it worries me, the
10 argument worries me that AT&T is looking out for the
11 little guy here.

12 **MS. RULE:** I'm not arguing that AT&T is
13 looking out for the little guy.

14 **COMMISSIONER GARCIA:** You're the only one
15 arguing for the little guy here. What I want you to
16 get back to is if it's irrelevant, then why bother
17 with it? Why bother with this Motion to Strike if it
18 is irrelevant to the track that Southern Bell is on,
19 why are we worried about it?

20 **MS. RULE:** Well, we have to worry about it
21 because BellSouth has put it at issue.

22 **COMMISSIONER GARCIA:** I'm sorry,
23 Commissioner Deason, I jumped in --

24 **MS. RULE:** As intervenors we have to worry
25 about it because BellSouth puts it at issue. We

1 believe it's not properly at issue. But once they
2 raise it we have two choices: respond or not. And
3 we've chosen to respond. We believe that's the proper
4 course of action.

5 Now, I'm not sure I fully answered your
6 question. Did you have another part to it?

7 **COMMISSIONER GARCIA:** No. I don't think you
8 have answered the question. I understand that you're
9 arguing against it. That's clear. But I'm saying if
10 it's irrelevant to our determination, what does it
11 matter if it's part of the evidence or not, or if it's
12 in the record or not?

13 **MS. RULE:** Well, because procedurally it's
14 not --

15 **COMMISSIONER GARCIA:** It's irrelevant in the
16 standard that the FCC is committed anyway.

17 **MS. RULE:** That's correct.

18 **COMMISSIONER GARCIA:** And you mean it's
19 unnecessary before us.

20 **MS. RULE:** That's correct. And had
21 BellSouth properly brought before you an SGAT, I
22 wouldn't be sitting here making this argument.

23 They are entitled to rely on whatever
24 evidence they want at the FCC. If they want to take a
25 SGAT to the FCC in spite of the FCC's clear order in

1 the Ameritech decision that they want to see
2 interconnection agreements and how those have been
3 implemented, that's certainly up to BellSouth.

4 **COMMISSIONER GARCIA:** Wouldn't it be better
5 if they are going to possibly take this before the FCC
6 that we have something that at least this Commission
7 has looked at? As opposed to something that we
8 haven't looked at, going up to the FCC? In other
9 words, giving you the opportunity to discuss it here
10 before us in this state so that we have an idea of
11 what's going on up there? So that at least in that
12 part of it it's through us that it goes up there?

13 **MS. RULE:** No, sir, and here's why.

14 **COMMISSIONER GARCIA:** Okay.

15 **MS. RULE:** This hasn't been properly
16 noticed. As BellSouth pointed out -- and BellSouth is
17 here arguing this is the great thing for the little
18 guy and all the mean intervenors don't think like it.
19 But if BellSouth wanted an SGAT, it could have done it
20 right. It had myriad opportunities over the course of
21 the last year to put an issue in this case and it
22 didn't do it. It hasn't even filed an SGAT for you to
23 review. It's been a moving target all the along and
24 we've been doing our best to try and hit. But
25 BellSouth's actions have resulted in a deficient

1 notice in this case.

2 You are required -- and this goes back to
3 your question too, Commissioner Deason -- you are
4 required as an agency in Florida to offer a clear
5 point of entry into the agency's determination
6 process. That FAW notice simply doesn't do it. It
7 doesn't put anybody on notice that you're going to
8 engage in a cost setting proceeding. You're making
9 rates here and you haven't told anybody that that's
10 what you're going to do. And it's not the fault of
11 Staff and it's not the fault of intervenors. It's
12 BellSouth's fault for not putting that at issue.

13 **MS. BARONE:** I have one question for
14 BellSouth. It appears that you are, as you say,
15 proceeding under Track A. My question to you, then,
16 is if that's your position at this time, would it be
17 prudent to take out the issues on Track B at this
18 stage?

19 **MR. CARVER:** No, I don't think it would be
20 prudent. And, actually, this is something that I
21 guess we've argued at great length previously when
22 these same parties moved to strike Track B. And what
23 I'd say now is the same thing that I said then, which
24 is that we believe we're Track A compliant.

25 We hope that this Commission's factual

1 findings will support that and that we'll have a
2 record that we can take to the FCC, but it may not
3 come out that way.

4 I mean, it may vary -- well, I don't want to
5 say "very well," but there's at least a possibility
6 that you'll scrutinize the people that have actually
7 entered and decide that Track A hasn't been met. And
8 then the question comes up, well, if Track A is not
9 open, is Track B open or, as I assume they're going to
10 argue, are we in some sort of limbo; because our
11 position is that if we haven't met Track A, then
12 Track B should be looked at. And I think whether
13 we're Track A or Track B is something that ultimately
14 the FCC is going to have to decide on the basis of the
15 facts put before them. And we're trying to do here is
16 to develop as complete a factual record as we possibly
17 can.

18 And I just have to say that Ms. Rule
19 answered Commissioner Garcia's question say, no, the
20 Commission didn't need to develop a full factual
21 record, or -- I don't want to misquote her, but I
22 think that was the gist of it. I disagree with that
23 very much.

24 I mean, since this decision will ultimately
25 be made by the FCC, I think it's extremely important

1 for this Commission, in performing its consultative
2 role, to gather as many facts as you can and consider
3 as many things as you can.

4 I believe the SGAT should be approved, but
5 if you see it differently, then I think it's
6 appropriate to have it in the case and to not approve
7 it. I don't think it's appropriate to strike it from
8 the case.

9 COMMISSIONER DEASON: Mr. Carver, that leads
10 me to, I guess, my final question; hopefully, my final
11 question.

12 You would rather us go ahead and consider
13 the SGAT in this proceeding even though the decision
14 may be that it not be approved?

15 MR. CARVER: Yes -- well, yes, we would,
16 because, first of all, we think it should be approved;
17 but, secondly, if you don't approve it, hopefully
18 you'll at least give us some guidance as to where you
19 believe it falls short, and then if we need to make a
20 subsequent filing, then we will have that guidance.

21 I guess the other side of the coin of
22 finding facts is what comes out of the factual
23 determination. So even if the SGAT were not approved,
24 I believe that the process and the findings of the
25 Commission would be helpful to everyone to give them a

1 better idea of what this Commission would believe to
2 be checklist compliant.

3 So the short answer to your question is,
4 yes, we would rather have it a part of the proceeding
5 even if ultimately it's not approved, because I don't
6 think that would foreclose us from trying again.

7 COMMISSIONER DEASON: In your -- that wasn't
8 my last question, I guess, after all. You've
9 completed your direct case. In fact, you've completed
10 your rebuttal case; is that correct?

11 MR. CARVER: Well, yes, we have --

12 COMMISSIONER DEASON: I guess Mr. Scheye --
13 I mean, I'm sorry -- Mr. Stacy may be recalled for
14 some further recross-examination or whatever?

15 MR. CARVER: Right. But to the extent we're
16 not putting him up any more, I would say, yes, we've
17 completed our case.

18 COMMISSIONER DEASON: So all the evidence
19 that you want us to rely upon to approve your SGAT is
20 in the record?

21 MR. CARVER: All that we've presented. I
22 mean, hopefully we can elicit some more things through
23 cross-examination and their deposition --

24 COMMISSIONER DEASON: But it's your
25 burden --

1 **MR. CARVER:** Yes.

2 **COMMISSIONER DEASON:** -- and you have to go
3 forward with that. You can't depend upon
4 cross-examination to meet your burden.

5 **MR. CARVER:** That's true. I would say -- I
6 agree with that procedurally. I would say that in
7 this particular circumstance I think what
8 interconnectors are doing with their agreements is
9 something that should be considered. And in a lot of
10 instances we don't really know what they're doing with
11 their agreements because they won't tell us.

12 So, you know, in many instances we may be
13 asking them questions and, hopefully, they will tell
14 the Commission whether they're competing or not
15 competing or trying to get into the market, and we
16 believe that that should be considered.

17 So I guess the one caveat is, is because of
18 the unique procedural stance of this, I think there's
19 some information that's going to come out on
20 cross-examination that should be considered. At the
21 same time, I agree with your point, Commissioner; it
22 is our burden to go forward.

23 **COMMISSIONER CLARK:** Ms. Rule, I want to be
24 clear as to what you're asking for. Is this a motion
25 to strike?

1 **MS. RULE:** Or in the alternative, sever the
2 SGAT from this proceeding for separate consideration.

3 **COMMISSIONER CLARK:** And you said a motion
4 to strike is for two purposes. What are those two
5 purposes? You quoted Trawick.

6 **MS. RULE:** Two reasons for a motion to
7 strike: One is to test the legal sufficiency of a
8 defense. In this case it would be the case. And the
9 other would be to strike immaterial, redundant,
10 impertinent or scandalous allegations.

11 **COMMISSIONER KIESLING:** Well, I need to be
12 clear since I don't have Trawick in front in me.
13 Generally, when I think of using a motion to strike
14 defenses, which is the one you're trying to rely on,
15 what we're talking about is striking affirmative
16 defenses, not striking the actual petitioner's case or
17 parts of it.

18 **MS. RULE:** That's correct. Yes, you're
19 right.

20 **COMMISSIONER KIESLING:** So that's not quite
21 the same as what you characterized as what you're
22 trying to use that part for.

23 **MS. RULE:** No. I believe it's more because
24 it's immaterial, but as I mentioned to
25 Commissioner Clark, I really haven't researched this.

1 Mr. Hatch very kindly handed Trawick's to me.

2 COMMISSIONER KIESLING: With the pertinent
3 parts underlined.

4 MS. RULE: Well, not enough pertinent parts
5 as it turns out. I really wish he had underlined a
6 bit more for me.

7 COMMISSIONER DEASON: Ms. Rule, contrast for
8 me what you're seeking here to what was considered by
9 the Commission, I don't know, some month or two ago
10 concerning the scope of this proceeding and that was
11 denied by the Commission -- I think I dissented
12 against that at that time -- but that was denied at
13 that time that we were going to consider Track A and
14 Track B. Compare -- I mean, tell me what's different
15 now from what we considered then.

16 MS. RULE: Well, a couple of different
17 things. The main one that comes to mind is that the
18 FCC has issued its Ameritech order explaining what or
19 what types of evidence it's going to consider in
20 connection with a Track A filing, and it's
21 specifically stated in those paragraphs I handed out
22 to you -- and I've given you the fuller version in the
23 other material -- it's specifically stated for Track A
24 the applicant lives or dies by the interconnection
25 agreements, not an SGAT.

1 So that's one thing. And the other thing is
2 BellSouth has now declared to you and testified to you
3 that they're proceeding under Track A. And if you'll
4 recall, at the time you heard the last motion the
5 Ameritech order hadn't come out and BellSouth did not
6 state which way it wanted to go; and, in fact, it
7 specifically reserved the right to go either way. But
8 you've heard now it's a Track A case.

9 Also you've heard testimony, and I think
10 that's a big difference.

11 **MR. CARVER:** May I comment on that briefly?
12 Our position in response to this motion all along is
13 that in effect it's a motion to dismiss. I mean, they
14 tried to dismiss Track B. That motion was denied.
15 Now they're trying to in effect strike all of the
16 evidence that relates to a Track B consideration.

17 It really amounts to the same thing. And,
18 properly, this really isn't a motion to strike, it's a
19 motion to dismiss.

20 I think what Ms. Rule told you are two
21 substantive reasons why, in effect, they're arguing
22 that a motion to dismiss is better taken today than it
23 was a month or two ago. But in terms of what they're
24 really asking for and the effect it's going to have on
25 the proceeding, I don't think their comments really

1 address. And I think because, in effect, what's
2 happening here is they're asking you to take one of
3 the two things we're seeking. That is, in effect, a
4 fact record and a determination on A and a fact record
5 and a determination on B.

6 They're asking you to take the Track B
7 portion of it and simply remove it from the case, not
8 to have any facts, not to have anything the FCC can
9 rely upon and, in effect, not to have Track B as part
10 of the proceeding.

11 So I believe the short answer to the
12 question "how is it different" is, in effect, it
13 really isn't any different.

14 **COMMISSIONER GARCIA:** I don't know if it's
15 been repeated by the parties enough times to convince
16 me or I just missed it, but -- and I believe you said
17 it, too, so -- that this proceeding is basically about
18 Track A, that that's the track that you are trying to
19 get to in this proceeding.

20 **MR. CARVER:** Yes, sir. Our view is that we
21 meet Track A, and we believe the facts support that.
22 We hope the Commission will reach that decision, also.
23 But at some point we're going to have to file an
24 application with the FCC, and there will be a factual
25 record made here and there may be other things that

1 come into consideration.

2 And one possibility -- I hope it doesn't
3 happen -- but one possibility is the Commission may
4 look at everything we have here and say, no, you're
5 not Track A compliant.

