**TARIFF FORMAT SHEETS**

**A. Sheet Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

**B. Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the FPSC. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc., the FPSC follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.

**C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

2.  
2.1.  
2.1.1.  
2.1.1.A.  
2.1.1.A.1.  
2.1.1.A.1.(a).  
2.1.1.A.1.(a).I.  
2.1.1.A.1.(a).I.(i).  
2.1.1.A.1.(a).I.(i).(1).

**D. Check Sheets** - When a tariff filing is made with the FPSC, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the FPSC.

**SECTION 3 - DESCRIPTION OF SERVICE**

3.1 **Timing of Calls**

3.1.1 **When Billing Charges Begin and End For Phone Calls**

The customer's long distance usage charge is based on the actual usage of the Company's network. Usage begins when the called party picks up the receiver, (i.e. when 2 way communication, often referred to as "conversation time" is possible.). When the called party picks up is determined by hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. When software answer supervision is employed, up to 60 seconds of ringing is allowed before it is billed as usage of the network. A call is terminated when the calling or called party hangs up.

3.1.2 **Billing Increments**

The minimum call duration for billing purposes is 1 minute for a connected call and calls beyond 1 minute are billed in 1 minute increments.

3.1.3 **Per Call Billing Charges**

Billing will be rounded up to the nearest penny for each call.

3.1.4 **Uncompleted Calls**

There shall be no charges for uncompleted calls.
