COMPETITIVE TELECOMMUNICATIONS SERVICE TARIFF

TARIFF FORMAT

A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

B. Sheet Revision Numbers - Revision numbers appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Florida Public Service Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the Florida Public Service Commission follows in its tariff approval process, the most current sheet number on file with the Commission is not always the tariff in effect. Consult the Check Sheet for the sheet currently in effect.

C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

2.
2.1
2.1.1
2.1.1.A.
2.1.1.A.1.
2.1.1.A.1.(a)
2.1.1.A.1.(a).I.
2.1.1.A.1.(a).I.(i).
2.1.1.A.1.(a).I.(i).(1)

D. Check Sheets - When a tariff filing is made with the Florida Public Service Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The tariff user should refer to the latest Check Sheet to find out if a particular sheet is the most current on file with the Florida Public Service Commission.

The call completion rate is calculated as the number of calls completed (including calls completed to a busy line or to a line which remains unanswered by the called party) divided by the number of calls attempted.

SECTION 3 - DESCRIPTION OF SERVICE, (CONT'D)**3.2 Calculation of Distance**

Usage charges for all mileage sensitive products are based on the airline distance between the Rate Centers associated with the originating and terminating points of the call.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the Rate Centers as defined by BellCore (Bell Communications Research), in the following manner:

- Step 1** - Obtain the "V" and "H" coordinates for the Rate Center of the originating and the destination points.
- Step 2** - Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the difference between the "H" coordinates.
- Step 3** - Square the differences obtained in Step 2.
- Step 4** - Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5** - Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6** - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating points of the call.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

SECTION 3 - DESCRIPTION OF SERVICE, (CONT'D)**3.3 Call Timing**

- 3.3.1 Long distance usage charges are based on the actual usage of the Company's network. Chargeable time begins when the calling and the called station are connected. Call timing is determined using industry standard methods of answer supervision, including hardware and software answer detection.
- 3.3.2 Chargeable time ends when the calling service point terminates, thereby releasing the network connection.
- 3.3.3 Unless otherwise specified in this tariff, usage is measured in one (1) minute increments for billing purposes. Partial usage will be rounded up to the next highest whole minute. All calls are rounded to the next highest billing increment. Any partial cents per call will be rounded up to the next highest cent.
- 3.3.4 Unless flat rated, usage charges are determined by the time of day rate periods and minutes of use within each rate period. The rate period is determined by the time and day of call originating at the Customer's Location.
- 3.3.5 No charges apply to unanswered calls.

3.4.2 Application of Rates