6 Now, if -- in our view, if we're not Track A
7 compliant, then it raises the question of why. And
8 some of those reasons put us back on Track B, if like,
9 for example, if you looked at --

10 **COMMISSIONER GARCIA:** -- including if you
11 were back on Track B, we're not going to make that
12 determination, but you would think that that record,
13 then, would apply to the FCC.

14 **MR. CARVER:** Yes, as --

15 **COMMISSIONER GARCIA:** Or you would take that
16 forward to the FCC?

17 **MR. CARVER:** Yes, sir. Essentially, the
18 record that's created we hope will be broad enough so
19 that it will give us some guidance as to whether
20 Track A or Track B is appropriate. But what they're
21 arguing is the situation, in effect, where you get rid
22 of B now and allow A to be the only possibility. Then
23 if you find that we're not Track A compliant, then
24 we're nowhere.

25 And our hope since A -- or lack of A can

1 turn back to B, we believe it's important to have a
2 full factual record, because some of the reasons that
3 might lead to a denial of A would also support the
4 B -- a Track B application. We --

5 **COMMISSIONER GARCIA:** Ms. Rule, if --

6 **MR. CARVER:** I'm sorry.

7 **COMMISSIONER GARCIA:** If we knew that
8 Southern Bell was going to use Track B for a while,
9 then how can -- how could it have escaped you that
10 it's not an issue in this case? How could it escape
11 the parties?

12 If we knew that they were presenting Track B
13 and ruled on it, and I -- I don't remember if anyone
14 even did dissent.

15 **MS. RULE:** Commissioner, we didn't know they
16 were presenting Track B, and they refused to tell you.
17 I believe Commissioner Deason asked a direct question,
18 and the response was that they're not ready to tell
19 you. Clearly we can't read their minds.

20 I'd also like to point out to you that the
21 Kentucky PSC dismissed their SGAT. A Kentucky PSC
22 found that Track B was closed to BellSouth.

23 I'd also like to remind you that at
24 Paragraph 130 of the Ameritech Order we find that the
25 Michigan Commission dismissed or rejected Ameritech's

1 SGAT because Ameritech didn't qualify for Track B.
2 Why? Competitors had made timely requests for action
3 and interconnection.

4 COMMISSIONER CLARK: Now, Did the FCC do
5 that or did Michigan do that?

6 MS. RULE: The Michigan PSC did that.

7 COMMISSIONER CLARK: What did they do?

8 MS. RULE: I will quote to you from footnote
9 No. 130 of the Ameritech order.

10 COMMISSIONER CLARK: Of what?

11 MS. RULE: Of the Ameritech order.

12 COMMISSIONER CLARK: From the FCC.

13 MS. RULE: Yes. And It says -- cites some
14 material from the Michigan consultation, and it says
15 "Indicating that the Michigan Commission rejected
16 Ameritech's statement of generally available terms and
17 conditions on the ground that Ameritech does not
18 qualify for Track B because competitors had made
19 timely requests for access and interconnection.

20 COMMISSIONER CLARK: Did they strike it or
21 they just reject it?

22 MS. RULE: Reject it. But your procedural
23 posture is different. You're being asked to turn this
24 into a ratemaking proceeding. There are no issues
25 before you. There's no notice to parties who aren't

1 here.

2 **COMMISSIONER DEASON:** Ms. Rule, doesn't that
3 go to their burden, though, as to whether they've met
4 their burden to have an SGAT, as they have filed it,
5 approved by this Commission at this time?

6 **MS. RULE:** If it were properly noticed, I
7 would agree with it, but it's not properly noticed.
8 You're being asked to set rates. You haven't given
9 anybody any notice that you're going to do that.
10 BellSouth hasn't given the public any notice that it's
11 requesting that. The notice is procedurally
12 deficient.

13 **COMMISSIONER DEASON:** Is anyone harmed if
14 SGAT is not approved in this proceeding?

15 **MS. RULE:** If it's not approved in this
16 proceeding, BellSouth has the opportunity to file it
17 again or you could choose to sever this proceeding,
18 notice it properly; hold another hearing or not. You
19 could, I imagine, do it as a PAA if you find there's
20 sufficient evidence for you to do that.

21 But in any event, I don't know if anybody is
22 prejudiced. Those people aren't here. They haven't
23 been given notice.

24 **COMMISSIONER GARCIA:** Are you saying we
25 could do it as a PAA within this order in this case?

1 **MS. RULE:** No, because this case hadn't been
2 properly noticed. You have the ability to open any --

3 **COMMISSIONER GARCIA:** That's what I thought.

4 So I didn't understand if you had answered
5 Commissioner Deason's question directly, which was
6 "who is hurt if we don't." Is it -- am I correct?

7 **MS. RULE:** That's like saying "Who has not
8 received notice." I don't know, but the notice
9 requirements are intended to give the public at large
10 an idea of what's going on in this case.

11 **COMMISSIONER DEASON:** But now you would
12 agree that when it comes to notice, that it is not
13 practical for this Commission to lay out within the
14 notice every conceivable issue which is going to -- if
15 this were a rate proceeding -- and you've gone through
16 rate proceedings before -- it's not unheard of to have
17 100 issues.

18 The notice is not required to list out 100
19 issues as to what there's going to be an affirmative
20 vote on at the time of agenda conference to determine
21 what the outcome of that case is going to be. Now,
22 how is this different?

23 **MS. RULE:** You are absolutely correct, but I
24 invite you to take a look at the title of this docket,
25 "Consideration of BellSouth Telecommunication, Inc.'s

1 entry into intraLATA services pursuant to Section 271
2 of the Federal Telecommunications Act of 1996."

3 This is a 271 proceeding. You've noticed it
4 as a 271 proceeding. Nothing in 271 authorizes you to
5 approve an SGAT. That authority comes from Section
6 252, and you haven't noticed this as a 252 proceeding.

7 **COMMISSIONER GARCIA:** Isn't part of 271 --
8 considers that SGAT? Isn't the Track B necessarily
9 considering that SGAT?

10 **MS. RULE:** Not necessarily. And even so, if
11 you look at the language of the Act, that would be an
12 existing SGAT. Look at the issue this case. Do they
13 have one? Has it been approved by the Commission?
14 Has it been permitted to go into effect.

15 **COMMISSIONER DEASON:** Ms. Rule, you would
16 agree that the so-called little players out there,
17 they have the opportunity, if they want to, to just
18 say, I want AT&T's agreement or, I want MCI's
19 agreement. They don't have to depend on the SGAT if
20 they don't want to.

21 **MS. RULE:** They don't have to, but I would
22 say that the little guys don't have AT&T's ability to
23 negotiate an agreement, and the agreement we've
24 negotiated is specific for our business needs. As
25 BellSouth said, if they wanted an SGAT, it's so people

1 don't have to do that.

2 **COMMISSIONER CLARK:** I'm not sure I agree
3 with your notion that this is a rate case and that all
4 customers are entitled to notice. This is the setting
5 of the rates between companies, not with respect to
6 ratepayers. So I'm not sure I can buy into your
7 notion that there hasn't been proper notice of this.
8 But I see this more -- I see our role as consultative
9 with the FCC, and I think that the Ameritech order
10 kind of sets out -- the part you read, at least, is
11 that if we believe that it isn't adequate, we should
12 recommend to them that they reject it and that we
13 think it's not appropriate under B.

14 I just don't know if it is wise for us at
15 this time to strike it or sever it. I think we ought
16 to take it what it is and comment on it and send it up
17 to the FCC.

18 **COMMISSIONER DEASON:** Let me offer some
19 comments to -- I'm in basic agreement with you.

20 When we considered the question, the scope
21 of this proceeding and whether we were going to go to
22 Track A or Track B or whatever, I thought that's what
23 we should do. We were at the stage of the hearing
24 where we should have specified, if we were so
25 inclined -- and I felt it was appropriate to specify

1 we were just filing it -- discovered this case was
2 going to be Track A. And part of that reason was so
3 that we could hone the issues, focus on what was
4 important, focus on that 14-point checklist as it
5 pertained to the arbitrated agreements, and forget
6 about this SGAT, because I don't think it was relevant
7 at the time. I don't think it perhaps is relevant
8 now. And I thought that it was an expeditious thing
9 to do.

10 But the fact of the matter is we've already
11 done all the work now. We have sat here for a whole
12 week and listened to all of the direct case, the
13 rebuttal case, and at some points your excruciating
14 cross-examination. (Laughter)

15 The work has been done. There's nothing to
16 be gained. Now the case is in, the evidence is in,
17 and this Commission will have to decide whether we're
18 going to approve the SGAT or not.

19 So I don't think there's anything to be
20 gained by severing it off. And I agree with
21 Commissioner Clark; I don't think the notice is
22 deficient. Anyone that is familiar enough to know
23 what 271 is, they know what an SGAT is, and they
24 better look in here to see if there's going to be an
25 issue as to SGAT, if they're concerned whether they're

1 going to be harmed by a SGAT being approved in this
2 proceeding.

3 So for those reasons, I would make a motion
4 that we deny the motion to strike or, in the
5 alternative, to sever the issue from this proceeding.

6 **CHAIRMAN JOHNSON:** There's been a motion.
7 Is there a second?

8 **COMMISSIONER CLARK:** Second.

9 **CHAIRMAN JOHNSON:** There's a motion and a
10 second. Any further discussion?

11 **COMMISSIONER KIESLING:** Yes. I want to
12 indicate, since a number of my questions may have
13 suggested otherwise, that I'm in agreement with the
14 motion. I do not feel that --

15 **COMMISSIONER CLARK:** Which motion? The one
16 we've made or the one they've made?

17 **COMMISSIONER KIESLING:** The motion that was
18 just made by the Commission. (Laughter)

19 I think that a question that is legitimately
20 before us in regard to the SGAT is whether or not
21 BellSouth has presented sufficient evidence to support
22 our approval of the SGAT. And I certainly think that
23 all the information is in the record and that the
24 whole record should go forward to the FCC.

25 I see this case a little differently because

1 it is a consultative role. It's not the traditional
2 kind of 120 hearing that we do. And my preference
3 would be that we air all of it here. We hear the
4 witnesses. We've already gone through -- I would have
5 used instead of "excruciating," maybe "tedious," but
6 there's a number of adjectives that would work --
7 cross-examination on these things, and I think we
8 should just go forward with the case as it is.

9 I don't think that the notice is necessarily
10 deficient because this is a consultation proceeding as
11 opposed to a formal proceeding where we are going to,
12 in essence, set rates.

13 So I think it's a legitimate issue is before
14 us in 1B, and that is whether or not we should approve
15 the SGAT. If we don't approve the SGAT, then that's
16 what goes forward to the FCC.

17 **COMMISSIONER CLARK:** I think even if we
18 struck it, they would still have the opportunity to
19 send it.

20 **COMMISSIONER KIESLING:** Well, that's my
21 concern.

22 **COMMISSIONER CLARK:** So it would be well to
23 sort of leave it in there and provide our views on it.

24 **COMMISSIONER KIESLING:** I am in agreement.
25 If we're supposed to consult with the FCC and give

1 | them, you know, our whole record of what we've heard
2 | here, then I think we should give them the most
3 | complete record possible. So I am going to vote for
4 | the motion, but I just didn't want anyone to think
5 | that --

6 | **COMMISSIONER CLARK:** And while we had talked
7 | about the cross-examination, it has been, you know,
8 | difficult at times, but I think it's been well worth
9 | it in the sense of illuminating those areas of
10 | particular problems, and my hope is that -- you know,
11 | there's not only the benefit of having this
12 | information to send to the FCC, it's a benefit between
13 | the parties so you can resolve your differences,
14 | because the objective here is not to keep one or the
15 | other out of the other market. The objective here is
16 | to get it fair so customers have a choice.

17 | I mean, I get tired of my relatives saying
18 | when. When are we going to get a choice? When am I
19 | going to get a choice?" I'm ready to go now. So I
20 | think, you know, not just to send it to the FCC, but
21 | hopefully you all are learning where your real
22 | disagreements are and what you need to work on.

23 | **COMMISSIONER DEASON:** Let me clarify
24 | something. My use of the term excruciating was not
25 | intended -- (Laughter)

1 **COMMISSIONER CLARK:** Some of us need it
2 three times. You only need it once.

3 **COMMISSIONER DEASON:** -- was not intended to
4 be derogatory towards those persons conducting the
5 cross-examination. What it intended to relay was the
6 fact that these are very complicated issues, and if we
7 had granted the motion to start with, we would not
8 have had some of this excruciating cross-examination.

9 But this Commission decided we were going to
10 leave open Track A and Track B and leave SGAT in
11 there, and so it was necessary. And my point is that
12 we've done the work now, and there's not a lot to be
13 gained by kicking it out at this point. The evidence
14 is in, and we can make a decision on the SGAT. And
15 I'm ready to go forward.

16 **CHAIRMAN JOHNSON:** There is a motion and
17 second. All those in favor, signify by saying aye.

18 (Affirmative responses.)

19 **CHAIRMAN JOHNSON:** Show it approved
20 unanimously and the motion denied.

21 **COMMISSIONER GARCIA:** The words you were
22 looking for was "painfully proficient." (Laughter)

23 **COMMISSIONER DEASON:** I'll try to remember
24 that next time.

25 **CHAIRMAN JOHNSON:** We're going to take a

1 10-minute break.

2 (Brief recess.)

3

- - - - -

4 **CHAIRMAN JOHNSON:** We'll go back on the
5 record. I think we're ready for our next witness.
6 And there may be some preliminary matters. Let's go
7 to the preliminary matters.

8 **MR. HATCH:** There's a couple preliminary
9 matters. I think the next one on the agenda,
10 Commissioners, is there is still a pending dispute
11 with respect to BellSouth and AT&T and the other
12 members of FCCA with respect to the production of
13 documents that we received last week.

14 I'm about to hand you a document that are
15 extracts of some of the information in the material
16 that was produced by BellSouth to FCCA. It is highly
17 proprietary. That's why I'm handing you this out.
18 What I would request at the moment is that you enter a
19 temporary protective order that would protect it from
20 public records disclosure while it's in the
21 Commission's hands, and then after we're done with the
22 argument, then we can gather these sheets back up. So
23 I'll go ahead and hand those out now if I can have a
24 protective order.

25 **CHAIRMAN JOHNSON:** How do we handle this,

1 Staff, this document that he's referring to?

2 MS. CULPEPPER: I believe what Mr. Hatch
3 suggested will be appropriate, a temporary protective
4 order.

5 CHAIRMAN JOHNSON: That we grant that
6 temporary protection order now. Okay. Then we'll
7 grant the temporary protective order. And I'm sorry.
8 I didn't catch the first part of your statement. How
9 is this being used?

10 MR. HATCH: Okay. What you have before you
11 is information that has been drawn from the
12 interconnection agreements that BellSouth has with
13 other ILECs and you can go through there. The first
14 page is basically a summary of the basic agreement
15 that BellSouth has with all of the LECs, and then as
16 you go through you can see for each LEC which
17 piece-parts they have with respect to their agreements
18 with BellSouth.

19 The reason I'm giving you this sheet is
20 because I can show you it without having to talk about
21 it and disclose it, which was one of the problems of
22 trying to get ready to do any cross-examination on it.

23 Essentially the posture we find ourselves in
24 is that I had proposed to BellSouth that we basically
25 go ahead and stipulate the contracts into the record

1 and that we could argue the information in them with
2 respect to our cases when we file the briefs.

3 BellSouth still claims, or still is arguing,
4 that the information is irrelevant, and essentially
5 that's what Ms. White and I are going to argue about
6 now.

7 Commissioners, what you see before you is
8 essentially the substance of all those interconnection
9 agreements. As you recall from the beginning of the
10 hearing last week, Commissioner Johnson had issued a
11 ruling that the information was relevant to produce.
12 The Commission had denied BellSouth's motion for
13 reconsideration, that these documents are relevant and
14 should be produced.

15 What I am asking today is that these
16 documents be entered into the record in this
17 proceeding. Because of the lateness in which we got
18 them and because of the difficulties of trying to
19 structure cross-examination from these documents, this
20 seemed to me the most expedient solution -- if you'll
21 forgive the word -- for getting information into the
22 record for subsequent use.

23 These contracts are, as you can see from the
24 services covered with respect to companies, they're
25 directly on the issues in this case with respect to

1 whether BellSouth is providing nondiscriminatory
2 access as well as other services that are relevant
3 within the 14-point checklist.

4 We still maintain that these documents are
5 directly relevant. They directly show what BellSouth
6 is doing with some of its competitors. Then the
7 question then becomes what is it doing with all of its
8 competitors and is it relevant to that determination?

9 CHAIRMAN JOHNSON: BellSouth?

10 MS. WHITE: Yes. Thank you. Chairman
11 Johnson, you, as the prehearing officer, decided that
12 these documents were relevant for purposes of
13 discovery, and on reconsideration the Commission
14 agreed with you.

15 Now AT&T and the other members of the FCCA
16 are asking that these documents be included into the
17 record; moved into the record. So it's not just for
18 discovery purposes anymore, it's for purposes of
19 entering them into the record.

20 BellSouth would object to the documents
21 coming into the record for the same reasons it
22 objected on discovery; that interconnection with the
23 incumbent local exchange companies was not provided
24 under the Act, it was not negotiated under the Act
25 and, therefore, it is not relevant to what BellSouth

1 is providing under the Act. Thank you.

2 **CHAIRMAN JOHNSON:** Staff?

3 **MS. CULPEPPER:** Commissioners, Staff

4 recommends that the evidence appears relevant for the
5 purposes of determination under Section 271.

6 Therefore, we would recommend that the evidence be
7 admitted but accorded whatever weight that it may be
8 due.

9 **CHAIRMAN JOHNSON:** Commissioners, any
10 comments? And are you at this time asking us to mark
11 this?

12 **MR. HATCH:** Yes, ma'am; that would be my
13 next request is that the interconnection agreements be
14 marked for identification as a composite exhibit. I
15 don't know what the next number is.

16 **CHAIRMAN JOHNSON:** Okay. And how do we
17 handle that with the confidential document?

18 **MR. HATCH:** I will provide a copy I have.
19 Actually, it's a box. I will provide the box to the
20 court reporter with that exhibit number on it.

21 **MS. CULPEPPER:** Madam Chairman, may I ask
22 Mr. Hatch if he would clarify for us? We just looked
23 over this document, and we're not sure exactly what
24 information in here is exactly supposed to be
25 confidential, because it appears to us some of this

1 has actually been filed.

2 **MR. HATCH:** All of the information in this
3 handout that I handed to you comes directly out of the
4 documents produced. BellSouth has claimed that those
5 documents are proprietary. So rather than get into
6 the nuances of which piece is and which piece isn't,
7 which can be solved later, this seemed to be the best
8 way to handle it.

9 **MS. WHITE:** Well, if I could just have a
10 clarification. You're not moving this handout into
11 the record, you're moving the actual agreements
12 themselves into the record?

13 **MR. HATCH:** That is correct. The handout I
14 was going to pick back up. It was solely for
15 illustrative purposes for argument. The handout is
16 not the exhibit. The documents themselves, the
17 contracts, are the exhibit.

18 **MS. CULPEPPER:** Thank you.

19 **CHAIRMAN JOHNSON:** We will mark as
20 Exhibit 66 the interconnection agreements with the
21 ILECs, and Mr. Hatch will provide those to our court
22 reporter. And you've moved that?

23 **MR. HATCH:** Yes, ma'am.

24 **CHAIRMAN JOHNSON:** I'm going to admit that.
25 I do believe that it is relevant, and to the extent

1 that there are arguments that can be made, they will
2 go to weight and not admissibility.

3 Any other preliminary matters?

4 (Exhibit 66 marked for identification and
5 received in evidence.)

6 MR. HATCH: One final matter. Dr. Kaserman
7 is technically the next witness up in the lineup. We
8 have agreed to stipulate him into the record, if you
9 want to handle that now.

10 Dr. Kaserman has prepared 59 pages of
11 rebuttal testimony including end notes, and we would
12 request that that be inserted into the record as
13 though read.

14 COMMISSIONER KIESLING: I'm sorry. Did you
15 say Robert?

16 MR. HATCH: Dr. Kaserman, David Kaserman.

17 COMMISSIONER KIESLING: That's what I
18 thought. That's why I was confused about --

19 MR. HATCH: If I said Robert, I misspoke.
20 I'm sorry.

21 CHAIRMAN JOHNSON: It will be admitted
22 inserted into the record as though read.

23 MR. HATCH: Dr. Kaserman had also prepared
24 six exhibits, DLK-1 through DLK-6. Could I request
25 they be marked for identification?

1 **CHAIRMAN JOHNSON:** They will be marked as
2 exhibits -- Composite Exhibit 67.

3 **MR. HATCH:** And we would request that
4 Dr. Kaserman's exhibits also be admitted into the
5 record.

6 **CHAIRMAN JOHNSON:** They will be admitted
7 without objection.

8 (Exhibit 67 marked for identification and
9 received in evidence.)

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is David L. Kaserman. My business address is the Department of Economics, College of Business, 415 West Magnolia -- Room 203, Auburn University, Auburn, Alabama, 36849-5242.

Q. WHAT IS YOUR OCCUPATION?

A. I am an economist. My current position is Torchmark Professor of Economics at Auburn University.

Q. WOULD YOU PLEASE SUMMARIZE YOUR QUALIFICATIONS?

A. Yes. I hold a Ph.D. degree in Economics from the University of Florida. My principal field of interest is industrial organization, which encompasses the areas of antitrust economics and the economics of regulation. I have over twenty years of experience as a professional economist and have held positions both in government agencies (e.g., the U.S. Federal Trade Commission) and in academic institutions. In addition, I have consulted on and testified in numerous antitrust cases and regulatory hearings. My primary research interest is in the application of microeconomic analysis to public policy issues, and that interest is reflected in my publications.

1 Over the past twelve years, I have focused much of my research on public
2 policy issues surrounding the telecommunications industry, particularly
3 those issues created by the emergence of competition in the various
4 markets that comprise that industry. That research has resulted in the
5 publication of more than a dozen papers on this subject, with several more
6 papers currently in progress. I have also published a textbook, co-
7 authored with Professor John W. Mayo at Georgetown University, dealing
8 with the economics of antitrust and regulation. In addition, over this same
9 period, I have testified on telecommunications policy issues in more than
10 fifteen states and before the Federal Communications Commission.

11

12 Q. HAVE YOU PREPARED A VITA THAT DESCRIBES YOUR
13 EDUCATION, PUBLICATIONS, TESTIMONIES, AND
14 EMPLOYMENT HISTORY?

15 A. Yes. A copy of my most recent vita is attached as Exhibit 1.

16

17 Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?

18 A. I have been asked by MCI Telecommunications Corporation ("MCI") and
19 AT&T Communications of the Southern States, Inc. ("AT&T") to respond
20 to several of the economic arguments presented by Mr. Alphonse Varner,
21 of BellSouth Telecommunications, Inc., in his direct testimony in this
22 proceeding. In that testimony, Mr. Varner attempts to support BellSouth's

1 application to enter the interLATA long-distance market within Florida
2 under the provisions of Section 271 of the Telecommunications Act of
3 1996. This Section of the Act establishes the criteria under which the
4 Regional Bell Operating Companies (RBOCs) will be allowed to enter (or,
5 more accurately, reenter) the in-region interLATA market.¹ Specifically,
6 under the 271 provisions, an RBOC's reintegration within its certificated
7 geographic territory is made contingent upon the satisfaction of four
8 necessary preconditions.²

9
10 First, the RBOC must be able to demonstrate that it is providing
11 interconnection to competitive local exchange providers (at least one of
12 which is predominantly a facilities-based carrier). Moreover, the terms
13 and conditions under which the RBOC offers interconnection must
14 conform to the standards established by a "competitive checklist"
15 contained in the Act.

16
17 Second, the RBOC seeking approval to reintegrate must comply with the
18 Act's nondiscrimination and structural separation requirements.
19 Importantly, the Federal Communications Commission (FCC) has
20 interpreted these provisions to mean that not only must the RBOC refrain
21 from discriminating among third parties, but regulators must also be able

1 to establish that the RBOC does not discriminate between itself (or its
2 subsidiaries) and third party providers.³

3

4 Third, the Act requires the FCC to seek advice from the U.S. Department
5 of Justice (DOJ) concerning each RBOC application. In conducting its
6 evaluation of a 271 application, the latter agency may apply any standard
7 that it deems appropriate. Although the resulting DOJ recommendation is
8 not binding on the FCC's decision, the Act requires that "substantial
9 weight" be given to it.

10

11 Finally and importantly, the Act explicitly instructs the FCC to deny the
12 application unless it finds that the requested reentry is consistent with the
13 "public interest." From an economic standpoint, such a determination
14 would appear to require that the benefits accruing to telecommunications
15 consumers exceed any potential harm to those consumers as a result of the
16 reintegration.

17

18 The above criteria are clearly intended to establish some threshold level of
19 competition in local exchange markets as a prerequisite to RBOC reentry
20 into long distance. The crucial question, then, is what that level of
21 competition will be. The action taken by this

1 Commission on BellSouth's application, along with the actions of the other
2 regulatory and antitrust agencies involved in the 271 process, will
3 determine the answer to that question.

4

5 Q. HOW IS YOUR REBUTTAL TESTIMONY ORGANIZED?

6 A. My testimony is organized in four substantive sections. The first two
7 sections deal with the current intensity of competition in the interLATA
8 and local exchange markets, respectively. The question of whether and to
9 what extent competitive market forces are present in these two markets
10 largely determines the merits of allowing BellSouth to reintegrate at this
11 time. In my opinion, Mr. Varner has seriously misstated the status of
12 competition in Florida's interLATA market, resulting in an erroneous
13 conclusion concerning the likely effects of reintegration on the welfare of
14 the consumers of this state.

15 The third substantive section then reevaluates Mr. Varner's
16 conclusions regarding the likely economic effects of allowing
17 BellSouth to reintegrate into the interLATA market at this time.
18 Due to Mr. Varner's erroneous conclusions regarding the intensity
19 of competition in the interLATA market and his failure to address
20 the state of competition in local exchange markets in Florida, his
21 conclusions concerning the probable consequences of BellSouth
22 reintegration are also mistaken.

1 The fourth substantive section then responds to three additional
2 economic issues raised in Mr. Varner's testimony. These issues
3 are: (1) the alleged benefits of allowing BellSouth to reenter the
4 interLATA market to provide consumers bundled service offerings
5 (the one-stop-shopping argument); (2) the claimed ability of
6 regulation to successfully safeguard the public (both consumers
7 and competitors) from any anticompetitive behavior that might be
8 exhibited by a reintegrated BellSouth; and (3) the allegation that
9 price cap regulation eliminates incentives for BellSouth to
10 misallocate its costs in order to cross-subsidize competitive
11 services in a reintegrated environment. A final section then
12 summarizes the testimony.

13

14 II. COMPETITIVENESS OF THE LONG-DISTANCE MARKET

15 Q. AT SEVERAL POINTS IN HIS TESTIMONY, MR. VARNER ARGUES
16 THAT THE LONG-DISTANCE INTERLATA MARKET IS NOT
17 SUBJECT TO EFFECTIVE COMPETITION (E.G., PP. 6 AND 60-61).
18 HOW IS THIS ISSUE RELEVANT TO THE SECTION 271
19 DELIBERATIONS?

20 A. The intensity of competition in the interLATA market is relevant to the
21 decision of whether to approve BellSouth's 271 application in at least two
22 respects.⁴ First, BellSouth argues that the interexchange industry currently

1 is characterized by monopoly (or, at least, by the absence of effective
2 competition) and, therefore, that reintegration by BellSouth will increase
3 competition and, thereby, enhance consumer welfare. If, alternatively, the
4 interexchange industry is subject to effective competition, then the market
5 is already providing virtually all of the consumer benefits possible. In that
6 event, reintegration will not yield the benefits claimed by Mr. Varner.
7 Second, if the interLATA market is competitive and local
8 exchange markets are not, then the very real potential for
9 monopoly leveraging behavior arises with reintegration. In that
10 event, it is likely that BellSouth's reentry into the interLATA
11 market will actually cause a reduction in the intensity of
12 competition in this market. As a result, an affirmative case for
13 RBOC reintegration hinges largely upon the argument that the
14 interLATA market is not yet subject to effective competition.
15 Consequently, that argument provides an important cornerstone to
16 BellSouth's application in this proceeding.

17
18 Q. IS THE INTENSITY OF COMPETITION IN BELLSOUTH'S LOCAL
19 EXCHANGE MARKETS ALSO RELEVANT TO THIS PROCEEDING?

20 A. Yes. If consumers are to benefit from BellSouth's reintegration into the
21 in-region interLATA market, effective competition must first prevail in its
22 local exchange markets. The competitive checklist provided by Section

1 271 (c)(2)(B) represents a necessary (but not sufficient) condition for such
2 competition to arise. As a result, it is imperative that the checklist items
3 be fully implemented, tested, and proven capable of supporting the level of
4 competition on which these consumer benefits depend. Pro forma
5 satisfaction of checklist items without actual market experience by
6 competitors may create the illusion of a market that is “open to
7 competition” but closed to competitors. Such a level of checklist
8 enforcement will ultimately harm consumers by forestalling the
9 development of any real competition.

10

11 Q. PLEASE DESCRIBE THE TERM “EFFECTIVE COMPETITION.”

12 A. Effective competition connotes an absence of significant monopoly power.
13 Specifically, when effective competition is present, the economic benefits
14 from public policy intervention in a market are more than offset by the
15 economic costs of any regulatory efforts designed to mitigate the relatively
16 small amounts of market imperfections that may exist. While economists
17 envision a theoretical range of competition, spanning from perfect
18 competition to pure monopoly, a benchmark for the determination of
19 public policy attention is the presence or absence of effective competition.
20 If effective competition is present, consumers are best served by the
21 unimpeded operation of market forces.

22

1 Q. IS THERE A GENERALLY ACCEPTED METHODOLOGY IN
2 ECONOMICS FOR EVALUATING THE INTENSITY OF
3 COMPETITION IN A MARKET?

4 A. Yes. The intensity of competition can be gauged by the degree of
5 monopoly (or market) power present. Where monopoly power is absent or
6 de minimis, effective competition exists. Monopoly power, in turn, is the
7 ability to control price and exclude competition. Fortunately, industrial
8 organization economics provides a framework for determining whether a
9 firm provides its services under conditions of significant monopoly power
10 or, alternatively, faces effective competition. In particular, in most
11 circumstances, one can assess whether a firm possesses significant
12 monopoly power by examining three underlying structural determinants:
13 (1) the elasticity (or responsiveness) of the supply of other firms, (2)
14 market share, and (3) market demand characteristics.⁵

15
16 Q. IS MR. VARNER'S EVALUATION OF THE INTENSITY OF
17 COMPETITION IN THE INTERLATA MARKET
18 METHODOLOGICALLY SOUND?

19 A. No. Rather than applying the standard, widely-accepted economic criteria
20 identified above, Mr. Varner simply makes unsupported assertions that
21 this market is not performing competitively (see, for example, pages 60-61

1 of his direct testimony). Such an approach is neither objective nor
2 analytical. It is a personal opinion, not economic analysis.

3

4 Q. IF WE APPLY THE TRADITIONAL ECONOMIC CRITERIA FOR
5 ASSESSING THE INTENSITY OF COMPETITION TO THE
6 INTERLATA MARKET, WHAT DOES THE EVIDENCE SHOW?

7 A. It shows unambiguously that this market is subject to fully effective
8 competition. Consider each of the three criteria described above.⁶

9

10 First, with regard to the elasticity of competing firms' supply, the data
11 reveal that the relative ease of entry into and expansion within the
12 interLATA market result in a high supply elasticity. Exhibit DLK-3
13 depicts the number of long-distance firms competing in the interexchange
14 market. As can be seen, roughly 500 firms are now vying for the
15 patronage of long-distance customers nationwide.

16

17 Moreover, not only have firms entered the interexchange market, but they
18 have also been aggressive in developing the capacity for future output
19 expansions. Indeed, as seen in Exhibit DLK-4, both AT&T and its
20 competitors have been very active in developing fiber optic transmission
21 networks. The data exhibited here show that miles of fiber in place have
22 increased in all categories every year since 1984. At the end of 1995,

1 AT&T had about 1.4 million miles of fiber in place, while other IXCs had
2 about 1.3 million. Such capacity for future output expansions is important
3 because capacity limitations facilitate monopolistic price increases on the
4 part of incumbent firms. That is, any attempt by any incumbent
5 interexchange carrier, say AT&T, to raise prices to supra-competitive
6 levels would be aided if the capacity of its rival firms were limited.
7 Alternatively, where the capacity of rival firms is abundant (and customers
8 readily demonstrate a willingness to switch to alternative carriers), the
9 ability of any firm contemplating a supracompetitive price increase is
10 constrained.

11
12 In the case at hand, it is well known that the interexchange industry is rife
13 with capacity. For instance, a recent study found that AT&T's competitors
14 could readily absorb a significant percentage of AT&T's traffic
15 immediately and within three months take roughly one-third of all of
16 AT&T's traffic simply by utilizing spare switch ports and existing
17 transport facilities.⁷

18
19 Importantly, the distribution of this transmission capacity in the
20 interexchange industry is spread across a variety of carriers. Indeed, in
21 Florida, there are at least 28 facilities-based interexchange carriers. This
22 presence of alternative carriers with the capability to expand assures that

1 no interexchange firm has control over any bottleneck facilities that might
2 aid in attempts to sustain supracompetitive prices.

3

4 Not only have firms been aggressive about their expansion of physical
5 facilities in the interexchange industry, but they have also demonstrated in
6 incontrovertible terms their willingness and desire to expand output.

7 Exhibit DLK-5 depicts the growth of output of competitors to AT&T, such
8 as MCI, in the post-divestiture period. As is readily apparent, these
9 competitors collectively have exhibited a remarkable growth rate of
10 roughly twenty percent per year between 1984 and 1996.

11

12 Finally, the breadth of interexchange service offerings in Florida also
13 indicates that there is a high elasticity of supply by rival firms. Not only
14 do a large number of firms offer long-distance service in this state and
15 nearly 500 offer service nationwide, but this competition exists across
16 virtually all product lines within the long-distance market. Every service
17 offered by AT&T and MCI has competitive alternatives, whether MTS,
18 Private Line, or high volume inbound services. Also, there has been an
19 explosion of new service offerings by interexchange carriers in the post-
20 divestiture period. This remarkable proliferation of services provides
21 objective proof regarding the highly elastic nature of supply in the
22 interexchange industry. In sum, the data unequivocally reveal that barriers

1 to entry and expansion are extremely low and, therefore, that the elasticity
2 of competitive supply is quite high.

3

4 Q. DOES THE MARKET SHARE EVIDENCE ALSO INDICATE THE
5 PRESENCE OF COMPETITION IN THE INTERLATA MARKET?

6 A. Yes. At the outset of the post-divestiture period, AT&T had a
7 preponderance (over 90 percent) of interLATA traffic in the United States.
8 As seen in Exhibit DLK-6, however, AT&T's minutes-of-use market share
9 has dropped consistently during the past decade. At the same time, the
10 output and breadth of competitors' service offerings has expanded
11 dramatically. By 1996 (3rd quarter), AT&T's interstate minutes-of-use
12 market share had fallen to 52.8 percent.⁸

13

14 Typically, the pattern and level of intrastate interLATA minutes-of-use
15 market shares have followed closely the interstate market share statistics.
16 The consistent and pronounced declines in AT&T's market share reveal a
17 vulnerability of AT&T to competitive attacks. Importantly, this observed
18 decline in market share has come about during a period in which the real
19 price of long-distance services has fallen by over 50 percent. This decline
20 in market share in the face of falling prices reveals a pronounced
21 vulnerability of interexchange companies to competitive attacks. Clearly,
22 in the event of any unwarranted attempt to raise prices above competitive

1 levels, the resulting market share loss would be devastating. Therefore,
2 the market share evidence also provides unequivocal support for the
3 conclusion that the interLATA market is subject to effective competition.

4

5 Q. DO DEMAND CHARACTERISTICS ALSO INDICATE THAT THE
6 INTEREXCHANGE MARKET IS COMPETITIVE?

7 A. Yes. The demand characteristics of the interexchange market reinforce the
8 competitive impact of the high elasticity of firm supply and the
9 distribution of market shares in the interLATA market. Several
10 considerations support this conclusion. First, overall market growth has
11 been pronounced. Sales of interexchange services have increased
12 dramatically since the divestiture. This large growth rate has had the
13 effect of attracting new firms into the market and has mitigated the risk of
14 failure for prospective new entrants.

15

16 Second, the distribution of demand across telecommunication customers
17 has also contributed to the vulnerability of incumbent firms. Specifically,
18 a large proportion of consumer demand for interexchange services is
19 accounted for by a relatively small percentage of customers. That skewed
20 distribution, together with a pronounced propensity of customers to switch
21 long-distance carriers, makes the sales of any particular carrier subject to
22 potentially large losses in the event of an anticompetitive price increase.

1 Third, consumer demand in long-distance services is characterized by an
2 acute tendency to switch carriers. In 1994, some 27 million households
3 switched long-distance carriers. By 1995, that number had swollen to over
4 42 million customers (representing some 19 percent of the interexchange
5 carrier base).⁹

6
7 In the face of such a pronounced willingness and demonstrated ability of
8 consumers to switch long-distance providers, the high elasticity of other
9 firms' supply, and the existing distribution of market shares, it is virtually
10 inconceivable that the long-distance market is characterized by anything
11 other than effective competition. In short, buyers have too many choices,
12 firms have too much capacity, and there is simply too little customer
13 loyalty to any given carrier for any firm to possess monopoly power or
14 exploit consumers of long-distance services in Florida.

15
16 Q. DOES ECONOMETRIC EVIDENCE EXIST TO SUPPORT THE
17 CONCLUSION THAT THE INTEREXCHANGE MARKET IS
18 COMPETITIVE?

19 A. Yes. At least two recent studies of the interexchange industry based on
20 substantially different methodologies and different sources of data have
21 both concluded that there is very little market power exhibited in the
22 interexchange industry.

1 The first study, performed by a staff member of the Federal Trade
2 Commission, makes use of two data sets -- a time series for interstate
3 calling that covers the period from July 1986 through August 1991 and a
4 pooled sample of monthly data that covers the 1988-1991 period for five
5 states.¹⁰ The study focuses on the small business and residential portion of
6 the overall interexchange market. The results of the study support the
7 conclusion that no firm in the interexchange marketplace holds significant
8 monopoly power. Indeed, the study concludes that the potential economic
9 welfare loss due to deviations of prices from those that would prevail
10 under perfect competition are minuscule, ranging from 0.03 percent to
11 0.36 percent of industry revenues. (See Ward p.61)

12
13 The second study to provide an empirical assessment of market power in
14 the interexchange industry is one conducted by Professors Simran Kahai,
15 John W. Mayo, and me.¹¹ Based on quarterly observations on interstate
16 calling volumes and tariffed rates for residential MTS service between the
17 third quarter of 1984 and the fourth quarter of 1993, we simultaneously
18 estimate the total market demand and the supply of AT&T's rivals while
19 controlling for exogenous influences such as the price of carrier access and
20 the percentage of lines converted to equal access. Based on these
21 estimates and known values of AT&T's market share (alternatively on a
22 capacity and minutes-of-use basis), it is possible to measure the degree of

1 market power held by AT&T. The results from this second econometric
2 analysis also indicate that AT&T has very little market power and is
3 therefore subject to effective competition. Given the relative size of
4 AT&T in the interexchange market, this conclusion holds a fortiori for
5 other long-distance carriers, such as MCI.

6

7 Q. HAS THE FCC MADE ANY FINDINGS CONCERNING
8 COMPETITIVE CONDITIONS IN THE INTEREXCHANGE
9 MARKET?

10 A. Yes. For several years, the FCC considered the issue of the status of
11 competition in the interexchange market with an eye toward whether the
12 market was sufficiently competitive to end price regulation and the
13 dominant-carrier status of AT&T. As a consequence of that investigation,
14 and in the presence of claims by the RBOCs that the market was
15 insufficiently competitive to warrant a removal of price regulation of
16 AT&T, the FCC found that the long-distance market was subject to a host
17 of competitive forces and that, accordingly, AT&T should be reclassified
18 as a "non-dominant" firm.¹²

19

20 Importantly, that finding was based upon a consideration of the same
21 structural factors described above. Specifically, with regard to the issue of
22 supply elasticity, the FCC notes that "AT&T's competitors have enough

1 readily available excess capacity to constrain AT&T's pricing behavior."¹³
2 The FCC also points out that the source of the high supply elasticity
3 derives not only from MCI and Sprint but from other smaller carriers as
4 well. In particular, the Commission correctly noted that "[w]e find
5 unpersuasive the arguments that interexchange carriers other than AT&T,
6 MCI, and Sprint are too small to exert competitive pressure."¹⁴

7
8 On the issue of market demand characteristics, the FCC finds that
9 "residential customers are highly demand-elastic and will switch to or
10 from AT&T in order to obtain price reductions and desired features." The
11 Commission also noted that "[t]he largest interexchange carriers
12 continually promote various discount plans, which meet the needs of
13 customers with different calling patterns (e.g., volume discounts, calling
14 circles, postalized rates) and offer cash awards to entice residential
15 consumers to switch carriers."¹⁵

16
17 In light of its consideration of supply elasticity, demand elasticity and the
18 pronounced decline in AT&T's market share, the FCC concluded that "*The*
19 *behavior of the market between 1984 and 1994 suggests intense rivalry*
20 *among AT&T, MCI, and Sprint.*"¹⁶

21

1 Finally, the FCC has recently reaffirmed its position regarding the
2 intensity of competition in the interLATA market. In its October 31, 1996
3 Order, the Commission states:

4 "Thus we believe that market forces will generally insure that the
5 rates, practices, and classifications are just, reasonable, and not
6 unjustly or unreasonably discriminatory... We also reject the
7 unsupported suggestion that the current levels of competition are
8 inadequate to constrain AT&T's prices"¹⁷

9
10 Q. IS THERE ANY EVIDENCE OF COLLUSION AMONG
11 INTEREXCHANGE CARRIERS?

12 A. No. In the face of the above overwhelming evidence of no unilateral
13 market power and as a justification to permit reintegration by the RBOCs
14 into the interLATA market, some RBOC witnesses have alleged that the
15 interexchange market is currently subject to tacit collusion. For example,
16 on page 61 of his testimony, Mr. Varner writes:

17 "AT&T, MCI, Sprint and WorldCom carry the majority of the
18 interLATA traffic but maintain a classic oligopoly. Prices move
19 up in lock-step without regard to decreasing costs; profit margins
20 are high and rising; and carriers target discounts at high-volume,
21 price-sensitive customers while charging the majority of callers
22 inflated basic rates."

1 I have evaluated this claim of non-competitive performance and found it to
2 be unconvincing and unsupported by any credible evidence. Indeed,
3 considerable evidence exists that refutes this claim.

4
5 The basic idea of tacit collusion is that, under certain well-specified
6 conditions, rival firms in highly concentrated industries may gravitate
7 toward the joint profit-maximizing (i.e., monopoly) price and output
8 without actually entering into an explicit overt agreement to fix prices. As
9 is widely recognized, however, whether this sort of behavior is likely to
10 occur is highly dependent upon the specific characteristics of the market in
11 question. For tacit collusion to arise, industry conditions must be
12 favorable to the stable sort of "meeting of the minds" that must occur to
13 sustain this highly coordinated market conduct.

14

15 Q. HAVE YOU EXAMINED THE INTERLATA MARKET TO
16 DETERMINE WHETHER THESE INDUSTRY CONDITIONS ARE
17 PRESENT?

18 A. Yes. A thorough examination of the structural characteristics of the
19 interexchange market reveals that the industry is definitely not conducive
20 to tacit collusion. In a recent article I co-authored with Professor John W.
21 Mayo, I evaluated the structural and behavioral characteristics of the
22 interexchange industry to determine the prospect for tacit collusion.

1 There, we describe at least seven structural factors that tend to impair the
2 prospects for tacit collusion in this market:

- 3 [1] The market is characterized by low barriers to entry;
- 4 [2] The market is characterized by substantial spare capacity;
- 5 [3] The market shares of the largest firms are highly disparate;
- 6 [4] The market is characterized by a relatively complex price
7 structure;
- 8 [5] The market is characterized by rapid product innovation;
- 9 [6] The market is characterized by a highly skewed distribution
10 of demand; and
- 11 [7] The market is characterized by a very large number of
12 competitors.

13 Attachment DLK-2 (pp. 15-18) describes in specific detail how each of
14 these structural characteristics of the market act to deter the prospects for
15 tacit collusion.

16

17 Additionally, an examination of the behavioral characteristics of the
18 industry provides equally compelling evidence that tacit collusion is not
19 present in the interexchange industry. Specifically, at least four aspects of
20 observed conduct and performance in the interexchange marketplace are
21 inconsistent with the claim that tacit collusion is occurring in this market:

- 1 [1] The downward trend in prices (both gross and net of access
2 charges) over the past dozen years;
- 3 [2] AT&T's market share has exhibited marked instability over
4 time;
- 5 [3] The presence of aggressive advertising and marketing
6 campaigns of the various long-distance firms; and
- 7 [4] The consistent propensity and willingness of interexchange
8 competitors to expand output.

9 Exhibit DLK-2 (pp. 18-20) explains in detail why each of these behavioral
10 characteristics of the market are inconsistent with the conclusion that
11 interexchange firms are engaged in tacit collusion.

12

13 Q. DO RECENT INCREASES IN THE BASIC TARIFFED RATES
14 CHARGED BY AT&T, MCI, AND OTHERS TEND TO SUPPORT THE
15 HYPOTHESIS OF TACIT COLLUSION IN INTERLATA TOLL
16 MARKET?

17 A. No. Typical RBOC arguments characterize increases in tariffed rates
18 which occur contemporaneously as tacit collusion. This characterization is
19 incorrect on several grounds. First, firms in competition with one another
20 operate in a common environment and therefore face similar changes in
21 costs, demands, and the like. It would be incredible if the timing and
22 directions of price changes were unrelated among firms.

1 Second, the widespread use of lower priced calling plans makes any
2 analysis based on "standard" rates suspect. In fact, average rates per
3 minute paid for long-distance services have continuously declined for
4 many years.

5
6 Third, customers who use undiscounted tariffed rates are often very low
7 volume users. Further, these basic schedule rates do not recover even
8 direct costs for some low volume users.¹⁸ Therefore, changes in some
9 tariffs are probably best viewed as one facet of a broad movement in rate
10 restructuring that predominantly leads to price reductions but may result in
11 some prices (which were below costs under regulation) increasing.

12
13 Additionally, and most importantly, claims of tacit collusion by the long
14 distance carriers are unbelievable when the scope of the alleged conspiracy
15 is examined in detail. Since deregulation, large users have enjoyed huge
16 reductions in per minute costs of long- distance services. Small users have
17 enjoyed smaller reductions than large users but still pay substantially less.
18 RBOC analysts typically focus on a narrow class of tariffs over a specific
19 time period (usually, since 1989 or 1991). Accepting this approach, one is
20 forced to conclude that, if the major IXCs collude, then they do so in a
21 relatively small, unprofitable market segment while competing more
22 intensely in larger, higher revenue venues. For example, in 1996, MCI

1 obtained less than 4% of its total revenues from residential callers using
2 undiscounted calling plans. It would be simply nonsensical for a firm to
3 collude on such a small portion of its overall business while competing
4 aggressively on the remainder.

5

6 Q. THE RBOCS CLAIM THAT MOST CUSTOMERS DO NOT QUALIFY
7 FOR DISCOUNT PLANS AND, CONSEQUENTLY, ARE NOT
8 BENEFICIARIES OF INTEREXCHANGE COMPANY RIVALRY. IS
9 THIS ALLEGATION CORRECT?

10 A. No. While the RBOCs have portrayed competition as only benefitting the
11 larger long- distance customers, the vast majority of customers have
12 benefitted from the intense rivalry among the long-distance carriers.
13 Competition has led to an explosion of new services for residential and
14 small business customers, improvement in the technical quality of service,
15 improved customer service, and prices that more accurately reflect cost
16 than at any other time in the post-divestiture era.

17

18 Moreover, it is a gross mischaracterization of the facts for the RBOCs to
19 allege that residential and small business customers are not able to take
20 advantage of the rivalry that exists for larger customers. Television,
21 newspaper and other forms of solicitations are frequently targeted at
22 exactly these customer groups. The result is that for any consumer willing

1 to engage in a modest amount of shopping, very attractive -- discounted --
2 rates are available for long-distance consumers even if they are not high
3 volume customers.

4

5 Q. THE RBOCS HAVE ALSO CHARGED THAT THE LONG-DISTANCE
6 MARKET EVIDENCES PRICE LEADERSHIP AND, THUS, THAT IT
7 MUST NOT BE COMPETITIVE. HOW DO YOU RESPOND TO THIS
8 CLAIM?

9 A. It is important to recognize at the outset that prices charged by rival firms
10 routinely move together in competitive markets. Indeed, a high
11 correlation among the prices charged by rivals is an indication that
12 consumers view the services provided by these firms as close substitutes.
13 Thus, the claim of "price leadership" requires far more specification if one
14 is to take seriously the allegation that contemporaneous (or nearly
15 contemporaneous) price changes signal less than competitive performance.

16

17 Economic analysis has revealed that price leadership is a routine practice
18 in the U.S. economy and comes in several, generally innocuous, forms.
19 For example, "barometric price leadership" occurs when a single firm that
20 happens to be adept at reading market conditions calls out a price and
21 other industry members routinely follow that price. This "price
22 leadership" is thought to occur, for instance, in the automobile industry.

1 The "followership" behavior of some industry participants in the case of
2 barometric price leadership, however, is not in any sense anticompetitive
3 and will continue only so long as the "leader" firm's prices remain an
4 accurate bellwether of market conditions. "Follower" firms will surely
5 depart from the price called out by the "leader" should they see any profit
6 opportunity from doing so.

7

8 Other types of price leadership are similarly innocuous.¹⁹ It is for this
9 reason that the United States Supreme Court established that a pattern of
10 one firm calling out a price while others (in a temporal sense) follow that
11 price is not evidence of anticompetitive behavior:

12 the most that can be said as to this, is that many of its competitors
13 have been accustomed, independently and as a matter of business
14 expediency, to follow approximately the prices at which it has sold
15 ... [its products]. ... *And the fact that competitors may see proper,*
16 *in the exercise of their own judgment, to follow the prices of*
17 *another manufacturer, does not establish any suppression of*
18 *competition or show any sinister domination. United States v.*
19 *International Harvester Co., 274 U.S. 693, 708-709 (1927)*
20 (emphasis added).

21

1 Only where price leadership promotes collusive, monopolistic prices does
2 this practice cause any anticompetitive concern. Yet, as I discussed
3 earlier, numerous structural and behavioral factors in the interexchange
4 industry indicate that collusive price leadership is not present in this
5 industry.²⁰ Thus, the RBOCs' claims that the observed "price leadership"
6 (really, just a correlation of price movements over time) is inconsistent
7 with competitive market performance is completely unfounded.

8

9 Q. TAKEN TOGETHER, WHAT DOES THE ABOVE BODY OF
10 EVIDENCE INDICATE ABOUT THE LEVEL OF COMPETITION IN
11 THE INTERLATA MARKET?

12 A. Together, this body of evidence unequivocally demonstrates the presence
13 of effective competition in this market. Consumers have benefitted
14 tremendously from declining prices, expanded service offerings, and
15 increased choices resulting from the intense rivalry that permeates that
16 market. As a result, entry by the RBOCs is unlikely to improve
17 performance significantly in this market. Indeed, if these firms possess
18 substantial monopoly power in local exchange markets, such entry is
19 likely to diminish competition.

20

21 **III. COMPETITIVENESS OF LOCAL EXCHANGE MARKETS**

22

1 Q. WHAT IS MR. VARNER'S POSITION REGARDING THE QUESTION
2 OF THE COMPETITIVENESS OF LOCAL EXCHANGE MARKETS
3 IN FLORIDA?

4 A. Mr. Varner apparently believes that the issue of the intensity of
5 competition in local exchange markets is irrelevant to Section 271
6 deliberations. For example, on pages 31-32 of his testimony, Mr. Varner
7 writes:

8 "Thus it is clear that Congress debated and explicitly decided to
9 exclude a specific level of local competition as being a requirement
10 for interLATA entry."

11 And on page 33, he concludes that:

12 "...BellSouth does not believe the level of local competition should
13 be a consideration."

14

15 Q. DO YOU AGREE WITH MR. VARNER'S POSITION ON THIS
16 ISSUE?

17 A. No. If Mr. Varner is offering strictly a legal opinion of the requirements
18 of the Telecommunications Act, I am not qualified to respond. I am not an
19 attorney and will not proffer a legal opinion on this issue.

20

1 As an economist, however, I must say that whether such reintegration is
2 likely to have the beneficial effect claimed by Mr. Varner hinges crucially
3 upon the intensity of competition in the affected local exchange markets.

4

5 Q. ARE LOCAL EXCHANGE MARKETS IN FLORIDA SUBJECT TO
6 EFFECTIVE COMPETITION ACCORDING TO STANDARDS
7 GENERALLY ACCEPTED IN ECONOMIC ANALYSIS?

8 A. No. These markets exhibit monopoly or near monopoly conditions.
9 Application of the same criteria discussed above -- the elasticity of other
10 firms' supply, market shares, and conditions of demand -- reveals that
11 these local exchange markets are very far from effective competition.
12 Further, and perversely, the speed at which effective competition can be
13 expected to emerge in these markets depends critically upon the behavior
14 of BellSouth and the response of regulatory authorities to this behavior.
15
16 Specifically, new firms entering local exchange markets in Florida will, in
17 all likelihood, be dependent upon the cooperation of BellSouth and other
18 local exchange companies in providing unbundled network elements,
19 interconnection, and wholesale services for some time to come.
20 BellSouth, in turn, has strong economic incentives to impede such entry to
21 preserve its monopoly position. As a result, a heavy burden falls upon the
22 regulatory agency to vigorously implement and enforce the provisions of

1 the Telecommunications Act to ensure, to the extent possible, that such
2 entry-forestalling tactics do not succeed.

3

4 Q. WHAT ARE THE RELEVANT PRODUCTS AND SERVICES
5 INCLUDED IN THE CATEGORY OF THE "LOCAL
6 TELECOMMUNICATIONS MARKET"?

7 A. Although we often speak of the "local market," it is more accurate
8 economically to view this portion of the industry as being segmented into
9 (at least) three separate product markets. These markets are (1) intralata
10 toll markets; (2) the market for carrier access; and (3) the market for local
11 exchange services. The relevant barriers to entry and states of competition
12 in these three markets differ in important respects, although none is
13 presently subject to effective competition.

14

15 Q. HOW DO BARRIERS TO ENTRY AND COMPETITION VARY
16 BETWEEN THESE MARKETS?

17 A. The technical requirements for competitive provision of these critical
18 services vary significantly. The degree to which effective entry requires
19 enforced cooperation by the incumbent local exchange carriers also varies.
20 As a result, the current prospects for the emergence of competition in these
21 markets also differs greatly. Those markets where nonregulatory entry
22 barriers and the necessity of incumbent firm cooperation are lowest have

1 seen the greatest degree of competitive entry, although it is inaccurate to
2 describe any of these markets as effectively competitive today.
3 Nevertheless, these markets provide a useful object lesson in the
4 importance of barriers to entry and strategic behavior by the incumbent
5 local exchange carriers in hindering the emergence of effective
6 competition in local telecommunications markets generally.

7

8 Q. WHAT IS THE CURRENT STATE OF COMPETITION IN THESE
9 MARKETS?

10 A. The intraLATA toll market appears to be the most competitive of the three
11 markets described above. This result is unsurprising given an economic
12 evaluation of the entry conditions that characterize this market. It is
13 probable that intraLATA toll markets could become effectively
14 competitive in a very short time if: (1) equal access (i.e., intraLATA
15 presubscription) were in place (which I understand has been implemented
16 in BellSouth's territory); (2) access charges were reformed so that
17 efficient pricing of access was allowed to prevail; and (3) the RBOCs
18 could be prevented from exploiting their monopoly in local exchange
19 markets to stifle competition in intraLATA toll. The current system is
20 grossly slanted to the advantage of the incumbent carriers and has the
21 effect of stifling competition and, thereby, limiting the competitive
22 benefits realized by consumers.

1 Further, the incumbent providers of intraLATA toll have taken extensive
2 steps to slow the emergence of effective competition in this market by
3 introducing extended area service programs in response to threats of
4 competitive entry. Strategic behavior of this sort is fully consistent with
5 the view that incumbent local exchange companies are monopolies
6 seeking to hinder entry by whatever means are available.

7

8 Q. WHAT IS THE STATE OF COMPETITION IN CARRIER ACCESS
9 MARKETS IN FLORIDA?

10 A. The carrier access market is probably the second most competitive of the
11 three local exchange markets. Nonetheless, while some limited entry by
12 "competitive access providers" (CAPs) has occurred, this entry is wholly
13 ineffective in several important respects. As a result, the market for carrier
14 access remains highly concentrated and is subject to substantial market
15 power.

16

17 The market for carrier access exhibits lower barriers to entry than do local
18 exchange markets. CAPs may require connection from an interexchange
19 company's point of presence (POP) to its local exchange consumers --
20 generally large volume business customers located in relatively dense
21 urban areas. In some cases, however, they do not require interconnection
22 with the local exchange company. In general, then, the extent of

1 interconnection required by CAPs is far less than that required by new
2 entrants into the local exchange markets. Thus, for technical reasons, the
3 CAPs are likely to be somewhat less vulnerable to strategic harm from
4 ILEC's anticompetitive practices. Yet, any examination of this market on
5 economic grounds strongly implies that effective competition has yet to
6 emerge.

7

8 Q. WHAT EVIDENCE IS THERE THAT THE CAPS HAVE FAILED TO
9 ESTABLISH EFFECTIVE COMPETITION IN THE MARKETS FOR
10 CARRIER ACCESS IN FLORIDA?

11 A. There is substantial evidence of several kinds. First, the CAPs are quite
12 specialized, almost "niche" providers. They target large companies, often
13 located in large buildings. As a result, any competitive impact they may
14 wield is felt by only a small portion of the overall access market. Second,
15 CAPs overwhelmingly offer dedicated access services, which, again,
16 limits their competitive impact. Third, the CAPs are relatively small and
17 lack the capacity to offer mass marketed services that would provide most
18 consumers a realistic alternative to the incumbent local exchange
19 company.²¹

20

21 While the CAPs have provided some limited competition to the ILECs in
22 special access services and private lines, it is important to remember that

1 few, if any, residential customers have any choice in access provision:
2 they face monopoly supply conditions. It is thus highly inaccurate to
3 describe the carrier access market as competitive.

4

5 Q. IS THE CAP EXPERIENCE RELEVANT IN DETERMINING THE
6 LEVEL OF BARRIERS TO ENTRY IN THE CARRIER ACCESS AND
7 OTHER MARKETS?

8 A. Yes. Three important points concerning the CAPs' experience are worth
9 noting. First, access charges exceed the incremental costs of providing the
10 access services many times over. Thus, the economic incentive to enter
11 this market is strong. Second, despite the extraordinarily high level of
12 these access charges and the longevity of this pricing distortion, CAP
13 entry has been limited and has targeted only certain classes of users.
14 Together, these two facts unambiguously demonstrate that significant
15 nonregulatory barriers to entry exist in this market. And third, it is clear
16 that these barriers apply a fortiori to the local exchange services market.
17 That is, due to tremendous sunk costs and the need for interconnection,
18 whatever barriers to entry exist in the access market are magnified in the
19 local exchange market.

20

21 Q. DOES THE FACT THAT CARRIER ACCESS SERVICES ARE
22 PRICED FAR ABOVE ECONOMIC COSTS CARRY ANY OTHER

1 IMPLICATIONS FOR THE EMERGENCE OF COMPETITION IN
2 LOCAL EXCHANGE MARKETS?

3 A. Yes. Excessive prices for carrier access services are unwarranted on
4 economic grounds. Such prices distort market outcomes in at least two
5 dimensions. First, artificially high access charges raise the costs of
6 providing long-distance services, thereby dampening consumption in that
7 market. Moreover, these artificially inflated prices for toll services have,
8 no doubt, discouraged new and innovative uses of the long-distance
9 network over time. The economic (social welfare) costs of this distortion
10 have been quite substantial.

11
12 Second, and perhaps more important, is the potential damage that
13 excessive access charges can do to the emergence of competition in
14 local exchange markets. These charges provide ILECs a source of
15 excess revenues that can be used to subsidize anticompetitive
16 practices of various sorts -- e.g., underpricing of intraLATA toll,
17 extended area calling plans, and below-cost pricing of certain local
18 exchange services. Cross-subsidization is the enemy of
19 competition, and carrier access charges are currently providing the
20 major source of the revenues required for such cross-subsidies. As
21 a result, it is unlikely that effective competition will arise

1 throughout local exchange markets until these charges are lowered
2 to cost.

3
4 Additionally, if the RBOCs are allowed to reenter the interLATA
5 market while continuing to receive excess profits from the sale of
6 access services, the potential for monopoly leveraging behavior
7 will be expanded significantly. Therefore, access charge reform
8 (i.e., lowering carrier access charges to their relevant economic
9 costs) becomes an integral part of the overall process of promoting
10 competition throughout telecommunications markets.

11

12 Q. ARE LOCAL EXCHANGE SERVICE MARKETS IN FLORIDA
13 COMPETITIVE?

14 A. No, these markets are the least competitive of all. For residential
15 consumers, choice is, for all practical purposes, nonexistent. Incumbent
16 carrier market shares in local exchange services are generally well above
17 monopoly levels for antitrust purposes. Indeed, in many local exchange
18 markets, they are at or near 100 percent. Also, entry barriers are
19 sufficiently high to allow monopolistic pricing without a substantial threat
20 of response from potential competitors. Thus, the same criteria applied to
21 the interLATA market earlier in this testimony clearly reveal the presence
22 of substantial monopoly power in local exchange markets.

1 Q. WHY ARE LOCAL EXCHANGE SERVICE MARKETS SO HIGHLY
2 CONCENTRATED?

3 A. There are several reasons. First, and most importantly, competitive entry
4 into these markets requires an extremely high level of cooperation by
5 BellSouth. The Telecommunications Act of 1996 and FCC orders
6 explicitly recognize this state of affairs. The Act places extensive and
7 detailed obligations on the ILECs in the areas of sales of unbundled
8 network elements, their pricing and provision, determination of wholesale
9 discounts, conditions of interconnection, etc.

10

11 These obligations were written into this law because it is abundantly clear
12 that competition in local services can only arise if incumbents such as
13 BellSouth can be forced to refrain from anticompetitive practices.

14 Unfortunately, competition in these markets is not in the incumbents'
15 economic interest. Unsurprisingly, they wish to maintain their monopoly
16 status. Potential entrants, then, are placed in the unenviable position of
17 being forced to rely upon the cooperation of another party who has every
18 incentive to be uncooperative. And regulators are placed in the equally
19 unenviable position of trying to enforce that cooperation.

20

21 Cost conditions and investment requirements also severely limit entry into
22 local exchange services markets, particularly on a facilities-based basis. A

1 substantial portion of local exchange investment appears to represent sunk
2 costs. Moreover, the dominant position that BellSouth holds interacts with
3 these cost conditions and investment requirements to discourage entry. In
4 particular, the high capital costs requirements of facilities-based entry
5 (virtually all of which are sunk) become particularly prohibitive if
6 BellSouth is expected to engage in post-entry strategic anticompetitive
7 practices.

8
9 The role of sunk, or unrecoverable, costs attendant on entry in stifling
10 competition is made worse by the promulgation of high “nonrecurring
11 charges” (NRCs) for certain unbundled network elements. These charges,
12 which should be based solely on the minimal, forward looking costs of
13 provision, represent substantial sunk investments for new entrants. They
14 are entirely sunk upon entry. As a result, they represent an entry barrier
15 for firms attempting to enter through the purchase of unbundled network
16 elements.

17
18 Finally, certain local exchange rates may incorporate subsidies (funded by
19 excessive access charges). If they do, entry is further discouraged. The
20 level and nature of these subsidies, however, are uncertain at this time.

21

1 Q. IF LOCAL EXCHANGE MARKETS IN FLORIDA ARE NOT
2 EFFECTIVELY COMPETITIVE, ARE THEY "OPEN TO
3 COMPETITION"?

4 A. The distinction between effective competition and "openness to
5 competition" is driven primarily by the desire of some ILECs, such as
6 BellSouth, to enter in-region interLATA toll markets while still retaining
7 local exchange monopolies. While "open to competition" has no precise
8 economic meaning, the closest related concepts are market "contestability"
9 and low barriers to entry. A market with no sunk cost of entry, that further
10 allows for very rapid entry and zero-cost exit, is called "contestable." In
11 such a rarefied market, potential competition would play the same role as
12 actual competition, limiting the exercise of market power even if the
13 incumbent is a monopoly.

14
15 It is clear that local exchange markets in Florida are neither effectively
16 competitive nor contestable. High entry barriers and significant sunk costs
17 have severely limited entry in most important market segments. Retail-
18 stage entry alone can never impose constraints on BellSouth remotely
19 similar to those provided by effective competition or contestability. The
20 experience of CAP entry, discussed above, is strong evidence of
21 significant nonregulatory entry barriers.

22

1 If, on the other hand, by the term "open to competition" Mr. Varner
2 simply means that regulatory barriers to entry have been removed and pro
3 forma satisfaction of checklist items has been achieved, then the term is
4 economically empty. Consumers cannot benefit from competition that is
5 legally open but economically closed.

6
7 Thus, the argument that BellSouth has opened its markets to competition
8 because it has satisfied the "competitive checklist" and should, therefore,
9 be allowed to enter in-region interLATA toll markets while maintaining its
10 local monopoly position is a purely legal claim - it has no economic
11 content.

12
13 Q. CAN YOU SUMMARIZE YOUR DISCUSSION OF THE STATE OF
14 COMPETITION IN LOCAL EXCHANGE TELECOMMUNICATIONS
15 MARKETS?

16 A. Yes. Local telecommunications services are best viewed as segmented
17 into (at least) three distinct product markets: intraLATA toll, carrier
18 access, and local exchange services. While none of these markets is
19 highly competitive, intraLATA toll is potentially competitive given equal
20 access, access charge reforms and effective restraint of monopoly
21 leveraging behavior. Carrier access and local exchange service markets
22 are, however, quite concentrated, with BellSouth holding near monopoly

1 or monopoly positions. Moreover, these high levels of concentration are
2 exacerbated by the presence of substantial barriers to entry. And,
3 perversely, competition in the latter market requires cooperation by
4 BellSouth via reasonable interconnection agreements, efficient pricing and
5 provisioning of unbundled network elements, wholesale services, and the
6 like. Until sufficient facilities-based entry occurs to erode the dominant
7 position that BellSouth now holds, this firm will continue to possess
8 substantial monopoly power in both the access and local exchange
9 markets.

10
11 Therefore, regulation has a critical role to play in facilitating competitive
12 entry into these important markets. In the absence of some regulatory
13 mechanism to oversee the practices of BellSouth, one cannot credibly
14 expect that the elimination of regulatory barriers to entry by itself will
15 produce entry sufficient to render these markets effectively competitive.
16 There are significant nonregulatory barriers to entry, as the dearth of CAP
17 capacity in the face of exorbitant access fees shows. To fulfill the promise
18 of competition in local exchange telecommunications markets, pro-
19 competitive policies are and will continue to be required.

20
21 IV. THE LIKELY CONSEQUENCES OF BELL SOUTH REINTEGRATION

22 AT THIS TIME

1 Q. WHAT CONCLUSIONS CAN YOU DRAW FROM THE PRECEDING
2 SECTIONS OF YOUR TESTIMONY?

3 A. Two important conclusions flow from the analysis presented above:

4 [1] The interLATA market is subject to effective competition;
5 and

6 [2] Local exchange markets are subject to substantial
7 monopoly power.

8 These conclusions are strongly supported by both economic theory and
9 empirical evidence.

10

11 Q. GIVEN THESE CONCLUSIONS, WHAT ARE THE LIKELY
12 CONSEQUENCES OF ALLOWING BELLSOUTH TO REINTEGRATE
13 INTO THE IN-REGION INTERLATA MARKET IN FLORIDA AT
14 THIS TIME?

15 A. If RBOCs such as BellSouth are permitted to reintegrate into the
16 interLATA market before effective competition (i.e., the absence of
17 significant monopoly power) emerges in the local exchange market,
18 incentives for monopoly leveraging emerge. In addition, once permitted
19 into the interLATA market, BellSouth will cease even the minimal efforts
20 that have been exhibited so far to treat interexchange sellers as customers
21 whose interests they have no incentive to harm. Rather, BellSouth will

1 view interexchange firms as competitors that they seek to displace in the
2 market.

3
4 The normal desire to displace competitors is an inherent and typically
5 healthy effect of competition. If the RBOCs retain significant monopoly
6 power, however, this incentive to displace rivals is perverted and is likely
7 to manifest itself in an anticompetitive fashion. In this situation, then,
8 reintegration by BellSouth prior to the eclipse of significant monopoly
9 power in its local exchange markets will erode rather than promote
10 competition in both the interLATA market and the local exchange market.
11 Such an effect is clearly not in the interest of consumers.

12
13 In considering the dangers of the premature reintegration of BellSouth into
14 the interLATA market, it is perhaps apt to recall the adage that "Those
15 who forget history are destined to repeat it." The problems presented by
16 having a firm with monopoly control of bottleneck facilities competing
17 with unintegrated rivals in adjacent markets were thoroughly documented
18 in the antitrust suits brought by both the Department of Justice and by
19 MCI against the Bell System companies in the 1970s.²²

20
21 While some RBOCs have claimed that local exchange is no longer subject
22 to the significant monopoly power that gave rise to these abuses, a close

1 examination of the status of competition in local exchange markets today
2 reveals otherwise. Moreover, the RBOCs have already demonstrated a
3 propensity to engage in anticompetitive actions designed to maintain,
4 extend, and exploit their significant monopoly power in the post-
5 divestiture period. Such activities fall within the general description of
6 monopoly leveraging.

7

8 Q. IS THERE ANY POST-DIVESTITURE EVIDENCE THAT
9 MONOPOLY LEVERAGING IS LIKELY TO OCCUR IN THIS
10 INDUSTRY?

11 A. Yes. Divestiture removed the incentive for the RBOCs to engage in
12 monopoly leveraging behavior with respect to the interLATA market, and
13 this judicial alteration of the industry's structure has greatly aided the
14 emergence of healthy competition in that market. On subsequent
15 occasions, however, the RBOCs have engaged in practices designed to
16 forestall competition in areas where competitive rivalry has had the
17 potential to develop. Examples of such behavior abound and are growing
18 rapidly as competitive threats increase.

19

20 The case of Great Western Directories v. S. W. Bell Telephone is
21 exemplary of the anticompetitive actions that are likely to arise with
22 premature reintegration. This case arose when two independent publishers

1 of yellow pages (Great Western and Canyon), who were operating in
2 Texas and Oklahoma, charged that Southwestern Bell (SWB) had
3 orchestrated an affiliation-wide concerted action "to extend the SWB
4 monopoly of the yellow pages market and to eliminate competition by
5 raising the costs of doing business as an independent directory ..."
6 Specifically, Great Western and Canyon charged that SWB had violated
7 Section 2 of the Sherman Act by "abusing an essential facility and through
8 market leveraging."

9
10 The jury in this case found that:

- 11 [1] SWB had monopolized and attempted to monopolize the
12 alleged relevant markets ... by denying reasonable access to
13 an essential facility;
- 14 [2] SWB monopolized the same alleged markets by leveraging
15 monopoly power; and
- 16 [3] SWB attempted to monopolize the alleged markets by
17 increasing the price of the essential facility while at the
18 same time substantially reducing [advertising] rates.²³

19
20 This case of anticompetitive behavior on the part of SWB stems directly
21 from the possession of significant monopoly power at one stage in the
22 vertical structure of the industry. The underlying economics closely

1 parallel the situation of a prematurely reintegrated RBOC and should,
2 therefore, give pause to any prudent policymaker who is contemplating the
3 risks of anticompetitive behavior in the event of reintegration prior to the
4 development of effective competition in local exchange markets.

5
6 In another case, Pacific Bell was ordered to open its intraLATA toll
7 market to 10-XXX competition in California. In the wake of the
8 California Commission's mandate to open this market to competition -- a
9 step opposed by the RBOC -- Pacific refused to permit customers to avail
10 themselves of an automatic routing feature that would have resulted in
11 intraLATA traffic being directed to their new competitors. A challenge to
12 this anticompetitive practice led to a preliminary injunction hearing. The
13 California Public Utilities Commission concluded that "Pacific is
14 attempting to maintain a monopoly in the intraLATA market by the means
15 of such refusal to serve."²⁴

16
17 Collectively, these and other actions like them demonstrate that the
18 RBOCs are motivated and willing to engage in actions that promote their
19 narrow economic interest over the broader "public interest."²⁵ While self-
20 interested behavior is generally highly correlated with the broader social
21 interest under competitive market conditions, the possession of and desire
22 to retain significant monopoly power creates an incentive to engage in

1 actions that are in the profit maximizing self-interest of the firm but are
2 clearly counter to the broader goal of effective competition.

3

4 RBOC claims that they possess neither the incentives nor the wherewithal
5 to engage in anticompetitive practices if allowed to reintegrate at this time
6 are transparent, misleading, and self-serving. Vertical integration by a
7 regulated firm with significant monopoly power at one vertical stage
8 creates strong economic incentives for the firm to engage in
9 anticompetitive practices against its unintegrated rivals, and we have seen
10 ample evidence that these incentives can be borne out in actions despite
11 the presence of regulations designed to prevent them.

12

13 Q. YOU STATED ABOVE THAT PREMATURE REINTEGRATION BY
14 THE RBOCS WOULD REDUCE THE INTENSITY OF COMPETITION
15 NOT ONLY IN THE INTERLATA MARKET BUT IN THE LOCAL
16 EXCHANGE MARKET AS WELL. CAN YOU EXPLAIN HOW THIS
17 LATTER MARKET IS AFFECTED BY SUCH EARLY
18 REINTEGRATION?

19 A. Yes. Under the terms of the divestiture agreement, the only incentive the
20 RBOCs had to facilitate the emergence of effective competition within
21 their local exchange markets was the promise of being allowed to reenter
22 the (now competitive) long-distance market. In itself, that promise did not

1 provide much incentive. In effect, under Section VIII.C of the MFJ, the
2 RBOCs were presented the following offer:

3 If you will relinquish your monopoly over the local exchange
4 market, you will be allowed to reenter the competitive
5 interexchange market.

6
7 It is little wonder that that offer was not accepted. Abrogation of
8 monopoly in return for permission to enter a competitive market is a
9 distinctly bad deal.

10
11 Under the terms of the Telecommunications Act of 1996, that same basic
12 offer remains in place, with one very important difference. Specifically,
13 Sections 251 and 252 of the Act create policies designed to facilitate entry
14 by interexchange carriers and others into local exchange markets on both a
15 facilities-based and resale basis. As such entry unfolds, the RBOCs' new
16 competitors will, for the first time since divestiture, be able to offer
17 customers bundled service packages containing both local and long-
18 distance services. It is widely believed that consumers will place
19 considerable value on the convenience of having a single firm provide the
20 full range of their telecommunications needs. Some preliminary empirical
21 evidence suggests and many industry observers believe that firms that are
22 unable or unwilling to offer service bundles including, at a minimum, both

1 local and long-distance calling will suffer a significant handicap in
2 competing for customers' patronage in this new environment.²⁶

3
4 As a result, successful entry into local exchange markets will greatly
5 intensify the incentives for the RBOCs to reenter long distance so that
6 they, too, can provide the bundled service offerings valued by consumers.
7 In effect, the wilted and unappetizing carrot offered by Section VIII.C of
8 the MFJ will be transformed into a large and powerful stick with the local
9 exchange entry envisioned under the Act. With such entry, the RBOCs
10 will feel considerable pressure to facilitate whatever level of competition
11 is required under Section 271 to permit their own reintegration.

12
13 If that reintegration is allowed to proceed without first experiencing
14 sufficient entry into local exchange markets, however, that incentive to
15 facilitate competition will be lost. In fact, with reintegration, the RBOCs'
16 incentive to maintain their monopoly positions in local exchange markets
17 will be heightened as profitable opportunities to circumvent the constraints
18 provided by regulation will be created thereby. Therefore, premature
19 reintegration -- viz., reintegration that is allowed to occur before local
20 exchange markets are subject to effective competition -- will jeopardize
21 competition in both the long-distance and local exchange markets.
22 Consumers will be doubly harmed if such reintegration is allowed to

1 occur. The benefits of competition will be denied or postponed in both
2 markets.

3

4

V. OTHER ISSUES

5

6 Q. ON PAGE 63 OF HIS TESTIMONY, MR. VARNER ARGUES THAT
7 ALLOWING BELLSOUTH TO ENTER THE IN-REGION INTERLATA
8 MARKET WILL YIELD SUBSTANTIAL CONSUMER BENEFITS BY
9 PERMITTING BUNDLED SERVICE OFFERINGS. DO YOU AGREE
10 WITH THIS ARGUMENT?

11 A. No. On the contrary, the existence of a demand for bundled service by the
12 public, if true, highlights an important asymmetry between IXC's
13 integrating into the local market, and the local monopoly integrating into
14 interLATA toll. If the ILEC becomes a long-distance provider while
15 maintaining its local monopoly status, it automatically becomes the
16 monopoly provider of the bundled service. To the extent it can, it then
17 extracts the maximum amount of these bundle-created benefits from
18 consumers through its packaged service pricing and other means.

19

20 In contrast, the IXC's are not monopolies in any market. As a result, entry
21 by IXC's into local service will assure that consumers, rather than
22 producers, receive the full benefits created by offering bundled services. If

1 these bundling benefits exist, then, they should be made available to
2 consumers. Like any product, however, consumers will realize the full
3 benefits only if the good is competitively provided, not offered by a
4 monopoly.

5
6 Besides the very different consequences of bundled service provision by
7 competitive firms and monopolies, another important asymmetry exists
8 with regard to BellSouth entry into interLATA toll markets and IXC entry
9 into local markets. Unlike local markets, the long-distance market
10 exhibits full equal access and a very level playing field, benefitting
11 entrants. In contrast, entry into many local markets confronts the potential
12 competitor with a host of technical and operational difficulties. As a result
13 of these asymmetries, it is absolutely crucial that local exchange
14 competition precede RBOC in-region interLATA entry.

15
16 Q. AT PAGE 57 OF HIS TESTIMONY, MR. VARNER ARGUES THAT
17 REGULATORY AND JUDICIAL MECHANISMS EXIST AND ARE
18 ADEQUATE "...TO ENSURE THAT NO HARM RESULTS TO THE
19 PUBLIC OR COMPETITION." ARE SUCH REGULATORY
20 CONTROLS LIKELY TO SUCCESSFULLY RESOLVE CONCERNS
21 ABOUT MONOPOLY LEVERAGING BY A REINTEGRATED
22 BELLSOUTH?

1 A. No, they are not. If BellSouth were allowed, at this time, to reintegrate
2 into inregion interLATA markets, circumstances quite similar (if not
3 identical) to those associated with anticompetitive behavior in the
4 preinvestiture environment would arise again. History clearly reveals that
5 regulation was incapable of preventing monopoly leveraging behavior in
6 that environment. Further, entrepreneurial ingenuity can often find a way
7 around regulatory initiatives aimed at moderating anticompetitive actions.

8
9 The structural separation imposed on the then integrated Bell System by
10 the MFJ was, in large measure, a response to the extreme difficulty
11 oversight authorities had in policing anticompetitive actions by Bell.²⁷
12 Actions by the Bell System prior to the MFJ ran the gamut from
13 traditional leveraging strategies to outright refusals to deal. In his opinion,
14 Judge Green noted that,

15 “the testimony and documentary evidence adduced by the
16 government demonstrate that the Bell System has violated antitrust
17 laws in a number of ways over a lengthy period of time.”²⁸

18
19 Recent actions by some RBOCs raise similar concerns. A rather extensive
20 discussion of such cases is offered by Professors Bernheim and Willig.²⁹
21

1 Q. CAN REGULATORY MECHANISMS SUCH AS PRICE CAPS AND
2 IMPUTATION TESTS PREVENT LEVERAGING?

3 A. No. They may combat leveraging, but they are unlikely to win the war. If
4 regulatory mechanisms such as imputation tests worked perfectly, they
5 could presumably prevent some limited forms of leveraging. The
6 difficulty, though, is that, in practice, such procedures are far from perfect.
7 As the economist Walter Oi observed, "...the imagination of the greedy
8 entrepreneur outstrips the analytic ability of the economist."³⁰ The
9 inability of regulation (or economists) to "keep up" with the ingenuity of
10 the regulated firm is the defining rationale for the entire deregulatory
11 movement. The history of telecommunications itself provides a stellar
12 example. Yet, history also shows that competition can do what regulation
13 cannot. Competition is, by far, the best regulator.

14
15 Q. AT PAGE 59 OF HIS TESTIMONY, MR. VARNER ARGUES THAT,
16 BECAUSE BELLSOUTH IS SUBJECT TO PRICE-CAP REGULATION
17 IN FLORIDA, IT "...WOULD THEREFORE NOT HAVE AN
18 INCENTIVE TO IMPROPERLY ALLOCATE COSTS." IS THIS
19 ARGUMENT ECONOMICALLY VALID?

20 A. This argument would only be valid if two necessary conditions were met.
21 First, only if BellSouth were subjected to price-cap regulation in its purest
22 form would the link between its maximum prices and its costs be broken.

1 That is, the price caps would have to be set once and never be readjusted
2 to bring them back into alignment with costs.

3
4 That, however, is not how price caps actually work in practice. Observed
5 price-cap plans frequently provide for periodic true-ups of the applicable
6 caps to the company's costs. As a result, real world price caps tend to
7 work much more like traditional rate-of-return regulation with a fixed
8 regulatory lag. Consequently, contrary to Mr. Varner's assertion,
9 incentives for strategic cost misallocations remain.

10
11 More importantly, even in the absence of periodic true-ups, pure price-cap
12 regulation would still fail to eliminate incentives for cross-subsidization
13 through cost misallocation in situations where the regulated firm faces the
14 threat of competitive entry into some of its markets. That is, Mr. Varner's
15 argument would hold only under a franchised, entry-protected monopoly.
16 In an environment where public policy decisions are aimed at fostering
17 emerging competition, the argument is invalid. Here, the regulated firm
18 will have incentives to misallocate costs -- not to increase its rate base but,
19 rather, to preserve its monopoly position. For both of these reasons, Mr.
20 Varner's argument fails.

21 VII. SUMMARY OF TESTIMONY

22 Q. WOULD YOU PLEASE SUMMARIZE YOUR TESTIMONY?

1 A. Yes. In my opinion, reintegration by Bell South into the interLATA toll
2 market in Florida at the present time is unwarranted and premature. It is
3 unwarranted because the consumer benefits that the Company claims will
4 flow from such reintegration are lacking. Specifically, the interLATA
5 market is already subject to effective competition. As a result, the
6 addition of another competitor, even one as large as BellSouth, is unlikely
7 to alter performance in this market perceptibly.

8

9 Moreover, reintegration is premature, because, as is plainly evident from
10 even a superficial examination of local exchange markets, BellSouth
11 retains significant monopoly power in the provision of local exchange and
12 access services. In fact, competition in the market for switched local
13 exchange services in Florida is virtually nonexistent at the present time.
14 Consequently, reintegration by this firm raises the specter of monopoly
15 leveraging behavior, which will result in a lessening of competition in the
16 long-distance market. Also, by allowing premature reintegration, any
17 incentive that BellSouth might have to facilitate the growth of competition
18 in its local exchange markets (or even to acquiesce to the growth of such
19 competition) will be lost. As a result, competition in these latter markets
20 will also be harmed by reintegration at this time. Accordingly,
21 reintegration by BellSouth into the interLATA market is likely to harm

1 competition in both markets. Therefore, BellSouth's 271 application
2 should be denied.

1. These firms had been excluded from that market under the terms of the settlement reached in the AT&T divestiture case. See United States v. American Tel. & Tel. Co., 552 F. Supp. 131 (D.D.C. 1982). Specifically, under Section VIII.C of the Modified Final Judgment issued in that case, the RBOCs were proscribed from reintegrating into interLATA long distance until they could demonstrate to the satisfaction of the Court that they would be unable to use their ownership of local exchange facilities for anticompetitive purposes in that market.
2. Reintegration into the provision of long-distance services outside the RBOC's certificated region is permitted immediately under the Act without any substantive preconditions.
3. In the Matter of Implementation of the Local Competition Provisions in the Telecommunications Act of 1996, First Report and Order, at pp 218, 312-316 (August 8, 1996).
4. Apparently, Mr. Varner agrees that the state of competition in Florida's telecommunications market is relevant to this decision. On pages 3-4 of his testimony, he writes that
 "It is also important for the Commission to assess the current market conditions existing in Florida. This assessment will assist this Commission in consulting with the FCC as to whether BellSouth has met the requirements of Section 271(c)(1)(A)('Track A') or Section 271(c)(1)(B)('Track B')."

14. Id. at ¶ 62.
15. Id. at ¶ 64.
16. Id. at ¶ 72 (emphasis added).
17. Policies and Rules Concerning the Interstate, Interexchange Market, CC Docket No. 96-61, Second Report and Order, FCC 96-424, pp 21, 22, October 31, 1996.
18. Ex Parte Presentation in Support of AT&T's Motion for Reclassification as a Non-Dominant Carrier, CC Docket No. 79-252, April 24, 1995.
19. See, e.g., the discussion of "low-cost price leadership" found in David L. Kaserman and John W. Mayo Government and Business: The Economics of Antitrust and Regulation, Dryden Press, 1995, pp. 199-200.
20. Indeed, given the numerous times that product innovations, marketing and promotional plans have been initiated by someone other than AT&T, it is not at all clear that AT&T is most accurately described as the industry "leader." Consider, for instance, the well-documented blow rendered to AT&T by the introduction of MCI's Friends and Family Program or, more recently, the introduction of Sprint Sense.
21. See Bernheim and Willig, *supra*, Note 9.
22. MCI Communications v. American Telephone and Telegraph Company, 708 F. 2d 1081 (1983); and United States v. American Tel. & Tel. Corp., 552 F. Supp. 131 (D.D.C. 1982), *aff'd sub nom. Maryland v. United States*, 460 U.S. 1001 (1983).
23. A judgment was entered consistent with this verdict, which has been affirmed by the U.S. Fifth Circuit. Great Western Directories v. S. W. Bell Telephone, 63 F.3d 1378 (5th Cir. 1995).
24. See MCI Telecommunications Corp. v. Pacific Bell, Decision No. 95-05-020 (1995 Cal. PUC LEXIS 458).

25. Additional examples of anticompetitive conduct on the part of the RBOCs are discussed by Douglas Bernheim and Robert D. Willig, *supra*, Note 9.
26. Using survey data from Japan, Timothy J. Tardiff, "Effects of Presubscription and Other Attributes on Long-Distance Carrier Choice," Information Economics and Policy, Vol. 7 (1995), pp. 353-366, presents evidence of a price advantage of approximately 14 percent resulting from the ability to bundle local and long-distance calling. Other services that potentially may be bundled with local and long distance include cellular, internet, and video services.
